# FERC FINANCIAL REPORT FERC FORM No. 1: Annual Report of Major Electric Utilities, Licensees and Others and Supplemental Form 3-Q: Quarterly Financial Report

These reports are mandatory under the Federal Power Act, Sections 3, 4(a), 304 and 309, and 18 CFR 141.1 and 141.400. Failure to report may result in criminal fines, civil penalties and other sanctions as provided by law. The Federal Energy Regulatory Commission does not consider these reports to be of confidential nature

Exact Legal Name of Respondent (Company)

Transource Missouri, LLC

Year/Period of Report End of: 2021/ Q4

### INSTRUCTIONS FOR FILING FERC FORM NOS 1 and 3-0

# **GENERAL INFORMATION**

### Purpose

FERC Form No. 1 (FERC Form 1) is an annual regulatory requirement for Major electric utilities, licensees and others (18 C.F.R. § 141.1). FERC Form No. 3-Q (FERC Form 3-Q) is a quarterly regulatory requirement which supplements the annual financial reporting requirement (18 C.F.R. § 141.400). These reports are designed to collect financial and operational information from electric utilities, licensees and others subject to the jurisdiction of the Federal Energy Regulatory Commission. These reports are also considered to be non-confidential public use forms.

### Who Must Submit

Each Major electric utility, licensee, or other, as classified in the Commission's Uniform System of Accounts Prescribed for Public Utilities, Licensees, and Others Subject To the Provisions of The Federal Power Act (18 C.F.R. Part 101), must submit FERC Form 1 (18 C.F.R. § 141,1), and FERC Form 3 (18 C.F.R. § 141,400).

Note: Major means having, in each of the three previous calendar years, sales or transmission service that exceeds one of the following:

one million megawatt hours of total annual sales.

100 megawatt hours of annual sales for resale.

500 megawatt hours of annual power exchanges delivered, or

500 megawatt hours of annual wheeling for others (deliveries plus losses).

### What and Where to Submit

Submit FERC Form Nos. 1 and 3-Q electronically through the eCollection portal at <a href="https://eCollection.ferc.gov">https://eCollection.ferc.gov</a>, and according to the specifications in the Form 1 and 3-Q taxonomies.

The Corporate Officer Certification must be submitted electronically as part of the FERC Forms 1 and 3-Q fillings.

Submit immediately upon publication, by either eFiling or mail, two (2) copies to the Secretary of the Commission, the latest Annual Report to Stockholders. Unless eFiling the Annual Report to Stockholders, mail the stockholders report to the Secretary of the Commission at:

Secretary

Federal Energy Regulatory Commission 888 First Street, NE

Washington, DC 20426

For the CPA Certification Statement, submit within 30 days after filing the FERC Form 1, a letter or report (not applicable to filers classified as Class C or Class D prior to January 1, 1984). The CPA Certification Statement can be either eFiled or mailed to the Secretary of the Commission at the address above.

The CPA Certification Statement should:

Attest to the conformity, in all material aspects, of the below listed (schedules and pages) with the Commission's applicable Uniform System of Accounts (including applicable notes relating thereto and the Chief Accountant's published accounting releases), and

Be signed by independent certified public accountants or an independent licensed public accountant certified or licensed by a regulatory authority of a State or other political subdivision of the U. S. (See 18 C.F.R. §§ 41.10-41.12 for specific qualifications.)

 Schedules
 Pages

 Comparative Balance Sheet
 110-113

 Statement of Income
 114-117

 Statement of Retained Earnings
 118-119

 Statement of Cash Flows
 120-121

 Notes to Financial Statements
 122-123

The following format must be used for the CPA Certification Statement unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied. Insert parenthetical phrases only when exceptions are reported.

"In connection with our regular examination of the financial statements of [COMPANY NAME] for the year ended on which we have reported separately under date of [DATE], we have also reviewed schedules [NAME OF SCHEDULES] of FERC Form No. 1 for the year filed with the Federal Energy Regulatory Commission, for conformity in all material respects with the requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases. Our review for this purpose included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below) conform in all material respects with the accounting requirements of the Federal Energy Regulatory Commission as set forth in its applicable Uniform System of Accounts and published accounting releases." The letter or report must state which, if any, of the pages above do not conform to the Commission's requirements. Describe the discrepancies that exist.

Filers are encouraged to file their Annual Report to Stockholders, and the CPA Certification Statement using eFiling. Further instructions are found on the Commission's website at <a href="https://www.ferc.gov/ferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/frequently-asked-questions-faqs-efilingferc-online/faqs-efilingferc-o

Federal, State, and Local Governments and other authorized users may obtain additional blank copies of FERC Form 1 and 3-Q free of charge from <a href="https://www.ferc.gov/general-information-0/electric-industry-forms">https://www.ferc.gov/general-information-0/electric-industry-forms</a>.

FERC Form 1 for each year ending December 31 must be filed by April 18th of the following year (18 CFR § 141.1), and FERC Form 3-O for each calendar quarter must be filed within 60 days after the reporting quarter (18 C FR § 141.400).

### Where to Send Comments on Public Reporting Burden.

The public reporting burden for the FERC Form 1 collection of information is estimated to average 1,168 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data-needed, and completing and reviewing the collection of information. The public reporting burden for the FERC Form 3-Q collection of information is estimated to average 168 hours per response.

Send comments regarding these burden estimates or any aspect of these collections of information, including suggestions for reducing burden, to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426 (Attention: Information Clearance Officer); and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attention: Desk Officer for the Federal Energy Regulatory Commission). No person shall be subject to any penalty if any collection of information does not display a valid control number (44 U.S.C. § 3512 (a)).

### GENERAL INSTRUCTIONS

Prepare this report in conformity with the Uniform System of Accounts (18 CFR Part 101) (USofA). Interpret all accounting words and phrases in accordance with the USofA

Enter in whole numbers (dollars or MWH) only, except where otherwise noted. (Enter cents for averages and figures per unit where cents are important. The truncating of cents is allowed except on the four basic financial statements where rounding is required.) The amounts shown on all supporting pages must agree with the amounts entered on the statements that they support. When applying thresholds to determine significance for reporting purposes, use for balance sheet accounts the balances at the end of the current reporting period, and use for statement of income accounts the current year's year to date amounts.

Complete each question fully and accurately, even if it has been answered in a previous report. Enter the word "None" where it truly and completely states the fact.

For any page(s) that is not applicable to the respondent, omit the page(s) and enter "NA," "NONE," or "Not Applicable" in column (d) on the List of Schedules, pages 2 and 3.

Enter the month, day, and year for all dates. Use customary abbreviations. The "Date of Report" included in the header of each page is to be completed only for resubmissions (see VII. below).

Generally, except for certain schedules, all numbers, whether they are expected to be debits or credits, must be reported as positive. Numbers having a sign that is different from the expected sign must be reported by enclosing the numbers in parentheses.

For any resubmissions, please explain the reason for the resubmission in a footnote to the data field.

Do not make references to reports of previous periods/years or to other reports in lieu of required entries, except as specifically authorized.

Wherever (schedule) pages refer to figures from a previous period/year, the figures reported must be based upon those shown by the report of the previous period/year, or an appropriate explanation given as to why the different figures were used.

Schedule specific instructions are found in the applicable taxonomy and on the applicable blank rendered form.

Definitions for statistical classifications used for completing schedules for transmission system reporting are as follows:

FNS - Firm Network Transmission Service for Self. "Firm" means service that can not be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff. "Self" means the respondent.

FNO - Firm Network Service for Others. "Firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Network Service" is Network Transmission Service as described in Order No. 888 and the Open Access Transmission Tariff.

LFP - for Long-Term Firm Point-to-Point Transmission Reservations. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. "Point-to-Point Transmission Reservations" are described in Order No. 888 and the Open Access Transmission Tariff. For all transactions identified as LFP, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally cancel the contract.

OLF - Other Long-Term Firm Transmission Service. Report service provided under contracts which do not conform to the terms of the Open Access Transmission Tariff. "Long-Term" means one year or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions. For all transactions identified as OLF, provide in a footnote the termination date of the contract defined as the earliest date either buyer or seller can unilaterally get out of the contract.

SFP - Short-Term Firm Point-to-Point Transmission Reservations. Use this classification for all firm point-to-point transmission reservations, where the duration of each period of reservation is less than one-year.

NF - Non-Firm Transmission Service, where firm means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions.

OS - Other Transmission Service. Use this classification only for those services which can not be placed in the above-mentioned classifications, such as all other service regardless of the length of the contract and service FERC Form. Describe the type of service in a footnote for each entry.

AD - Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment.

### DEFINITIONS

Commission Authorization (Comm. Auth.) -- The authorization of the Federal Energy Regulatory Commission, or any other Commission. Name the commission whose authorization was obtained and give date of the authorization.

### When to Submit

FERC Forms 1 and 3-Q must be filed by the following schedule:

### **EXCERPTS FROM THE LAW**

### Federal Power Act. 16 U.S.C. § 791a-825r

Sec. 3. The words defined in this section shall have the following meanings for purposes of this Act. to with:

'Corporation' means any corporation, joint-stock company, partnership, association, business trust, organized group of persons, whether incorporated or not, or a receiver or receivers, trustee or trustees of any of the foregoing. It shall not include 'municipalities, as hereinaffer defined'.

'Person' means an individual or a corporation:

'Licensee, means any person, State, or municipality Licensed under the provisions of section 4 of this Act, and any assignee or successor in interest thereof:

'municipality means a city, county, irrigation district, drainage district, or other political subdivision or agency of a State competent under the Laws thereof to carry and the business of developing, transmitting, untitizing, or distributing power:.....

"project' means. a complete unit of improvement or development, consisting of a power house, all water conduits, all dams and appurtenant works and structures (including navigation structures) which are a part of said unit, and all storage, diverting, or fore bay reservoirs directly connected therewith, the primary line or lines transmitting power there from to the point of junction with the distribution system or with the interconnected primary transmission system, all miscellaneous structures used and useful in connection with said unit or any part thereof, and all water rights, rights-of-way, ditches, dams, reservoirs, Lands, or interest in Lands the use and occupancy of which are necessary or appropriate in the maintenance and operation of such unit:

"Sec. 4. The Commission is hereby authorized and empowered

'To make investigations and to collect and record data concerning the utilization of the water 'resources of any region to be developed, the water-power industry and its relation to other industries and to interstate or foreign commerce, and concerning the location, capacity,

FERC FORM NO. 1 (ED. 03-07)

Respondent — The person, corporation, licensee, agency, authority, or other Legal entity or instrumentality in whose behalf the report is made

development costs, and relation to markets of power sites; ... to the extent the Commission may deem necessary or useful for the purposes of this Act."

"Sec 304

Every Licensee and every public utility shall file with the Commission such annual and other periodic or special\* reports as the Commission may by rules and regulations or other prescribe as necessary or appropriate to assist the Commission in the proper administration of this Act. The Commission may prescribe the manner and FERC Form in which such reports shall be made, and require from such persons specific answers to all questions upon which the Commission may need information. The Commission may require that such reports shall include, among other things, full information as to assets and Liabilities, capitalization, net investment, and reduction thereof, gross receipts, interest due and paid, depreciation, and other reserves, cost of project and other facilities, cost of renewals and replacement of the project works and other facilities, depreciation, generation, transmission, distribution, delivery, use, and sale of electric energy. The Commission may require any such person to make adequate provision for currently determining such costs and other facts. Such reports shall be made under oath unless the Commission otherwise specifies\*.10

"Sec. 309.

The Commission shall have power to perform any and all acts, and to prescribe, issue, make, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this Act. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this Act; and may prescribe the FERC Form or FERC Forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be field..."

