REQUESTED FROM: Suedeem Kelly/Mary Hoyt

DATE REQUESTED: 5/23/02

INFORMATION REQUESTED: What Missouri Public Service Commission orders or decisions did Suedeem Kelly review for the purpose of writing her rebuttal testimony? Did she review the particular order or decision in entirety?

REQUESTED BY: Steven Dottheim 573-751-7489

**INFORMATION PROVIDED**

Ms. Kelly reviewed the following Missouri Public Service Commission ("PSC") decisions:

- *In re Associated Natural Gas Company's Tariff Revisions*, 1999 Mo. PSC LEXIS 2.
- *In re Empire District Elec. Co.'s Tariff Sheets*, Case No. ER-2001-299 (Sept. 20, 2001).
- *In re Laclede Gas Co.'s Tariff Filing*, Case No GT-2001-329 (Sept. 20, 2001).
- *In re Missouri Public Service*, 1998 Mo. PSC LEXIS 21.
- *Petition of Southwestern Bell Telephone Co.*, 1997 Mo. PSC LEXIS 247.

Ms. Kelly reviewed the following court cases involving appeals of Missouri PSC decisions:

- *Barker v. Kansas City Gas Company*, 163 S.W. 854 (Mo. 1914).
- *Citizen's Gas Company of Hannibal v. PSC*, 8 F.2d 632 (W.D. Mo. 1925).
- *State ex rel. Associated Natural Gas Co. v. PSC*, 706 S.W.2d 870 (Mo. Ct. App. 1985).
- *State ex rel. Campbell Iron Co. v. PSC*, 296 S.W. 998 (Mo. 1927).
- *State ex rel. Capital City Water Co. v. PSC*, 252 S.W. 446 (Mo. 1923).
- *State ex rel. Chicago, Rock Island & Pac. R.R. Co. v. PSC*, 312 S.W.2d 791 (Mo. 1958).
- *State ex rel. City of St. Joseph v. PSC*, 30 S.W.2d 8 (Mo. 1930).
- *State ex rel. City of St. Louis v. PSC*, 34 S.W.2d 507 (Mo. 1930).
- *State ex rel. City of West Plains v. PSC*, 310 S.W.2d 925 (Mo. 1958).
- *State ex rel. Electric Co. of Missouri v. Atkinson*, 204 S.W. 897 (Mo. 1918).
- *State ex rel. Empire District Elec. v. PSC*, 100 S.W.2d 509 (Mo. 1936).
- *State ex rel. Harline v. PSC*, 343 S.W.2d 177 (Mo. Ct. App. 1960).
- *State ex rel. Hotel Continental v. Burton*, 334 S.W.2d 75 (Mo. 1960).
- *State ex rel. Jackson County v. PSC*, 532 S.W.2d 20 (Mo. 1975).
- *State ex rel. Joplin Water Works Co. v. PSC*, 495 S.W.2d 443 (Mo. 1973).
- *State ex rel. Laclede Gas Co. v. PSC*, 535 S.W.2d 561 (Mo. Ct. App. 1976).
- *State ex rel. Laclede Gas Co. v. PSC*, 600 S.W.2d 222 (Mo. Ct. App. 1980).

- *State ex rel. Martigney Creek Sewer Co. v. PSC*, 537 S.W.2d 388 (Mo. 1976).
- *State ex rel. McKittrick v. PSC*, 175 S.W.2d 857 (Mo. 1943).
- *State ex rel. Midwest Gas Users Ass'n v. PSC*, 976 SW.2d 470 (Mo. Ct. App. 1998).
- *State ex rel. Missouri Southern R.R. Co. v. PSC*, 168 S.W.2d 1156 (Mo. 1914).
- *State ex rel. Missouri Water Co. v. PSC*, 308 S.W. 2d 704 (Mo. 1957).
- *State ex rel. Pugh v. PSC*, 10 S.W.2d 946 (Mo. 1928).
- *State ex rel. Southwestern Bell Telephone Co. v. PSC*, 262 U.S. 276, 289 (1923).
- *State ex rel. Utility Consumers Council of Mo. v. PSC*, 585 S.W.2d 41 (Mo. 1979).
- *State ex rel. Valley Sewage Co. v. PSC*, 519 S.W.2d 845 (Mo. Ct. App. 1974).
- *State ex rel. Watts Engineering Co. v. PSC*, 191 S.W.2d 412 (Mo. 1917).

The attached information provided to the Missouri Public Service Commission Staff in response to the above data information request is accurate and complete, and contains no material misrepresentations or omissions, based upon present facts of which the undersigned has knowledge, information or belief. The undersigned agrees to immediately inform the Missouri Public Service Commission Staff if, during the pendency of Case No. EC-2002-1 before the Commission, any matters are discovered which would materially affect the accuracy or completeness of the attached information.

If these data are voluminous, please (1) identify the relevant documents and their location (2) make arrangements with requestor to have documents available for inspection in the Ameren, St. Louis, Missouri office, or other location mutually agreeable. Where identification of a document is requested, briefly describe the document (e.g. book, letter, memorandum, report) and state the following information as applicable for the particular document: name, title number, author, date of publication and publisher, addresses, date written, and the name and address of the person(s) having possession of the document. As used in this data request the term "document(s)" includes publication of any format, workpapers, letters, memoranda, notes, reports, analyses, computer analyses, test results, studies or data, recordings, transcriptions and printed, typed or written materials of every kind in your possession, custody or control or within your knowledge. The pronoun "you" or "your" refers to AmerenUE and its employees, contractors, agents or others employed by or acting in its behalf.

ORDER CANCELLING GENERAL ORDER 38-A (CASE NO. 10,723)

- 1) Adopted December 28, 1945.
- 2) Effective January 31, 1946.
- 3) I think that it is possible that this order should be a General Order. It does lay out some procedures for companies to follow in accounting.
- 4) No evidence of any supplementary or cancelling orders.

REPORT AND ORDER

On August 14, 1944, this Commission issued its General Order 33-A, Wilson, C., dissenting. The general order was directed to the gas, electric, water, telegraph, telephone and heating utilities under our jurisdiction and relates to depreciation and the accounting therefor by such utilities as prescribed by Sections 5656 and 5680, R.S. Mo., 1939. We stated in the general order that in our opinion the utilities are not fully complying with the provisions of Sections 5656 and 5680, in that the income from the investments of moneys in their depreciation reserve funds pertaining to property in Missouri is not being credited to and carried in such funds; also, that the utilities have their depreciation reserve funds invested in plant, securities and other properties and are deriving income from such investments. The general order required the utilities to file with this Commission on or before October 2, 1944, (a) statements showing income derived from their depreciation reserve funds for the year ended July 31, 1944, (b) copies of balance sheets as of July 31, 1944, and (c) statements showing income derived from all sources for the year ended July 31, 1944; and provided that unless appropriate pleadings showing cause to the contrary should be filed with this Commission on or before October 2, 1944, the utilities not so pleading would be required, on and after January 1, 1945, to credit their depreciation reserve funds pertaining to property in Missouri with the income derived from the investment of moneys in such funds, and to reduce their annual charges to operating income for depreciation by the amount of such income. The general order further provided that unless appropriate pleadings showing cause to the contrary should be filed with this Commission on or before October 2, 1944, the utilities would be required to set aside moneys and accrue same to their depreciation funds at the same annual rates then being used for such accruals, either pursuant to orders of this Commission or by orders of their managements, and to continue such rates for accruals unless and until cause should be shown why other and different rates should be used. Finally, the general order

provided that if appropriate pleading should be filed by any public utility, the issues raised thereby would be set down for hearing before this Commission on proper notice.

