TELECOMMUNICATIONS COMPANY OR IVOLP PROVIDER ANNUAL REPORT TO THE MISSOURI PUBLIC SERVICE COMMISSION

FILED³
APR 15 2011

For the Calendar Year of
January 1 - December 31, 2010

**Missouri Public
Service Commission**

Please select how the company is certificated or registered with the Commission under the Company Name as shown above (check all that apply):

- ☐ Incumbent Local Telecommunications Company (not competitively classified ILEC)
- ☐ Incumbent Local Exchange Telecommunications Company (competitively classified ILEC)
- ☒ Competitive Local Exchange Telecommunications Company (CLEC)
- ☒ Interexchange Telecommunications Company (IXC)
- ☐ Local Non-switched Telecommunications Provider (classified in EFIS as IXC)
- ☐ Interconnected Voice over Internet Protocol Service Provider (IVoIP)

If more than one certificate or registration is held by the company then keep in mind that you must file an annual report in the Commission's Electronic Filing and Information System (EFIS) based on each certificate or registration. In such situations, we anticipate the annual reports to be identical; however please verify the following:

- ☐ The various annual reports filed in EFIS are **identical**.
- ☐ The various annual reports filed in EFIS are **different**.
- ☒ Not applicable (Company only has one certificate or registration; therefore only one annual report was filed in EFIS.)

Please choose one of the following filing options to indicate the security level of the filing:

- ☒ **Public submission** (NOT Proprietary or Highly Confidential)
- ☐ **Non-Public submission** (Highly Confidential or Proprietary)
(See instructions for special requirements.)

Please review the instructions document before proceeding by using the link below:

Annual 47 C.F.R. § 64.2009(e) CPNI Certification

EB Docket 06-36

Annual 64.2009(e) CPNI Certification for 2010

1. Date filed: February 25, 2011
2. Name of company(s) covered by this certification: CenturyLink (see attachment A)
3. Form 499 Filer ID: See Attachment A
4. Name of signatory: Shirish Lal
5. Title of signatory: Senior Vice-President, Marketing
6. Certification:

I, Shirish Lal, certify that I am an officer of CenturyLink, and acting as an agent of the company, that I have personal knowledge that the company has established operating procedures that are adequate to ensure compliance with the Commission's CPNI rules. (See 47 C.F.R. § 64.2001 et seq)

Attached to this certification is an accompanying statement explaining how the company's procedures ensure that the company is in compliance with the requirements (including those mandating the adoption of CPNI procedures, training, recordkeeping, and supervisory review) set forth in section 64.2001 et seq. of the Commission's rules.

The company has not taken actions (i.e., proceedings instituted or petitions filed by a company at either state commissions, the court system, or at the Commission against data brokers) against data brokers in the past year.

The company has not received customer complaints in the past year concerning the unauthorized release of CPNI.

Methods for Obtaining Customer Approval

CenturyLink uses the opt-out method to obtain customer approval to utilize CPNI for marketing purposes. Customers are able to opt-out at no cost and to effectuate that choice whenever they choose. CenturyLink informs customers of these opt-out methods through a CPNI notice, which is sent to new customers upon initiation of service and to all customers every two years.

CenturyLink uses a combination of one IVR system¹ with three (3) phone numbers to ensure that all customers have the availability of a 7 day/24-hour CPNI opt-out option. CenturyLink residential and business customers are instructed to call a phone number, which connects to either Customer Care or the IVR to make or change their CPNI elections; the Customer Care number is routed to an IVR after hours so that in all cases a 7 day/24-hour opt-out option is available. The customer's election then is recorded by either the Customer Care representative or automatically loaded to the customer's account. Legacy Embarq residential and business customers that have not yet converted to CenturyLink billing systems each have a separate phone number that connects to the IVR and allows for 7 day/24 hour CPNI elections to be made.

A customer's account is coded with either a "Y" or "N" in the CPNI consent flag, depending on the customer's response. If a residential customer does not respond to a CPNI notice within 65 days of service initiation, or if a business customer does not respond within a minimum of 40 days of service initiation, the customer is considered to have approved the use, disclosure and access to CPNI and the account is coded with a "Y." This allows all customers at least 33 days after mailing of the CPNI notice to respond. If the customer denies approval ("N"), that decision remains in effect until the customer affirmatively grants permission to use CPNI. Within this initial period of service initiation, a unique CPNI code is assigned and there is no out of category marketing to customers who have this code, with the exception of when the script for consent is read by a representative, which allows agents to market for the purpose of the one call only.

How CPNI Authorization Records Are Maintained/Used

The Database Marketing (DBM) Group generates customer lists for all marketing campaigns. Campaigns are implemented by the Marketing group, which creates a strategy brief containing the products offered and the criteria for selecting customers to be used, allowing DBM to generate a campaign list that meets those requirements and deliver it to the requestor in the Marketing group. Before conducting marketing campaigns that utilize CPNI, DBM pulls only those accounts with a CPNI indicator of "Y" if the campaign will utilize CPNI to market services out of category. Use of the CPNI by agents for marketing campaigns is also documented. Documentation of campaigns is maintained for a year.

