SECTION 3 - DESCRIPTION OF SERVICES

3.10 Miscellaneous

3.10.1 Account Codes

- (A) Account codes are an optional feature associated with outbound long distance Service that provides the Customer the ability to track usage by requiring the caller enter a string of digits ("digit string"). Account codes enable the Customer to obtain call detail from the Company which is sorted and summarized based on digits entered by the caller. See Section 5.9 for the account code feature MRC.
- (B) Account codes are available to Business Customers that (1) subscribe to one of the Company's outbound long distance service offerings described in Section 3.7 of this Tariff for the provision of interstate, intrastate InterLATA, and intrastate IntraLATA Service; (2) request the optional feature; and (3) are billed via a Company direct bill or a shared LEC or CLEC bill. Account codes are not available with SBC Long Distance Virtual Private Network Service, TFS or calling card Service. To subscribe to Account Codes for intrastate calling, the Customer must also subscribe to one of the Company's outbound Service offerings for the provision of interstate calling.
- (C) The length of the string digits available to a Customer is limited and the number of digits is based on whether the call originates at an On-Net or Off-Net location. The Company controls the length of the string digits. The caller will be allowed three (3) attempts to enter a valid account code before the call is terminated.