A copy of General Order 38-A was served on each utility in Missouri of the classification affected by the order. Almost without exception, such utilities filed pleadings within the allotted time which were designed to show cause why the terms and provisions of General Order 38-A should not be applied. Various objections and questions were raised in the pleadings, both on legal and equitable grounds. Thereafter, conferences were held between representatives of certain of the utilities and this Commission and its staff, and a report was submitted to our staff by a committee of accountants representing the utilities.<sup>1/</sup> Following this, the matters involved were consolidated into this Case No. 10,273 and set down for hearing at Jefferson City on December 17, 1945, upon appropriate notice to all interested parties. Such hearing was only held and at that time the cities of St. Louis and Kansas City were granted authority to intervene. All of the utilities which desired to be heard in the matter were represented by officials or by counsel. At the close of the hearing all utilities represented were advised by the Commission that unless they expressed disagreement with the evidence presented on behalf of the utilities it would be assumed that all adopted the evidence proffered at the hearing. Most of those present expressed their concurrence and none objected. For the reason that this is a matter of paramount importance, we deem it advisable to discuss the issues fully.

As is indicated above, the issuance of General Order 38-A arose out of the provisions of Sections 5656 and 5680 of our public utility act which relate to depreciation and depreciation accounting<sup>1/</sup>. The provisions of the two sections are identical except that 5656 applies to gas, electric and

---

<sup>1/</sup> This report, dated June 11, 1945, deals with methods for determining the amount of income from depreciation funds. It was submitted at the request of our staff as a result of conferences between our staff and the utilities' accounting committee.

water utilities and 5680 to telegraph and telephone utilities; such provisions are made applicable to heating utilities by Section 5684. Section 5656 is quoted below:

"The commission shall have power, after hearing, to require any or all gas corporations, electrical corporations and water corporations to carry a proper and adequate depreciation account in accordance with such rules, regulations and forms of account as the commission may prescribe. The commission may, from time to time, ascertain and determine and by order fix the proper and adequate rates of depreciation of the several classes of property of such corporation, person or public utility. Each gas corporation, electrical corporation and water corporation shall conform its depreciation accounts to the rates so ascertained, determined and fixed, and shall set aside the moneys so provided for out of earnings and carry the same in a depreciation fund and expend such fund only for such purposes and under such rules and regulations, both as to original expenditure and subsequent replacement, as the commission may prescribe. The income from the investments of moneys in such fund shall likewise be carried in such fund."

Pursuant to the authority granted by Sections 5656 and 5680, this Commission, in the past, has fixed depreciation rates for most of the utilities under its jurisdiction; in some instances the utilities have provided for depreciation based on rates fixed by their managements. Such rates have been designed to provide depreciation within the useful life of the utility property. The utilities have used the funds accumulated by reason of their depreciation reserve provisions for such purposes as construction of additions, betterments and extensions of property and plant, working capital and investments in securities,<sup>2/</sup> and admit that they are deriving income from such use of the funds. It is the income attributable to use by the utilities of depreciation funds that we are here concerned with. For Sections 5656 and 5680 provide that "the income from the investments of moneys in such fund (the depreciation fund) shall likewise be carried in such fund."

Although the utilities strenuously deny the proposition that their customers have any interest, in law or in fact, in depreciation funds, or any other utility funds or property, their witnesses agree with the validity

---

<sup>2/</sup> Since depreciation funds are not segregated from other funds in the accounting records of the utilities, it is not possible to trace the particular use of all of such funds. It can be determined, however, that such funds, together with funds procured from other sources, have been used by the utilities for such purposes as those enumerated.

of the principle that when an undepreciated rate base is used, a proper credit attributable to the use by the utilities of depreciation funds can fairly and equitably be applied for the benefit of the customers.<sup>3/</sup> We do not see how this principle can be considered as other than fair and equitable. For depreciation is a component part of established rates for service and the funds to pay for depreciation are currently supplied to the utilities by their customers through their rates for service. And when such funds, pending their use for replacement of completely depreciated and retired plant, are used by the utilities for other purposes, the customers are equitably entitled, through their rates for service, to appropriate credit for such use, just as any investor is entitled to a return on funds supplied by him to a corporation for the corporation's use.<sup>4/</sup> Accordingly, we shall require that appropriate credit shall be given with respect to the utilities' use of the depreciation funds, and that such credit shall take the form of a reduction of the utilities' operating expenses, which may in turn reduce the allowable return.

It is obvious, however, that if the utilities allowable return is reduced by income on depreciation funds, the utility rate base upon which the allowable return is predicated, should be an undepreciated rate base. This is true for the reason that to reduce the allowable return by deducting depreciation from the rate base and to also reduce it by income on the depreciation funds would obviously constitute duplication. While, in the past this Commission has followed the rulings of the Courts in fixing the rate base for the utilities, which required deduction of depreciation from the rate base, and under which the interest or income methods of computing

---

<sup>3/</sup> General Order 38-A provided that such income would be applied in reduction of annual charges to operating income for depreciation. This would reduce the utilities' allowable return, and the overall cost of service to the utilities' customers.

<sup>4/</sup> As was stated by Prof. Herbert B. Dorau of Columbia University, a recognized authority in these matters, in his article entitled "Economic Implications of Public Utility Depreciation Accounting" (see The New York Certified Public Accountant, June 1944) "...It must be recognized that the assets reflected by the depreciation reserve balances arise from payments made by customers in order to meet a future liability, and that the customer is entitled to a return or compensation for the use of such funds by the company according to the character and extent of their employment as earnings assets until they are used up in extinguishing the liability reflected by the reserve..."

depreciation provisions in determination of the allowable return could not equitably be applied, we interpret the recent decisions of the United States Supreme Court in the Natural Gas Pipe Line Co. case and the Hope Natural Gas Co. case as no longer requiring adherence to the former rules.<sup>5/</sup>

This Commission for some time has been concerned with the long delays and cumbersome procedure inherent in the determination of costs of reproduction of utility properties and the existing depreciation in utility properties, and has been desirous of adopting a rate making formula which will be simple, expeditious and effective. We are convinced that the so-called "original cost rate base,"<sup>6/</sup> appropriately modified, adequately answers those requirements as to the utility rate base. Accordingly, it will be the policy of this Commission in the future, whenever possible and warranted by the facts, to fix the utility rate base upon which the allowable return is predicated based on the undepreciated original cost of the utility property used and useful in the public service, to which will be added materials and supplies and a reasonable allowance for cash working capital. Other adjustments in this rate base may be made when justified by the facts.

With such a rate base, "income from the investment of moneys in depreciation funds" may be appropriately recognized.

The question presents itself as to whether the utilities shall be required to currently record in their books of account, as a reduction of

---

<sup>5/</sup> Federal Power Commission v. Natural Gas Pipe Line Co., 315 U.S. 575, 62 S. Ct. 736. Federal Power Commission et. al. v. Hope Natural Gas Co., 320 U.S. 591, 64 S. Ct. 281.

<sup>6/</sup> The "original cost" rate base is sometimes referred to as "prudent investment," and may be modified when appropriate to reflect other allowable costs. The basic foundation, subject to appropriate modification, is the actual legitimate cost of the utility property at the time of its construction and dedication to the public service.

their annual charges to operating income for depreciation, the income attributable to their use of depreciation funds. Since this is a rate making matter, adopted for the primary purpose of preserving the principles of equity as between the customers of the utilities and the utilities, we see no reason for such a requirement. However, we shall require, in order that we may be currently informed and in a position to take such action as may be necessary, that the utilities shall include in their annual reports, and in such other reports that may be required by this Commission from time to time, schedules in such form as we shall prescribe showing the income from the investment of moneys in depreciation funds.