### GENERAL PENALTIES

The Commission may assess up to \$1 million per day per violation of its rules and regulations. See FPA § 316(a) (2005), 16 U.S.C. § 825o(a).

# INFORMATION ON FORMULA RATES - Formula Rate Variances

- If a respondent does not submit such filings then indicate in a footnote to the applicable Form 1 schedule where formula rate inputs differ from amounts reported in the Form 1.
   The footnote should provide a narrative description explaining how the "rate" (or billing) was derived if different from the reported amount in the Form 1.
   The footnote should explain amounts excluded from the ratebase or where labor or other allocation factors, operating expenses, or other items impacting formula rate inputs differ from amounts reported in Form 1 schedule amounts.
   Where the Commission has provided guidance on formula rate inputs, the specific proceeding should be noted in the footnote.

	Date of Report: 04/14/2022	Year/Period of Report End of: 2021/ Q4
--	----------------------------	---

### STATEMENT OF INCOME

### Quarterly

- 1. Report in column (c) the current year to date balance. Column (c) equals the total of adding the data in column (g) plus the data in column (i) plus the data in column (k). Report in column (d) similar data for the previous year. This information is reported in the annual filing only.

  2. Enter in column (e) the balance for the reporting quarter and in column (f) the balance for the same three month period for the prior year.
- 3. Report in column (d) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for other utility function for the current year quarter.
- 4. Report in column (f) the quarter to date amounts for electric utility function; in column (i) the quarter to date amounts for other utility function for the prior year quarter.
- 5. If additional columns are needed, place them in a footnote

### Annual or Quarterly if applicable

Do not report fourth guarter data in columns (e) and (f)

Report amounts for accounts 412 and 413, Revenues and Expenses from Utility Plant Leased to Others, in another utility column in a similar manner to a utility department. Spread the amount(s) over Lines 2 thru 26 as appropriate. Include these amounts in columns (c) and (d) totals.

Report amounts in account 414, Other Utility Operating Income, in the same manner as accounts 412 and 413 above.

Use page 122 for important notes regarding the statement of income for any account thereof.

Give concise explanations concerning unsettled rate proceedings where a contingency exists such that refunds of a material amount may need to be made to the utility's customers or which may result in material refund to the utility with respect to power or gas purchases. State for each year effected the gross revenues or costs to which the contingency relates and the tax effects together with an explanation of the major factors which affect the rights of the utility to retain such revenues or recover amounts paid with respect to power or gas purchases. Give concise explanations concerning significant amounts of any refunds made or received during the year resulting from settlement of any rate proceeding affecting revenues received or costs incurred for power or gas purchases, and a summary of the adjustments made to balance sheet, income, and expense accounts.

If any notes appearing in the report to stockholders are applicable to the Statement of Income, such notes may be included at page 122.

Enter on page 122 a concise explanation of only those changes in accounting methods made during the year which had an effect on net income, including the basis of allocations and apportionments from those used in the preceding year. Also, give the appropriate dollar effect of such changes.

Explain in a footnote if the previous year's/guarter's figures are different from that reported in prior reports.

If the columns are insufficient for reporting additional utility departments, supply the appropriate account titles report the information in a footnote to this schedule.

### STATEMENT OF CASH FLOWS

- 1. Codes to be used:(a) Net Proceeds or Payments;(b)Bonds, debentures and other long-term debt; (c) Include commercial paper; and (d) Identify separately such items as investments, fixed assets, intangibles, etc.

  2. Information about noncash investing and financing activities must be provided in the Notes to the Financial statements. Also provide a reconciliation between "Cash and Cash Equivalents at End of Period" with related amounts on the Balance Sheet.

  3. Operating Activities Other: Include gains and losses pertaining to operating activities only. Gains and losses pertaining to investing and financing activities should be reported in those activities. Show in the Notes to the Financials the amounts of interest paid (net of amount capitalized) and income taxes paid.

  4. Investing Activities: Include at Other (line 31) net cash outflow to acquire other companies. Provide a reconciliation of assets acquired with liabilities assumed in the Notes to the Financial Statements. Do not include on this statement the dollar amount of leases capitalized per the
- USofA General Instruction 20; instead provide a reconciliation of the dollar amount of leases capitalized with the plant cost.

FERC FORM No. 1 (ED. 12-96)

Name of Respondent: Transource Missouri, LLC	This report is:  (1) ☑ An Original  (2) ☐ A Resubmission	Date of Report: 04/14/2022	Year/Period of Report End of: 2021/ Q4
---	--	----------------------------	---

### NOTES TO FINANCIAL STATEMENTS

- 1. Use the space below for important notes regarding the Balance Sheet, Statement of Income for the year, Statement of Retained Earnings for the year, and Statement of Cash Flows, or any account thereof. Classify the notes according to each basic statement, providing a subheading for each statement except where a note is applicable to more than one statement.
- 2. Furnish particulars (details) as to any significant contingent assets or liabilities existing at end of year, including a brief explanation of any action initiated by the Internal Revenue Service involving possible assessment of additional income taxes of material amount, or of a claim for refund of income taxes of a material amount initiated by the utility. Give also a brief explanation of any dividends in arrears on cumulative preferred stock.
- 3. For Account 116, Utility Plant Adjustments, explain the origin of such amount, debits and credits during the year, and plan of disposition contemplated, giving references to Cormmission orders or other authorizations respecting classification of amounts as plant adjustments and requirements as to disposition thereof.
- 4. Where Accounts 189. Unamortized Loss on Reacquired Debt, and 257. Unamortized Gain on Reacquired Debt, are not used, give an explanation, providing the rate treatment given these items. See General Instruction 17 of the Uniform System of Accounts.
- 5. Give a concise explanation of any retained earnings restrictions and state the amount of retained earnings affected by such restrictions.
- 5. Of the notes to financial statements relating to the respondent company appearing in the annual report to the stockholders are applicable and furnish the data required by instructions above and on pages 114-121, such notes may be included herein.
- 7. For the 3Q disclosures, respondent must provide in the notes sufficient disclosures so as to make the interim information not misleading. Disclosures which would substantially duplicate the disclosures contained in the most recent FERC Annual Report may be omitted.
- 8. For the 3Q disclosures, the disclosures shall be provided where events subsequent to the end of the most recently ear have occurred which have a material effect on the respondent. Respondent must include in the notes significant changes since the most recently completed year in such items as: accounting principles and practices; estimates inherent in the preparation of the financial statements; status of long-term contracts; capitalization including significant new borrowings or modifications of existing financing agreements; and changes resulting from business combinations or dispositions. However were material contingencies exist the disclosure of such matters shall be provided even though a significant change since vear end have not have occurred.
- 9. Finally, if the notes to the financial statements relating to the respondent appearing in the annual report to the stockholders are applicable and furnish the data required by the above instructions, such notes may be included herein.

### GLOSSARY OF TERMS FOR NOTES

Meaning

# When the following terms and abbreviations appear in the text of this report, they have the meanings indicated below.

1erm	Meaning				
AEP	American Electric Power Company, Inc., an investor-owned electric public utility holding company which includes American Electric Power Company, Inc. (Parent) and majority owned subsidiaries and. affiliates.				
AEP System	American Electric Power System, an electric system owned and operated by AEP subsidiaries.				
AEP Transmission Holdco	AEP Transmission Holding Company, LLC, a wholly-owned subsidiary of AEP.				
AEPSC	American Electric Power Service Corporation, an AEP service subsidiary providing management and professional services to AEP and its subsidiaries.				
ASU	Accounting Standards Update.				
CAA of 2021	Consolidated Appropriations Act of 2021 signed into law in December 2020.				
CARES Act	Coronavirus Aid, Relief, and Economic Security Act signed into law in March 2020.				
COVID-19	Coronavirus 2019, a highly infectious respiratory disease. In March 2020, the World Health Organization declared COVID-19 a worldwide pandemic.				
CWIP	Construction Work in Progress.				
Evergy, Inc.	A public utility holding company incorporated in 2017 and headquartered in Kansas City, Missouri.				
Evergy Metro, Inc.	A wholly-owned subsidiary of Evergy, Inc., formerly known as Kansas City Power & Light Company, providing certain support services to Transource Energy and subsidiaries.				
Excess ADIT	Excess accumulated deferred income taxes.				
FASB	Financial Accounting Standards Board.				
FERC	Federal Energy Regulatory Commission.				
GAAP	Accounting Principles Generally Accepted in the United States of America.				
IRS	Internal Revenue Service.				
OATT	Open Access Transmission Tariff.				
Parent	American Electric Power Company, Inc., the equity owner of AEP subsidiaries.				
PJM	Pennsylvania - New Jersey - Maryland regional transmission organization.				
RTO	Regional Transmission Organization, responsible for moving electricity over large interstate areas.				
SPP	Southwest Power Pool regional transmission organization.				
TCA	Transmission Coordination Agreement dated January 1, 1997, by and among, PSO, SWEPCo and AEPSC, in connection with the operation of the transmission assets of the two public utility subsidiaries.				
Tax Reform	On December 22, 2017, President Trump signed into law legislation referred to as the "Tax Cuts and Jobs Act" (the TCJA). The TCJA includes significant changes to the Internal Revenue Code of 1986, including a reduction in the corporate federal income tax rate from 35% to 21% effective January 1, 2018.				
Transource Energy	Transource Energy, LLC, an AEP subsidiary formed for the purpose of investing in utilities which develop, acquire, construct, own and operate transmission facilities in accordance with FERC-approved rates.				

### 1. ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### ORGANIZATION

Transource Missouri

Transource Missouri was established to build and own transmission facilities in Missouri. Transource Energy owns all of Transource Missouri's outstanding equity. AEP Transmission Holdco and Evergy, Inc. hold 86.5% and 13.5% membership interests in Transource Energy, respectively.

A 100% wholly-owned subsidiary of Transource Energy.

AEPSC and Evergy Metro, Inc. provide services to Transource Energy through service agreements. Transource Missouri does not have employees.

## SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Rates and Service Regulation

The FERC regulates Transource Missouri's rates and is permitted to review and audit Transource Missouri's books and records. The FERC regulates the affiliated transactions of Transource Missouri, including affiliated transactions involving AEPSC and Evergy Metro, Inc. billings at cost under the 2005 Public Utility Holding Company Act and the Federal Power Act.

The FERC issued an order authorizing the inclusion of the Transource Missouri. Under this revenue requirement, Transource Missouri makes annual filings in order to recover prudently incurred costs and an allowed return from wholesale transmission customers of SPP. An annual rate filing is made for each calendar year using estimated costs, which is used to determine the billings to SPP ratepayers. The annual rate filing is compared to actual costs with an under-or over-recovery being trued-up with interest and recovered or refunded in future year rates. The FERC has approved the use of a formula rate methodology for recovery of all prudently incurred operations and maintenance expenses, a return on debt and 60% equity for transmission facilities that are not yet in service and an actual capital structure of 40% debt and 60% equity for transmission facilities that are not yet in service and an actual capital structure of the project

### Basis of Accounting

Transource Missouri's accounting is subject to the requirements of the FERC and the Missouri Public Service Commission. The financial statements have been prepared in accordance with the Uniform System of Accounts prescribed by the FERC. The principal differences from GAAP include:

- The requirement to report deferred tax assets and liabilities separately rather than as a single amount.
- The exclusion of current maturities of long-term debt from current liabilities
- The classification of accrued non-ARO asset removal costs as accumulated depreciation rather than regulatory liabilities.
- The classification of regulatory assets and liabilities related to the accounting guidance for "Accounting for Income Taxes" as separate assets and liabilities rather than as a single amount.
- The classification of certain nonoperating expenses as miscellaneous nonoperating expense instead of as operating expense.
- The separate classification of income tax expense for operating and nonoperating activities instead of as a single income tax expense
- The classification of certain other assets and liabilities as noncurrent instead of current
- The inclusion of income taxes as a component of the financial statements rather than the exclusion of income taxes due to structure as a limited liability company.
- The classification of land premium in utility plant adjustments rather than in Property Plant and Equipment.
- The classification of land premium amortization in utility plant adjustments rather than in property, plant and equipment accumulated depreciation and amortization.
- The classification of debt issuance costs as noncurrent assets instead of noncurrent liabilities.
- The classification of interest on regulated finance leases as Operating Expense instead of Other Income (Expense).
- The classification of certain expenses in operating income rather than operating expenses
- The classification of cloud computing implementation costs as Utility Plant rather than as a noncurrent asset.

