1 (EXHIBIT NOS. 1 THROUGH 11 WERE MARKED FOR
2 IDENTIFICATION BY THE COURT REPORTER.)

3 RONALD L. BIBLE, being duly sworn, testified as
4 follows:

5 DIRECT EXAMINATION BY MR. CYNKAR:

6 Q. This is the deposition of Ronald L. Bible in
7 Case No. EC-2002-1.

8 Good morning again, Mr. Bible.

9 A. Good morning.

10 Q. I know you've had experience in depositions
11 now and so you know basically the ground rules.

12 The key thing is that we both articulate our
13 responses so the stenographer can take them down, and
14 not respond by nods of the head and so forth.

15 In addition, if there is any question that
16 you don't understand, feel free, as I know you will,
17 to say so and explain the basis of your
18 misunderstanding. I'll try to clear it up.

19 And with that, are you on any medication or
20 have any medical problem that would prevent you from
21 understanding the questions today and answering
22 truthfully?

23 A. No.

24 Q. Okay. Now, you have now filed testimony in
25 the March filing of the Staff which is Exhibit 2 for

1 purposes of this deposition, I believe?

2 A. Yes.

3 Q. Oh, no. That's your original one. I'm
4 sorry. That's what we're calling the original one.

5 You can keep that since we will be using it.

6 A. I filed this one too.

7 MR. CYNKAR: Yes. So we'll just have all of
8 these in front of you to make it easy.

9 Exhibit 3 is the current testimony.
10 Exhibit 4 is your red-lined pages with the corrections
11 that you've identified that have been made in your
12 corrected pages, which is Exhibit 5.

13 And just so you don't forget, for purposes
14 of the record, Mr. Williams brought to our attention
15 that there were a couple other corrections to be made,
16 and if you want to put those on the record right now
17 and we'll just make sure that we get those, which I
18 believe it was page 16 of Exhibit 3.

19 MR. WILLIAMS: On line 15 of page 16 of
20 Exhibit 3 the first occurrence of 14.60 should also be
21 changed to 14.30. And while the -- on the red-lined
22 version which is of the correction sheets, which is --

23 MR. CYNKAR: The red-line is Exhibit 4.

24 THE WITNESS: The red-lined version was
25 changed.

1 MR. WILLIAMS: Exhibit 4 is correct while
2 the corrected page is incorrect on Schedule 15.

3 The date under the 30-year U.S. Treasury
4 Bond should be January 14th of 2002, not January 6th.

5 MR. CYNKAR: Okay. Is there anything else?

6 MR. WILLIAMS: Not that I'm aware of.

7 MR. CYNKAR: Okay.

8 BY MR. CYNKAR:

9 Q. Mr. Bible, if you could identify for the
10 record the changes that you made between your
11 testimony filed in July of 2001 and March of 2002?

12 A. What do you mean by the changes I made?
13 It's two separate filings.

14 Q. Right. And there's differences -- it's
15 filings in the same case, and your testimony from July
16 is not the same as your testimony in March. Correct?
17 There's differences between --

18 A. No. The testimony is the same. The inputs
19 are different.

20 Q. Okay. So what do you think are the changes
21 between the two?

22 A. The inputs. I mean interest rates, growth
23 rates, stock prices. I mean, pretty much the inputs
24 that go into the models.

25 Q. Okay. So that is from your perspective the

1 most significant things that are different there?

2 A. Well, the inputs, yes, those are the most
3 significant changes.

4 Q. Which are numbers?

5 A. For the most part, yeah.

6 Q. Are there nonnumerical changes to the
7 testimony in March?

8 A. I think some of the economic philosophy,
9 some of the prospects that come out of Value Line,
10 Standard & Poor's, their interpretation of where the
11 stock market is at.

12 Quantitative is a big part of it. There is
13 qualitative information that has changed too, so --

14 Q. And those qualitative changes come from the
15 various kinds of analysts and those sorts of sources
16 that you were just describing?

17 A. From analysts, from department --
18 governmental departments, Bureau of Labor Statistics,
19 all of the references that I cited in the testimony.

20 Q. And those come from those sources and not
21 from any sort of independent analysis or study you've
22 done between July and March?

23 A. Not -- no, not in these filings.

24 Q. Okay. Now, could you describe for us --
25 your cost of equity between July and March has

1 declined. What is the reason for that?

2 A. Well, my cost of equity didn't decline. The
3 cost of equity for the Company declined.

4 Q. Okay. What is the reason for your estimate
5 of the cost of equity for the Company declining?

6 A. Well, the inputs changed.

7 Q. Is there any particular input that figures
8 more prominently than others in producing that change?

9 A. No, not really. I mean, the stock prices
10 changed. The dividend basically stayed the same. I
11 would say I was pretty much right on as far as the
12 forward-looking dividend for the Company. It didn't
13 change in about a year.

14 Q. What role did interest rates play in the
15 change of your estimate of cost of equity?

16 A. Well, the interest rates that I use and the
17 models that I use are a crosscheck. The DCF model
18 doesn't directly have an input for interest rates.

19 Q. So does it not play a role then in your
20 estimate of cost of equity?

21 A. Not directly.

22 Q. How does it indirectly?

23 A. Again, it goes into the models that I use as
24 a crosscheck on the DCF model.

25 Q. So how would the interest rates in the -- by

1 "the other models," you mean CAPM and risk premium
2 analysis?

3 A. Yep.

4 Q. In your deposition testimony last time
5 around I believe you said that those crosschecks would
6 not cause you to change or reconsider your DCF
7 estimate unless they were double your DCF estimate.

8 Is that pretty much how, then, interest
9 rates might affect your DCF estimate?

10 A. No. I said that -- what I actually said in
11 the previous deposition was, unless they doubled, it
12 wouldn't cause me to go back and rethink or even look
13 at the DCF. I mean, even if the interest rates
14 doubled, I'm not going to automatically go back and
15 change my DCF model just because of that.

16 It might cause me to pause and say, Well,
17 maybe I need to look at it, but, offhand, it's not
18 going to cause me to just automatically go back and
19 change it.

20 Q. In your experience, has a change in interest
21 rates ever caused you to change your DCF model?

22 A. No.

23 Q. What is the relationship of interest rates
24 to a company's cost of funds?

25 A. In general, if interest rates were to go up,

1 and I'm talking longer term rates, in particular, a
2 company's cost of debt capital could go up. It
3 depends on the company.

4 That causing their debt capital costs to go
5 up may cause equity investors to look at that company
6 as potentially being more risky because they have more
7 fixed expenses, and that may cause them to require a
8 higher return on equity. Again, it depends on the
9 company.

10 Q. Does the interest rate have any direct
11 effect on the cost of equity for a company?

12 A. To the extent that if a company went out and
13 borrowed money and the interest rates were higher,
14 then, yes, it would.

15 Q. How is that captured in your analysis, that
16 phenomenon you just described?

17 A. In my analysis for the whole thing?

18 Q. Uh-huh.

19 A. Well, I mean, a company provides me with the
20 embedded cost of debt, so if their rates went higher,
21 they borrowed money, it would be in their embedded
22 cost of debt that they provided me, so that would be
23 captured in the model.

24 Q. How dependent are interest rates on the
25 actions of the Federal Reserve?

1 A. Well, the Federal Reserve controls the
2 discount rate and the federal funds rate. The markets
3 really greatly influence the borrowing costs and
4 interest rates in general, so...

5 Q. On page 9 of your testimony you discuss --

6 A. Which testimony?

7 Q. I'm sorry. This is Exhibit 3. It's your
8 March testimony.

9 You make a reference to the fact -- on the
10 paragraph on lines 14 to 19, discussing the Federal
11 Reserve lowering interest rates to stimulate a slowing
12 economy. And that really is the basis of my question.

13 Does the -- how significant is the Federal
14 Reserve's actions in terms of the setting of interest
15 rates in your view?

16 A. I don't know what you mean by "significant."
17 Define "significant" for me.

18 Q. Well, could you explain what you mean by the
19 sentence on lines 15 to 17 when you say, In August
20 1999, the Federal Reserve began raising the discount
21 rate. Increases continued until January 2001 when the
22 Federal Reserve began lowering interest rates to help
23 stimulate a slowing economy."

24 What did you mean by that?

25 A. Well, just what it says. The Fed from time

1 to time will raise or lower rates depending on what
2 they see as the economic prospects in order to
3 stimulate an economy, or if they think the economy is
4 overheated, they may want to try to cool it off a
5 little bit.

6 Q. And the raising or lowering of rates that
7 the Fed does, what relationship does that have to
8 interest rates?

9 A. Well, it will cause short-term borrowing
10 costs to go up or down, depending on which direction
11 they move it.

12 Q. So the Fed's actions, in your view, then, do
13 have a direct impact on interest rates?

14 A. On these interest rates, yes.

15 Q. By "these interest rates," you're referring
16 to what interest rates?

17 A. The Fed-- these right here, the discount
18 rate.

19 Q. And the Fed's discount rate, does it have
20 any impact on any other interest rates?

21 A. Not directly, no.

22 Q. Does it have any impact at all?

23 A. Not directly, no.

24 Q. Well, directly or indirectly?

25 A. It could indirectly, yes.

1 Q. How?

2 A. Well, I mean, if you look in terms of a
3 yield curve of maturities between short- and
4 long-term, typically -- in the example if you
5 increased short-term rates, there have been times
6 where short-term rates have been higher than long-term
7 rates, and that might cause people to prefer long-term
8 rates. If the demand goes up for long-term rates,
9 then that may suppress the price or the interest rate
10 that people pay and vice versa. It works itself out
11 in the marketplace.

12 Q. If you turn to page 16 of Exhibit 3, again,
13 which is your current testimony, the paragraph that
14 covers lines 13 through 20, which we talked about
15 earlier which had the corrections of the 14.6 to the
16 14.3 number, why did you put that paragraph in your
17 testimony?

18 A. Which lines again?

19 Q. Lines 13 through 20.

20 A. I was showing a range of what Ameren had
21 earned as far as ROE and compared that with what had
22 been earned by other electric utilities as listed in
23 the Value Line report dated January 4, 2002.

