RE: Case No. CA-2003-0242 - Application of BBC Telephone, Inc. for Certificate of
Service Authority and for Competitive Classification
Proposed Missouri Telecommunications Tariffs - YC-2003-1526

Dear Mr. Roberts:

Enclosed for filing please find an original and six (6) copies of the substitute proposed tariff sheets 4 and 6 for BBC Telephone, Inc. These replace the substitute proposed tariff sheets 4 and 6 which we filed on March 6, 2003 and have been changed in conformity with my conversation with Mr. Tom Solt of the Commission Staff.

Also, pursuant to Mr. Solt's request for some additional time to review these substitute sheets, we hereby renew our extension of the proposed effective date from March 24, 2003 to April 8, 2003.

Please place the file stamp on the additional copy of the tariffs and return them in the self-addressed stamped envelope I have provided. Thank you for your assistance. Please contact me at (816) 753-1122 if there are any questions.

Very truly yours,
FINNEGAN, CONRAD & PETERSON, L.C.

17.0 Caller ID:

This feature enables the Customer to view on a display unit the Calling Party Directory Name and/or Number (CPN) on incoming telephone calls. When Caller ID is activated on a Customer's line, the CPN of incoming calls are displayed at the called CPE during the first, long silent interval of the ringing cycle.

Per line blocking for blocking of CPN will be available upon request, at no charge, **ONLY** to the following entities for lines over which the official business of the agency is conducted, including those at the residences of employees/volunteers, where an executive officer of the agency registers a need for blocking and provides the required certification to Applicant:

- a) Private, nonprofit, tax exempt, domestic violence intervention agencies,
- b) Federal, state, and local law enforcement agencies.

The CPN will not be transmitted from a line equipped with this capability. Per line blocking is operational on a continuous basis but can be deactivated by the Customer by dialing an access code immediately prior to placing a call. Line blocking Customer can unblock their CPN information on a per call basis, at no charge, by dialing an access code (*82 on their touch tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A Customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (*67 on their touch tone pad or 1167 from a rotary phone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the CPN will not be transmitted across the line to the called party. Instead, Calling Line Identification Customer will receive an anonymous indicator. This anonymous indicator notifies the Caller ID Customer that the calling party has elected to block the delivery of their name and telephone number. The blocking of CPN will not be provided on calls originating from Customer Owned Pay Telephones. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.