### Accounting for the Effects of Cost-Based Regulation

As a rate-regulated entity, Transource Missouri's financial statements reflect the actions of regulators that result in the recognition of certain revenues and expenses in different time periods than enterprises that are not rate-

regulated. Under Transource Missouri's formula rate mechanism and in accordance with accounting guidance for "Regulated Operations," Transource Missouri records regulatory assets (deferred expenses) and regulatory liabilities (deferred revenue reductions or refunds) to reflect the economic effects of regulation in the same accounting period by matching expenses with their recovery through regulated revenues and by matching income with its passage to customers in cost-based regulated rates.

### Accounting for the Effects of Cost-Based Regulation

As a rate-regulated entity, Transource Missouri's financial statements reflect the actions of regulators that result in the recognition of certain revenues and expenses in different time periods than enterprises that are not rate-regulated. Under Transource Missouri's formula rate mechanism and in accordance with accounting guidance for "Regulated Operations," Transource Missouri records regulatory assets (deferred expenses) and regulatory liabilities (deferred revenue reductions or refunds) to reflect the economic effects of regulation in the same accounting period by matching expenses with their recovery through regulated revenues and by matching income with its passage to customers in cost-based regulated rates.

### Use of Estimates

The preparation of these financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. These estimates include, but are not limited to, long-lived asset impairment, the effects of regulation including formula rate revenues, long-lived asset recovery and the effects of contingencies. The estimates and assumptions used are based upon management's evaluation of the relevant facts and circumstances as of the date of the financial statements. Actual results could ultimately differ from those estimates.

Cash and Cash Equivalents include Cash, Working Fund and Temporary Cash Investments on the balance sheet with original maturities of three months or less.

## Supplementary Information

	2021	2	2020	
For the Years Ended December 31,		(in thousands)		_
Cash Paid for Interest (Net of Capitalized Amounts)	\$	3,191 \$	2,280	
As of December 31,				
Construction Expenditures Included in Current and Accrued Liabilities		28	(	

### Accounts Receivable

Accounts receivable primarily includes receivables from SPP based on the monthly allocation of the tariff rates that were authorized in the FERC order.

### Transmission Property

Transmission property is stated at original cost. Additions, major replacements and betterments are added to the property accounts. Under the group composite method of depreciation, continuous interim routine replacements of items such as poles, transformers, etc. result in original cost retirements, less salvage, being charged to accumulated depreciation. The group composite method of depreciation assumes that on average, asset components are retired at the end of their useful lives and thus there is no gain or loss. The equipment in each primary electric plant account is identified as a separate group. The depreciation rates that are established take

into account the past history of an affiliated company as a proxy of interim capital replacements and the amount of salvage received. These rates and the related lives are subject to periodic review. Removal costs, when incurred, will be charged to accumulated depreciation. The costs of labor, materials and overhead incurred to operate and maintain the transmission property is included in operating expenses.

Long-lived assets are required to be tested for impairment when it is determined that the carrying value of the assets may no longer be recoverable or when the assets meet the held-for-sale criteria under the accounting guidance for "Impairment or Disposal of Long-Lived Assets." When it becomes probable that an asset in service or an asset under construction will be abandoned and regulatory cost recovery has been disallowed, the cost of that asset shall be removed from plant-in-service or CWIP and charged to expense.

The fair value of an asset or investment is the amount at which that asset or investment could be bought or sold in a current transaction between willing parties, as opposed to a forced or liquidation sale. Quoted market prices in active markets are the best evidence of fair value and are used as the basis for the measurement, if available. In the absence of quoted market prices for identical or similar assets or investments in active markets, fair value is estimated using various internal and external valuation methods including cash flow analysis and appraisals.

CWIP and Atlowance for Funds Used During Construction (AFUDC)

The FERC issued an order approving Transource Missouri's request to include CWIP in recoverable rate base, instead of accruing AFUDC during construction. If this incentive had not been granted, Transource Missouri would have capitalized an immaterial amount of AFUDC in CWIP during 2021 and 2020. As of December 31, 2021 and 2020, Transource Missouri's Transmission Property would have been \$20.1 million higher, respectively, as a result of AFUDC if it had been capitalized during construction.

rumunon oj rionucrirunire i munemi instruments

The book values of Cash, accounts receivable and accounts payable approximate fair value because of the short-term maturity of these instruments

#### Fair Value Measurements of Assets and Liabilities

The accounting guidance for "Fair Value Measurements and Disclosures" establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). Where observable inputs are available for substantially the full term of the asset or liability, the instrument is categorized in Level 2. When quoted market prices are not available, pricing may be completed using comparable securities, dealer values, operating data and general market conditions to determine fair value. Valuation models utilize various inputs such as commodify, interest rate and, to a lesser degree, volatility and credit that include quoted prices for similar assets or liabilities in inactive markets, market data) and other observable inputs (i.e. inputs derived principally from, or correlated to, observable market data) and other observable inputs for the asset or liabilities.

### Revenue Recognition

Regulatory Accounting

Transource Missouri's financial statements reflect the actions of regulators that can result in the recognition of revenues and expenses in different time periods than enterprises that are not rate-regulated. Regulatory assets (deferred expenses or alternative revenue recognized in accordance with the guidance for "Regulated Operations") and regulatory liabilities (deferred revenue reductions or refunds) are recorded to reflect the economic effects of regulation in the same accounting period by matching expenses with their recovery through regulated revenues and by matching revenue with its passage to customers in cost-based regulated rates.

When regulatory assets are probable of recovery through regulated rates, Transource Missouri records them as assets on its balance sheets. Transource Missouri tests for probability of recovery at each balance sheet date or whenever new events occur. Examples of new events include the issuance of a FERC order or passage of new legislation. If it is determined that recovery of a regulatory asset is no longer probable, the regulatory asset is derecognized as a charge against income.

Pursuant to an order approved by the FERC, Transource Missouri, makes annual filings in order to recover prudently incurred costs (including amortization of the formation cost regulatory asset) and an allowed return on plant and costs with annual rate filing is compared to actual costs with any over- or under-recovery being tructed-up being tructed-up with carrying charges and recovered or refunded in a future year's rates.

Transource Missouri recognizes revenue when the underlying performance obligations to design, develop, construct, operate and maintain the transmission plant are satisfied and as it incurs recoverable costs and earns the allowed return on plant in service and CWIP on a monthly basis. See Note 11 - Revenue from Contracts with Customers for additional information.

#### Income Taxe

Transource Missouri is a single-member limited liability company that is owned by a tax partnership. As a result, Transource Missouri is not liable for federal or state income taxes. The income tax effect of Transource Missouri's activities flows directly to the partners of Transource Energy, AEP Transmission Holdco and Evergy, Inc. AEP Transmission Holdco and Evergy, Inc. report their respective shares of Transource Missouri's earnings, gains, losses, deductions and tax credits on their respective federal and state income tax returns.

Transource Missouri is allowed, however, to recover in rates, as a component of its cost of service, an allowance for income taxes and is required to adjust its rate base by the amount of accumulated deferred taxes it would have recorded if it were a taxable corporation. As such, Transource Missouri has included a provision for AEP Transmission Holdco's and Evergy, Inc.'s federal and state income tax expenses and deferred taxes on its statements of income, balance sheets and statements of cash flows in this report.

Income tax expense is derived using the liability method as prescribed by accounting guidance for "Income Taxes". Under this method, deferred income taxes have been recorded using current enacted tax rates for the differences between the members' tax basis of Transource Missouri's assets and liabilities and the basis reported in the financial statements.

### Subsequent Events

Management reviewed subsequent events through April 13, 2022, the date that Transource Missouri's 2021 FERC Form 1 was available to be issued.

## 2. NEW ACCOUNTING STANDARDS

During the FASB's standard setting process and upon issuance of final standards, management reviews the new accounting literature to determine its relevance, if any, to Transource Missouri's business. There are no new standards expected to have a material impact on Transource Missouri's financial statements.

## 3. RATE MATTERS

Transource Missouri is involved in rate and regulatory proceedings at the FERC. Rate matters can have a material impact on net income, eash flows and possibly financial condition. Transource Missouri's recent significant rate orders and pending rate filings are addressed in this note.

### Formula Rate

Transource Missouri submits an annual filing with PJM which establishes their projected transmission revenue requirement (PTRR). The new rates become effective at the beginning of the year and are subject to refund and true-up.

Transource Missouri's 2020 PTRR was \$36.6 million. In 2020, Transource Missouri had an under-recovery of revenues totaling \$502 thousand, including carrying charges that were subject to true-up of these revenues was incorporated in the 2022 PTRR discussed below. As of December 31, 2021, Transource Missouri had a remaining balance associated with the true-up of \$68 thousand and \$426 thousand recorded as Accounts Receivable from Associated Companies and Other Regulatory Assets, respectively, on the balance sheets.

Transource Missouri's 2021 PTRR was \$36.2 million. Transource Missouri refunded \$212 thousand, including carrying charges, of 2019 over-recovered revenues in 2021. In 2021, Transource Missouri had an estimated over-recovery of revenues of \$839 thousand, including carrying charges, recorded as Accumulated Provision for Rate Refunds on the balance sheets as of December 31, 2021. The 2021 true-up of revenues will be incorporated in the 2023 PTRR.

Transource Missouri's 2022 PTRR is \$33.9 million plus an additional \$502 thousand of 2020 under-recovered revenues. The 2022 true-up of these revenues will be incorporated in the 2024 PTRR.

### FERC Notice of Proposed Rule Making

In April 2021, the FERC issued a supplemental NOPR, the RTO Incentive would be modified such that a utility would only be eligible for the RTO Incentive for the first three years after the utility joins a FERC-approved Transmission Organization. This is a significant departure from a previous NOPR issued in 2020 seeking to increase the RTO Incentive from 50 basis points to 100 basis points. The supplemental NOPR also required utilities that have received the RTO Incentive for three or more years to submit, within 30 days of the effective date of a final rule, a compliance filing to eliminate the incentive from its tariff prospectively. The supplemental NOPR was subject to a 60 day comment period followed by a 30 day period for reply comments. In July 2021, AEP submitted reply comments a final rule from the FERC.

Remaining

In July 2021, the FERC issued an order denying Dayton Power and Light's request for a 50 basis point RTO incentive on the basis that its RTO participation was not voluntary, but rather is required by Ohio law. In its February 2022 order on rehearing, the FERC affirmed the decision in its July 2021 order. This precedent could have an impact on AEP's transmission owning subsidiaries.

If the FERC modifies its RTO Incentive policy, it would be applied, as applicable, to Transource Missouri on a prospective basis, and could affect future net income and cash flows and impact financial condition.