24 Q. Did you take this into account in estimating
25 your proposed rate of return for Ameren?

1 A. When you say take it into account, what do
2 you mean?

3 Q. Well, it's here in your testimony, and you
4 just described what it was showing, but your whole
5 testimony is designed to propose a particular range of
6 rates of return for Ameren.

7 And so how, if in any way, did you take the
8 information in this paragraph into account in doing
9 your analysis?

10 A. When you say do my analysis, you mean when I
11 calculated my DCF model?

12 Q. Yes.

13 A. It's not included. That's not an input into
14 my DCF model.

15 Q. Okay. Is there -- so this -- the
16 information in this paragraph doesn't affect the
17 numbers that you come out with at all?

18 A. Not directly, no.

19 Q. Does it in an indirect way?

20 A. It is something that I can look at, similar
21 to the other models, and make a determination as far
22 as where Ameren lies compared to other electric
23 utilities as a comparison, a means of comparison.

24 Q. Once you've made that determination, does
25 that ever affect the range that you propose in --

1 A. No. No. It doesn't factor into the model
2 or the outputs that I use.

3 Q. How should the Commission take this
4 paragraph into account in its rate-making proceedings?

5 A. I don't know how the Commission should take
6 it.

7 Q. If Ameren's ROE was significantly below the
8 average for the central electric utility industry,
9 would that cause you to affect your judgment about the
10 range for an estimated return for Ameren?

11 A. If their actual ROE was below that?

12 Q. Yes.

13 A. No.

14 Q. Is the yield on 10-year Treasury Notes
15 normally below the yield of 30-year Treasury Bonds?

16 A. In a normal yield curve, it would be, yes.

17 Q. And why is that?

18 A. It's a shorter maturity, has less risk
19 relative to that maturity and the time value of money.
20 That would cause it to pay less of an interest rate.

21 Q. Is there more risk in utility bonds than in
22 the 30-year Treasury Bond?

23 A. I have never done an analysis to determine
24 that and I've never seen an analysis done to determine
25 that.

1 Q. So you don't have an opinion on that?

2 A. No.

3 Q. Is the Federal Reserve an authoritative
4 source for interest rate data for 30-year Treasury
5 Bonds?

6 A. Yes, I would say it is.

7 Q. If you could turn to -- again, in your
8 Exhibit 3, which is your current testimony, turn to
9 page 25. On lines 14 to 15 -- and, again, this date
10 has been changed to January 14th in the sentence,
11 but the sentence reads, "The appropriate rate was
12 determined to be 5.38 percent for the period
13 January 14, 2002, as published on
14 www.marketwatch.com."

15 What is www.marketwatch.com?

16 A. It's a financial news web site.

17 Q. And who produces it?

18 A. I -- I'm not sure. I think it's CNN.

19 Q. And why did you use it as a source for this
20 figure?

21 A. It's an easy source to find the information.

22 Q. And why didn't you use the Federal Reserve
23 as a source here?

24 A. Well, the Federal Reserve doesn't publish
25 daily rates.

1 Q. And the 5.38 is a day rate?

2 A. Right. That's what it --

3 Q. I see.

4 A. -- as of that day had closed at.

5 Q. Okay. Now, we have been talking about the
6 correction of the 14.60 number to the 14.30 number.
7 It's in different places in here as we've talked
8 about.

9 Now, where does the 14.3 number come from?
10 What's the source of that?

11 A. It comes from the Company's annual report.

12 Q. And how did your awareness of a need for a
13 correction between 14.6 and 14.3, how did that come
14 about?

15 A. How did I become aware that --

16 Q. Right. Your testimony originally had 14.6
17 and you've changed it to 14.3. How did that come
18 about that you felt a need to change it?

19 A. The Company sent me a data request asking me
20 what the source of it was. And when I looked in the
21 source, I realized I had made a mistake and corrected
22 it.

23 Q. Did you personally collect the data that you
24 set out in your schedules here?

25 A. What do you mean by did I personally collect

1 that?

2 Q. From the sources that you set out here. I
3 mean, someone else didn't put these schedules together
4 for you?

5 A. No, no. I put the schedules together.

6 Q. Okay. And after it became clear that the --
7 because of the various proceedings in the rate-making
8 that the Staff was going to be filing new testimony,
9 did -- was there any meetings of the Staff witnesses
10 concerning the new testimony that was to be filed?

11 A. The only meeting that I recall was there was
12 an information meeting just letting everybody know
13 that they would be required to file new testimony.
14 That's the only one I recall.

15 Q. Before you prepared your new testimony, did
16 you speak with any other Staff member about it?

17 A. About the testimony that I prepared in
18 March?

19 Q. No -- yes.

20 A. Before I prepared it? No.

21 Q. Yes.

22 A. No.

23 Q. After you prepared it, did anybody review it
24 before you submitted it?

25 A. Yes.

1 Q. Who?

2 A. Nathan Williams, Greg Meyer. Typically, in
3 my department everybody reviews everybody else's stuff
4 to try to catch errors and things like that. So
5 Roberta McKiddy and David Murray in my department
6 reviewed it.

7 Q. Mr. Dottheim, did he review it?

8 A. I'm not aware. Mr. Williams might be aware
9 whether or not Mr. Dottheim reviewed it. I don't
10 recall giving Mr. Dottheim a copy of it. If somebody
11 else did, it's possible he did review it.

12 Q. Mr. Schallenberg, did he review it?

13 A. Not that I know of. I didn't give him a
14 copy of it.

15 Q. Besides grammatical types of editing things,
16 did anyone suggest any changes to your draft
17 testimony?

18 A. I recall the project coordinator asked me --

19 Q. Which is Greg Meyer?

20 A. Greg Meyer.

21 -- asked me to stop my DCF model growth at
22 the update period.

23 Q. The update period is what period?

24 A. Well, September.

25 Q. And before that had you gone farther than

1 that?

2 A. Yes. I had gone into, I think, February of
3 this year.

4 Q. And why did he suggest that?

5 A. I -- all I recall is he was concerned about
6 the Company objecting to any information beyond the
7 update period being used, so --

8 Q. Do you know how much your rate of return
9 proposal would lower UE's current rate of return?

10 A. No. I've never done that comparison.

11 Q. Do you know how your rate of return would
12 ultimately affect UE's revenues?

13 A. No. No, I don't. Not a dollar figure, I
14 don't.

15 Q. Do you have an opinion --

16 A. I don't do my calculations trying to come up
17 with a specific number as far as revenue or rate of
18 return, so...

19 Q. Do you have an opinion about whether UE is
20 well managed?

21 A. No, I don't.

22 Q. Do you have an opinion about whether UE is
23 poorly managed?

24 A. No, I don't.

25 Q. Have you made any determination or judgment

1 about whether UE is earning excessively?

2 A. No, I haven't.

3 Q. Do you know how much each percentage point
4 in your rate of return translates into dollars of
5 rates?

6 A. No, I don't.

7 Q. If we return to Exhibit 3, again, and to
8 schedule 17, now, am I correct that the data on which
9 this schedule is based is data for electric utility
10 companies in 2000?

11 A. No, I don't -- I don't think you can say
12 it's for 2000. It's whenever the database was
13 updated.

14 Q. It's not later than 2000 though?

15 A. It -- you mean earlier or --

16 Q. No. Meaning, like, 2001.

17 A. It could be. I don't --

18 Q. Well, if you -- if I understand, your
19 sources are Value Line of December 7th, 2001,
20 January 4, 2002, for columns 1, 2, 4 and 5. And at
21 least my understanding of Value Line is that there
22 wouldn't be 2001 data necessarily complete by
23 January 4 of 2002?

24 A. What page are you looking at?

25 Q. Schedule 17-3, is --

1 A. Oh, 17--

2 Q. Yeah. Schedule 17 goes over three pages, I
3 think, and your sources are at the bottom of the
4 schedule, which is page 17-3. And the line I just
5 read there was the first source, which is Value Line,
6 and that's why I asked the question.

7 A. Well, January 4, 2002, certainly 2001 could
8 be included in January 4, 2002, so...

9 Q. In your experience, have you ever seen Value
10 Line have -- have data from the prior year complete by
11 January 4 of the following year?

12 A. It's possible not for the whole year but
13 certainly for part of the year.

14 Q. Okay.

15 A. Are you proposing that they wouldn't have
16 any 2001 information available as of January 4, 2002?

17 Q. I'm asking you what was the scope --

18 A. Yes, I think it's possible, very likely,
19 that as of January 4, 2002, they could have some 2001
20 information.

21 Q. Do you know whether the data on which this
22 schedule is based includes 2001 data?

23 A. I don't recall, no.

24 Q. In your July testimony, I'm not going to --
25 we're done with that schedule.

1 In your July testimony, you defined the
2 universe of potentially comparable companies as
3 those having a total capital in the range of \$5 to
4 \$6 billion. Now, as I understand it, in your March
5 testimony you've expanded that range to \$4 to
6 \$8 billion.

7 Why did you make the change?

8 A. Well, things change. A company's total
9 capitalization will change, and so I broadened the
10 range.

11 I can tell you specifically when I input the
12 parameters into the filter for Value Line, no
13 companies fell out at 5 to 6 billion. The annual
14 report for Ameren indicated the total capitalization
15 of something a little bit over 6 billion. So what I
16 did was I broadened -- I lowered and raised the two
17 end points on the range until I had some companies
18 fall out from the filter in Value Line.

19 Q. And if -- Ameren, as you're saying, had
20 total capital of around 6 billion?

21 A. According to the annual report, yes.

22 Q. Okay. So then the range that you're using
23 now is sort of plus or minus 2 billion from that
24 point?

25 A. Well, that's the way it comes out, yes.

1 That's not the way I set it up.

2 Q. And, I'm sorry. How did you set it up then?
3 What were you looking for in terms of setting a range?
4 What was your standard?

5 A. I wasn't looking for anything other than
6 companies to fall out of the filter. The way the
7 filter works is you put in the parameters, and then it
8 will go through the database and display the names.
9 Until I got to 4 to 8 billion, it didn't display any
10 names.