Perhaps the most difficult question for decision in this matter is the question of how the income from the investment of moneys in depreciation funds shall be determined. This question divides itself into two parts, (1) ascertainment of the principal amount of depreciation funds; and (2) having ascertained such principal amount, methods for determining the income attributable to the ascertained principal amount of the funds.

As to the first part of this question, it is obvious that the principal amounts of depreciation funds are exactly represented by the balances in the utilities' depreciation reserves, which are usually provided from operating income. However, the evidence shows that, in some instances, depreciation reserves have been provided, in part, not from operating income, but by appropriations from utility surplus, or otherwise than from operating income. It is obvious, that in such instances, depreciation funds have been provided by the utilities themselves, and not by their customers, and, accordingly, that in ascertaining the principal amount of depreciation funds subject to such income credit that we may impose, that total depreciation reserve balances should be adjusted by any portions thereof so provided. We will permit such adjustments but shall require convincing proof as to the validity thereof.

There is considerable evidence in the record relating to methods for determining the income attributable to the ascertained principal amount

of depreciation funds. We do not deem it necessary to review all of such evidence, but do consider it advisable to set forth the fundamental considerations which have formed the bases for our conclusions, including a brief discussion of the nature of depreciation funds and the relationship of the utilities and the utilities' customers to such funds. At the outset it should be stated that we are not dealing with the problem of determining accrued depreciation from the standpoint of the utility rate base, but rather the question of an appropriate credit which may be equitably applied for the benefit of the customers as representing income applicable to depreciation funds.

Depreciation, of course, represents the consumption in service of the utility property and is a part of the cost of the services rendered. Accordingly, the rates for service are designed to include a component for depreciation, in addition to all other costs of service, and a fair return upon the investment. It is an obligation of the customer to pay in his rates for the cost of the service, including the cost of depreciation, just as it is an obligation of the utility to render the service at cost, plus a fair return upon the investment. One of the objectives of depreciation accounting is to provide a reasonable method for charging currently to income the cost of depreciation, in such orderly manner that those in whose service the property is used up shall pay therefor.

Depreciation accounting results in the accumulation of moneys by the utility, which are commonly referred to as "depreciation funds", or "depreciation reserve funds". Accumulated depreciation funds cannot be returned to the investors of the capital but must be retained by the utilities so that when utility plant wears out in service, funds shall be available to provide new facilities in replacement of the worn out plant. Accordingly, depreciation funds are in the nature of trust funds, maintained for and dedicated to the replacement of worn out plant. The utilities are the custodians of the funds and are responsible for them to the end that funds shall be available as required to replace worn out plant and a continuity of service shall be maintained. And when, pending the use of depreciation funds for the

replacement of worn out plant, the utilities use the funds for other purposes, they are, in practical effect, borrowing from the funds. As we have previously stated, the utilities, from time to time, use the funds for such purposes as working capital, construction of property or investments in securities, and admit that they earn income from such use of the funds. The question before us is the rate of interest that the utilities shall be required to pay for such use of the funds.

We are aware that, to the extent possible, the utilities use accumulated depreciation funds for construction of property and that the utilities earn income from such property. However, it must be borne in mind that such property belongs to the utilities and that they (the utilities) are charged with the responsibility to maintain and operate the property in the public interest to the same extent and in the same manner as they are required to maintain and operate property acquired or constructed from funds derived from investors. The utilities assume all of the hazards and risks associated with the ownership, management and operation of such property, including any losses or reductions of earnings below a fair or compensatory return, whereas the customers assume no responsibilities or risks whatever, with respect to the property. And the utilities are justly entitled to receive proper compensation for assuming those responsibilities and risks. To deprive the utilities of the full amount of the income from such property, as interest on depreciation funds, would be grossly unfair, and would be equivalent to confiscating the property for the exclusive benefit of the customers, and at the same time requiring the utilities to gratuitously operate the property and assume all of the risks as to the property and its operation. However, the customers are entitled to share in such income at least to the extent of the value of depreciation funds, just as any lender of funds is paid from the income of a corporation for the value of his funds.

There is considerable testimony in the record as to the proper rate of interest which should be applied with respect to the utilities' use of depreciation funds. Witnesses for the utilities assert that when the funds

are used for construction of additional property, the interest rate should not exceed, or should be less than the rate the utilities would be required to pay if the funds were borrowed on long-term funded obligations, such as first mortgage bonds. These witnesses introduced evidence showing that, for some time in the past, utility bonds were marketed at approximately 3 percent per annum, and that recently two of our larger Missouri utilities sold their bonds (or debentures) at an approximate yield of 2 3/4 percent. The witnesses point out that the cost of money and the worth or value of money are largely dependent on the element of risk, and maintain that there is less risk associated with depreciation funds than with any class of utility capital, even first mortgage bonds. In support of their position, the witnesses point out that the income attributable to the use of depreciation funds would be applied for the benefit of customers in reduction of the utilities' allowable return prior to and without regard to the payment of interest on bonds or other obligations, and, thus, that as to safety of income, depreciation funds rank ahead of bonds or other obligations; and as to principal, that the amounts of depreciation funds to which interest rates would be applied are completely within the jurisdiction of this Commission, and thus are subject to little, if any, risk. The witnesses further contend that, as a matter of fairness, and bearing in mind that interest on depreciation funds will be applied in reduction of the utilities' allowable return, the utilities, in any event, should not be required to pay more for depreciation funds, when used by them for construction of additional property, than they would be required to pay out of their allowable return for funds they could borrow on long-term funded obligation.

Other witnesses referred to the fact that at times the utilities are unable to use depreciation funds for construction of additional property. They point to the recent war period, when restrictions on materials needed for the war effort so curtailed construction that many utilities could not use depreciation funds for property additions and extensions, and that as a result, depreciation funds remained idle or were invested in short-term

government securities, yielding in many instances less than 1 percent per annum. It was stated that similar conditions have occurred during periods of high prices or industrial depression. The witnesses further stated that even in normal times accumulated depreciation funds cannot always be immediately used for property additions, resulting in a lag between the time the funds become available and the time they may be so used, during which periods the funds are idle and earn no income. The witnesses urged that these conditions be taken into account in fixing the interest rate for depreciation funds.

Other witnesses for the utilities expressed the view that an appropriate interest rate for depreciation funds should not exceed the interest rates on government securities, which they stated range from less than 1% to approximately 2% per annum. They pointed to the trust character of depreciation funds, and asserted that the interest rate for government securities most nearly reflects the worth of trust funds and the risks associated with trust funds.

An Exhibit which was submitted in evidence to show yields on a representative list of high grade bonds included only two Missouri utility companies. One of these was earning a yield to maturity of 3.46%, the other was earning 2.63%. The Commission is aware that only two Missouri utilities have bonds outstanding which bear a coupon rate of less than 3%. Other utility bonds which have been issued in Missouri have coupon rates in excess of 3%. In some cases the rate is considerably in excess of 3%.

We have given careful consideration to all of the evidence introduced in this proceeding, and also to the principles above discussed relating to the nature of depreciation funds. There can be no doubt that when the utilities use depreciation funds for construction of property (which, as we have before indicated, represents the predominant use of the funds) the utilities are entitled to just compensation for discharging their obligations to manage and operate such property in the public interest, and for assuming the

U  
risks associated with such property, and that to deprive the utilities of a disproportionate share of the permissible income from such property, as income on depreciation funds, would be unfair to the utilities. On the other hand, the customers of the utilities, who supply depreciation funds, are entitled to receive adequate and just recognition with respect to the use of the funds by the utilities consistent with the worth or value of the funds.