### 4. EFFECTS OF REGULATION

Regulatory assets and liabilities are comprised of the following items:

	(in the	ousands)	
Regulatory Assets:	2021 2020		

FERC Formula Rates Under Recovery	\$	426 \$	1,030	2 years
Total Regulatory Assets Approved for Recovery		426	1,030	
Total FERC Account 182.3 Regulatory Assets	<u>s</u>	426 \$	1,030	
		December 31,		Remaining Refund
Regulatory Liabilities:	:	2021	2020	Period
		(in thousands)		
Regulatory liabilities pending final regulatory determination:				
Income Tax Related Regulatory Liabilities (a)				
Excess ADIT Associated with Certain Depreciable Property	S	27,953 \$	27,956	
Excess ADIT that is Not Subject to Rate Normalization Requirements		(14,952)	(14,952)	
Total Regulatory Liabilities Pending Final Regulatory Determination		13,001	13,004	
Total FERC 254 Account Regulatory Liabilities	\$	13,001 \$	13,004	

### (a) Predominately pays a return due to the inclusion of Excess ADIT in rate base.

#### 5 COMMITMENTS GUARANTEES AND CONTINGENCIES

Transource Missouri is subject to certain claims and legal actions arising in its ordinary course of business. In addition, Transource Missouri's business activities are subject to extensive governmental regulation related to public health and the environment. The ultimate outcome of such pending or potential litigation cannot be predicted. Transource Missouri accrues contingent liabilities only when management concludes that it is both probable that a liability has been incurred at the date of the financial statements and the amount of loss can be reasonably estimated. When management determines that it is not probable, but rather reasonably possible that a liability has been incurred at the date of the financial statements, Transource Missouri discloses such contingent and significant uncertainties. Any estimated range of possible loss may not represent the maximum possible loss exposure. Circumstances change over time and actual results may vary significantly from estimates.

For current proceedings not specifically discussed below, management does not anticipate that the liabilities, if any, arising from such proceedings would have a material effect on the financial statements,

#### CHADANTEES

Liabilities for guarantees are recorded in accordance with the accounting guidance for "Guarantees". There is no collateral held in relation to any guarantees. In the event any guarantee is drawn, there is no recourse to third parties unless specified below.

## Indemnifications and Other Guarantees

Pagulatory Accate Currently Farning a Pature

Transource Missouri enters into certain types of contracts which require indemnifications. Typically these contracts include, but are not limited to, lease agreements and financing agreements and financing agreements may include, but are not limited to, indemnifications around certain tax, contractual and environmental matters. As of December 31, 2021, there were no material liabilities recorded for any indemnifications.

### CONTINGENCIES

## Insurance and Potential Losses

Transource Missouri maintains property insurance coverage normal and customary for an electric utility, subject to various deductibles. Insurance includes substations, facilities and inventories. Excluded property generally includes transmission lines, poles and towers. Transource Missouri's insurance program also generally provided by a combination of various industry mutual and/or commercial insurance carriers.

Some potential losses or liabilities may not be insurable or the amount of insurance carried may not be sufficient to meet potential losses and liabilities, if they occur, which are not completely insured, unless recovered from customers, could reduce future net income and cash flows and impact financial condition.

## 6. FAIR VALUE MEASUREMENTS

### Fair Value Measurements of Long-Term Debt

The fair values of Long-Term Debt are based on quoted market prices, without credit enhancements, for the same or similar issues and the current interest rates offered for instruments with similar maturities classified as Level 2 measurement inputs. These instruments are not marked-to-market. The estimates presented are not necessarily indicative of the amounts that could be realized in a current market exchange.

The book values and fair values of Transource Missouri's Long-Term Debt are summarized in the following table:

December 3	1, 2021	Dece	ember 31, 2020
Book Value	Fair Value	Book Value	Fair Value
	(in thou	sands)	
\$ 114,572 \$	109,156	\$ 116,	393 \$ 120,949

## 7. INCOME TAXES

## Income Tax Expense

The details of Transource Missouri's Income Tax Expense are as follows:

(728)
5,258
4,530
(23)
(23)
4,507
_

The following is a reconciliation between the federal income taxes computed by multiplying pretax income by the federal statutory tax rate and the income taxes reported:

		rems Engen December 123			
	21	021	2020		
		(in thousands)			
let Income	\$	12,161 \$	13,894

Net Operating Loss Carryforward	1,856	6,070	
All Other, Net	2	(120)	
Net Deferred Tax Liabilities	\$ (37,835) \$	(31,617)	

### Net Income Tax Operating Loss Carryforward

As of December 31, 2021, Transource Missouri had \$1.3 million of unrealized federal net operating loss carryforward tax benefits. Management anticipates future taxable income will be sufficient to realize the remaining net income tax operating loss tax benefits before the federal carryforward expires after 2036. Also, as of December 31, 2021, Transource Missouri had \$5.50 thousand of unrealized state net operating loss carryforward tax benefits. Management also anticipates future taxable income will be sufficient to realize the state net income tax operating loss tax benefits before the state carryforward expires for Missouri.

8. FINANCING ACTIVITIES

## Long-Term Debt

		Weighted-Average Interest Rate as of	Interest Rate Ranges as of December 31,			Outstanding as of December 31,			
Type of Debt	Maturity	December 31, 2021	2021	2020		2021	2020		
		•				(in thou	sands)		
Intercompany Notes Payable	2050	2.75%	2.75%	2.75%	\$	114,572	\$ 116,393		
Total Long-term Debt					S	114,572	\$ 116,393		

### Dividend Restrictions

Transource Missouri pays dividends to Transource Energy provided funds are legally available. Various regulatory requirements may impose certain restrictions on the ability of Transource Missouri to transfer funds in the form of dividends.

All dividends declared by Transource Missouri are subject to a Federal Power Act restriction that prohibits the payment of dividends out of capital accounts without regulatory approval: payment of dividends is allowed out of retained earnings only. As of December 31, 2021, the maximum amount of restricted net assets of Transource Missouri that may not be distributed to Transource Energy in the form of a loan, advance or dividend was \$122.8 million.

### Member's Equity Subsequent Events

In January 2022, Transource Missouri distributed a \$3 million dividend to Transource Energy.

In March 2022, Transource Missouri distributed a \$2.5 million dividend to Transource Energy.

## 9. RELATED PARTY TRANSACTIONS

## Affiliated Transmission Revenues

For the years ended December 31, 2021 and 2020, subsidiaries of AEP and Evergy Metro, Inc. that are load serving entities within the SPP region incurred SPP transmission services costs related to Transource Missouri that were billed to them in accordance with the OATT and TCA. Transource Missouri recorded these affiliated transmission revenues in Operating Revenues as shown in the table below:

		Years Ended December 31,			
		2021		2020	
	·	(in thousands)			
AEP	\$	5,247	\$	5,381	
Evergy Metro, Inc.		3,773		4,168	
Total Affiliated Transmission Revenues	\$	9,020	\$	9,549	

## service Agreements

AEPSC and Evergy Metro, Inc. each provide managerial and professional services to Transource Energy under services agreements. The costs of the services are billed to Transource Energy Metro, Inc., on a direct-charge basis whenever possible and on a reasonable basis of proration for services that benefit multiple companies. The billings for services are made on a cost basis on the same basis as such charges are determined for equivalent services that AEPSC provides to other AEP affiliates and that Evergy Metro, Inc. affiliates, including reasonable allocations of overhead. Billings from AEPSC and Evergy Metro, Inc. are capitalized or expensed depending on the nature of the services rendered and are recoverable from customers. AEPSC, Evergy Metro, Inc. and their billings are subject to regulation by the FERC under the Public Utility Holding Company Act of 2005. Transource Energy bills Transource Missouri's total billings from Transource Energy betro, Inc. related services were \$3.3 million and \$2.9 million of the years ended December 31, 2021 and 2020, respectively. Evergy Metro, Inc. for services were \$439 thousand and \$435 thousand for the vears ended December 31, 2021 and 2020, respectively.

#### Affiliated Long-Term Debt

In 2020, Transource Missouri retired \$116.2 million of variable rate affiliated notes, and issued \$117.4 million of 2.75% affiliated notes. For the years ended December 31, 2021 and 2020, Transource Missouri repaid \$1.8 million and \$1 million of affiliated notes, respectively, to Transource Energy. See Note 8 - Financing Activities for additional information

## Depreciation

Transource Missouri will provide for depreciation of Transmission Property on a straight-line basis over the estimated useful lives of property as projects are completed and placed in service. Transource Missouri's FERC approved composite depreciation rates for depreciable assets range from 1.33% to 2.85%. As of December 31, 2021 and 2020, Transource Missouri had \$313.2 million and \$314.2 million of depreciable assets in service, respectively.

### Asset Retirement Obligations (ARO)

10. TRANSMISSION PROPERTY

Transource Missouri has identified, but not recognized, ARO liabilities related to electric transmission assets, as a result of certain easements on property on which assets are owned. Generally, such easements are perpetual and require only the retirement and removal of assets upon the cessation of the property's use. The retirement obligation is not estimable for such easements since Transource Missouri plans to use their facilities indefinitely. The retirement obligation would only be recognized if and when Transource Missouri abandons or ceases the use of specific easements, which is not expected.

#### 11. REVENUE FROM CONTRACTS WITH CUSTOMERS

#### Disaggregated Revenues from Contracts with Customers

Transource Missouri's revenue consists of affiliated and nonaffiliated transmission revenues from contracts with customers. The annual transmission revenue true-ups meet the definition of alternative revenues are contracted with the accounting guidance for "Regulated Operations." Transource Missouri has \$(1.2) million and \$8.1 million of alternative revenues, respectively, for the years ended December 31, 2021 and 2020.

#### Performance Obligations

Transource Missouri has performance obligations as part of its normal course of business. A performance obligation is a promise to transfer a distinct good or service, or a series of distinct goods or services that are substantially the same and have the same pattern of transfer to a customer. The invoice practical expedient within the accounting guidance for "Revenue from Contracts with Customers" allows for the recognition of revenue from performance obligations in the amount of consideration to which there is a right to invoice the customer and when the amount for which there is a right to invoice or responds directly to the value transferred to the customer.

The purpose of the invoice practical expedient is to depict an entity's measure of progress toward completion of the performance obligation within a contract and can only be applied to performance obligations that are satisfied over time and when the invoice is representative of services provided to date. Transource Missouri elected to apply the invoice practical expedient to recognize revenue for performance obligations satisfied over time as the invoices from the respective revenue streams are representative of services or goods provided to date to the customer. Performance obligations for Transource Missouri are summarized as follows:

Wholesale Revenues - Transmission Revenues

Transource Missouri has performance obligations to design, develop, construct, operate and maintain transmission plant for the ultimate purpose of transmission of electricity to wholesale customers through assets owned and operated by Transource Missouri. The performance obligations of Transource Missouri to SPP encompasses a time frame greater than a year. Payments from SPP for transmission services are typically received within one week from the issuance of the invoice, which is issued monthly.

Transource Missouri collects revenues through Transmission Formula Rates. The FERC-approved rates establish the annual transmission revenue requirement (ATRR) and transmission service rates for transmission owners. The formula rates establish rates for a one-year period and also include a true-up calculation for the prior year's billings, allowing for over/under-recovery of the transmission owner's ATRR.

## Fixed Performance Obligations

The following table represents Transource Missouri's remaining fixed performance obligations to be satisfied over time as of December 31, 2021. Fixed performance obligations primarily include wholesale transmission services. The amounts below include affiliated and nonaffiliated revenues.

	2022	2023-2024	2025-2026	After 2026	Total
-			(in thousands)		<del>-</del>
\$	36.346	s — s	_	2 — 2	36.346

### Contract Assets and Liabilities

Contract assets are recognized when Transource Missouri has a right to consideration that is conditional upon the occurrence of an event other than the passage of time, such as future performance under a contract. Transource Missouri did not have any material contract assets as of December 31, 2021 and 2020.