¹ Prior to October 2010, CenturyLink had two (2) IVR systems and three (3) phone numbers that were used for making CPNI elections.

Customer Notice of CPNI Rights/Date of Most Recent Notification

CenturyLink provides new customers with a CPNI notice at the time they establish service and sends renewal CPNI notices to existing customers every two years. The most recent biennial notice was sent to CenturyLink customers in 2009. All new residential and business customers are notified of their CPNI rights via a message contained in the first bill that is sent following the customer's service order. Additionally, some new business customers are notified of their CPNI rights via a notice contained in the Welcome Package. Major Account customers (i.e., accounts that request a non-standard billing format) are sent a packet containing a CPNI notification at the time their service is established.

Company Procedures for CPNI Disclosure

CenturyLink Methods and Procedures (M&Ps) for Business and Residential representatives require a password for release of call detail records (CDR) when requested by telephone. If a customer does not have a password, representatives will offer to call the customer back at the phone number of record to provide the information or alternatively will offer to mail the call records to the billing address on the account. Representatives encourage customers to establish a password to safeguard their account information. Passwords are generally based on response to one of a list of questions that include name of first grade teacher, name of first pet, etc. M&Ps for face-to-face transactions in retail environments that involve CPNI require that the customer present a photo ID that matches the customer responsible for billing or authorized use for that account.

CenturyLink notifies customers of password and address changes to accounts. For password changes, CenturyLink has a process that is triggered by the representative via a letter request, which is systematically sent to the Residential and Business Offline Centers for fulfillment. The process for notifying customers of billing address changes is via a back-end process that monitors billing address changes made in the order entry system. The information is formatted into a file that contains the customer's name and old billing address. This file is loaded into an automated dialing system that attempts to notify the customer by telephone. Another file is created for customers who were not reached via telephone after two (2) attempts and is handed off to a letter fulfillment vendor who then sends the notification via US Mail.

To establish a password for an on-line account, a customer can choose from a variety of questions such as name of first grade teacher, name of first pet, etc. When on-line account passwords are changed, CenturyLink sends e-mail notification to the e-mail address on record provided by the customer.

For release of non-CDR CPNI, standard identity verification methods are used and include password, account number, other information from the account (alternate can be reach number, numbers called, etc) or last four digits of SSN.

For customers who have a CPNI indicator of "No", service representative M&Ps specify how to obtain one-time use permission for using CPNI.

CenturyLink also has a Data Breach Incident Response Plan that includes procedures and who to contact and who to notify if there is a breach of CPNI information.

Training of Company Personnel

Consistent with CenturyLink's commitment to preserving customer privacy, the company has implemented a variety of training programs for its employees regarding the company's policies and employees' obligations to protect customer information. All new Customer Care representatives receive CPNI training as part of their initial job training. The CPNI training program explains CenturyLink's legal obligations regarding the access, use, storage, and disclosure of CPNI and discusses the application of the FCC's rules to the company's operations. On an ongoing basis, Customer Care representatives have CPNI resources available in their online reference repository and supervisors periodically provide refresher training. CPNI training is also available for all employees

Under CenturyLink's standard procedures, only those persons with duties that require access to CPNI to perform their job functions are eligible for such access, and access is controlled through User IDs and passcodes. Each representative access is "stamped" with the representative's user ID so that any breaches could be tied to a specific representative. CenturyLink has adopted a disciplinary process, which has been incorporated into the company's corporate compliance procedures and communicated to employees, to address any employee mishandling or misuse of CPNI. Corporate Security, Legal or Human Resources personnel investigate instances of potential improper access to or disclosure of CPNI by employees. If the investigation indicated a violation has occurred, disciplinary action up to and including termination will follow, with such termination being highly likely for any significant violation.

Effective with the FCC's 2007 CPNI order, third parties who have access to CPNI for marketing purposes have become CenturyLink agents. These agents abide by all CPNI regulations and have appropriate protections in place to ensure the ongoing confidentiality of the CPNI; limit access to persons who have a need to know such information in connection with the performance of the contract; and restrict the use of CPNI solely to the performance of the contract, in connection with the provisioning and marketing of communications related services and products.

Actions Taken Against Data Brokers for Unauthorized Access to Customer Records

CenturyLink had no instances of data brokers obtaining unauthorized access to customer records in 2010.

Summary of Customer Complaints Concerning Unauthorized Release of CPNI

Potential sources for capturing customer complaints regarding unauthorized use of CPNI include calls to the business office, calls to the executive hotline, and e-mails to the Office of Privacy. CenturyLink had no customer complaints regarding the unauthorized release of CPNI in 2010.