The fixing of an interest rate for depreciation funds is an integral part of the rate making process in public utility regulation, since the interest credit produced thereby directly affects the utilities' allowable return and the rates charged to the public for utility service. The Public Service Commission Act (Chapter 35, R.S. Mo. 1939) establishes the policies of this State in connection with public utility regulation, and while these policies are necessarily set forth in the act in broad outline, Section 5579 of the act vests this Commission with "all powers necessary or proper to enable it to carry out fully and effectually all of the purposes (of the act),<sup>2</sup> And one of the primary purposes of our Public Service Commission Act is just and reasonable rates and charges for utility service.

Accordingly, we believe that the fixing of the interest rate for depreciation funds is a function of the regulatory authority, and that under the general powers delegated to us we are authorized to fix the interest rate for depreciation funds to the end that the rates charged in this State for public utility service shall be just and reasonable, and the policies established by the legislature shall be fully and effectually carried out. Moreover, Sections 5656 and 5680 of the act authorize this Commission, in connection with depreciation funds, to prescribe, in its discretion, rules and regulations "both as to original expenditure and subsequent replacement" of such funds and further provide, "The income from investments of moneys in such fund shall likewise be carried in such fund." We believe that such authority

<sup>2</sup> As was stated in the Report to the Board of Public Utility Commissioners of New Jersey on the Rate Adjustment Plan for New Jersey Power & Light Company (see Page 66) "The utility is entitled to compensation for management of the investment and for performance of the risk taking function. Unless the enterprise is reasonably compensated, management might be expected in the absence of regulatory restraint, to reduce the risk and responsibility by investment (of depreciation funds) in government bonds, or other relatively risk-free securities."

necessarily includes the authority to prescribe rules and regulations as to the amounts to be credited for the use of such funds.

Upon consideration of all of the evidence in this matter, and based upon our intimate knowledge of the operations and finances of the utilities under our jurisdiction, and taking into consideration the fact that the utilities at times, varying with economic conditions, are not able to invest depreciation reserve funds in income producing assets, we are of the opinion that an appropriate interest rate for use in determining the income from the investment of moneys in depreciation funds to be applied in the rate making process in reduction of the utilities' allowable return is 3% per annum. We are also of the opinion, since the circumstances surrounding the use of depreciation funds are generally the same as to all utilities, that such rate should be applied in the case of all of the gas, electric, water, telegraph, telephone, and heating utilities under our jurisdiction. However, if it should appear to the Commission or if any utility shall prove that due to unusual or extraordinary circumstances, such rate is not fairly and equitably applicable to it, such rate may be modified according to the circumstances of the particular case.

In conclusion, we are of the opinion that the ratemaking practices and policies established in this order are an important step in promoting efficient public utility regulation in this State. This is particularly true in connection with our announced policy relating to the establishment of the utility rate base in future proceedings. For a rate base predicated on original cost can be fixed with a minimum of delay, and original cost having once been established, can be brought up to date on short notice. Moreover, and of equal importance, is the fact that original cost avoids the inflationary effects of reproduction cost in the establishment of the rate base. Also, the consideration of income from the investment of moneys in depreciation reserve funds in the fixing of rates is in the direction of reducing the overall cost of service.

We are also of the opinion that these practices and policies will be of advantage to the utilities. Their rate base will be stable, and they will be able to determine at all times with reasonable exactitude their position as to allowable income, and thus be in a position to plan more intelligently for the future. In addition, the public utility industry requires large amounts of capital which must be secured on the open market in competition with other industries. And with a stabilized rate structure, capital requirements can be more effectively financed.

Accordingly, it is

ORDERED: 1. That General Order 38-A, issued by this Commission on August 14, 1944, be and is hereby cancelled, set aside and for naught held.

ORDERED: 2. That in the process of determining the reasonableness of rates for service, income shall be determined on the depreciation funds of the gas, electric, water, telegraph, telephone and heating utilities pertaining to their properties used and useful in the public service in Missouri, and shall be applied in reduction of the annual charges to operating income of such utilities.

ORDERED: 3. That the income from the investment of moneys in depreciation funds shall be computed at the rate of 3 percent per annum of the principal amount of such depreciation funds.

ORDERED: 4. That the principal amount of depreciation funds of any such utility, for the purposes of this order, shall be deemed to be equivalent to the balance in the depreciation reserve account of any such utility regardless of whether or not any such depreciation reserve account may be represented by a segregated fund earmarked for such purpose; provided, however, that the principal amount of such depreciation funds may be adjusted by the portion or portions thereof which may have been provided under circumstances other than by charges to operating income, or otherwise, such adjustments to be subject to the approval of this Commission. The terms "depreciation funds" and "depreciation reserve accounts" shall be deemed to

include the terms "retirement funds" and "retirement reserve accounts."

ORDERED: 5. That the rate of 3 percent per annum referred to in Ordered: 3 above shall be applied in the case of each gas, electric, water, telegraph, telephone and heating utility of the State of Missouri, provided, however, that modification of such rate may be made upon the Commission's own motion or upon proper showing by a utility that such rate is not reasonably and equitably applicable to it.

ORDERED: 6. That such utilities shall prepare and include in their annual reports to this Commission commencing with their annual reports for the year 1945, and in such other reports that may be required by this Commission from time to time, schedules showing for the year or period covered by such reports, the income from the investment of moneys in depreciation funds. The schedules referred to shall be in the form prescribed by this Commission and shall include, among other things that may be prescribed (1) the principal amount of depreciation funds as represented by balances in depreciation reserve accounts; (2) any adjustments of such depreciation funds and accounts with complete details and explanations thereof; and (3) the amount of the income from the investment of moneys in depreciation funds computed at the rate of 3 percent per annum, or such other rate as may be prescribed by order of this Commission.

ORDERED: 7. That the Commission shall retain jurisdiction of this proceeding for the purpose of making any change or changes in the interest rate prescribed in paragraph "Ordered: 3" hereof that may be warranted.

ORDERED: 8. That this order shall take effect on and after January 31, 1946, and that the Secretary of this Commission shall forthwith serve a copy of this order on all parties interested herein, and that said interested parties be required to notify the Commission on or before January 31, 1946 in the manner required by Section 5601, R.S. Mo. 1939, whether the terms of this order are accepted and will be obeyed.

Osburn, Chr., Williams, Henson and McClintock, CC., concur.  
Wilson, C., dissents in separate opinion.

BY THE COMMISSION  
*Willard B. Leavitt*  
WILLARD B. LEAVITT,  
SECRETARY

Dated at Jefferson City, Missouri,

Schedule 3-15

DISSENTING OPINION OF COMMISSIONER WILSON

I am unable to concur in this order. I am still of the opinion which I expressed on July 17, 1944 at the time of the issuance of General Order No. 38, and On August 14, 1944 at the time of the issuance of General Order No. 38-A that there is nothing in the language of the statute - Sections 5656 and 5680, R.S. Mo. 1939 - either express or implied, or elsewhere in the law which authorizes the making of such an order.