When Transource Missouri receives consideration, or such consideration is unconditionally due from a customer prior to transferring goods or services to the customer under the terms of a sales contract, they recognize a contract liability on the balance sheet in the amount of that consideration. Revenue for such consideration is subsequently recognized in the period or periods in which the remaining performance obligations in the contract are satisfied. Transource Missouri did not have any material contract liabilities as of December 31, 2021 and 2020.

### Accounts Receivable from Contracts with Customers

Accounts receivable from contracts with customers are presented on Transource Missouri's balance sheets in Customer Accounts Receivable. Transource Missouri's balances for receivables from contracts that are not recognized in accordance with the accounting guidance for "Revenue from Contracts with Customers" included in Customer Accounts Receivable were immaterial as of December 31, 2021 and 2020.

The amount of affiliated accounts receivable from contracts with customers included in Accounts Receivable from Associated Companies on Transource Missouri's balance sheets were \$902 thousand and \$721 thousand, respectively, as of December 31, 2021 and 2020.

### Contract Costs

Contract costs to obtain or fulfill a contract for Transource Missouri are accounted for under the guidance for "Other Assets and Deferred Costs" and presented as a single asset and neither bifurcated nor reclassified between current assets and deferred debits on the balance sheets. Contract costs to acquire a contract are amortized in a manner consistent with the transfer of goods or services to the customer in Operation Expenses on the statements of income. Transource Missouri did not have material contract costs as of December 31, 2021 and 2020.

## ELECTRIC PLANT IN SERVICE (Account 101, 102, 103 and 106)

- 1. Report below the original cost of electric plant in service according to the prescribed accounts
- 1. Report below the Griginal coasts of security and in Service (Classified), this page and the next include Account 102. Electric Plant to Account 103. Experimental Electric Plant Unclassified: and Account 106. Completed Construction Not Classified-Electric.
- 2. Include in column (c) or (d), as appropriate, corrections of additions and retirements for the current or preceding year.

  4. For revisions to the amount of initial asset retirement costs capitalized, included by primary plant account, increases in column (c) additions and reductions in column (e) additions and reductions and reductions and reductions are column (e) additions and reductions and reductions are column (e) additional additions and reductions are column (e) additional additional additions are column (e) additional additional
- 5. Enclose in parentheses credit adjustments of plant accounts to indicate the negative effect of such accounts.
- 6. Classify Account 106 according to prescribed accounts, on an estimated basis if necessary, and include the entries in column (c). Also to be included in column (c) are entries for reversals of tentative distributions of the prior year reported in column (b). Likewise, if the respondent has a significant amount of plant retirements which have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements, with have not been classified to primary accounts at the end of the year, include in column (d) a tentative distribution of such retirements. depreciation provision. Include also in column (d) distributions of these tentative classifications in columns (c) and (d), including the reversals of the provision. Include also in column (d) distributions of these amounts. Careful observance of the above instructions and the texts of Accounts 101 and 106 will avoid serious omissions of the reported amount of respondent's plant actually in service at end of year.
- 7. Show in column (f) reclassifications or transfers within utility plant accounts. Include also in column (f) the additions or reductions of primary account classifications arising from distribution of amounts initially recorded in Account 102, include in column (e) the amounts with respect to accumulated provision for depreciation, acquisition adjustments, etc., and show in column (f) only the offset to the debits or credits distributed in column (f) to primary account classifications.
- 8. For Account 399, state the nature and use of plant included in this account and if substantial in amount submit a supplementary statement showing subaccount classification of such plant conforming to the requirement of these pages.
- 9. For each amount comprising the reported balance and changes in Account 102, state the property purchased or sold, name of vendor or purchase, and date of transaction. If proposed journal entries have been filed with the Commission as required by the Uniform System of Accounts, give also date.

## ACCUMULATED PROVISION FOR DEPRECIATION OF ELECTRIC UTILITY PLANT (Account 108)

- 1. Explain in a footnote any important adjustments during year.
  2. Explain in a footnote any difference between the amount for book cost of plant retired, Line 12, column (c), and that reported for electric plant in service, page 204, column (d), excluding retirements of non-depreciable property.
  3. The provisions of Account 108 in the Uniform System of Accounts require that retirements of depreciable plant be recorded when such plant is removed from service. If the respondent has a significant amount of plant retired at year end which has not been recorded and/or classified to the various reserve functional classifications, make preliminary closing entries to tentatively functionalize the book cost of the plant retired. In addition, include all costs included in retirement work in progress at year end in the appropriate functional classifications.
  4. Show separately interest credits under a sinking fund or similar method of depreciation accounting.

## INVESTMENTS IN SUBSIDIARY COMPANIES (Account 123.1)

- 1. Report below investments in Account 123.1, Investments in Subsidiary Companies.
  2. Provide a subheading for each company and list thereunder the information called for below. Sub-TOTAL by company and give a TOTAL in columns (e), (f), (g) and (h). (a) Investment in Securities List and describe each security owned. For bonds give also principal amount, date of issue, maturity, and interest rate. (b) Investment Advances Report separately the amounts of loans or investment advances which are subject to repayment, but which are not subject to current settlement. With respect to each advance show whether the advance is a note or open account. List each note giving date of issuance, maturity date, and specifying whether note is a renewal.
  3. Report separately the equity in undistributed subsidiary earnings since acquisition. The TOTAL in column (e) should equal the amount entered for Account 418.1.
- 4. For any securities, notes, or accounts that were pledged designate such securities, notes, or accounts in a footnote, and state the name of pledgee and purpose of the pledge.
- 5. If Commission approval was required for any advance made or security acquired. designate such fact in a footnote and give name of Commission, date of authorization, and case or docket number.
- To column (h) report for each investment disposed of during the year, the gain or loss represented by the difference between cost of the investment (or the other amount at which carried in the books of account if different from cost) and the selling price thereof, not including interest adjustment includible in column (f).
- 8. Report on Line 42, column (a) the TOTAL cost of Account 123.1.

## Allowances (Accounts 158.1 and 158.2)

- 1. Report below the particulars (details) called for concerning allowances.
- Report all acquisitions of allowances at cost.
- 2. Report allowances in accordance with a weighted average cost allocation method and other accounting as prescribed by General Instruction No. 21 in the Uniform System of Accounts.

  4. Report the allowances transactions by the period they are first eligible for use: the current year's allowances in columns (b)-(c), allowances for the three succeeding years in columns (d)-(i), starting with the following year, and allowances for the remaining succeeding years in columns (j)-(k).
- 5. Report on Line 4 the Environmental Protection Agency (EPA) issued allowances. Report withheld portions Lines 36-40.
  6. Report on Line 5 allowances returned by the EPA. Report on Line 39 the EPA's sales of the withheld allowances. Report on Lines 43-46 the net sales proceeds and gains/losses resulting from the EPA's sale or auction of the withheld allowances.
- Report on Lines 8-14 the names of vendors/transferors of allowances acquired and identify associated companies.
   Report on Lines 2-2-27 the name of purchasers/ transferors of allowances disposed of and identify associated companies.
   Report on Lines 2-2-27 the name of purchasers/ transferores of allowances disposed of and identify associated companies.
- 9. Report the net costs and benefits of hedging transactions on a separate line under purchases/transfers and sales/transfers.
- 10. Report on Lines 32-35 and 43-46 the net sales proceeds and gains or losses from allowance sales.

### CAPITAL STOCKS (Account 201 and 204)

- 1. Report below the particulars (details) called for concerning common and preferred stock at end of year, distinguishing separate series of any general class. Show separate totals for common and preferred stock. If information to meet the stock exchange reporting requirement outlined in column (a) is available from the SEC 10-K Report Form filing, a specific reference to report form (i.e., year and company title) may be reported in column (a) provided the fiscal years for both the 10-K report and this report are compatible.

  2. Entries in column (b) should represent the number of shares authorized by the articles of incorporation as amended to end of year.

  3. Give details concerning shares of any class and series of stock authorized to be issued by a regulatory commission which have not yet been issued.

- 4. The identification of each class of preferred stock should show the dividend rate and whether the dividends are cumulative or noncumulative.
- 5. State in a footnote if any capital stock that has been nominally issued is nominally outstanding at end of year.

  6. Give particulars (details) in column (a) of any nominally issued capital stock, reacquired stock, or stock in sinking and other funds which is pledged, stating name of pledge and purpose of pledge.

### LONG-TERM DEBT (Account 221, 222, 223 and 224)

- 1. Report by Balance Sheet Account the details concerning long-term debt included in Accounts 221, Bonds, 222, Reacquired Bonds, 223, Advances from Associated Companies, and 224, Other Long-Term Debt.
- 2. For body assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds, and in column (b) include the related account number.

  3. For body assumed by the respondent, include in column (a) the name of the issuing company as well as a description of the bonds, and in column (b) include the related account number.

  3. For Advances from Associated Companies, report separately advances on notes and advances on open accounts. Designate demand notes as such. Include in column (a) names of associated companies from which advances were received, and in column (b) include the related
- 4. For receivers' certificates, show in column (a) the name of the court and date of court order under which such certificates were issued, and in column (b) include the related account number.
- 5. In a supplemental statement, give explanatory details for Accounts 223 and 224 of net changes during the year. With respect to long-term advances, show for each company: (a)principal advanced during year (b) interest added to principal amount, and (c) principal repaid during In a supplemental statement, give explanatory details for Accounts 223 and 224 or net changes uning the year.
   If the respondent has pledged any of its long-term debt securities, give particulars (details) in a footnote, including name of the pledgee and purpose of the pledge.
   If the respondent has any long-term securities that have been nominally issued and are nominally outstanding at end of year, describe such securities in a footnote.

- 8. If interest expense was incurred during the year on any obligations retired or reacquired before end of year, include such interest expense in column (m). Explain in a footnote any difference between the total of column (m) and the total Account 427. Interest on Long-Term Debt and Account 430, Interest on Debt to Associated Companies.
- 9. Give details concerning any long-term debt authorized by a regulatory commission but not yet issued.

### RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES

- 1. Report the reconciliation of reported net income for the year with taxable income used in computing Federal income tax accruals and show computation of such tax accruals. Include in the reconciliation, as far as practicable, the same detail as furnished on Schedule M-1 of the tax return for the year. Submit a reconciliation even though there is no taxable income for the year. Indicate clearly the nature of each reconciling amount.

  2. If the utility is a member of a group which files a consolidated Federal tax return, reconcile reported net income usif a separate return were to be field, indicating, however, intercompany amounts to be eliminated in such a consolidated return. State names of group member, tax assigned to each group member, and basis of allocation, assignment, or sharing of the consolidated tax among the group members.
- 3. A substitute page, designed to meet a particular need of a company, may be used as Long as the data is consistent and meets the requirements of the above instructions. For electronic reporting purposes complete Line 27 and provide the substitute Page in the context of a

#### TAXES ACCRUED, PREPAID AND CHARGES DURING YEAR

- 1. Give particulars (details) of the combined prepaid and accrued tax accounts and show the total taxes charged to operations and other accounts during the year. Do not include gasoline and other sales taxes which have been charged to the accounts to which the taxed material was charged. If the actual or estimated amounts of such taxes are known, show the amounts in a footnote and designate whether estimated or actual amounts.
- was charged. It the actual, or estimated amounts or such taxes are known, show the amounts in a foothote and designate whether estimated or actual amounts.

  2. Include on this page, taxes paid during the year and charged direct to final accounts, (not charged to prepaid or accrued taxes.) Enter the amounts in both columns (g) and (h). The balancing of this page is not affected by the inclusion of these taxes.