11 Q. Where were you coming from?

12 A. Five to 6.

13 Q. You are going up from that?

14 A. Up on one end and down on the other.

15 Q. Right. So you were expanding the range?

16 A. Right.

17 Q. And why did you stop there? Why didn't you
18 expand it further?

19 A. I didn't need it. It wasn't necessary. I
20 had some names fall out that met the criteria, so...

21 Q. How many names fell out that met the
22 criteria, the number you have here?

23 A. I don't recall exactly. I can count them.
24 I count eleven --

25 Q. Okay.

1 A. -- in these schedules on my March filing. I
2 may have miscounted, but that's the way it looks like
3 to me.

4 Q. You're referring to schedule 17?

5 A. Yes.

6 Q. And the eleven, where are you counting those
7 from? Column 7?

8 A. Column 4.

9 Q. Column 4.

10 Now, the -- to fall out, what are you
11 counting when you say you're counting eleven? Does
12 the word "yes" appear?

13 A. Yes.

14 Q. Okay. So there is one, two, three, four --
15 there's four yeses there. Right?

16 A. Well, on the first page -- there's three
17 pages of it. As you pointed out, it goes to 17-3.

18 Q. Right. But there's no subsequent -- oh, I'm
19 sorry. There's a couple. Okay. I see.

20 I count eight, but that doesn't -- I'm not
21 sure that makes that much of a difference.

22 But, anyway, in terms of the number of
23 companies that fell out, did you have any
24 predetermined number in mind that you thought was
25 appropriate?

1 A. No.

2 Q. When you're doing this kind of analysis in
3 cases, does that number change? I mean, does it --
4 how do you know when you're comfortable with a number
5 that falls out for purposes of identifying
6 comparables?

7 A. Well, considering that this is comparable
8 companies and it is not used directly to determine the
9 return on equity or rate of return for the Company, I
10 don't have any predetermined number. It's not really
11 that significant. It's not that important.

12 It's merely a crosscheck. It isn't used
13 directly to determine the return on equity or rate of
14 return for the Company, so it's not a critical factor
15 to have any particular number of comparable.

16 Q. So in your view, this crosscheck, as you
17 call it, is that not significant?

18 A. No, it is not. And that's the view of other
19 Commissions, by the way.

20 Q. Which other Commissions?

21 A. I don't recall exactly, but I know I've read
22 some Reports and Orders where Commissions have come --
23 well, actually Oregon in a recent one came out and
24 said that they would not use the other models as
25 directly determining return on equity and rate of

1 return. It's not appropriate. They use the model --
2 specific model that they have determined is
3 appropriate.

4 Q. Is that a recent Oregon decision?

5 A. I don't remember the date. It was probably
6 last year.

7 So it's not just my opinion.

8 Q. Allegheny Energy is one of the comparable
9 companies that you used?

10 A. Yes.

11 Q. Are you aware of any recent changes in
12 Allegheny's line of business?

13 A. When you say "recent," what do you mean?

14 Q. Within the last two years.

15 A. I don't recall specifically any changes in
16 the line of business.

17 Q. Another comparable that you used was Alliant
18 Energy?

19 A. Yes.

20 Q. Do you know what the origin of Alliant
21 Energy is?

22 A. What do you mean by "origin"?

23 Q. Well, has it existed -- did it exist before
24 1998?

25 A. I don't recall. And, again, your line of

1 questioning is insignificant because I don't use this
2 to determine directly the return on equity and rate of
3 return for the Company.

4 Q. With respect to Alliant, these are the Value
5 Line sheets that you provided in response to data
6 requests, and this is Exhibit 6. And I just had a
7 question there. And you also refer to it in
8 Exhibit 3, schedule 19. And in that schedule you set
9 out the three comparables that you're using,
10 Allegheny, Alliant, and Cinergy, and you have data
11 from 2001 and from 1991 there.

12 And if you look at the Value Line sheet,
13 which is Exhibit 6, in this block up in the upper
14 left-hand corner, the last sentence, it says, "Data
15 prior to 1998 are for WPL Holdings only, and are not
16 comparable with Alliant Energy data."

17 Earlier in that block it describes Alliant
18 being formed through a merger of WPL, with IES
19 Industries, and Interstate Power.

20 Is it fair to say, then, for purposes of
21 your crosscheck on your cost of capital that WPL is a
22 company that essentially is comparable to Alliant,
23 which is a comparable you're using?

24 A. I didn't make any comparison between WPL and
25 Alliant.

1 Q. Well, but you're using 1991 data for
2 Alliant, and that by definition is WPL data, according
3 to the source that you have.

4 So from your perspective, is it fair to say
5 that they are comparable companies for purposes of
6 your analysis?

7 A. I'm not making any comparison between these
8 two companies. Based -- well, that's not what this
9 analysis is.

10 Q. In your schedule 19, for example, the first
11 column under "Dividends Per Share" is 1991 data which
12 you identify as being Alliant Energy data. And your
13 source for that that you've given us is Value Line.
14 And Value Line says everything before '98 is for WPL
15 Holdings only, so that's not an Alliant number on your
16 schedule?

17 A. Okay.

18 Q. Okay. So all I'm asking you then is what I
19 thought was not actually a controversial thing, was
20 that in your view WPL is essentially the same thing as
21 Alliant Energy as you're using data for WPL from this
22 sheet?

23 A. Okay.

24 Q. Is that fair to say? I mean, this -- this
25 \$1.80 is not Alliant Energy's \$1.80. It's WPL's \$1.80

1 under dividends per share for 1991.

2 A. Okay.

3 Q. Okay. And so is it fair to say that for
4 purposes of the analysis you're doing on schedule 19,
5 it is your judgment that WPL is the same as Alliant
6 Energy?

7 A. No. Like I said, I'm not making any
8 comparison.

9 Q. Well, then, you've mislabeled the \$1.80
10 here?

11 A. No, I haven't.

12 Q. That's not \$1.80 for Alliant --

13 A. The entity in question, Alliant Energy,
14 okay, the entity in question, the whole entity, in
15 1991 made a buck-eighty.

16 Q. That's not true.

17 A. Yes, it is.

18 Q. What's the source?

19 A. Right here (indicated).

20 Q. They just said it is information for WPL
21 Holdings.

22 A. Then why did they include it on this sheet?

23 The entity in question on this sheet --

24 Mr. Cynkar, basically what happens when companies do
25 their business and they have earnings and

1 capitalization that they borrow, they have options
2 that they can do with that money. They can pay it out
3 in dividends. They can retain it in the company.
4 They can buy other companies. They can merge with
5 them, just like Ameren did.

6 You know, you want to say this isn't
7 comparable. Ameren is in the same situation. So to
8 me that would make them more comparable. Prior to
9 1997 they were Union Electric. Post-1997, they are
10 AmerenUE.

11 But when a company makes those decisions,
12 one of the decisions it can make is whether or not
13 they'll merge with another company. Those are things
14 they do with their capital.

15 So this entity in 1991 made a buck-eighty,
16 and this entity in 2001 made \$2. So this entity grew
17 its earnings from 1.80, however it did that to grow
18 its earnings. Whether it bought other companies and
19 merged with them or invested in other projects, or
20 whatever, it grew those earnings from a buck-eighty to
21 \$2.

22 Q. Would it be fair --

23 A. And that's what I am reflecting here. I'm
24 not comparing WPL with Alliant.

25 Now, that said, it still doesn't make any

1 difference because I don't use this to come up with a
2 return on equity and a rate of return for AmerenUE or
3 any other company.

4 Q. Would it be fair to say, then, in light of
5 what you have just described, that the entity in 1991
6 was called WPL. It then acquired or merged with some
7 other entities and became Alliant by the end of 2001?

8 A. I would say that's fair.

9 Q. I'd like to turn now to your July testimony,
10 which I believe is Exhibit 2, and I'd like to turn to
11 schedule 23.

12 And I'm going to give you three other
13 exhibits. Exhibit 7 is the Value Line for Cinergy
14 dated January 5th, 2001. Exhibit 8 is Constellation's
15 Value Line sheet, dated March 9th, 2001. And
16 Exhibit 9 is Potomac Electric Power's Value Line
17 sheet, date March 9th, 2001.

18 Now, I would like to direct your attention
19 on schedule 23 of Exhibit 2 to column 4.

20 And column 4 is entitled, Projected three-
21 to five-year EPS growth Value Line. And for Cinergy,
22 the number entered there is 5.50 percent. Correct?

23 A. Yes.

24 Q. Now, for column 4 you identify the source as
25 Value Line reports for January 5th and March 9th,

1 2001, and you produced those in response to our data
2 request.

3 And just so I understand how this works,
4 that 5.50 percent figure, am I correct that that is
5 this number on Value Line in this little box in the
6 left where it says "Annual Rates"?

7 A. Yes.

8 Q. And it has earnings and there is 5.50?

9 A. Yes.

10 Q. Great. Now, for Constellation -- I'm just
11 going to -- I just want to make sure I understand how
12 Value Line relates to this chart. I'm just going to
13 take you through these three.

14 For Constellation the number on schedule 23
15 is 13 percent. And, again, when you look at the Value
16 Line, which is Exhibit 8, I guess it is -- is that
17 correct?

18 A. Yes.

19 Q. -- the same place, in the left-hand side of
20 the annual rates over there, you have earnings and you
21 have 13.0 percent, and that's where that number comes
22 from?

23 A. Yes.

24 Q. Okay. And then for Potamic Electric Power,
25 the number on schedule 23 is 7 percent. And, again,

1 looking on the Value Line, which is Exhibit 9, if you
2 look in the same location on Value Line, the annual
3 rates and earnings, it's 7.0 percent, and that's where
4 that number comes from over there --

5 A. Yes.

6 Q. -- correct?

7 Okay. And that's because this -- this
8 number on Value Line is this projected three- to
9 five-year EPS growth calculated by Value Line?

10 A. Yes.

11 Q. Okay. Now, if we could turn to your March
12 testimony, which, again, is Exhibit 3, and your
13 schedule 20.

14 Now, you already have the Value Line for
15 Alliant, which I guess is Exhibit 6. Allegheny's is
16 Exhibit 10. And Cinergy's is Exhibit 11, and here is
17 that.

18 Okay. Now, we start with Alliant -- or
19 Allegheny, I'm sorry, is first in your schedule 20 --
20 you have 9.33 percent in column 4, the same place.
21 But when you look at the Value Line for Allegheny in
22 the same place, the number that is in the
23 corresponding spot as it was in the other Value Line
24 is 14.0 percent.

