Payment for Service

The rates specified in the Tariff are generally rates based on usage, billed monthly and generally payable in arrears except as otherwise provided. All customers shall be permitted to have a last date for timely payment changeable for cause in writing. Such a change will become effective when acknowledged by POPP TELCOM. Until acknowledged, no change in date of timely payment is recognized by POPP TELCOM.

Customer payments are considered prompt when received at POPP TELCOM or its agent by the due date on the bill. The due date is thirty (30) days after the bill is rendered. Any customer not paying within thirty (30) days is considered delinquent.

POPP TELCOM may request payment upon issuance of a final bill when service is terminated at the customer's request. For all other bills, payment will not be requested until the due date.

The maximum payment required for restoration of service that existed prior to disconnection shall be the total past-due amount, applicable nonrecurring charges and, if appropriate, an Advance Payment and Deposit as specified elsewhere in this Tariff.

The customer is held responsible for all charges for services furnished at the customer's request and for all toll service furnished. Failure to receive a bill does not exempt the customer from prompt payment of the account. It is the customer's responsibility to contact POPP TELCOM when no bill is received.

Initial Service Periods and Termination of Service

FEB 1 1996

The initial service period for service is one month.

The initial service period for service of any class may be greater than that specified above when facilities are not available and the customer's location or the character or quantity of the service requested is such that, upon termination of the customer's use thereof, the required facilities are not likely to be useful as a part of a properly designed telephone distribution system serving telephone users in or beyond the customer's location. Under these circumstances, POPP TELCOM may use either individual case basis installation charges or contracts requiring basis termination liabilities.

When other utilities who provide POPP TELCOM with facilities impose individual case basis installation charges, activation fees or contracts requiring basic termination liabilities, POPP TELCOM will pass these obligations on to those customers who make use of such facilities. POPP TELCOM will use the same type of instruments of obligation with the customers as the utility providing the facilities imposes on POPP TELCOM.

Service may be terminated prior to the expiration of the initial service period upon payment of all charges due for service which has been furnished plus the initial bill fee and termination charges as specified in this Tariff. If service is continued through the initial service period the period is one month, the charges due are for the balance of the month.

Service which has continued beyond the initial service period may be terminated without charge except for payment of all charges due for service which has been already furnished. Subscriber shall give written notice 30 days in advance of cancelling this service.

MO. PUBLIC SERVICE COMM.

- a. Limitation. The liability of POPP TELCOM for damages to any party arising out of mistakes, omissions, interruptions, delays, errors, or defects in transmission occurring in the course of furnishing service or facilities shall in no event exceed an amount equivalent to the metered rate charged by POPP TELCOM for the defective call or, for nonmetered services, the proportionate charge to the customer for the period of service during which mistake, omission, interruption, delay, error, or defect in transmission occurs.

POPP TELCOM is not liable for damages which occur because of acts of God which include, but are not limited to: tornados, floods, storms, lightning, earthquakes, etc.

POPP TELCOM is not liable for damages which occur because of the unavailability of services of other interexchange carriers, local exchange carriers, or utilities.

- b. Out of Service Conditions. POPP TELCOM shall make all reasonable efforts to prevent out of service conditions. An out of service condition exists when POPP TELCOM facilities, either leased or owned, are either not functioning or are malfunctioning such that the customer can complete no interexchange calls on the POPP TELCOM network or such that the quality of transmission of all calls on the POPP TELCOM network is degraded below the minimum acceptable standard.
- c. Out of Service Adjustment. In the event of an out of service condition which is not due to the negligence or willful act of the customer and which is due to the failure of the POPP TELCOM owned or leased facility, a pro rata adjustment will be made of any fixed monthly or annual charges for the service affected by said out of service conditions as follows:

.01 The out of service period will be considered to begin at the time the customer first notifies POPP TELCOM of the service outage. If, in the judgment of POPP TELCOM, circumstances prevent a customer from notifying POPP TELCOM of an out of service condition, the requirement for notification to POPP TELCOM may be waived, in which case the out of service period will begin with the time at which the out of service condition is first known to POPP TELCOM.