  3. Include in column (g) taxes charged during the year, taxes charged to operations and other accounts through (a) accruals credited to taxes accrued, (b)amounts credited to proportions of prepaid taxes chargeable to current year, and (c) taxes paid and charged direct to operations or accounts other than accrued and prepaid tax accounts.
- 4. List the aggregate of each kind of tax in such manner that the total tax for each State and subdivision can readily be ascertained.
- 5. If any tax (exclude Federal and State income taxes) covers more than one every show the required information separately for each tax year, identifying the year in column (d).
- In any tax (exclude reducing and state income taxes) covers in one year, show the required information separately for each rax year, licentifying the year in continuing ().
   C. Enter all adjustments of the accrude and prepaid tax accounts in column (i) and explain each adjustment in a foot- note. Designate debit adjustments by parentheses.
   T. Do not include on this page entries with respect to deferred income taxes or taxes collected through payroll deductions or otherwise pending transmittal of such taxes to the taxing authority.
- 8. Report in columns (b) through (o) how the taxes were distributed. Report in column (o) only the amounts charged to Accounts 408.1 and 409.1 pertaining to electric operations. departments and amounts charged to Accounts 408.2 and 409.2. Also shown in column (o) the taxes charged to utility plant or other balance sheet accounts.
- 9. For any tax apportioned to more than one utility department or account, state in a footnote the basis (necessity) of apportioning such tax.

Do not report quarterly data in columns (2), end to prevenue since the separately described account, and manufactured gas revenues in total.

  3. Report number of customers, columns (f) and (g), on the basis of meters, in addition to the number of flat rate accounts; except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters added. The average number of customers means the average of twelve figures at the close of each month.
- 4. If increases or decreases from previous period (columns (c),(e), and (q)), are not derived from previously reported figures, explain any inconsistencies in a footnote.
- 5. Disclose amounts of \$250,000 or greater in a footnote for accounts 451, 456, and 457.2.
- 6. Commercial and industrial Sales, account 442, may be classified according to the basis of classification (Small or Commercial, and Large or Industrial) regularly used by the respondent if such basis of classification is not generally greater than 1000 Kw of demand. (See Account Commercial and industrial Sales, Account 442, may be classified according to the basis of classification (Small or Commercial 442 of the Uniform System of Accounts. Explain basis of classification in a footnote.)
   See page 108, Important Changes During Period, for important new territory added and important rate increase or decreases.
- 8. For Lines 2.4.5 and 6, see Page 304 for amounts relating to unbilled revenue by accounts.
- Include unmetered sales. Provide details of such Sales in a footnote.

#### SALES OF ELECTRICITY BY RATE SCHEDULES.

- 1. Report below for each rate schedule in effect during the year the MWH of electricity sold, revenue, average number of customer, average Kwh per customer, and average revenue per Kwh, excluding date for Sales for Resale which is reported on Page 310.
  2. Provide a subheading and total for each prescribed operating revenue account in the sequence followed in "Electric Operating Revenues," Page 300. If the sales under any rate schedule are classified in more than one revenue account, List the rate schedule and sales data under each applicable revenue account subheading.
  3. Where the same customers are served under more than one rate schedule in the same revenue account classification (such as a general residential schedule and an off peak water heating schedule), the entries in column (d) for the special schedule should denote the
- duplication in number of reported customers.
- 4. The average number of reported customers.

  4. The average number of customers should be the number of bills rendered during the year divided by the number of billing periods during the year (12 if all billings are made monthly).

  5. For any rate schedule having a fuel adjustment clause state in a footnote the estimated additional revenue billed pursuant thereto.

  6. Report amount of unbilled revenue as of end of year for each applicable revenue account subheading.

#### SALES FOR RESALE (Account 447)

- 1. Report all sales for resale (i.e., sales to purchasers other than ultimate consumers) transacted on a settlement basis other than power exchanges during the year. Do not report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges on this schedule. Power exchanges must be reported on the Purchased Power schedule (Page 326).
- 2. Enter the name of the purchaser in column (a). Do note abbreviate or truncate the name or use acronyms. Explain in a footnote any ownership interest or affiliation the respondent has with the purchaser.
- 3. In column (b), enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
- RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projected load for this service in its system resource planning). In addition, the reliability of requirements service must be the same as, or second only to, the supplier's service to its own ultimate consumers.
- LF for tong-term service. "Long-term" means five years or Longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for Long-term firm service which meets the definition of RQ service. For all transactions identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or setter can unilaterally get out of the contract.
- IF for intermediate-term firm service. The same as LF service except that "intermediate-term" means longer than one year but Less than five years.
- SF for short-term firm service. Use this category for all firm services where the duration of each period of commitment for service is one year or less.
- LU for Long-term service from a designated generating unit. "Long-term" means five years or Longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability of designated unit.
- IU for intermediate-term service from a designated generating unit. The same as LU service except that "intermediate-term" means Longer than one year but Less than five years.
- OS for other service. use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote.
- AD for Out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
- 4. Group requirements RQ sales together and report them starting at line number one. After listing all RQ sales, enter "Subtotal RQ" in column (a). The remaining sales may then be listed in any order. Enter "Subtotal-Non-RQ" in column (a) after this Listing. Enter "Total" in column (a) as the Last Line of the schedule. Report subtotals and total for columns (d) through (k).
- 5. In Column (c), identify the FERC Rate Schedule or Tariff Number. On separate Lines, List all FERC rate schedules or tariffs under which service, as identified in column (b), is provided.
- 6. For requirements RQ sales and any type of-service involving demand charges imposed on a monthly (or Longer) basis, enter the average monthly billing demand in column (d), the average monthly non-coincident peak (NCP) demand in column (f). For all other types of service, enter that in columns (d), (e) and (f). Monthly NCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in meaquawatt basis and explain.
- 7. Report in column (a) the megawatt hours shown on bills rendered to the purchaser.
- 8. Report demand charges in column (h), energy charges in column (i), and the total of any other types of charges, including out-of-period adjustments, in column (j). Explain in a footnote all components of the amount shown in column (j). Report in column (k) the total charge shown on bills rendered to the purchaser.
- 9. The data in column (g) through (k) must be subtotaled based on the RQ/Non-RQ grouping (see instruction 4), and then totaled on the Last -line of the schedule. The "Subtotal RQ" amount in column (g) must be reported as Requirements Sales For Resale on Page 401, line 23.

  The "Subtotal Non-RQ" amount in column (g) must be reported as Non-Requirements Sales For Resale on Page 401, line 24.
- 10. Footnote entries as required and provide explanations following all required data.

#### PURCHASED POWER (Account 555)

- 1. Report all power purchases made during the year. Also report exchanges of electricity (i.e., transactions involving a balancing of debits and credits for energy, capacity, etc.) and any settlements for imbalanced exchanges.
- 2. Futer the name of the seller or other narty in an exchange transaction in column (a). Do not abbreviate or truncate the name or use acronyms. Explain in a football any ownership interest or affiliation the respondent has with the seller
- 3. In column (b) enter a Statistical Classification Code based on the original contractual terms and conditions of the service as follows:
- RQ for requirements service. Requirements service is service which the supplier plans to provide on an ongoing basis (i.e., the supplier includes projects load for this service in its system resource planning). In addition, the reliability of requirement service must be the same as, or second only to the supplier's service to its own ultimate consumers.
- LF for long-term firm service. "Long-term" means five years or longer and "firm" means that service cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions (e.g., the supplier must attempt to buy emergency energy from third parties to maintain deliveries of LF service). This category should not be used for long-term firm service which meets the definition of RQ service. For all transaction identified as LF, provide in a footnote the termination date of the contract defined as the earliest date that either buyer or seller can unilaterally used to ut of the contract.
- IF for intermediate-term firm service. The same as LF service expect that "intermediate-term" means longer than one year but less than five years.
- SF for short-term service. Use this category for all firm services, where the duration of each period of commitment for service is one year or less.
- LU for long-term service from a designated generating unit. "Long-term" means five years or longer. The availability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, aside from transmission constraints, must match the availability and reliability and reliability of service, as described from transmission constraints, must match the availability and reliability and reliability of service, as described from transmission constraints, must match the availability and reliability and reliab
- IU for intermediate-term service from a designated generating unit. The same as LU service expect that "intermediate-term" means longer than one year but less than five years.
- EX For exchanges of electricity. Use this category for transactions involving a balancing of debits and credits for energy, capacity, etc. and any settlements for imbalanced exchanges.
- OS for other service. Use this category only for those services which cannot be placed in the above-defined categories, such as all non-firm service regardless of the Length of the contract and service from designated units of Less than one year. Describe the nature of the service in a footnote for each adjustment.
- AD for out-of-period adjustment. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting years. Provide an explanation in a footnote for each adjustment.
- 4. In column (c), identify the FERC Rate Schedule Number or Tariff, or, for non-FERC jurisdictional sellers, include an appropriate designation for the contract. On separate lines, list all FERC rate schedules, tariffs or contract designations under which service, as identified in column (b), is provided.
- 5. For requirements RQ purchases and any type of service involving demand charges imposed on a monnthly (or longer) basis, enter the monthly average billing demand in column (d), the average monthly non-coincident peak (RCP) demand in column (f). For all other types of service, enter NA in columns (d), (e) and (f). Monthly RCP demand is the maximum metered hourly (60-minute integration) demand in a month. Monthly CP demand is the metered demand during the hour (60-minute integration) in which the supplier's system reaches its monthly peak. Demand reported in columns (e) and (f) must be in megawatts. Footnote any demand not stated on a megawatt basis and explains and explains.
- 6. Report in column (g) the megawatthours shown on bills rendered to the respondent, excluding purchases for energy storage. Report in column (h) the megawatthours shown on bills rendered to the respondent for energy storage purchases. Report in columns (i) and (j) the megawatthours of power exchanges received and delivered used as the basis for settlement. Do not report net exchange.
- Report demand charges in column (k), energy charges in column (l), and the total of any other types of charges, including out-of-period adjustments, in column (m). Explain in a footnote all components of the amount shown in column (m). Report in column (n) the total charge shown on bills received as settlement by the respondent. For power exchanges, report in column (n) the settlement amount for the net receipt of energy. If more energy was delivered than received, enter a negative amount. If the settlement amount (m) include credits or charges other than incremental generation expenses, or (2) excludes certain credits or charges covered by the agreement, provide an explanatory footnote.
- 8. The data in columns (g) through (n) must be reported as Exchange Received on Page 401, line 12. The total amount in column (i) must be reported as Exchange Received on Page 401, line 13.
- Footnote entries as required and provide explanations following all required data.

