Section 5 - Switched Access Rates	
Section 6 – Reserved for Future Use	
Section 7 - Contract Arrangements	
Section 8 - Miscellaneous Services	

SECTION 2 - RULES AND REGULATIONS, (Cont'd.)

2.3 Obligations of the Customer, (Cont'd.)

2.3.3 <u>Jurisdictional Reporting</u> (cont'd.)

(cont'd.)

The Customer shall keep records of call detail from which the percentage of interstate and intrastate use can be ascertained and, upon request of the Company, shall make the records available for inspection as reasonably necessary for purposes of verification of the percentages. The Company reserves the right to conduct an audit at any time during the year. The Customer, as its own expense, has the right to retain an independent auditing firm.

2.3.4 <u>Identification and Rating of VoIP-PSTN Traffic</u>

(A) Scope

- 1. VoIP-PSTN Traffic is defined as traffic exchanged between a MetTel end user and the customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section governs the identification of VoIP-PSTN Traffic that is required to be compensated at interstate access rates (unless the parties have agreed otherwise) by the Federal Communications Commission in its Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) ("FCC Order"). Specifically, this section establishes the method of separating such traffic (referred to in this tariff as "Relevant VoIP-PSTN Traffic") from the customer's traditional intrastate access traffic, so that such Relevant VoIP-PSTN Traffic can be billed in accordance with the FCC Order.
- 2. This section will be applied to the billing of switched access charges to a customer that is a local exchange carrier only to the extent that the customer has also implemented billing of interstate access charges for Relevant VoIP-PSTN Traffic in accordance with the FCC Order.

(B) Rating of VoIP-PSTN Traffic

The Relevant VoIP-PSTN Traffic identified in accordance with this tariff section will be billed at rates equal to MetTel's applicable tariffed interstate switched access rates as specified in MetTel's FCC Tariff.

SECTION 4 - SWITCHED ACCESS SERVICE, (Cont'd.)

4.2 Provision and Description of Switched Access Service Arrangements, (Cont'd.)

Manner of Provision 4.2.2

Trunks used for Switched Access Service may be configured for one-way (either originating only or terminating only) or for two-way directionality.

4.2.3 Call Types

The following Switched Access Service call types are available:

- (C) A. Originating Non-8XX FG Access (C)
- Originating 8XX FG Access В.
- Terminating FG Access C.

4.2.4 Originating Non-8XX FG Access

The access code for FG Access switching is a uniform access code of the form 1+ or 011+ or 101XXXX. For 101XXXX dialing a single access code will be the assigned number of all FG Access provided to the Customer by the Company. When the access code is used, FG Access switching also provides for dialing the digit 0 for access to the Customer's operator service, 911 for access to emergency service, and/or the end of dialing digit (#) for cut-through access to the Customer's premises. The Company will provide originating FG access consistent with dialing parity obligations.

SECTION 4 - SWITCHED ACCESS SERVICE, (Cont'd.)

4.2 Provision and Description of Switched Access Service Arrangements, (Cont'd.)

4.2.5 Originating 8XX FG Access

(C)

8XX Data Base Access Service is a service offering utilizing originating Trunk side Switched Access Service. When an 8XX + NXX + XXXX call is originated by an End User, the Company will perform Customer identification based on screening of the full ten-digits of the 8XX number to determine the Customer location to which the call is to be routed.

(C)

4.2.6 <u>Terminating FG Access</u>

FG Access, when used in the terminating direction, may only be used to access end users who are subscribing to the Company's Local Exchange Services. Calls in the terminating direction will not be completed to 950-0XXX or 950-1XXX access codes, local operator assistance (0- and 0+), Directory Assistance, (411 or 555-1212) service codes 611 and 911 and 101XXXX access codes.

4.3 Reports and Testing

- 4.3.1 <u>Design Layout Report</u>: At the request of the Customer, the Company will provide to the Customer the makeup of the facilities and services provided from the Customer's Premises to the first point of switching. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the Customer at no charge.
- 4.3.2 <u>Acceptance Testing</u>: At no additional charge, the Company will, at the Customer's request, cooperatively test, at the time of installation, the following parameters: loss, C-notched noise, C-message noise, 3-tone slope, d.c. continuity and operational signaling.

SECTION 5 - SWITCHED ACCESS RATES, (Cont'd.)

5.2 Rate Categories

- 5.2.1 There are several rate categories which apply to Switched Access Service:
 - Carrier Switched Access Originating Non-8XX

(N) (C)

- Carrier Switched Access Originating 8XX
- Carrier Switched Access Terminating
- Toll-Free 8XX Data Base Access Service

The Company provides Originating Non-8XX switched access service through a single blended rate based on aggregate traffic volumes from the following cost categories:

(C)

Common Line

The Common Line cost category establishes the charges related to the use of Company-provided end user common lines by customers and end users for intrastate access.

Switched Transport

The Switched Transport cost category establishes the charges related to the transmission and tandem switching facilities between the customer designated premises and the end office switch(es) where the customer's traffic is switched to originate or terminate the customer's communications.

End Office Switching

The End Office Switching cost category establishes the charges related to the use of end office switching equipment, the terminations in the end office of end user lines, the terminations of calls at Company Intercept Operators or recordings, the Signaling Transfer Point (STP) costs, and the SS7 signaling function between the end office and the STP.

(C)

For Originating 8XX and Terminating switched access service, MetTel concurs in the rates found in Metropolitan Telecommunications Corporation (MetTel) Tariff FCC #1, Section 3 as they now exist, and as they may be revised, added to or supplemented. MetTel's Tariff FCC #1 may be accessed via the following URL: http://www.mettel.net/tariffs.html

SECTION 5 - SWITCHED ACCESS RATES, (Cont'd.)

5.4 Rates and Charges

5.4.1 Carrier Switched Access – Originating Non-8XX

(C)

Blended Rate – per minute

\$0.023267

5.4.2 Carrier Switched Access – Originating 8XX and Terminating

(C)

(C)

For Originating 8XX and Terminating switched access service, MetTel concurs in the rates found in Metropolitan Telecommunications Corporation (MetTel) Tariff FCC #1, Section 3 as they now exist, and as they may be revised, added to or supplemented. MetTel's Tariff FCC #1 may be accessed via the following URL: http://www.mettel.net/tariffs.html.
