

Burton Stephen & Karen Elizabeth Kissel, Clayton, MO.
We are senior citizens who have lived in our home for 35 years. We are extremely concerned about the Spire STL Pipeline, which is scheduled to be shut down on December 13. We are on a fixed income and worry that the cost of heating our home will increase dramatically. We are also concerned about the potential for outages and service disruptions.

Please extend the operation of the STL Pipeline so that increased heating costs and potential outages will not affect St Louis seniors.

Thank you.