FERC FORM NO. 1 (ED. 12-90)

Page 326-327

### TRANSMISSION OF ELECTRICITY FOR OTHERS (Account 456.1) (Including transactions referred to as "wheeling")

- 1. Report all transmission of electricity, i.e., wheeling, provided for other electric utilities, cooperatives, other public authorities, qualifying facilities, non-traditional utility suppliers and ultimate customers for the quarter.
- 2. Use a separate line of data for each distinct type of transmission service involving the entities listed in column (a), (b) and (c),
- 3. Report in column (a) the company or public authority that paid for the transmission service. Report in column (b) the company or public authority that the energy was delivered to. Provide the full name of each company or public authority. Do not abbreviate or truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation the respondent has with the entities listed in columns (a), (b) or (c).
- 4. In column (d) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO Firm Network Service for Others, FNS Firm Network Transmission Service or Self, LFP "Long-Term Firm Point to Point Transmission Service, SFP Short-Term Firm Point to Point Transmission Service, OS Other Transmission Service and AD Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-time provided in prior reporting periods Provided an acquiantation in a footnote for codes."
- 5. In column (e), identify the FERC Rate Schedule or Tariff Number. On separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (d), is provided.
- 6. Report receipt and delivery locations for all single contract path, "point to point" insamission service. In column (f), report the designation for the substation, or other appropriate identification for where energy was received as specified in the contract. In column (g) report the designation for the substation, or other appropriate identification for where energy was received as specified in the contract.
- 7. Report in column (h) the number of megawatts of billing demand that is specified in the firm transmission service contract. Demand reported in column (h) must be in megawatts. Footnote any demand not stated on a megawatts basis and explain.
- 8. Report in column (i) and (i) the total megawatthours received and delivered.
- 9. In column (k) through (n), report the revenue amounts as shown on bills or vouchers. In column (k), provide revenues from demand charges related to the billing demand reported in column (h). In column (l), provide revenues from energy charges related to the amount of energy transferred. In column (m), provide the total revenues from all other charges on bills or vouchers rendered adjustments. Explain in a foothote all components of the amount shown in column (n). Report in column (n) the total charge shown on bills rendered to the entity Listed in column (a), if no monetary settlement was made, enter zero (in column (n). Provide a foothote explaining the nature of the non-monetary settlement, including the amount and two of service rendered.
- 10. The total amounts in columns (i) and (j) must be reported as Transmission Received and Transmission Delivered for annual report purposes only on Page 401, Lines 16 and 17, respectively.
- 11. Footnote entries and provide explanations following all required data.

#### TRANSMISSION OF FLECTRICITY BY ISO/RTOS

- 1. Report in Column (a) the Transmission Owner receiving revenue for the transmission of electricity by the ISO/RTO.
  2. Use a separate line of data for each distinct type of transmission service involving the entities listed in Column (a).
  3. In Column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows: FNO Firm Network Service for Others, FNS Firm Network Transmission Service for Self, LFP Long-Term Firm Point-to-Point Transmission Service, OLF Other Long-Term Firm Transmission Service, SFP Short-Term Firm Point-to-Point Transmission Reservation, NF Non-Firm Transmission Service, OS Other Transmission Service and AD- Out-of-Period Adjustments. Use this code for any accounting adjustments or "true-ups" for service provided in prior reporting periods. Provide an explanation in a footnote for each adjustment. See General Instruction for definitions of codes.
- 4. In column (c) identify the FERC Rate Schedule or tariff Number, on separate lines, list all FERC rate schedules or contract designations under which service, as identified in column (b) was provided.
- In column (d) report the revenue amounts as shown on bills or vouchers.
   Report in column (e) the total revenues distributed to the entity listed in column (a).

### TRANSMISSION OF ELECTRICITY BY OTHERS (Account 565)

- 1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, qualifying facilities, and others for the quarter.
- 1. Report all transmission, i.e. wheeling or electricity provided by other electric utilities, cooperatives, municipalities, other public authorities, quality required and others for the quarter.

  2. In column (a) report each company or public authority that provided transmission service. Provide the full name of the company, abbreviate if necessary, but do not truncate name or use acronyms. Explain in a footnote any ownership interest in or affiliation with the transmission service provider. Use additional columns as necessary to report all companies or public authorities that provided transmission service for the quarter reported.

  3. In column (b) enter a Statistical Classification code based on the original contractual terms and conditions of the service as follows:

  FNS Firm Network Transmission Service for Self, LFP Long-Term Firm Point-to-Point Transmission Reservations, NF Non-Firm Transmission Service, and
- OS Other Transmission Service. See General Instructions for definitions of statistical classifications.
- 4. Report in column (c) and (d) the total measurant hours received and delivered by the provider of the transmission service.
- 4. Report in column (c) and (a) the total megawatt nours received and delivered by the provider or the transmission service.

  5. Report in column (e), (f) and (g) expenses as shown on bills or vouchers rendered to the respondent. In column (e) report the demand charges and in column (f) energy charges related to the amount of energy transferred. On column (g) report the total of all other charges on bills or vouchers rendered to the respondent, including any out of period adjustments. Explain in a footnote all components of the amount shown in column (g). Report in column (h) the total charge shown on bills rendered to the respondent. If no monetary settlement was made, enter zero in column (h). Provide a footnote explaining the nature of the non-monetary settlement, including the amount and type of energy or service rendered.
- 6. Enter ""TOTAL"" in column (a) as the last line.
- 7. Footnote entries and provide explanations following all required data.

### Depreciation and Amortization of Electric Plant (Account 403, 404, 405)

- 1. Report in section A for the year the amounts for: (b) Depreciation Expense (Account 403); (c) Depreciation Expense for Asset Retirement Costs (Account 403.1); (d) Amortization of Limited-Term Electric Plant (Account 404); and (e) Amortization of Other Electric Plant (Account 405)
- 409.

  2. Report in Section B the rates used to compute amortization charges for electric plant (Accounts 404 and 405). State the basis used to compute charges and whether any changes have been made in the basis or rates used from the preceding report year.

  3. Report all available information called for in Section C every fifth year beginning with report year 1971, reporting annually only changes to columns (c) through (g) from the complete report of the preceding year.
- Unless composite depreciation accounting for total depreciable plant is followed, list numerically in column (a) each plant subaccount, account or functional classification, as appropriate, to which a rate is applied. Identify at the bottom of Section C the type of plant included in any
- In column (b) report all depreciable plant balances to which rates are applied showing subtotals by functional Classifications and showing composite total. Indicate at the bottom of section C the manner in which column balances are obtained. If average balances, state the method of averaging used.
- For columns (c), (d), and (e) report available information for each plant subaccount, account or functional classification listed in column (a). If plant mortality studies are prepared to assist in estimating average service Lives, show in column (f) the type of mortality curve selected as most appropriate for the account and in column (g), if available, the weighted average remaining life of surviving plant. If composite depreciation accounting is used, report available information called for in columns (b) through (g) on this basis.
- 4. If provisions for depreciation were made during the year in addition to depreciation provided by application of reported rates, state at the bottom of section C the amounts and nature of the provisions and the plant items to which related.

#### RESEARCH, DEVELOPMENT, AND DEMONSTRATION ACTIVITIES

- 1. Describe and show below costs incurred and accounts charged during the year for technological research, development, and demonstration (R. D. and D.) project initiated, continued or concluded during the year. Report also support given to others during the year for iointly-Describe and since we was included uning the year and the common below to so included uning the year and the common below to so included uning the year and the common below to so included uning the year. The principle is soonsored projects. (Identify recipient regardless of affiliation.) For any R. D and D work carried with others, show separately the respondent's cost for the year and cost, charges be to others. (See definition of research, development, and demonstration in Inform System of Accounts).
- Indicate in column (a) the applicable classification, as shown below: Classifications:

Electric R. D and D Performed Internally:

Generation

hydroelectric

Recreation fish and wildlife Other hydroelectric

Fossil-fuel steam Internal combustion or gas turbine Nuclear Unconventional generation Siting and heat rejection

Overhead Underground

Regional Transmission and Market Operation Environment (other than equipment) Other (Classify and include items in excess of \$50.000.) Total Cost Incurred

Electric, R. D and D Performed Externally:

Research Support to the electrical Research Council or the Electric Power Research Institute Research Support to Edison Electric Institute Research Support to Nuclear Power Groups

Research Support to Others (Classify)

Total Cost Incurred

- 3. Include in column (c) all R, D and D items performed internally and in column (d) those items performed outside the company costing \$50,000 or more, briefly describing the specific area of R, D and D (such as safety, corrosion control, pollution, automation, measurement, insulation, type of appliance, etc.). Group items under \$50,000 by classifications and indicate the number of items grouped. Under Other, (A (6) and B (4)) classify items by type of R, D and D activity.

  4. Show in column (e) the account number charged with expenses during the year or the account to which amounts were capitalized during the year, listing Account 107, Construction Work in Progress, first. Show in column (f) the amounts related to the account charged in column
- 5. Show in column (q) the total unamortized accumulating of costs of projects. This total must equal the balance in Account 188, Research, Development, and Demonstration Expenditures, Outstanding at the end of the year.
- 6. If costs have not been segregated for R. D and D activities or projects, submit estimates for columns (c), (d), and (f) with such amounts identified by ""Est.""
- 7. Report separately research and related testing facilities operated by the respondent.

					AMOUNTS CHARGED IN CURRENT YEAR

# DISTRIBUTION OF SALARIES AND WAGES

Report below the distribution of total salaries and wages for the year. Segregate amounts originally charged to clearing accounts to Utility Departments, Construction, Plant Removals, and Other Accounts, and enter such amounts in the appropriate lines and columns provided. In determining this segregation of salaries and wages originally charged to clearing accounts, a method of approximation giving substantially correct results may be used.

## AMOUNTS INCLUDED IN ISO/RTO SETTLEMENT STATEMENTS

1. The respondent shall report below the details called for concerning amounts it recorded in Account 555, Purchase Power, and Account 447, Sales for Resale, for items shown on ISO/RTO Settlement Statements. Transactions should be separately netted for each ISO/RTO administered energy market for purposes of determining whether an entity is a net seller or purchaser in a given hour. Net megawatt hours are to be used as the basis for determining whether a net purchase or sale has occurred. In each monthly reporting period, the hourly sale and purchase net amounts are to be aggregated and separately reported in Account 447, Sales for Resale, or Account 555, Purchased Power, respectively.

## Monthly ISO/RTO Transmission System Peak Load

- Report the monthly peak load on the respondent's transmission system. If the Respondent has two or more power systems which are not physically integrated, furnish the required information for each non-integrated system.
   Report on Column (b) by month the transmission system's peak load.
   Report on Column (c) and (d) the specified information for each monthly transmission system peak load reported on Column (b).
   Report on Columns (e) through (i) by month the system's transmission is system peak load reported on Column (b).
   Report on Columns (e) through (i) by month the system's transmission is system peak load reported as Through and Out Service in Column (g) are to be excluded from those amounts reported in Columns (e) and (f).
   Amounts reported in Column (j) for Total Usage is the sum of Columns (h) and (i).

## MONTHLY PEAKS AND OUTPUT

- Report the monthly peak load and energy output. If the respondent has two or more power which are not physically integrated, furnish the required information for each non- integrated system.
   Report in column (b) by month the system's output in Megawatt hours for each month.
   Report in column (c) by month the non-requirements sales for resale. Include in the monthly amounts any energy losses associated with the sales.
   Report in column (d) by month the system's monthly maximum megawatt load (60 minute integration) associated with the system.
   Report in column (e) and (f) the specified information for each monthly peak load reported in column (d).

### Steam Electric Generating Plant Statistics

- Report data for plant in Service only.
   Large plants are steam plants with installed capacity (name plate rating) of 25,000 Kw or more. Report in this page gas-turbine and internal combustion plants of 10,000 Kw or more, and nuclear plants.
   Indicate by a footnote any plant leased or operated as a joint facility.
   If net peak demand for 60 minutes is not available, give data which is available, specifying period.

- 7. If any employees attend more than one plant, report on line 11 the approximate average number of employees assignable to each plant.
- 6. If gas is used and purchased on a therm basis report the Btu content or the gas and the quantity of fuel burned converted to Mct.
- 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as show on Line 20.

- 7. Quantities of fuel burned (Line 38) and average cost per unit of fuel burned (Line 41) must be consistent with charges to expense accounts 501 and 547 (Line 42) as snow on Line 20.

  8. If more than one fuel is burned in a plant furnish only the composite heat rate for all fuels burned.

  9. Items under Cost of Plant are based on USofA accounts. Production expenses do not include Purchased Power, System Control and Load Dispatching, and Other Expenses Classified as Other Power Supply Expenses.