Under these sections this Commission does not have power to fix the rate for earnings upon the depreciation account. In the case of State ex rel. Empire District Electric Company v. Public Service Commission, 339 Mo. 1188, 100 SW (2d) 509 l.c. 511, Judge Frank speaking for the Court said:

"The power of the commission to make orders relative to the depreciation reserve of the company is conferred by statute. We must therefore look to the statute to determine whether the commission had authority to make the order in question. It has been well said that, 'when a particular power is exercised by the commission, or is claimed for it, that power should have its basis in the language of the statute, or should be necessarily implied therefrom.' People ex rel. Railways Co. v. Public Service Commission, 223 N.Y. 373, 119 N.E. 848, 849; Havre De Grace & Perryville Bridge Co. v. Towers, 132 Md. 16, 103 A. 319. Turning to the statute, we find that it gives the commission power, after hearing, to make an order requiring the company to carry a depreciation reserve account in an amount fixed by the commission, subject to the regulatory control of the commission."

At the hearing it was given as an opinion by the President of the Union Electric Company of Missouri testifying upon behalf of the utilities that the Commission does not have the power to fix a rate for earnings upon the depreciation account under the language of the last sentence contained in said Sections 5656 and 5680, i.e., "The income from investments of moneys in such fund shall likewise be carried in such fund." This witness stated that it was his opinion that that language applied to the sinking-fund method rather than the straight-line method of providing for depreciation. The witness stated that it was his opinion that the Commission had the power to fix a rate for the earnings on the investment of depreciation funds in determining what is a fair rate and what is a fair rate base. I agree with the opinion of this witness that this language does not apply to the straight-line method of providing for depreciation and believe that this language

in the statute is probably explainable by the fact that the Public Service Commission was originally considered to have jurisdiction over municipally-owned utilities the depreciation requirements of which are generally provided for under the terms of the mortgages in the form of a sinking-fund.

I cannot agree, however, that our general rate-making powers give us the right to fix a rate for the earnings upon the depreciation account applicable to all electric, gas, water, steam-heating, telegraph and telephone utilities operating under the jurisdiction of this Commission alike when conditions and circumstances relating to the investment of depreciation accounts vary with the several utilities. That there are various circumstances was recognized by counsel conducting the hearing on behalf of the utilities at the outset of the hearing and is recognized by the Report and Order itself in providing in ORDERED: 5. that "modification of such rate may be made upon the Commission's own motion or upon proper showing by such utility that such rate is not reasonably and equitably applicable to it." It is my belief that even if the Commission had power to make a general order upon this subject, and if the matter were a proper subject for a general order, which I do not think it is, the evidence is not sufficient upon which to base such a general order as the Commission does not have before it ample evidence touching the circumstances relating to the various utilities, and the rate so fixed can be nothing more than a guess and it is conceivable that it may result that there are as many exceptions as there are utilities which may come within the provisions of the Order.

The statute reads in part as follows:

"The commission may, from time to time, ascertain and determine and by order fix the proper and adequate rates of depreciation of the several classes of property of such corporation, person or public utility."

It is to be noted that the singular number is used - "corporation, person or public utility" not corporations, persons and public utilities. Also, the statute reads further:

"Each gas corporation, electrical corporation and water corporation shall conform its depreciation accounts to the rates so ascertained, determined and fixed, and shall set aside the moneys so provided for out of earnings and

carry the same in a depreciation fund and expend such fund only for such purposes and under such rules and regulations, both as to original expenditure and subsequent replacement, as the commission may prescribe."

In Section 5680 relating to telegraph and telephone corporations the language used is as follows:

"The commission, may, from time to time, ascertain and determine and by order fix the proper and adequate rates of depreciation of the several classes of property of such public utility."

and:

"Each telegraph corporation and telephone corporation shall conform its depreciation accounts to the rates so ascertained, determined and fixed, and shall set aside the money . . ."

Section 5638 relating to common carriers provides in part as follows:

"The commission may, from time to time, ascertain and determine and by order fix the proper and adequate rates of depreciation of the several classes of property of such corporation, person or public utility. Each railroad corporation, street railroad corporation and common carrier shall conform its depreciation accounts to the rates so ascertained, . . ."

I believe this statute contemplates that depreciation requirements shall be fixed by the Commission for each utility singly and not collectively. It is my opinion that this matter is not a proper subject for a general order, but that the jurisdiction of the Commission over the depreciation reserve of the several companies should be exercised in individual cases, and I do not consider this impossible or impracticable, but rather a problem that can be accomplished with an adequate staff and diligent effort.

The Order is further objectionable for the reason that it assumes that the Commission has power to require the investment of the depreciation account. If the depreciation account is not invested and there are no earnings, then the fixing of three per cent is confiscatory and for that reason unlawful.

Section 5638 R.S. Mo. 1939 is identical with Sections 5656 and 5630 except that it applies to railroad corporations, street railroad corporations and common carriers. This Order is not made applicable to railroad corporations, street railways and common carriers and for that reason is discriminatory.

Underscoring by writer:

After careful consideration, it is my opinion that the Order is unlawful and exceeds the powers of the Commission.

Agnes Mac Wilson  
Commissioner.

Mr. Steve Dottheim  
Missouri Public Service Commission  
200 Madison Street, Suite 100  
Governor Office Building  
Jefferson City, MO 65101

Re: Case No. EC-2002-1

Dear Mr. Dottheim:

AmerenUE hereby objects to Staff Data Request No. 179 in the above matter on the grounds that the information requested is irrelevant to the issues in this proceeding. In addition, the information sought by this data request would be unduly burdensome for AmerenUE to produce in that it covers rate cases filed since 1950 and annual reports filed since 1945. Finally, the Company objects to the request on the ground that it seeks information that is equally accessible by both the Staff and the Company in the Commission records department or in reported cases. Notwithstanding this objection, AmerenUE will provide a response to this request to the extent it seeks information which is not objectionable, and which is in the Company's possession.

If you have any questions, please contact me or Mary Hoyt to discuss our objection to this data request.

Very truly yours,

A handwritten signature in black ink, appearing to read "Thomas M. Byrne", with a long, sweeping underline.

Thomas M. Byrne  
Associate General Counsel

XXXX	1,516,760.44		272,263.17		441,219.61		

(1) Applicable only to utilities with natural gas operations.

(2) This account is prescribed in the NARUC system of accounts but not in the FPG system of accounts. If the account is used, particulars concerning the rents should be reported as required in the schedule entitled "Rent for Lease of Utility Plant."

Note: If the columns are insufficient for additional utility departments, supply the appropriate account titles, check 1 to 20, and report the information in the blank space above or on an insert page.

**SPECIAL DEPRECIATION SCHEDULE**

**PROPERTY ON DEPRECIATION RESERVE FUNDS - STATE OF MISSOURI**

1. Report this information called for concerning interest on depreciation funds during year applicable to operations within the State of Missouri.

2. Average depreciation reserve balances should be the total of depreciation reserve balances applicable to operations within the State of Missouri at the end of each month, and should be averaged for the year.

3. Adjustments should include such portions of depreciation reserve balances as are claimed by respondent not to be subject to interest credits. Furnish details of such adjustments, giving additional sheets if necessary.