25 A. Yes.

1 Q. Where does the 9.33 percent number come
2 from?

3 A. You add earnings, dividends, and book value
4 and divide it by three.

5 Q. And why didn't you do that in your earlier
6 testimony?

7 A. Why didn't I calculate it that way?

8 Q. Yes. You just took this number straight
9 from Value Line in your other testimony.

10 A. Right.

11 Q. And you've just described doing something
12 different here. Why did you do it differently?

13 A. Well, I reflected on something I put in the
14 Interrogatories and Admissions the two times you sent
15 us those, and it comes out of Parcells. Parcells
16 talks about when a company earns money, it has the
17 option of paying the money out in dividends or
18 retaining it. If it retains it, it can grow its book
19 value. If it pays it out in dividends, it can grow
20 its dividend.

21 Now, a company, if it keeps growing its
22 dividend indefinitely, potentially not retaining any
23 moneys, then it can't grow the company and can't grow
24 the earnings, so they are interrelated.

25 And this time I decided to look at it from

1 the perspective of averaging those three growths to
2 get a better perspective on what I felt was the
3 potential for earnings per share growth regardless of
4 what the actual earnings per share growth figure was.

5 Q. And what were those three growths that you
6 averaged again?

7 A. Earnings, dividends, and book value.

8 Q. So column 4 is an average of EPS, VVPS, and
9 DPS?

10 A. Correct.

11 Q. That's not labeled that way though?

12 A. Okay. So I didn't label it that way.

13 Q. It does make a difference.

14 That same calculation was made for Alliant
15 Energy and Cinergy?

16 A. Well, I'll correct you. No, it doesn't make
17 any difference, because, as I said before, I do not
18 use these to directly determine return on equity and
19 rate of return for Ameren. So you're -- you're
20 incorrect. It doesn't make that much difference.

21 Q. Then why did you make the change?

22 A. Like I said, I wanted to see what all three
23 average rates would come out to be.

24 Q. What does it matter by your light since this
25 doesn't matter at all?

1 A. It's my preference as far as my analysis.
2 It can matter to me if I want it to matter to me.

3 Q. Is there any -- well --

4 In your view, are we in a recession?

5 A. When you say "we," you mean me and you?

6 Q. Is this country?

7 A. Is this country?

8 I really don't have an opinion on that.

9 Q. In --

10 A. It depends on who you talk to. You can talk
11 to 100 economists, and half of them can say we're in a
12 recession; half of them would say we aren't in a
13 recession. Another bunch of them would say we never
14 were in a recession, even if somebody else says we
15 were, so...

16 Q. Have you done any kind of analysis yourself
17 for the state of the economy in Missouri?

18 A. No, I haven't.

19 Q. So you have no sense whether the economy of
20 Missouri is slowing or growing?

21 A. No, I don't.

22 Q. Do you know whether the population in
23 Missouri is growing?

24 A. No, I haven't looked at that or done any
25 analysis on that. It might be a good idea.

1 Q. Do you know what the unemployment rate in
2 Missouri is?

3 A. No, I don't offhand.

4 Q. Do you know how the price of electricity in
5 St. Louis compares to the price of electricity in
6 other major metropolitan areas in the United States?

7 A. No, I haven't done that analysis.

8 Q. Have you done any analysis of UE's
9 transmission infrastructure needs over the next five
10 years?

11 A. No, I haven't done that analysis.

12 Q. Have you done any analysis of UE's
13 generation capacity needs over the next five years?

14 A. No, I haven't done that analysis either.

15 Q. With respect to Missouri's needs for
16 electricity over the next five years, does it matter
17 whether Ameren builds generation capacity or buys
18 electricity on the wholesale market?

19 A. I don't have an opinion on that.

20 Q. Do you know if UE is one of the lowest cost
21 producers of electricity in the midwest?

22 A. I have read that.

23 Q. Do you agree?

24 A. I have no -- nothing to base that on as far
25 as whether I agree or not. I haven't done an analysis

1 on that.

2 Q. On page 11 of your testimony --

3 A. Which testimony?

4 Q. Good point. Your March testimony, which is
5 Exhibit 3 -- and, actually, your discussion of energy
6 prices begins on page 10, starting on line 21, and
7 goes through line 5.

8 And in the context of discussing trends in
9 energy prices there, you specifically mention gasoline
10 prices and home heating oil costs.

11 Are you with me?

12 A. Yes.

13 Q. Okay. Have you analyzed trends in natural
14 gas prices?

15 A. No, I haven't done that analysis.

16 Q. Have you analyzed trends in wholesale
17 electric power prices?

18 A. No, I have not.

19 Q. Why not?

20 A. Well, I haven't been to the moon either, so
21 it doesn't -- I mean, it doesn't factor in.

22 Q. Well, why did you mention the trends in
23 gasoline prices and home heating oil prices in an
24 electric rate case?

25 A. These are general economic trends.

1 Q. Isn't the trend concerning wholesale
2 electric prices more relevant to a rate-making for an
3 electric utility?

4 A. As far as offering general economic trends,
5 it's no more or less relevant than gasoline prices and
6 home heating oil costs. I mean --

7 Q. Okay. If we refer to your July testimony
8 again, which is Exhibit 2, and on page 14, there's a
9 couple of sentences starting on line 29 going to
10 page 15, line 1, in which you say, "UE, incorporated
11 in Missouri in 1922, supplies electric service in
12 Missouri and Illinois. UE accounts for 72 percent of
13 Ameren's revenues, 75 percent of operating income, and
14 77 percent of total assets. UE mainly engages in
15 selling electricity, 96 percent of UE's operating
16 revenues, in Missouri and a small area of Illinois."

17 In describing the relationship of UE to
18 Ameren there, you identified revenues, operating
19 income, and total assets. Correct?

20 A. Yeah.

21 Q. Now, keep that page open.

22 And in your March testimony, which is,
23 again, Exhibit 3, on the same page, page 14, beginning
24 at line 29 through page 15 and it goes over a little
25 bit into line 2, you now write, "AmerenUE, originally

1 incorporated in Missouri in 1922, supplies electric
2 service in Missouri and Illinois. AmerenUE accounts
3 for 70 percent of Ameren's revenues, 74 percent of
4 cash flow. Ameren mainly engages in selling
5 electricity, 95 percent of AmerenUE's operating
6 revenues in Missouri and in a small area of Illinois."

7 In your current testimony, you have focused
8 on revenues and cash flow. Why did you make the
9 change from operating income and total assets to cash
10 flow?

11 A. I would say it's because the sources cited
12 them that way, the Standard & Poor's rating them
13 direct, because that's where that information comes
14 from.

15 Q. Is it -- would it be fair to say that cash
16 flow is generally considered an important measure of a
17 firm's financial performance?

18 A. I would say it depends on who's looking at
19 it, but it can be an important measure.

20 Q. Okay. Is cash flow an important measure of
21 a firm's ability to invest in new plant and assets?

22 A. It could be.

23 Q. In what circumstances could it be?

24 A. Well, if the company has more cash flow, it
25 has more cash available to invest in whatever,

1 whatever it wants to.

2 Q. When you -- I'm done with that exhibit.

3 A. Okay.

4 Q. When you do the CAPM method, you calculate
5 an average of historic returns on stocks and an
6 average of historic returns on government bonds.
7 Correct?

8 A. That's correct.

9 Q. And the difference between those is the
10 market risk premium?

11 A. I mean, that's not the market risk premium.
12 That's what we use to estimate the market risk
13 premium.

14 Q. Fair enough. Fair enough. Now, as I
15 understand it, there's two ways of calculating average
16 historic returns. One way is an arithmetic, or simple
17 average, and one is a geometric, or compound average;
18 is that correct?

19 A. Well, that's two ways. I don't know if
20 that's the only two ways.

21 Q. Do you know of any other?

22 A. Well, instead of using averages, you could
23 use medians. I mean, I'm sure there are other ways to
24 calculate averages other than simple arithmetic and
25 geometric, but --

1 Q. Do you know if experts in this field use any
2 of those other ways?

3 A. I don't recall off the top of my head any
4 specific instances.

5 Q. Do you know if there's any consensus of
6 opinion of how to calculate those averages for the
7 CAPM method?

8 A. Well, I don't think it would apply
9 specifically to the CAPM method. I mean, there are a
10 couple of general ways, and, as I said, I'm sure
11 others, the arithmetic and geometric.

12 Q. Or the simple and compound?

13 A. Right.

14 Q. And do you know whether there is a consensus
15 among experts in your field to prefer one to the other
16 of those?

17 A. I -- I have never done -- seen any research
18 that's been done that has polled experts to ask them
19 what they prefer, whether they prefer arithmetic or
20 compound.

21 Q. I have a question about the errata sheet
22 that you submitted with respect to your other -- I
23 wasn't going to put it in as an exhibit, but do you
24 have a copy? This is the errata sheet.

25 The -- if you want to just refer to mine,

1 you certainly can.

2 You refer to page 150 of your deposition,
3 which is Exhibit 1. Have you got that?

4 Okay. The point at which -- I can just read
5 this into the record for one second. Thank you.

6 You identify at page 1, line 1, that you
7 want to add a sentence, "I did not want to because it
8 wasn't necessary for my analysis."

9 A. That's correct.

10 Q. And that -- that discussion there actually
11 begins on page 149 on line 20. And for purposes of
12 the record, it begins with a question for me in which
13 I say, "Okay. Now, you didn't do a risk premium
14 analysis on your comparable companies?"

15 Answer: "That's correct."

16 Question: "Why not?"

17 Answer: "Because I didn't want to."

18 Question: "And why didn't you want to?"

19 Answer: "I just didn't want to." And you
20 would say, "I did not want to because it wasn't
21 necessary for my analysis."

22 Why wasn't it necessary for your analysis?

23 A. Why wasn't it necessary for me to do a risk
24 premium on the comparable companies?

25 Q. Yes, sir.

1 A. Just -- I mean, it just isn't necessary for
2 me to do it. There's nothing -- there's no rules that
3 require me to do a risk premium on comparable
4 companies as part of my analysis.

5 Q. So it's basically your judgment?

6 A. Yes.

7 Q. Are there any standard treatises which
8 informed your judgment on that?

9 A. As far as whether or not I should do a risk
10 premium analysis on comparable companies for my
11 analysis?

12 Q. Right.

13 A. No. There is no treatises that address
14 whether or not I should do a risk premium analysis on
15 comparable companies for my analysis.

