CAES was excluded because Ameren Missouri decided to evaluate pumped storage as the mass energy storage technology. The anaerobic digestion (AD) and biomass stand-alone projects were excluded based on cost. The remaining landfill gas and hydro projects were excluded because they are relatively small and opportunistic in nature. Ameren Missouri will continue to consider these projects but they were not analyzed further in this IRP.⁵ Ozark Beach was disqualified since it is owned and operated by Empire District Electric.

Table 5.B.1 Potential Items for Owner's Costs⁷

| Potential Owner's Costs | |
|--|---|
| <p>Project Development:</p> <p>Site selection study Land purchase/options/rezoning Transmission/gas pipeline rights of way Road modifications/upgrades Demolition (if applicable) Environmental permitting/offsets Public relations/community development Legal assistance</p> <p>Utility Interconnections:</p> <p>Natural gas service (if applicable) Gas system upgrades (if applicable) Electrical transmission Supply water Wastewater/sewer (if applicable)</p> <p>Spare Parts and Plant Equipment:</p> <p>Air quality control systems materials, supplies, and parts Acid gas treating materials, supplies and parts Combustion turbine and steam turbine materials, supplies, and parts HRSG materials, supplies, and parts Gasifier materials, supplies, and parts Balance-of-plant equipment materials, supplies and parts Rolling stock Plant furnishings and supplies Operating spares</p> <p>Owner's Project Management:</p> <p>Preparation of bid documents and selection of contractor(s) and suppliers Provision of project management Performance of engineering due diligence Provision of personnel for site construction Management</p> | <p>Plant Startup/Construction Support:</p> <p>Owner's site mobilization O&M staff training Supply of trained operators to support equipment testing and commissioning Initial test fluids and lubricants Initial inventory of chemicals/reagents Consumables Cost of fuel not recovered in power sales Auxiliary power purchase Construction all-risk insurance Acceptance testing</p> <p>Taxes/Advisory Fees/Legal:</p> <p>Taxes Market and environmental consultants Owner's legal expenses:</p> <ul style="list-style-type: none"> • Power Purchase Agreement (PPA) • Interconnect agreements • Contracts--procurement & construction • Property transfer <p>Owner's Contingency:</p> <p>Owner's uncertainty and costs pending final negotiation:</p> <ul style="list-style-type: none"> • Unidentified project scope increases • Unidentified project requirements • Costs pending final agreement (e.g., interconnection contract costs) <p>Financing:</p> <p>Development of financing sufficient to meet project obligations or obtaining alternate sources of funding Financial advisor, lender's legal, market analyst, and engineer Interest during construction Loan administration and commitment fees Debt service reserve fund</p> <p>Miscellaneous:</p> <p>All costs for above-mentioned Contractor-excluded items, if applicable</p> |

The technologies evaluated by Black and Veatch estimated generic transmission interconnection costs as a percentage of the EPC cost. Ameren Missouri included an estimate of 2.5 Million for the interconnection cost of pumped hydro at the Church Mountain site. The interconnection cost for solar was assumed to be located at an existing Ameren Missouri power plant site.
