TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are added to the Tariff from time to time. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised sheet 14 cancels the 3rd revised sheet 14.
- C. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:

SECTION 2 - RULES AND REGULATIONS

2.2 Limitations on Service

2.2.1 Service is offered subject to the availability of facilities, equipment, or systems, the Company's ability to fulfill the request for Service and the provisions of this Tariff and the rules of the Commission applying to long distance communications as published in 4 CSR 240-33. Service is not offered where operating conditions do not permit. The Company reserves the right, without incurring liability, to refuse to provide Service, to or from any location where the necessary facilities, equipment, systems, billing agreements, and/or switch software are not available. In case a shortage of facilities exists at any time, either for temporary or protracted periods, the establishment of Switched Services shall take precedence over the establishment of Data Services.

2.2.2 Except for Casual Callers, all Switched Services provided according to this Tariff are intrastate add-on Services available from the Company only if the Customer subscribes to the Company's comparable interstate Service offering or interstate promotional offering unless otherwise indicated in this Tariff. Unless otherwise indicated in this Tariff, intrastate Switched Services are not offered on a stand-alone basis. Unless otherwise stated in this Tariff, the method of provisioning a specific Service is determined by the Company.

2.2.3 A third party call is any call charged to a number other than that of the called or calling party. The Company reserves the right to refuse to process a third party call when acceptance of charges at the third number cannot be confirmed.

2.2.4 Without incurring liability, the Company reserves the right to discontinue Service or to limit the use of Service, when necessitated by conditions beyond the Company's control, or when the Customer or End User is using Service in violation of the law or in violation of the provisions of this Tariff. The Company may regularly review any Customer's toll usage in order to protect itself from fraudulent or excessive usage by high-risk Customers or Customers who are delinquent in their payments. When the Company determines that the usage volume increases the likelihood that a particular Customer will not pay or will be unable to pay for usage, the Company may implement its toll blocking process, including calling card cancellation. Customers will be provided notification of the limit placed upon their toll usage pursuant to the establishment of credit, indebtedness of Service, and toll restrictions

To obtain Service, the Company requires the Customer to provide the Company with whatever authorization the Company deems appropriate. For example, the Company may require the Customer to execute a letter of agency, service agreement, RespOrg agreement, contract, etc. depending on the Service(s) selected by the Customer. Service may be initiated based on written or oral agreement between the Company and the Customer. The Company reserves the right to require an Applicant to sign an application for the Service desired, on a form provided by the Company, as a condition for establishing Service. Applications for Service will be accepted by the Company provided that the Service is available, and the Company has no reason to believe the Customer will not comply with the provisions of this Tariff. The Company will also accept an oral application from a Customer for additions to or changes in existing Service. Upon the Company's acceptance of this authorization, all applicable provisions in the Company's Tariff, as amended from time-to-time, become the agreement for Service between the Company and the Customer. The Company reserves the right, at any time, to require any Customer to present proof of identification to the Company as the Company may then deem acceptable. If the conditions of Service or the basis on which credit was originally established have materially changed, an existing Customer may be required to establish additional credit. The Company reserves the right to examine the credit record and check the references of any Customer at any time. The Company may establish credit limits for new and existing Customers. In the event a Customer's established credit limit is exceeded, or in the event a Customer becomes delinquent in the Customer's payments, the Company may implement its toll blocking process. Pursuant to that process, the Company may place a restriction on or discontinue Customer's use of intrastate long distance services, including calling card use, 1+, 0+, and all 900/976/700/500 calls until the Customer makes payment arrangements satisfactory to the Company. Access to local calling, operator assisted calls, emergency services (9-1-1), calls placed via a toll free number (800, 877, 888 or other area code assignments as appropriate) will not be affected. In the event that toll access is restricted or blocked pursuant to the foregoing, Customers attempting to access restricted services will be automatically routed to either a recorded announcement or a service representative for information regarding restoration of service. The Company reserves the right, at any time, to require any Customer to present proof of identification to the Company as the Company may then deem acceptable.

2.13 Timing of Calls

- 2.13.1 On Station-to-Station calls and on Direct-Dialed calls chargeable time begins when the called station answers and the connection is established between the calling station and the called station, miscellaneous common carrier, mobile radio system, or PBX system. Answer detection is determined based on standard industry answer detection methods, including hardware and software answer detection. However, when Services are directly connected to a Customer-provided communications systems at the Customer's or End User's premises, chargeable time begins when a call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Company's Service so that chargeable time may begin.
- 2.13.2 On Person-to-Person calls, chargeable time begins when connection is established between the calling person and the particular person or station specified or an agreed alternate.

2.14 Rate Periods

Different rates may be applicable to a call at different times of the day and on certain days of the week, as specified in the appropriate rate schedule for that call. All times shown are local time at the calling station in the case of an outbound call and at the called station in case of an inbound toll free call.

2.15 Determining Rate In Effect

For outbound Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the calling station determines the rate in effect. For Toll Free Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the called station determines the rate in effect. If a unit of time is split between two (2) or more rate periods, each rate period applies to the portion of the call that occurred during that rate period rounded to the nearest billing increment. If a call is completed by an operator, the time at the beginning of each initial or additional rate period determines the applicable rate period. When a message spans more than one rate period, total charges for each rate period are calculated and the results for each rate period are totaled to obtain the total message charge. The Company may offer a discount or a reduced rate per minute for directors, officers or employees of the Company or of an affiliated company that subscribe to one of the Company's Service offerings described in Section 3 of this Tariff.