16 Q. So how would you say that someone should
17 evaluate your judgment. If the question is, Is Ron
18 Bible right or wrong in making that judgment, how
19 would a neutral third party --

20 A. That's a good question.

21 I think in a broader context of whether or
22 not my recommendations are reasonable, in a broader
23 context of not just return on equity but rate of
24 return as far as what my recommendation is because
25 that's what goes against revenue, and I think in a

1 broader context of where my recommendation falls in
2 comparison to weighted returns on equity and rates of
3 returns that other Commissions are authorizing.
4 That's how I think my judgment should be evaluated.

5 Q. Okay. Good answer.

6 If we turn to your March testimony, which is
7 Exhibit 3 again, and if we turn to page 24, and
8 particularly lines 14 to 15 which we talked about a
9 little earlier -- and, again, that's one of those
10 where the date has been corrected --

11 A. That's correct.

12 Q. -- so that the sentence reads, "The average
13 yield for 30-year Treasury Bonds on January 14, 2002
14 was 5.38 percent."

15 Now, as we talked about earlier that is
16 the Treasury Bond yield for that particular day,
17 January 14th, 2002. Correct?

18 A. As of the close of that day.

19 Q. Right. How is that an average yield?

20 A. Well, I would say that whatever Treasury
21 Bonds were quoted as of the end of the day, the
22 average for those would be 5.38.

23 Q. So it's sort of like if you would say a
24 stock -- the stock price for a particular stock on a
25 particular day is really the average of the prices

1 that the stock was getting during the course of the
2 day? Is that what you mean?

3 A. No, no. See, what you're -- the comparison
4 you're making there is the stock price of a company,
5 so it's the stock.

6 Treasury Bonds, there are more than one
7 Treasury Bond.

8 Q. But these are 30-year -- is there more than
9 one 30-year Treasury Bond?

10 A. Well, yes, there are. I mean, if there
11 was only one, then I'm sure the price would be
12 astronomical because of the demand for it.

13 Q. I see what you're saying.

14 A. So these are -- there are numerous bonds
15 that people buy that are 30-year maturities from the
16 Treasury.

17 Q. And on January 14th, their average yield was
18 5.38 percent?

19 A. It closed at 5.38, yes.

20 Q. Okay. Now, if you turn the page, again, it
21 happens to be lines 14 to 15, and it was, again, a
22 line we talked about before, which says, "The
23 appropriate rate was determined to be 5.38 percent for
24 the period January 14th, 2002 as published on
25 www.marketwatch.com."

1 Again, here, by "period," you mean a
2 particular day --

3 A. Yes.

4 Q. -- January 14th?

5 A. At the closing.

6 Q. Right. Now, why did you choose
7 January 14th?

8 A. It was probably at the point where I got in
9 my testimony and doing this analysis. It was probably
10 that day, and so at the end of the day, I looked it up
11 and put it in my testimony that day.

12 Q. Now, this is outside the test period.
13 Correct?

14 A. Yes.

15 Q. And you earlier were saying that you pulled
16 back your DCF analysis to end in September when you
17 had gone into February.

18 Why didn't you feel it was appropriate to
19 pick a date for this number --

20 A. Well, once again, as I've said a number of
21 times before, I did not use this to directly determine
22 the return on equity and rate of return for AmerenUE.
23 And until you can understand that, I think you're
24 going to have a lot of questions and confusion over
25 why I did a lot of this stuff.

1 Q. To issue equity, is it true that a company
2 incurs flotation costs?

3 A. It's been my experience that companies can
4 typically price an issue at a discount to the
5 underwriter, and they incur no direct flotation cost
6 because of that. Now, they may have costs with
7 regards to legal fees, printing, and things such as
8 that, registration fees. So if those are included in
9 flotation costs, then there may be.

10 Q. Do you know whether Ameren has recently
11 issued any common stock?

12 A. Not that I'm aware of. I know they issued a
13 security that's convertible. That's all I'm aware of.

14 Q. Under what circumstances should a utility
15 recover flotation costs?

16 A. It's the position of this Commission that a
17 company, if they issue during the update or test
18 period, issue common stock, that if they can show
19 there are flotation costs, they can recover those on a
20 dollar-for-dollar basis.

21 Q. If we refer to your March testimony again,
22 and on page 2, on line 20, you estimate UE's return
23 on common equity to be in a range of 8.91 percent to
24 9.91 percent with a midpoint of 9.41 percent --

25 A. Yes.

1 Q. -- which as you explained in answers to, I
2 believe, our data requests, that range is essentially
3 plus or minus .5 percent around the midpoint; is that
4 correct?

5 A. Yes.

6 Q. Now, that plus or minus .5 percent range,
7 why did you choose that?

8 A. Didn't I answer that in the last deposition?

9 Q. I don't think so.

10 A. You don't think so?

11 Q. You're free to check, but I honestly don't
12 think I asked that question.

13 A. It seems like I did.

14 Q. Well, even if you did, what's the answer?

15 A. Would you repeat the question?

16 Q. Yes. Why did you choose the range of plus
17 or minus .5 percent around the midpoint in determining
18 your range for AmerenUE's return on common equity?

19 A. In my judgment, 50 basis points is an
20 adequate number to use around a midpoint for an
21 estimation such as this to develop a range.

22 Q. To advert to our earlier discussion about
23 doing a risk premium analysis on comparables, is there
24 any other basis for your judgment, or is that your
25 personal judgment which should be evaluated in the way

1 you described earlier?

2 A. You mean is there any treatise that deals
3 with my judgment as far as my analysis and using
4 50 basis points around the midpoint?

5 Q. Well, is there anything other than your own
6 thinking that you refer to, whether it's a treatise or
7 any other scholar or a policy of the staff to
8 determine that plus or minus .5 percent is a
9 reasonable range?

10 A. No, there is no specific reference. From my
11 experience and my judgment, that's an adequate number
12 to use around a midpoint to develop a range.

13 MR. CYNKAR: Why don't we take a five-minute
14 break?

15 MR. CYNKAR: Sounds good to me.

16 (A RECESS WAS TAKEN.)

17 MR. CYNKAR: Back on the record.

18 BY MR. CYNKAR:

19 Q. We were just talking about that plus or
20 minus .5 percent range around your midpoint for your
21 return of equity estimate, and you said that it was
22 your judgment that that was an appropriate range.

23 How did you form your judgment with respect
24 to that?

25 A. I'm not sure I understand what you're

1 asking.

2 Q. Well, what did you look to to shape your
3 judgment that that was a reasonable range, range of
4 different growth rates that those calculations were
5 giving you, any sense of that?

6 A. No. Just my experience in doing this for
7 close to 30 years, this kind of work, that 50 basis
8 points is an adequate amount to use around the
9 midpoint to develop a range for analysis.

10 Q. So the results from any of your other -- as
11 you've made very clear, the results from your other
12 methods didn't inform that the historical growth rates
13 or the projected growth rates, those ranges didn't
14 shape your judgment at all about this?

15 A. No. Like I said, the CAPM, the risk
16 premium, the comparable company analysis, those don't
17 factor directly into the calculations that I do for
18 return on equity and rate of return for AmerenUE.

19 Q. Your DCF midpoint, which, again, is on
20 page 2 of your testimony, line 20, is 9.--

21 A. Which testimony again?

22 Q. This is again your March testimony.

23 A. Page 2?

24 Q. Page 2, line 20.

25 -- is 9.41 percent. And that represents

1 | your estimate of the Company's cost of equity. Right?

2 | A. That's correct.

3 Q. Okay. So it's not their actual cost of
4 equity?

5 A. No.

6 MR. CYNKAR: We're done.

7 MR. MOLteni: No questions.

8 (PRESENTMENT WAIVED; SIGNATURE REQUESTED.)

3 RONALD L. BIBLE, having been sworn, testified as follows:

4 DIRECT EXAMINATION BY MR. CYNKAR:

5 Q. Good morning, Mr. Bible. This is your
6 deposition in Case No. EC-2002-1. My name is Bob Cynkar,
7 as I said before, representing AmerenUE.

8 I'm here with several other colleagues.

9 To my right is Mr. Gordon Todd from our firm,
10 and various other hangers-on who I won't necessarily
11 bother to introduce. We've all met before here.

12 MR. WILLIAMS: Why don't we go ahead and do
13 that.

14 MR. CYNKAR: You want to go ahead and do that?

15 MR. WILLIAMS: Sure.

16 MR. CYNKAR: All right. Well, I'll tell you
17 what, for simplicity sake, why don't we just go around the
18 table and everyone just say your name and affiliation.

19 Johannes, I think you're next.

20 MR. PFEIFENBERGER: My name is Johannes
21 Pfeifenberger. I'm with The Brattle Group in Cambridge,
22 Mass.

23 MR. COOK: Jim Cook, AmerenUE.

24 MR. BIRDSONG: Jerry Birdsong from AmerenUE.

25 MS. KELLY: Suede Kelly from the University

1 of New Mexico School of Law.

2 MR. MEYER: Greg Meyer, Missouri Public Service
3 Commission.

4 MR. MURRAY: Dave Murray, Missouri Public
5 Service Commission.

6 MR. WILLIAMS: Nathan Williams, Missouri Public
7 Service Commission.

8 MR. BIBLE: Ron Bible, Missouri Public Service
9 Commission.

10 BY MR. CYNKAR:

11 Q. Mr. Bible, have you ever been deposed before?

12 A. Yes.

13 Q. And how many times?

14 A. Two other times.

15 Q. All in cases for the Public Service Commission?

16 A. Yes.

17 Q. And what were those cases?

18 Do you remember the names?

19 A. One was a rate case for St. Joe Light & Power.

20 Another was a civil/criminal case involving Southwest Gas,
21 Southern Union and ONEOK.

22 Q. Thank you.

23 Since you have experience in testifying in
24 depositions, the ground rules you probably know, but let
25 me just go over a couple of them.

1 One very practical one is that all of your
2 answers have to be oral since we're taking down the
3 testimony. And so shaking your head and nodding -- normal
4 means of communication outside of a deposition don't work
5 here. So you have to say yes or no to questions.