LINE No.	ITEM (a)	Depreciation Reserve Total (b)	Depreciation Reserve Electric Dept. (c)	Depreciation Reserve Gas Dept. (d)	Depreciation Reserve Water Dept. (e)	Depreciation Reserve Heating Dept. (f)	Depreciation Reserve Other (g) (2)
1	Average depreciation reserve balance (Total) (Note 1)	31,724,128.09	27,555,338.02			392,927.39	3,775,862.68
2	Adjustments	1,274,263.50	1,274,263.50			392,927.39	3,775,862.68
3	Adjusted average depreciation reserve balance	30,449,864.59	26,281,074.52			11,787.82	113,275.83
4	Earnings on adjusted balance line 3 at 3 per cent per annum.	913,495.94	788,432.24				
DETAILS OF ADJUSTMENTS:							
Depreciation accruals for the period January 1, 1940 to December 31, 1949 incl. applicable to Licensed Project No. 459 voluntarily set aside by Company in addition to depreciation allowance made by Missouri Public Service Commission for rate making purposes in Report and Order dated February 20, 1937 in Cases 5905-7593		1,274,263.50	1,274,263.50				
Notes:							
(1) Average depreciation reserve balances include reserve balance provided for amortization of limited term investments as follows: Account 251 - Reserve for Amortization of Limited Term Electric Investments \$39,616.86 Account 253 - Reserve for Depreciation and Amortization of Other Property (Reserve for Amortization of Limited Investments - Heating Department) 271.90							
(2) The average depreciation reserve balance applicable to common utility plant is allocable as follows: Electric Department \$2,624,041.81 Heating Department \$1,141,620.87							

**INVESTMENTS - Schedule 101-111.7-112-123**

1. Report below investments in Accounts 111.7, 112, 123, investments in Securities of Associated Companies 111.2, 112, 123, by Associated Companies 112, Other Investments, and 123, Temporary Cash Investments.

2. Provide a statement for each account and list thereunder the instructions called for observing the instructions below.

3. Investments in Securities - List and describe each security owned, giving name of issuer. For bonds give also principal amount, date of issue, maturity, and interest rate. For capital stock state number of shares, class and series of stock. Minor investments may be grouped by class.

4. Investment Advances - Report separately for each person or company the amounts of loans or investment advances which are subject to repayment but which are not subject to current settlement. With respect to cash advances show whether the advance is a note or open account. Each note should be listed giving date of issuance, maturity date, and specifying whether note is a renewal. Designate any advances from officers, directors, stockholders, or employees.

5. For any securities, notes, or accounts that were pledged, designate such securities, notes, or accounts and in a footnote state the name of pledgee and purpose of the pledge.

6. If Commission approval was required for any advance made of security acquired, designate such fact and in a footnote give name of Commission, date of authorization, and class or ticket number.

7. Interest and dividend revenues from investments should be reported in column (d), including such revenues from securities disposed of during the year.

8. In column (f) report for each investment disposed of during the year the gain or loss represented by the difference between cost of the investment (or the other amount at which carried in the books of account if different from cost) and the selling price therefor, not including any dividend or interest adjustment includible in column (d).

Notes -

- The stocks of Union Electric Power Company are pledged with the St. Louis Union Trust Co., St. Louis, Missouri, under the indenture securing the First Mortgage and Collateral Trust Bonds of the Respondent.
- Common stocks of the companies constituent to a merger effected May 28, 1937, resulting in the present Union Electric Power Co. were acquired in 1923, 1928, and 1933. Acquisition loans in 1923 and 1928 were authorized by the Mo. P.S.C. on Nov. 8, 1923 in Case No. 374 and on Sept. 27, 1928 in Case No. 8091.
- In accordance with an agreement made with the Securities and Exchange Commission in 1945, in connection with proceedings under Section 11 (e) of the Public Utility Holding Company Act of 1935, the Respondent was required to dispose of \$6,698,303.45 by charges to either income or surplus over a period not to exceed thirty-three years from May 31, 1945. At December 31, 1949, \$1,528,833.31 of a r. amount has been disposed of by charges of \$941,833.31 and \$585,000 to income (Account 338) and Earnings Surplus, respectively. In 1945, the Respondent reduced its investment in the subsidiary \$2,111,947.47 by charging Earnings Surplus, which amount was equivalent to the undistributed surplus of Mississippi River Power Company realized upon merger into the Respondent.
- Cost to Respondent, \$804,831.93. The difference from book cost is due to write-down of the Respondent's investment in Peoples Station Light, Heat and Power Company (now Ceyer Realty Company) to reflect losses attributable to discontinuance of the subsidiary's major operations.
- Of the total investment in Poplar Ridge Coal Company, \$2,885,115.68, applicable to 28,700 shares, represents capital contribution from The North American Company, parent. The acquisition of the capital stock of Poplar Ridge Coal Company was authorized by the SEC on July 20, 1949 in File No. 54-176.
- Authorized by Mo. P.S.C. on 8/5/41, Case No. 10,100. by SEC on 5/27/41, File No. 70-313.
- Authorized by Mo. P.S.C. on 11/28/41, Case No. 10,129; by SEC on 12/1/41, File No. 70-479.
- The acquisition of the preferred stock, 3 3/8% Series was authorized by Mo. P.S.C. on 3/23/42, Case No. 10,181; by SEC on 4/3/42, File No. 70-508.
- Authorized by Mo. P.S.C. on 8/9/44, Case No. 10,448; by SEC on 5/4/45, File No. 54-85.
- Authorized by Mo. P.S.C. on 11/3/47, Case No. 11,206; by SEC on 11/24/47, File No. 70-1654.
- The acquisition of the preferred stock, 3% Series was authorized by Mo. P.S.C. on 5/4/43, Case No. 11,339; by SEC on 5/18/48, File No. 70-1817.
- Authorized by Mo. P.S.C. on 9/23/43, Case No. 11,768; by SEC on 9/19/43, File No. 70-2203.
- Authorized by SEC on 4/8/47, File No. 70-1459.

5. Contributions	2,278,790.42	2,278,790.42
6. General		
7. TOTAL	28,236,931.47	28,236,931.47

ELECTRIC OPERATING REVENUES (Account 501)

1. Report both the amount of increasing revenues for the year for each prescribed account and the amount of increase or decrease over the preceding year.  
 2. If increases and decreases are not derived from previously reported figures explain any inconformities.  
 3. Number of customers should be reported on the basis of meters of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer shall be counted for each group of meters reported figures explain any inconformities.  
 4. The average number of customers means the average of the 12 figures at the close of each month.  
 5. Unmetered sales should be included below. The details of such sales should be given in a footnote.

Line No.	Account	OPERATING REVENUES		KILOWATT-HOURS SOLD		AVERAGE NUMBER OF CUSTOMERS PER MONTH

ELECTRIC OPERATING EXPENSES

1. Enter in the space provided the electric operating expenses for the year.
2. The designations in columns (b) and (c) indicate the accounts prescribed for each class of utility.
3. If the increases and decreases are not derived from previously reported figures explain in footnotes.

**DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Accounts 503, 504)**

(Except Amortization of Acquisition Adjustments)

1. Report in section A the amounts of depreciation (account 503) and amortization of limited-term electric investments (account 504) for the year, classified according to plant functional classifications.

of electric plant. Show the rates used in computing the depreciation and amortization charges for the year, and state if any change has been made in the rates used or methods of determining depreciation and amortization charges from those used for the preceding year.

