Hi-Speed DSL

The Internet is a vital service for households today. Big River Telephone provides various methods of reliable Internet access to suit your growing communications needs. Whether you want to watch movies, listen to music or simply share photos with your family, Big River's Hi-Speed Internet solutions will connect you to the world faster than ever.

By signing up for Internet services through Big River Telephone Company, you automatically receive 5 free email addresses per Internet account. Along with your accounts, you can also enjoy the benefits of junk mail and virus filtering. Reduce spam in your inbox by 90% through this free service.

Hi-Speed DSL

DSL (Digital Subscriber Line) is a technology for bringing high-bandwidth information to homes and small businesses over ordinary copper telephone lines and comes in various forms (ADSL, HDSL, RADSL, and VDSL). Assuming that your home or small business is close enough to a DSL capable central office, Big River Telephone can provide DSL to your home or business at affordable prices.

The speeds that we can offer today range from 1Mbps/128Kbps to 3Mbps/512Kbps. Our DSL does not require being tied to a voice line as is the case with other carriers. For the standard installation fee, Big River will also dispatch a technician to install the DSL at no additional charge.

Although DSL is sufficient for most homes, there are some cases where there is a need for greater upload bandwidth. In those cases where additional bandwidth is needed you will need to call Big River Telephone TOLL FREE at 1-855-BIG RIVER (1-855-244-7483) to discuss our dedicated internet options.