6 Do you understand that?

7 A. Yes.

8 Q. In addition, it's very important -- and I will
9 try to observe this myself -- that we not cut each other
10 off or try to speak over each other, because the court
11 reporter can only take down one person at a time. So we
12 have to try to hold back and let the other fellow take a
13 breath before we talk.

14 Do you understand that?

15 A. Yes.

16 Q. Okay. During the course of the deposition,
17 your counsel has the right to object to any question that
18 I may pose to you, and he certainly has the right to do
19 that.

20 But in the context of a deposition where
21 there is no one to rule on those depositions -- those
22 objections -- excuse me -- you have to answer my question
23 after he lodges his objection unless he explicitly
24 instructs you not to answer the question because of
25 grounds of privilege.

1 Do you understand that?

2 A. Yes.

3 Q. Okay. We've scheduled this deposition to go
4 for most of today. How long it will actually go during
5 the day I can't anticipate, but this is not designed to be
6 any kind of endurance contest. And we'll try to take
7 regular breaks.

8 However, if we are going on and you want to
9 take a break, just let me know and we'll do that. We've
10 got coffee here and so forth, and the facilities are down
11 the hall.

12 In addition, are you taking any medication that
13 would interfere with your ability to understand the
14 questions here or answer them?

15 A. No.

16 Q. During the course of my questioning I may ask
17 you a question that may be confusing. I may be mixing up
18 terms of art that you're very familiar with and probably
19 are second nature to you but are not to me. And that is
20 purely unintentional.

21 And if I ask you a question that you don't
22 understand or in your view I'm confusing something, please
23 just say so, and I'll be happy to try to rephrase the
24 question or be clearer in whatever question I'm going to
25 ask you.

1 Okay?

2 A. Yes.

3 Q. Now, in starting out, I think one sort of rule
4 of thumb that I'm going to use in terms of definitions is
5 that when I'm using the word "Ameren," I'm referring to
6 sort of the whole Ameren, involving the consolidated
7 company of UE and CIPS and so forth.

8 And that the convention I'll follow is that
9 when I refer to UE, that is Union Electric here in
10 Missouri which is the subject of the rate case that is
11 before us.

12 Is that okay with you? Is that a good rule of
13 thumb?

14 A. Yes.

15 Q. I think what I'd like to do first, we have
16 already marked as Exhibit 1. This is your revised
17 testimony, and I just want to give you a copy.

18 MR. CYNKAR: And, Nathan, here is a copy for
19 yourself.

20 MR. WILLIAMS: Okay.

21 BY MR. CYNKAR:

22 Q. And this is the testimony that you are
23 sponsoring in this case. Is that true?

24 A. Um, assuming that it is the one I filed, yes.

25 Q. Yeah. I mean, you certainly can check it

1 later, and if it in any way doesn't conform to the revised
2 one that was served on us, we can correct that.

3 Now, the subject of your testimony is the rate
4 of return that should be afforded to UE going forward. Is
5 that correct?

6 A. Yes.

7 Q. Okay. And that is a subject that is very
8 important in the setting of the rates for UE. True?

9 A. I would assume it is, yes.

10 Q. And the allowed return on equity can have a
11 great effect on UE's rates. Correct?

12 A. The allowed return on equity can have a greater
13 or not so great effect on anybody's rates.

14 Q. In this case does the rate of return that
15 you're proposing have a great effect on the ultimate level
16 of rates that the Staff is proposing?

17 A. That would depend on what you would define as
18 "great."

19 Q. How would you define "great"?

20 A. I really don't have a specific definition of
21 "great."

22 Q. Do you know how your analysis of rate of return
23 fits into the overall Staff case proposing level of rates
24 for UE?

25 A. What do you mean by "fits in"?

1 Q. Well, what role it plays in ultimately
2 determining the rates that are being proposed by the
3 Staff.

4 A. When I determine rate of return, it is
5 calculated against rate base to come up with a revenue
6 figure, and that is worked into the rates that the company
7 is allowed to charge.

8 Q. And in the context of that being worked in, do
9 you know the impact the rate of return you're calculating
10 has on the ultimate rate being proposed by the Staff?

11 A. What do you mean by "impact"?

12 Q. Well, when your rate of return is being worked
13 in, that affects the ultimate number that is being
14 proposed by the Staff for UE's rates. Correct?

15 A. That's correct.

16 Q. And there are a number of different variables
17 that the Staff is considering that affects the rate
18 proposal of the Staff. Correct?

19 A. That's my understanding.

20 Q. Okay. Do you know how your rate of return
21 variable compares to the other variables that make up the
22 Staff's ultimate rate proposal?

23 A. When you say "compare," what do you mean?

24 Q. Well, do you know what the other variables are
25 that the Staff considered in proposing the rates that the

1 Staff has proposed in this case?

2 A. I know some of them.

3 Q. But you really have not examined them all?

4 A. No.

5 Q. When were you assigned to this case?

6 A. Are you looking for the date?

7 Q. In general terms. Not a specific date.

8 A. It would be earlier this year.

9 Q. January, February, that time frame?

10 A. If you're talking about EC-2002-1, it was
11 probably after that.

12 Q. I'm talking about the earnings audit of UE that
13 was started before, and I think it was started towards the
14 end of last year, if memory serves.

15 Were you involved in that?

16 A. You were referring to EC-2002-1. That's what I
17 thought you were talking about.

18 Q. Okay. So you were assigned to EC-2002-1 a
19 little later than January, February of this year?

20 A. That's my guess.

21 Q. Okay. Now, not referring specifically to that
22 case number but to the Staff's earning audits that led up
23 to the complaint that was filed by the Staff, were you
24 involved in that work?

25 A. I wasn't involved in the earnings audits.

1 Q. Were you involved in any way in work that led
2 up to the filing of the complaint in this case?

3 A. Yes.

4 Q. And what was that involvement?

5 A. I did some rough estimates of rate of return.

6 Q. And when about did you do those?

7 A. Earlier this year.

8 Q. Would that have been before you were actually
9 officially assigned to EC-2002-1?

10 A. Yes.

11 Q. So is the January, February time frame for that
12 involvement accurate?

13 A. It could have been even before that. I don't
14 recall exactly.

15 Q. It couldn't have been before January if it was
16 earlier this year.

17 Do you think it was before 2001?

18 A. It could have been.

19 Q. Okay. Now, after you were actually assigned to
20 this case, what was your specific assignment for your work
21 in this case?

22 A. To determine an estimate of the rate of return.

23 Q. And what information in general terms did you
24 review to prepare to calculate that rate of return?

25 A. Well, the stuff that is in my testimony.

1 I looked at historical information on the
2 company's book value, earnings, dividends per share,
3 looked at analyst projections, historical stock prices,
4 dividends, interest rates, those things in general.

5 Q. Okay. In response to our discovery earlier,
6 you-all produced this document to us --

7 MR. CYNKAR: And, Nathan, this is one of the
8 documents that I don't have copies of.

9 BY MR. CYNKAR:

10 Q. If you'll just take a look at that, that was
11 what we were given.

12 And does that pretty much capture the documents
13 and the material that you looked at?

14 A. Do you want me to look at all of that?

15 Q. Well, I just want to --

16 A. It looks familiar.

17 Q. It looks familiar?

18 A. Yes.

19 Q. As I explained to your counsel earlier in the
20 grand scheme of things, Fed Ex did not deliver certain
21 things here. So we are going to get you copies of that.
22 But I'll give you a copy of that as soon as I can, and I
23 apologize for not having one here right now.

24 I'm not going to ask you a lot of questions
25 about all of those pieces of paper.

1 Does that pretty much look like the material
2 you produced in response to our request?

3 A. It looks pretty much like it, yes.

4 MR. CYNKAR: Okay. I'm going to have this
5 marked as Exhibit 2.

6 (EXHIBIT NO. 2 WAS MARKED FOR IDENTIFICATION BY
7 THE COURT REPORTER.)

8 BY MR. CYNKAR:

9 Q. When did you start drafting your testimony in
10 this case?

11 A. This is a guess. I'd say April of this year.

12 Q. And in the context of developing your rate of
13 return analysis, you considered all of the factors that
14 you believed important?

15 A. Yes.

16 Q. And, basically, so I don't have to go through
17 this, all of those important considerations are recounted
18 in your testimony that is Exhibit 1 here. Correct?

19 A. Are you asking me, did everything that I
20 thought about, did I write down in my testimony?

21 Q. No. I'm asking you, everything that you
22 thought was significant in terms of calculating the rate
23 of return you have recounted in your testimony, your
24 written testimony here. Correct?

25 A. Everything that I thought was significant I

1 wrote down in my testimony. Is that the question?

2 Q. Yes.

3 A. I can't -- I can't say that -- that that's
4 true.

5 Q. And is there any reason why you would leave out
6 something that you thought was significant for calculating
7 rate of return?

8 A. I wouldn't say I left anything out. If I
9 didn't feel it was appropriate to document it in my
10 testimony, I wouldn't have put it in there.

11 Q. What do you mean by feel appropriate to
12 document in your testimony?

13 A. Well, people have thoughts all of the time and
14 conceptual ideas, that they don't necessarily write them
15 down. So, I mean, I may have had some thought processes
16 that might have influenced my thinking, but I didn't write
17 all of those thoughts down.

18 Q. But for our purposes here -- because we
19 certainly wouldn't want to know all of those thought
20 processes necessarily -- but in terms of all of the --
21 what you felt to be were the important factors for
22 calculating the rate of return, so we could know, you
23 know, what the basis of your testimony is, those are
24 recounted here. Is that fair?

25 A. Yes.

1 Q. Okay. Now, why didn't you use any Missouri
2 companies in your comparables for your analysis?

3 A. Because I didn't feel it was appropriate to use
4 them.

5 Q. Why?

6 A. There is an argument that there is circularity,
7 in that if the Commission sets the rates for a company,
8 then the circularity of influencing your decision or your
9 thoughts as far as what the rates should be in a specific
10 case.

11 Q. Do you agree with that argument?

12 A. I accept it.

13 Q. And so it obviously was a building block of
14 your analysis?

15 A. It was something that I took into consideration
16 when I did my analysis.

17 Q. As a result, then, is it fair to say that you
18 believe that the performance of companies outside of
19 Missouri is relevant to the analysis of rate of return?

20 A. In general or specifically this case?

21 Q. Well, specifically to this case.

22 A. It has a relevance.

23 Q. I mean, you're using that performance to
24 evaluate the reasonableness of your own analysis.

25 Correct?

1 A. To evaluate the reasonableness, yes.
2 Q. So to that extent it has a relevance?
3 A. Yes.
4 Q. Okay. And those companies outside of Missouri
5 are in turn regulated by public service commissions in
6 their jurisdictions. Correct?
7 A. Well, with deregulation I'm not familiar with
8 all of the states that are deregulated. So I can't say
9 for sure that, you know, all companies that would be
10 included in the comparable analysis would be regulated.
11 Q. What about your comparable analysis?
12 A. I did not check to see if they were regulated
13 or deregulated.
14 Q. So, then, in the context of your analysis, you
15 did not take a look at the practices or principles
16 governing other commissions regulating companies in their
17 jurisdiction?
18 A. That's correct.
19 Q. Some of the comparable companies you chose --
20 now, you ended up with three comparable companies.
21 Correct?
22 A. The final group was three, yes.
23 Q. Okay. Now, do some of those companies earn
24 revenues through interstate transmission of electricity?
25 A. I don't know.

1 Q. Do you know when the first experimental
2 alternative regulation plan -- which we can call an EARP
3 for short -- was negotiated?

4 A. No.

5 Q. Do you know when it began?

6 A. No.

7 Q. Have you ever reviewed the EARP?

8 A. Parts of it.

9 Q. Do you know how long Union Electric has been
10 operating under the EARP?

11 A. If I recall, it's been, like, five years.

12 Q. Would it sort of refresh your recollection if I
13 said that the first EARP started in 1995?

14 Does that sound right to you?

15 A. I don't recall. I mean, I wasn't here.

16 Q. Okay. Taking 1995, what is your view of how
17 interest rates have moved since 1995 to the present?

18 A. Which interest rates?

19 Q. Well, what do you think are the most important
20 interest rates for purposes of your analysis?

21 A. Risk-free rate, utility bond yields.

22 Q. And how have those rates moved since 1995?

23 A. Down.

24 Q. Consistently down?

25 A. Rates never move consistently in one direction

1 or another.

2 Q. I'm going to ask you a few questions about your
3 background, so I'm going to be referring to this, but I'm
4 not going to obviously get into all of this.

5 Now, you graduated from Colorado State in 1976.
6 Correct?

7 A. Yes.

8 Q. And according to your testimony, you have a
9 degree in social science from that university?

10 A. Yes.

11 Q. Okay. Did you study economics at all when you
12 were there?

13 A. Yes.

14 Q. Did you have any finance courses?

15 A. Yes.

16 Q. Do you recall how many?

17 A. At Colorado State?

18 Q. Yes.

19 A. No, I don't recall. It would be a guess.

20 Q. Do you know the subject matter of the finance
21 courses? Do you recall those?

22 A. Yes.

23 Q. Could you just briefly summarize those?

24 A. Financial theory, analysis of financial
25 statements, determination of the cost of capital, there is

1 investment theory included, those kind of things.

2 Q. I see.

3 Do you happen to recall what were the major
4 course books you used in that time?

5 A. You mean the titles of them?

6 Q. Even if you don't remember the exact title, do
7 you remember the authors or anything about them?

8 A. No.

9 Q. So those aren't the sort of things you've kept
10 on your shelf since college days?

11 A. No.

12 Q. Okay. I still have a lot of my law books.
13 That's why I ask. I'm a pack-rat.

14 After graduating from Colorado State, did you
15 go directly to Southern Illinois University or did you
16 have a gap there?

17 A. No. I had a gap there.

18 Q. What did you do?

19 A. I was in the Air Force.

20 Q. And what did you do in the Air Force?

21 I'm sorry. You did statistical analysis there.

22 A. Yes.

23 Q. And how long were you in the Air Force?

24 A. Six years.

25 Q. And were you in the Air Force while you were

1 attending SIU?

2 A. Yes.

3 Q. And why did you decide to leave the Air Force?

4 A. I finished my MBA and decided that I'd like to
5 see what the civilian world had to offer.

6 Q. In your MBA, your testimony recounts that you
7 had an emphasis on finance and investments. Is that
8 correct?

9 A. Yes.

10 Q. Do you recall the kind of finance courses you
11 had when you were doing your MBA?

12 A. In general.

13 Q. Could you just generally summarize those for
14 me?

15 A. Very similar to undergraduate courses. A lot
16 of it emphasizes more to managerial, the concept of it.

17 Q. Okay. Do you happen to recall any of the major
18 treatises or course books that you used in the context of
19 studying for your MBA in finance?

20 A. No.

21 Q. So you didn't keep any of those on your shelf
22 either?

23 A. No.

24 Q. Now, you're not a lawyer?

25 A. No.

1 Q. And never had any legal training?
2 A. Business law classes.
3 Q. Okay. But you never started to go to law
4 school and decided it was a waste of time or anything like
5 that?
6 A. No.
7 Q. Many of us think we should have.
8 Now, have you ever been an investment advisor?
9 A. What do you mean by "investment advisor"?
10 Q. Well, have you ever as a matter of earning your
11 living advised other people on how to invest in stocks or
12 bonds?
13 A. Yes.
14 Q. When was that?
15 A. When I was with American Express.
16 Q. And what did your role as an analyst planner
17 there have you do?
18 A. Help individuals and companies develop
19 portfolios, investment portfolios.
20 Q. Did you specialize in any particular segment of
21 the market?
22 A. As far as investments, asset allocation.
23 Q. What does that mean?
24 A. Helping individuals and couples determine the
25 proper assets to allocate their resources to.

1 Q. Have you ever written any articles in
2 professional journals or publications?

3 A. Yes.

4 Q. How many?

5 A. I don't recall. Five or six.

6 Q. Now, do you recall the subjects?

7 A. One of them was on capital investment for
8 Industrial Engineer Magazine. One of them was on
9 productivity enhancement measurement for the Health Care
10 Management Information Systems Society.

11 Q. How long ago was that article written?

12 A. Mid '80s.

13 Q. Do you recall any of the other articles?

14 A. Not specifically as far as the titles or
15 subject.

16 Q. Okay.

17 In response to our interrogatories -- and I
18 know a number of the folks on the Staff were involved in
19 responding to our discovery -- there were a couple of
20 different treatises that were cited.

21 One is called the Cost of Capital -
22 Practitioners Guide by Parcell.

23 Are you familiar with that work?

24 A. Yes.

25 Q. And the other is Regulatory Finance, Utilities

1 Cost of Capital by Roger Morin.

2 Are you familiar with that work?

3 A. Yes.

4 Q. And do you think that those two are reliable
5 authorities?

6 A. Yes.

7 Q. In addition, I think they both refer to Brealey
8 and Myers Principles of Corporate Finance.

9 Are you familiar with that work?

10 A. In the context of those works I am, yes.

11 Q. Okay. Are you familiar with another work
12 called Corporate Finance by Ross, Westerfield and Jaffee?

13 A. Not specifically.

14 Q. I don't know if that would ring any bells, but
15 that is used as a standard text at SIU's college of
16 business administration. I didn't know if that rings any
17 bells with you, Ross, Westerfield and Jaffee.

18 A. (Shakes head.)

19 I guess it would depend on when they started
20 using it.

21 Q. I think it's been around for a while. But
22 that's all right.

23 Now, if I understand not only your testimony
24 but the responses to interrogatories, is it fair to say
25 that ratemaking doesn't set the revenue a utility will

1 actually earn. Is that fair?

2 A. Say that again.

3 Q. Ratemaking does not set the revenue a utility
4 will actually earn?

5 A. That's correct.

6 Q. And that's because it only sets a rate that it
7 may -- that may produce revenues that it may earn,
8 depending upon a lot of other factors in the marketplace.
9 Correct?

10 A. That's correct.

11 Q. Okay. Now, is it fair to say that the
12 discounted cash flow method which you use -- which, again,
13 I'll just call DCF for shorthand -- in part tries to
14 measure investors expectations of future cash flows?

15 A. The DCF model is an expectation model.

16 Q. Right.

17 And what does that mean?

18 A. What the model measures is given the dividend
19 and the estimated growth, it shows what investors are
20 willing to pay for that, and imparts their expectation as
21 far as the return they would get from that investment.

22 Q. Okay.

23 The rate of return that is set by the
24 Commission obviously does greatly affect the revenue that
25 will be earned?

1 A. It depends on what you mean by "greatly
2 affect."

3 Q. Well, why don't you describe for me how you
4 believe it affects the revenues that will be ultimately
5 earned.

6 A. The rate of return is one factor that is used
7 in determining the rates that the company is allowed to
8 charge.

9 Q. Right. That's the fact.

10 And so how significant is that in terms of the
11 revenues that the company can ultimately achieve?

12 A. It's hard to say. It depends on the level the
13 rate is set at, what other factors that go into setting
14 the rates, what kind of volume of commodity the company
15 sells. I mean, there is a lot of other factors involved.

16 Q. In your view is there any way of ranking the
17 significance in terms of ultimate impact of those range of
18 factors?

19 A. Not in general. It's just specific to the
20 case.

21 Q. Well, in the case of UE in this case, is there
22 a way of doing that?

23 A. Again, it depends on what you mean by
24 "significance."

25 Q. Well, if I understand you correctly, there is a

1 range of factors that will affect the revenue that a
2 company ultimately can achieve. Is that fair?

3 A. Yes.

4 Q. Okay. And one of those is the rate of return
5 that is set by the Commission. Correct?

6 A. It can, yes.

7 Q. Okay. And there are many other factors too.
8 Correct?

9 A. Yes.

10 Q. And in this particular case, is it your view
11 that all of those factors are equal in terms of their
12 ultimate effect on UE's revenues?

13 A. If you say equal as far as on a numerical
14 sense, I couldn't say.

15 Q. I mean, that's fine. If you don't know, that's
16 a perfectly respectable answer. I'm not trying to ask you
17 to say something that you don't know the answer to.

18 So you haven't analyzed the significance of the
19 rate of return calculation on UE's ultimate revenues in
20 any way?

21 A. I haven't compared what rate of return in this
22 case means numerically versus what depreciation means
23 numerically versus what cost of service means numerically
24 versus what volume of commodity the company is going to
25 sell based on those rates to be able to determine --

1 Q. Okay.

2 A. -- what the revenue is going to be for Ameren.
3 And I don't think anybody has.

4 Q. Okay.

5 Have you done any comparison -- we were just
6 talking about rate of return versus other factors, and you
7 were talking about the volume of the commodity that UE can
8 sell and how no one has done an analysis of those factors
9 to each other.

10 Have you done any analysis of how your rate of
11 return could ultimately affect the commodity that the
12 company can sell?

13 A. Have I analyzed my rate of return against the
14 commodity?

15 Q. Well, you used the phrase "commodity." By that
16 I presume you meant electricity?

17 A. No. I'm talking about any commodity the
18 company sells.

19 Q. Okay.

20 A. That's what generates the revenue.

21 Q. Right.

22 But for purposes of this case, the focus is on
23 electricity. Correct?

24 A. Okay.

25 Q. Okay. So let's agree on that just to simplify

1 things.

2 So you, if I understand you correctly, said
3 there are a number of factors in the rate setting process,
4 including rate of return, that ultimately affects the
5 amount of electricity that UE can sell.

6 Do I understand you correctly?

7 A. No, I didn't say --

8 Q. Okay. I'm sorry. I don't mean to be thick,
9 but why don't you explain to me what you mean.

10 A. A rate of return doesn't determine how much a
11 company sells.

12 Q. What does it do?

13 A. Rate of return goes into the rates that the
14 company can charge.

15 Q. And what does rate of return affect?

16 A. It's a component of the rates.

17 Q. Right. What does it stand for? What does rate
18 of return mean?

19 Is it --

20 A. It's the rate of return on rate base.

21 Q. So how is it related to the cost of equity?

22 A. Well, the cost of equity is the component of
23 cost of capital. Cost of capital are used -- is used
24 synonymously with rate of return.

25 Q. And so the return that the Commission sets, is

1 it fair to say that that would greatly affect the access
2 to capital of a company?

3 A. I can't say that it would or it wouldn't.

4 Q. Is it your -- does it have any relationship to
5 the access to capital?

6 A. There is a lot of factors that go into
7 determining and actually resulting in a company's access
8 to capital.

9 Q. Okay. What are some of the other factors
10 besides the rate of return set by the Public Service
11 Commission?

12 A. A company's credit rating, investors
13 perceptions as far as the prospects for the company,
14 investors alternative, investment opportunities, the
15 amount of capital that the company would need.

16 Q. Let me ask you, just so I understand it, if the
17 Commission sets a rate of return that is comparatively
18 high, is it fair to suggest that that would attract
19 investors, all other things being equal?

20 A. I don't know what you mean by "comparatively
21 high."

22 Q. Well, compared to other similar investments.

23 A. Are you asking me if the Commission set a high
24 rate of return compared to other investments, that that
25 would enhance the company's access to capital?

1 Q. Yes.

2 A. It's possible, but then it's possible it may
3 not.

4 Q. And that's because of factors other than the
5 rate of return?

6 A. That's correct.

7 Q. But is it fair to say as a practical matter,
8 keeping those other factors equal, just so we're comparing
9 the same thing, if you have companies where -- if you had
10 two investment opportunities as an investor -- let's say
11 they are two utilities and all of the other factors we're
12 going to assume are the same.

13 If the Commission over here for Company A sets
14 a rate of return -- let's just pick a number. We'll call
15 it ten. And for Company B the Commission sets a rate of
16 return of five.

17 If I understand the operation of rate of
18 return, wouldn't it be fair to say in that hypothetical
19 that an investor would want to invest in Company A because
20 that investor would get more return on his or her money?

21 Is that fair?

22 A. If you unrealistically said everything else
23 being equal?

24 Q. Uh-huh.

25 A. Yes.

1 Q. Okay.

2 On page 2 -- starting on page 2 of your
3 testimony -- and maybe if we could refer to it. And this
4 goes on -- I guess it goes on pages 2 to 7. You discuss
5 the economic and legal rationale for regulation.

6 Now, we earlier were talking about you're not a
7 lawyer and haven't had any legal training. Correct?

8 A. Yes.

9 Q. Okay. Now, I'm going to ask -- the next group
10 of questions I'm going to ask you about focuses on these
11 pages.

12 So I understand that you're not a lawyer, and
13 if there is something you can't answer, just say so. I'm
14 not going to belabor the point.

15 Now, in this section you quote -- or cite and
16 quote from a number of initially United State Supreme
17 Court cases, articulating what you believe to be the legal
18 basis that you must use when determining a fair and
19 reasonable return for a public utility. Correct?

20 A. Yes.

21 Q. Okay. And you also cite a case from the
22 Pennsylvania Supreme Court, correct, on page 6, I believe
23 it is?

24 A. Yes.

25 Q. Okay. Now, given that you don't have any legal

1 training, how did you happen to select these four cases
2 for your testimony?

3 A. Through review of the published documents that
4 document the results of those cases and pulling out what
5 seemed appropriate for rate setting.

6 Q. And is there a reason why you didn't choose any
7 case after 1944?

8 A. No.

9 Q. Have you ever read Munn versus Illinois?

10 A. Yes.

11 Q. When was the last time you read it?

12 A. Last week.

13 Q. Good preparation.

14 A. I didn't memorize it. I read it.

15 Q. Don't worry. I won't give you a law school
16 class kind of quiz on it.

17 Had you ever read it before you submitted this
18 testimony?

19 A. Yes.

20 Q. What was the occasion for that?

21 A. It would have been for a rate case.

22 Q. Okay. And I'm just going to go through these
23 cases briefly.

24 Have you read Bluefield?

25 A. Yes.

1 Q. The same answer, both in preparation for today
2 in the context of earlier testimony?

3 A. Yes.

4 Q. The same thing with the Natural Gas Pipeline
5 case?

6 A. Yes.

7 Q. And Hope also?

8 A. Yes.

9 Q. What was the statute the Supreme Court was
10 construing in Hope?

11 A. I don't recall.

12 Q. Do you think that was significant in terms of
13 the legal principles there?

14 A. I would imagine it is.

15 Q. Did you take that into account when you
16 prepared your testimony, even if you can't recall it now?

17 A. No.

18 Q. If I understand you correctly, you surveyed
19 more Supreme Court cases than just these and selected
20 these for purposes of your testimony.

21 Did I understand that correctly?

22 A. Are you saying did I read more Supreme Court
23 cases than these?

24 Q. Yes.

25 A. No.

1 Q. Why not?

2 A. No particular reason.

3 Q. Isn't it a fact that these are the four cases

4 that have been cited by the Staff repeatedly in rate of

5 return testimony for a long time?

6 A. Yes.

7 Q. So is it fair to say as a practical matter that

8 you just used that as a guide for choosing the cases?

9 A. Yes.

10 Q. And in preparing this testimony you did not

11 read Duquesne Light Company versus Barasch?

12 A. No.

13 Q. Have you ever read Duquesne Light Company

14 versus Barasch?

15 A. No.

16 Q. Why didn't you cite any Missouri Supreme Court

17 cases?

18 A. No reason.

19 Q. Have you ever read a Missouri Supreme Court

20 case?

21 I don't recommend it as fun reading.

22 A. No, I don't recall that I have.

23 Q. Have you ever read the Takings Clause to the

24 Fifth Amendment to the United States Constitution?

25 A. No.

1 Q. Have you ever read the Takings Clause in the
2 Missouri Constitution?

3 A. No.

4 Q. I'm going to show you this. I'm just going to
5 ask you about one phrase.

6 I'm referring to the document that is Staff's
7 responses to Union Electric Company's first set of
8 interrogatories.

9 MR. CYNKAR: I don't necessarily feel a need to
10 make this an exhibit, but, Nathan, if you want, we can do
11 that. It's really a matter of practice, if you'd prefer.

12 BY MR. CYNKAR:

13 Q. That underlined phrase over there, and I'm just
14 going to ask you a question about that.

15 In that answer, which I think is the answer to
16 Interrogatory No. 49, the answer is, Utility regulation
17 acts as a substitute for the, quote, economic control of
18 market competition, close quote.

19 Have I read that correctly?

20 A. Yes.

21 Q. Now, are you familiar with that answer?

22 A. Yes.

23 Q. Okay. Do you agree with that statement?

24 A. Yes.

25 Q. Could you explain what the economic control of

1 market competition means?

2 A. It acts as a substitute for competition.

3 Q. Okay. And what are the aspects of that?

4 A. Of acting as a substitute or just --

5 Q. Yes, yes.

6 What does competition do that utility
7 regulation is also trying to do?

8 A. My understanding of competition in a business
9 environment would be more than one provider of a good or
10 service, with the potential for competition as far as
11 level of service, prices that would be charged, those kind
12 of things.

13 Q. Okay. I'm holding in my -- well, I've got
14 resting in front of me a book that is called Principles of
15 Public Utility Rates by Bonbright, Danielsen and
16 Kamerschen.

17 Are you familiar with Bonbright?

18 A. No.

19 Q. Have you ever heard of Bonbright before?

20 A. No.

21 Q. Let me ask you a question.

22 What I'm trying to understand -- and what I
23 want to talk to you about a little bit -- was this notion
24 of economic control of market competition and the
25 relationship of regulation and competition. So that's the

1 subject of my next couple of questions.

2 What role does competition have in setting
3 prices?

4 Could I have my -- if you want to keep that in
5 front of you for reference, you can. I want to keep it
6 moving.

7 A. Typically when you have competing companies,
8 there is the opportunity for one or more company to sell
9 their good of service for less in order to attract market
10 share.

11 Q. And if they sell it for less, there is a good
12 chance that they could get a bigger market share?

13 A. That's potentially true.

14 Q. And if they do that, they could make more
15 money?

16 A. That's potentially true.

17 Q. And that, of course, is their goal?

18 A. Yes.

19 Q. Okay. And how would a company in your example
20 go about being able to sell product for less?

21 A. By pricing it lower than their competitors.

22 Q. And what would allow them to do that?

23 A. Well, they control the prices they would
24 charge, so they would just do it.

25 Q. That's purely a matter of discretion on the