  10. For IC and GT plants, report Operating Expenses, Account Nos. 547 and 549 on Line 25 "Electric Expenses," and Maintenance Account Nos. 553 and 554 on Line 32, "Maintenance of Electric Plant." Indicate plants designed for peak load service. Designate automatically operated
- 11. For a plant equipped with combinations of fossil fuel steam, nuclear steam, hydro, internal combustion or gas-turbine equipment, report each as a separate plant. However, if a gas-turbine unit functions in a combined cycle operation with a conventional steam unit, include the gasturbine with the steam plant.
- 12. If a nuclear power generating plant, briefly explain by footnote (a) accounting method for cost of power generated including any excess costs attributed to research and development; (b) types of cost units used for the various components of fuel cost; and (c) any other informative data concerning plant type fuel used. fuel enrichment type and quantity for the report period and other physical and operating characteristics of plant.

### Pumped Storage Generating Plant Statistics

- Large plants and pumped storage plants of 10,000 Kw or more of installed capacity (name plate ratings).
   If any plant is leased, operating under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, indicate such facts in a footnote. Give project number.
   If net peak demand for 60 minutes is not available, give that which is available, specifying period.
   If a group of employees attends more than one generating plant, report on Line 8 the approximate average number of employees assignable to each plant.

- 4. If a group or improved automation international principal control and Load Dispatching, and Other Expenses classified as "Other Power Supply 5. The items under Cost of Plant represent accounts or combinations of accounts prescribed by the Uniform System of Accounts, Production Expenses do not include Purchased Power System Control and Load Dispatching, and Other Expenses classified as "Other Power Supply".
- Expenses."
  6. Pumping energy (Line 10) is that energy measured as input to the plant for pumping purposes.
  7. Include on Line 36 the cost of energy used in pumping into the storage reservoir. When this item cannot be accurately computed leave Lines 36, 37 and 38 blank and describe at the bottom of the schedule the company's principal sources of pumping power, the estimated amounts of energy from each station or other source that individually provides more than 10 percent of the total energy used for pumping, and production expenses per net MWH as reported herein for each source described. Group together stations and other resources which individually provide less than 10 percent of total pumping energy. If contracts are made with others to purchase power for pumping, give the supplier contract number, and date of contract.

### GENERATING PLANT STATISTICS (Small Plants)

- 1. Small generating plants are steam plants of, less than 25,000 Kw; internal combustion and gas turbine-plants, conventional hydro plants and pumped storage plants of less than 10,000 Kw installed capacity (name plate rating).

  2. Designate any plant leased from others, operated under a license from the Federal Energy Regulatory Commission, or operated as a joint facility, and give a concise statement of the facts in a footnote. If licensed project, give project number in footnote.

  3. List plants appropriately under subheadings for steam, hydro, nuclear, internal combustion and gas turbine plants. For nuclear, see instruction 11, Page 402.

  4. If net peak demand for 60 minutes is not available, give the which is a vailable, specifying period.

  5. If any plant is equipped with combinations of steam, hydro internal combustion or gas turbine equipment, report each as a separate plant. However, if the exhaust heat from the gas turbine is utilized in a steam turbine regenerative feed water cycle, or for preheated combustion air in a boiler, report as one plant.

FERC FORM NO. 1 (REV. 12-03)

	This report is:		
Name of Respondent: Transource Missouri, LLC	(1) ☑ An Original	Date of Report: 04/14/2022	Year/Period of Report End of: 2021/ Q4
	(2) A Resubmission		

### ENERGY STORAGE OPERATIONS (Large Plants)

- 1. Large Plants are plants of 10,000 Kw or more.

- Large Plants are plants of 10,000 Kw or more.
   In columns (a) (b) and (c) report the name of the energy storage project, functional classification (Production, Transmission, Distribution), and location.
   In column (d), report Megawatt hours (MWH) purchased, generated, or received in exchange transactions for storage.
   In columns (e), (f) and (g) report MWHs delivered to the grid to support production, transmission and distribution. The amount reported in column (d) should include MWHs delivered/provided to a generator's own load requirements or used for the provision of ancillary services.
- 5. In columns (h), (i), and (j) report MWHs lost during conversion, storage and discharge of energy.
- 6. In column (k) report the MWHs sold.
- o. In column (x) report the wwws sold.

  7. In column (I), report the cost of power purchased for storage operations. In a footnote, disclose the revenue accounts and revenue amounts related to the income generating activity.

  8. In column (m), report the cost of power purchased for storage operations and reported in Account 555.1, Power Purchased for Storage Operations. If power was purchased from an affiliated seller specify how the cost of the power was determined. In columns (n) and (o), report fuel costs for storage operations associated with self-generated power included in Account 501 and other costs associated with self-generated power.
- 9. In columns (a), (r) and (s) report the total project plant costs including but not exclusive of land and land rights, structures and improvements, energy storage equipment, turbines, compressors, generators, switching and conversion equipment, lines and equipment whose primary purpose is to integrate or tie energy storage assets into the power grid, and any other costs associated with the energy storage project included in the property accounts listed.

Line No.	Name of the Energy Storage Project (a)	Functional Classification (b)	Location of the Project (c)	MWHs (d)	MWHs delivered to the grid to support Production (e)	MWHs delivered to the grid to support Transmission (f)	MWHs delivered to the grid to support Distribution (g)	MWHs Lost During Conversion, Storage and Discharge of Energy Production (h)	MWHs Lost During Conversion, Storage and Discharge of Energy Transmission (i)	MWHs Lost During Conversion, Storage and Discharge of Energy Distribution (j)	MWHs Sold (k)	Revenues from Energy Storage Operations (I)	Power Purchased for Storage Operations (555.1) (Dollars) (m)	Fuel Costs from associated fuel accounts for Storage Operations Associated with Self- Generated Power (Dollars) (n)	Other Costs Associated with Self- Generated Power (Dollars) (0)	Project Costs included in (p)	Production (Dollars) (q)	Transmission (Dollars) (r)	Distribution (Dollars) (s)

FERC FORM NO. 1 ((NEW 12-12))

	This report is:		
Name of Respondent: Transource Missouri, LLC	(1) ☑ An Original	Date of Report: 04/14/2022	Year/Period of Report End of: 2021/ Q4
	(2) A Resubmission		

#### TRANSMISSION LINE STATISTICS

- 1. Report information concerning transmission lines, cost of lines, and expenses for year. List each transmission line having nominal voltage of 132 kilovolts or greater. Report transmission lines below these voltages in group totals only for each voltage. If required by a State commission to report individual lines for all voltages, do so but do not group totals for each voltage under 132 kilovolts.
- 2. Transmission lines include all lines covered by the definition of transmission system plant as given in the Uniform System of Accounts. Do not report substation costs and expenses on this page.
- 3. Exclude from this page any transmission lines for which plant costs are included in Account 121, Nonutility Property.
- 4. Indicate whether the type of supporting structure reported in column (e) is: (1) single pole wood or steel; (2) H-frame wood, or steel poles; (3) tower; or (4) underground construction If a transmission line has more than one type of supporting structure, indicate the mileage of each type of construction by the use of brackets and extra lines. Minor portions of a transmission line of a different type of construction need not be distinguished from the remainder of the line.
- 5. Report in columns (f) and (a) the total pole miles of each transmission line. Show in column (f) the pole miles of line on structures the cost of which is reported 5. Report in Columns (f) and (g) the total pole fillies of each transmission line. Show in column (g) the pole fillies of line on a studewing the pole fillies of line on a studewing the pole fillies of line on leased or partly owned structures in colorate, explain the basis of such occupancy and state whether expenses with respect to such structures are included in the expenses reported for the line designated.

  6. Do not report the same transmission line structure twice. Report Lower voltage Lines and higher voltage lines are higher voltage lines with higher voltage lines. If two or more transmission line structures support lines of the
- same voltage, report the pole miles of the primary structure in column (f) and the pole miles of the other line(s) in column (g).
- 7. Designate any transmission line or portion thereof for which the respondent is not the sole owner. If such property is leased from another company, give name of lessor, date and terms of Lease, and amount of rent for year. For any transmission line other than a leased line, or portion thereof, for which the respondent is not the sole owner but which the respondent operates or shares in the operation of, furnish a succinct statement explaining the arrangement and giving particulars (details) of such matters as percent ownership by respondent in the line. name of co-owner, basis of sharing expenses of the Line, and how the expenses borne by the respondent are accounted for, and accounts affected. Specify whether lessor, co-owner, or other party is an associated company.
- 8. Designate any transmission line leased to another company and give name of Lessee, date and terms of lease, annual rent for year, and how determined. Specify whether lessee is an associated company.
- 9. Base the plant cost figures called for in columns (i) to (l) on the book cost at end of year.

	DESIGN	DESIGNATION VOLTAGE (KV) - (Indicate where other than 60 cycle, 3 phase)			LENGTH (Pole miles) - (In the case of underground lines report circuit miles)						E (Include in colu and clearing rig		EXPENSES, EXCEPT DEPRECIATION AND TAXES

Name of Respondent:	This report is:  (1) ☑ An Original  (2) ☐ A Resubmission	Date of Report:	Year/Period of Report
Transource Missouri, LLC		04/14/2022	End of: 2021/ Q4

### TRANSMISSION LINES ADDED DURING YEAR

- 1. Report below the information called for concerning Transmission lines added or altered during the year. It is not necessary to report minor revisions of lines.

  2. Provide separate subheadings for overhead and under- ground construction and show each transmission line separately. If actual costs of competed construction are not readily available for reporting columns (I) to (o), it is permissible to report in these columns the costs.

  Designate, however, if estimated amounts are reported. Include costs of Clearing Land and Rights-of-Way, and Roads and Trails, in column (I) with appropriate footnote, and costs of Underground Conduit in column (m).

  3. If design voltage differs from operating voltage, indicate such fact by footnote; also where line is other than 60 cycle, 3 phase, indicate such other characteristic.

#### SUBSTATIONS

- Report below the information called for concerning substations of the respondent as of the end of the year.
   Substations which serve only one industrial or street railway customer should not be listed below.
   Substations with capacities of Less than 10 MVA except those serving customers with energy for resale, may be grouped according to functional character, but the number of such substations must be shown.
   Indicate in column (b) the functional character of each substation, designating whether transmission or distribution and whether attended or unattended. At the end of the page, summarize according to function the capacities reported for the individual stations in column (f).
- 5. Show in columns (I), (j), and (k) special equipment such as rotary converters, rectifiers, condensers, etc. and auxiliary equipment for increasing capacity.
- s. Snow in columns (i), (j), and (k) special equipment such as rotary converters, rectimers, condensers, etc. and auxiliary equipment for increasing capacity.
   Designate substations or major items of equipment leased from others, jointly owned with others, or operated otherwise than by reason of sole ownership by the respondent. For any substation or equipment operated under lease, give name of lessor, date and period of lease, and annual rent. For any substation or equipment operated other than by reason of sole ownership or lease, give name of co-owner or other party, explain basis of sharing expenses or other accounting between the parties, and state amounts and accounts affected in respondent's books of account. Specify in each case whether lessor, co-owner, or other party is an associated company.

## TRANSACTIONS WITH ASSOCIATED (AFFILIATED) COMPANIES

- 1. Report below the information called for concerning all non-power goods or services received from or provided to associated (affiliated) companies.

  2. The reporting threshold for reporting purposes is \$250,000. The threshold applies to the annual amount billed to the respondent or billed to an associated/affiliated company for non-power goods and services. The good or service must be specific in nature. Respondents should not attempt to include or aggregate amounts in a nonspecific category such as "general".

  3. Where amounts billed to or received from the associated (affiliated) company are based on an allocation process, explain in a footnote.