2. In section B state the rules by which the respondent determined the amounts of charges for depreciation and amortization

**A. Summary of Depreciation and Amortization Charges**

Line No.	Functional classification (a)	Depreciation (account 503)		Amortization of limited-term electric investments (account 504)		Total depreciation and amortization (d)

**B. Method of Determination of Depreciation and Amortization Charges**

**Depreciation Charges**

The provision for depreciation was based upon lump sum allowances made by the Missouri Public Service Commission in report and order issued February 20, 1937, in Cases 5905 and 7593, plus an additional provision from income for the year 1949 amounting to \$97,289. The allowances by the Missouri Public Service Commission amounted to \$1,975,000 per annum as of April 30, 1935, plus 3% per annum of net additions of depreciable property subsequent to April 30, 1935. The depreciation provision for the year 1949 amounted to the following percentages of the average investment in depreciable plant:

Osage Hydro-Electric Project	1.30%
All Other Property	2.84%

The additional provision of \$97,289, referred to above, was made in respect of the Osage Hydro-Electric Project, exclusive of appurtenant transmission lines, and was determined by subtracting the lump sum allowance applicable to such property which was made by the Missouri Public Service Commission from a computed total provision which was based on application of the following depreciation rates to the various plant accounts:

<u>Hydraulic Production Plant</u>		
321	Structures and Improvements	1.0%
322	Reservoirs, Dams and Waterways	1.0%
323	Water Wheels, Turbines, and Generators	1.7%
324	Accessory Electric Equipment	2.2%
325	Miscellaneous Power Plant Equipment	2.7%
326	Roads, Railroads, and Bridges	1.7%

(Continued on Page 89A)

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT - Continued

B. Method of Determination of Depreciation and Amortization Charges (Continued)

Transmission Plant

343	Station Equipment	2.4%
347	Underground Conduit	2.0%
348	Underground Conductors and Devices	2.0%

Distribution Plant

354	Poles, Towers, and Fixtures	2.5%
355	Overhead Conductors and Devices	2.1%
356	Underground Conduit	2.0%
357	Underground Conductors and Devices	2.3%
358	Line Transformers	2.7%
359-1	Services - Overhead	3.6%
360	Meters	3.3%
363	Street Lighting and Signal Systems	3.8%

General Plant

371-2	Structures and Improvements - Transportation	2.0%
371-3	Structures and Improvements - Stores	2.0%
372	Office Furniture and Equipment	4.5%
373-2	Transportation Equipment - Garage Equipment	4.8%
377	Tools and Work Equipment	4.8%
378	Communication Equipment	4.0%
379	Miscellaneous Equipment	4.8%

The Company used certain depreciation rates for the purpose of allocating the lump sum provision applicable to all property other than the Osage Hydro-Electric property referred to above among functional classifications, but such rates were not determinative of such provision.

There were no changes in rates or methods from those used in the preceding year.

Amortization Charges

The amounts included in electric plant accounts for limited term interests in land and land rights are being amortized over the remaining lives of the respective leases, beginning January 1, 1942.

SCHEDULE NO. 548-H.

101. FIXED CAPITAL—HEATING PROPERTY. (See Note 1)

1. Show the particulars indicated by the columnar headings for all heating fixed capital accounts, the cost of which is classified in accordance with the Uniform System of Accounts for Heating Companies prescribed by this Commission, dated January 1, 1915.
2. Adjustments during the year should be interpreted to mean entries, if any, made in fixed capital accounts to record corrections or modifications of entries made in prior accounting periods.
3. Show only heating fixed capital accounts in this schedule. Do not interline or insert other accounts. Do not group accounts.

16 Balance at end of year				333 600 13		

BAIS FOR DEPRECIATION ACCRUALS.

Give in detail the rules and rates by which the respondent determined the amount of accrued depreciation charged to operating expenses and credited to the above retirement reserve account. Show for each department the basis, the base amount, the rate, and the amount of accrued depreciation.

Item (a)	Base amount (b)	Rate (c)	Accrued depreciation (d)
17 The accrual for depreciation was based upon the allowance by the Missouri Public Service Commission in Cases 6905-7693. The allowance by the Missouri Public Service Commission (exclusive of depreciation on property carried in electric and common utility plant accounts) is allocable to steam heating department) amounted to \$47,413 per annum as of April 30, 1935, plus 2% of all net additions of depreciable property made subsequent to April 30, 1935.			68 158 00
18 Note (1):			
19 This schedule does not include any portions of reserves for depreciation applicable to			
20 (a) Ashley Street Power Plant, which is recorded as Common Utility Plant and (b) miscellaneous general facilities, which are recorded as Electric Utility Plant. Portions of such applicable reserves are allocable to heating operations. In addition to the accrual of \$68,158.00 shown above, the sum of \$119,564.22 is charged to operating expense account 412 - depreciation representing the portions chargeable to heating operations of depreciation accruals for the following facilities:			
21 Ashley Street Power Plant (Common Utility Plant)	\$117,865.14		
22 Misc. General Facilities (Electric Utility Plant)	1,699.08		
23	\$119,564.22		

SCHEDULE NO. 527-R.

HEATING DEPARTMENT—OPERATING REVENUES AND SALES.

Show the heating operating revenues and the pounds of steam sold during the year by the various classes of revenue for each city, town, and village in which the respondent rendered service at any time during the year. The number of pounds of steam sold to flat-rate consumers should be estimated.

**SPECIAL DEPRECIATION SCHEDULE**

**INTEREST ON DEPRECIATION RESERVE FUNDS—STATE OF MISSOURI**

1. Shows the information asked for concerning interest on depreciation funds during the year.  
 2. Adjustments should include such portions of depreciation reserve balances as are applicable to operations within the State of Missouri.  
 3. Average depreciation reserve cost should be the total of depreciation reserve account by respondent to be subject to interest credit. Furnish details of such adjustments applicable to operations within the State of Missouri at the end of each month, or 3 months, using additional sheets if necessary.

**DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT (Accounts 503, 504)**  
(Except Amortization of Acquisition Adjustments)

1. Report in section A the amounts of depreciation (account 503) and amortization of limited-term electric investments (account 504) for the year, classified according to plant functional classification.
2. In section B state the rules by which the respondent determined the amounts of charges for depreciation and amortization of electric plant. Show the rates used in computing the depreciation and amortization charges for the year, and state if any change has been made in the rates used or methods of determining depreciation and amortization charges from those used for the preceding year.

**A. Summary of Depreciation and Amortization Charges**

Line No.	Functional classification (a)	Depreciation (account 503)		Amortization of limited-term electric investments (account 504)		Total depreciation and amortization

**B. Method of Determination of Depreciation and Amortization Charges**

**Depreciation Charges**

The provision for depreciation was based upon lump sum allowances made by the Missouri Public Service Commission in report and order issued February 20, 1937, in Cases 5905 and 7593; plus an additional provision from income for the year 1952 amounting to \$75,716. The allowances by the Missouri Public Service Commission amounted to \$1,975,000 per annum as of April 30, 1935, plus 3% per annum of net additions of depreciable property subsequent to April 30, 1935. The depreciation provision for the year 1952 amounted to the following percentages of the average investment in depreciable plant:

Osage Hydro-Electric Project	1.37%
All Other Property	2.87%

The additional provision of \$75,716, referred to above, was made in respect of the Osage Hydro-Electric Project, exclusive of appurtenant transmission lines, and was determined by subtracting the lump sum allowance applicable to such property which was made by the Missouri Public Service Commission from a computed total provision which was based on application of the following depreciation rates to the various plant accounts:

<b>Hydraulic Production Plant</b>	
321 Structures and Improvements	1.0%
322 Reservoirs, Dams and Waterways	1.0%
323 Water Wheels, Turbines and Generators	1.7%
324 Accessory Electric Equipment	2.2%
325 Miscellaneous Power Plant Equipment	2.7%
326 Roads, Railroads and Bridges	1.7%

(Continued on Page 89A)

DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT - Continued

B. Method of Determination of Depreciation and Amortization Charges (Continued)

Transmission Plant

343	Station Equipment	2.7%
347	Underground Conduit	2.0%
348	Underground Conductors and Devices	2.0%

Distribution Plant

354	Poles, Towers and Fixtures	4.0%
355	Overhead Conductors and Devices	2.8%
356	Underground Conduit	2.0%
357	Underground Conductors and Devices	2.3%
358	Line Transformers	2.7%
359	Overhead Services	3.6%
360	Meters	3.3%
363	Street Lighting and Signal Systems	3.8%

General Plant

371-2	Structures and Improvements - Transp.	2.0%
372	Office Furniture and Equipment	4.5%
373-2	Transportation Equipment - Garage Equipment	4.8%
377	Tools and Work Equipment	4.8%
378	Communication Equipment	4.0%
379	Miscellaneous Equipment	4.8%

The Company used certain depreciation rates for the purpose of allocating the lump sum provision applicable to all property other than the Osage Hydro-Electric property referred to above among functional classifications, but such rates were not determinative of such provision.

There were no changes in rates or methods from those used in the preceding year.

Amortization Charges

The amounts included in electric plant accounts for the limited term interests in land and land rights are being amortized over the remaining lives of the respective leases, beginning January 1, 1942.

SCHEDULE NO. 54-A

RESERVE FOR DEPRECIATION

Give particulars called for concerning credits and debits to the reserve for depreciation account of each department detailed below.

Item (a)	Power Department (b)	Water Department (c)	Heating Department (d)	Other utility departments (e)	Non-utility departments (f)
1 Balance at beginning of year (credit).....			487,763.31		
2 Accrual charged to Operating Expenses or "Depreciation".....			77,228.00 (1)		
3 Other credits (debits): Damage credits.....			73.99		
4					
5					
6					
7 Total credits.....			545,064.30		
8 Retirement of Fixed Capital during the year.....			11,234.46		
9 Other debits (credits):.....					
10					
11					
12					
13					
14 Total debits.....			11,234.46		
15					
16 Balance at end of year.....			533,829.84		

BASIS FOR DEPRECIATION ACCRUALS

Give in detail the rate and ratio by which the respondent determined the amount of accrued depreciation charged to operating expenses and credited to the above retirement reserve account. Show for each department the basis, the base amount, the rate, and the amount of accrued depreciation.

The accrual for depreciation was based upon the allowance by the Missouri Public Service Commission in Cases 5905-7593. The allowance by the Missouri Public Service Commission (facilities of depreciation on property carried in electric and common utility plant accounts but allocable to steam heating department) amounted to \$47,413 per annum as of April 30, 1935, plus 2% of all net additions of appreciable property made subsequent to April 30, 1935.

Note (1):

This schedule does not include any portions of reserves for depreciation applicable to (a) Ashley Plant, which is recorded as Common Utility Plant and (b) miscellaneous general facilities, which are recorded as Electric Utility Plant. Portions of such applicable RESERVES ARE ALLOCABLE to heating operations. In addition to the accrual of \$77,228.00 shown above, the sum of \$153,644.00 is charged to operating expense account 412 - Depreciation, representing the proportions chargeable to heating operations of depreciation accruals for the following facilities:

Ashley Plant (Common Utility Plant)	\$161,940.00
Miscellaneous General Facilities (Electric Utility Plant)	1,704.00
	\$163,644.00

UNION ELECTRIC COMPANY OF MISSOURI

Year ended December 31, 1948

PARTICULARS CONCERNING CERTAIN OTHER INCOME ACCOUNTS

In this schedule the information specified in the instructions below for the respective other income accounts. Provide miscellaneous subheading for each account and show a total for the account. Additional columns may be added for any account if deemed necessary.

1. Income from Non-Utility Operations (Account 521) - Describe each non-utility operation and show revenues, operating expenses, depreciation, amortization, taxes, other deductions and net income from the operation. Specify nature of other deductions. Give the basis of any important aggregations of expenses between utility operations and non-utility operations.

2. Revenues from Lease of Other Physical Property (Account 522) - For each other physical property leased give name of lessee, description of property, effective date of lease, expiration date of lease, and amount of revenue. If the property is leased on a basis other than that of a fixed annual rental, give particulars of the method of determining the rental. Minor items may be

grouped by classes, but the number of items so grouped should be shown. Designate any lessees which are associated companies.

4. Revenues from Sinking and Other Funds (Account 525) - For each sinking and other fund report the interest, dividends, and other revenues derived during the year. Show account number in which each such fund is included.

5. Miscellaneous Non-Operating Revenues (Account 526) - Give the nature and source of each miscellaneous non-operating revenue and the amount thereof for the year. Minor items may be grouped by class.

6. Non-Operating Revenue Deductions (Account 527) - For each non-operating revenue deduction included in this account, give nature of the deduction, account in which the related revenue is included, and amount of the deduction. Minor items may be grouped according to accounts in which the related revenues are included.

18	Depreciation applicable to property acquired from non-affiliated companies	16,999.30	16,999.30			
19	BALANCE END OF YEAR	\$ 39,048,051.43	\$ 39,048,051.43			

B. Classification of Reserve at End of Year According to Functional Classifications

Line No.	Classification	Amount
41	Steam production	2,236,696.28
42	Hydraulic production	5,770,734.42
43	Internal combustion engine production	6,060,123.54
44	Transmission	22,121,849.73
45	Distribution	2,858,647.46
46	General	39,048,051.43
47	TOTAL	\$ 39,048,051.43

**DEPRECIATION AND AMORTIZATION OF ELECTRIC PLANT** (Accounts 503, 504)  
(Except Amortization of Acquisition Adjustments)

1. Report in section A the amounts of depreciation (account 503) and amortization of limited-term electric investments (account 504) for the year classified according to plant functional classifications.

2. In section B state the rules by which the respondent determined the amounts of charges for depreciation and amortization

of electric plant. Show the rates used in computing the depreciation and amortization charges for the year, and state if any change has been made in the rates used or methods of determining depreciation and amortization charges from those used for the preceding year.

**A. Summary of Depreciation and Amortization Charges**

Line No.	Functional classification (a)	Depreciation (account 503) (b)	Amortization of limited-term electric investments (account 504) (c)	Total Depreciation and amortization (d)
1	Steam production plant.....	\$ 612 774.00		\$ 612 774.00

5	Distribution plant.....	3 076 593.00	89.00	3 076 682.00
6	General plant.....	280 974.00	5 052.00	286 026.00
	<b>TOTAL</b>	<b>5 008 866.40</b>	<b>5 141.00</b>	<b>5 012 007.40</b>

**B. Method of Determination of Depreciation and Amortization Charges**

**Depreciation Charges**

The provision for depreciation was based upon lump sum allowances made by the Missouri Public Service Commission in report and order issued February 20, 1935, in Cases 5905 and 7593; plus additional provisions from income for the year 1953 amounting to \$175,040. The allowances by the Missouri Public Service Commission amounted to \$1,975,000 per annum as of April 30, 1935, plus 3% per annum of net additions of plant subsequent to April 30, 1935. The depreciation provisions for the year 1953 amounted to the following percentages of the average investment in depreciable plant:

Osage Hydro-Electric Project	1.33%
All Other Property	2.91%

The additional provisions of \$175,040 referred to above were made to provide (a) depreciation in the amount of \$128,678 at the rate of 1% per annum on portions of Accounts 320 and 340 and on Account 341, such portions of Accounts 320 and 340 representing all expenditures recorded in such accounts except expenditures for lands held under unrestricted fee title; and (b) additional depreciation in the amount of \$46,364 with respect to the investment in Osage Licensed Project #459 exclusive of Accounts 320, 340 and 341. Such additional depreciation for Osage Licensed Project #459 was determined by subtracting the lump sum allowance for such property which was made by the Missouri Public Service Commission from a computed total provision which was based on application of depreciation rates to individual plant accounts, as follows:
