**DIRECT TESTIMONY**

**DONALD J. PETRY**

**WITNESS INTRODUCTION**

1    **Q.    PLEASE STATE YOUR NAME AND BUSINESS ADDRESS.**

2    A.    Donald J. Petry, 727 Craig Road, St. Louis, Missouri 63141.

3    **Q.    BY WHOM ARE YOU EMPLOYED AND IN WHAT CAPACITY?**

4    A.    I am a Senior Financial Analyst in the Rates and Regulation Department of  
5           the Central Region of American Water Works Service Company, Inc.  
6           ("Company").

7    **Q.    PLEASE DESCRIBE YOUR EDUCATIONAL BACKGROUND AND**  
8           **BUSINESS EXPERIENCE.**

9    A.    My background and qualifications are summarized in Schedule DJP-1 of  
10          this testimony.

11

12                           **PURPOSE AND SCOPE**

13

14   **Q.    WHAT IS THE PURPOSE OF YOUR TESTIMONY IN THIS**  
15           **PROCEEDING?**

16   A.    The purpose of my testimony is to introduce and explain the financial  
17          information supporting Missouri American Water Company's ("Company")  
18          rate request to the Missouri Public Service Commission (MOPSC). I will  
19          cover the following topics: the financial schedules that calculate the

1 revenue deficiency, adjustments supporting the rate base, and the  
2 operating income statement. Specific accounting adjustments to the  
3 operating statement will include: Labor and Labor Related Expenses, Fuel  
4 & Power, Chemicals, Purchased Water, Waste Disposal, Tank Painting,  
5 and Uncollectibles.

6  
7 **Q. PLEASE EXPLAIN THE NUMBERING OF ACCOUNTING SCHEDULES**  
8 **CAS-1 THROUGH CAS-15.**

9 A. The first three digits are the abbreviation for Company Accounting  
10 Schedules (CAS). Schedule CAS-1 is a summary schedule for the Overall  
11 Rate Increase Calculation, Rate Base, and Income Statement for the  
12 Company. For Schedules CAS-2 through CAS-15, the numeric digits of 2  
13 through 15 represent specific components of the revenue requirement  
14 calculation. For example, Schedule 2 calculates the overall revenue  
15 deficiency; 3 through 7 calculates rate base; 8 through 12 is the income  
16 statement, revenues, O&M, O&M detail, and income taxes. Schedule 13  
17 and 14 is the bill analysis summary and the detail at present and proposed  
18 rates. And finally, Schedule 15 provides detailed income adjustments for  
19 all districts. The last three digits of Schedules 2 through 14 are  
20 alphabetized and provide specific detail for each district. For example,  
21 BRU is for the Brunswick District; JOP is for the Joplin District. Schedule  
22 DJP-2 contains a more detailed listing of the schedules and the  
23 alphabetical abbreviation for the each district. Some schedules have

multiple pages. Included on each page of Schedule CAS-15 is the name of the Company Witness who will provide testimony on that particular schedule.

**Q. WHAT TEST YEAR DOES THE COMPANY PROPOSE TO UTILIZE AS THE BASIS FOR THIS WATER RATE INCREASE?**

A. The rate filing is based upon a historic test year ending June 30, 2006, with adjustments through May 31, 2007. The May 31, 2007 cut-off was selected to provide the parties ample opportunity to audit capital additions that have been closed to plant-in-service, prior to the operation of law date.

#### **WATER ADJUSTMENTS**

**Q. ARE YOU SPONSORING ANY SCHEDULES THAT DEPICT THE MAJOR COMPONENTS OF THE RATE REQUEST?**

A. Yes. Schedules CAS-2-BRU, CAS-2-JFC, CAS-2-JOP, CAS-2-MEX, CAS-2-PKW CAS-2-SCH CAS-2-SJO CAS-2-STL CAS-2-WAR, CAS-2-WCW calculates the overall revenue deficiency in this rate case. The schedule titled, "Overall Revenue Requirement Summary for the Test Year Ended June 30, 2006," is the lead schedule and summarizes the financial information needed to calculate the Company's revenue deficiency by district.

1 **Q. PLEASE EXPLAIN THE REVENUE REQUIREMENT CALCULATION**  
2 **PRESENTED IN SCHEDULE CAS-2 FOR EACH DISTRICT.**

3 A. The revenue requirement calculation was determined by multiplying the  
4 Company's pro forma rate base by the requested rate of return to derive  
5 the required operating income. The recommended 8.52% overall rate of  
6 return is based upon an 11.3% common equity return requirement as  
7 supported by Company Witnesses Jenkins and Ahern. Company Witness  
8 Jenkins discusses the Cost of Capital schedule in detail in his Direct  
9 Testimony. The operating income requirement is then compared to pro  
10 forma earnings at present rates to determine the Company's operating  
11 income deficiency. When multiplied by the gross revenue conversion  
12 factor that adjusts for income taxes and uncollectibles, the result is a  
13 revenue deficiency. When added to the adjusted operating revenue, the  
14 result is the total revenue requirement for the district.

15  
16 **RATE BASE-WATER**

17 **Q. PLEASE DISCUSS THE CALCULATION OF EACH COMPONENT OF**  
18 **RATE BASE.**

19 A. The Company's rate base is shown on CAS-3 for each district that  
20 includes the actual June 30, 2006 balance for Utility Plant in Service  
21 (UPIS), Accumulated Reserve, Customer Advances, Contributions in Aid  
22 of Construction ("CIAC"), and Deferred ITC. Schedule CAS-4 through 7  
23 for each district contains detailed schedules for UPIS, Accumulated

1 Reserve, Customer Advances, CIAC, and Working Capital. UPIS is  
2 updated for true-up additions and retirements through May 31, 2007.  
3 Accumulated Reserve is updated for true-up retirements and depreciation  
4 through May 31, 2007, utilizing depreciation rates approved in Case No.  
5 WR-2003-0500. Customer Advances and CIAC were updated for true-up  
6 advances and contributions through May 31, 2007. The CIAC and  
7 Deferred ITC were updated for the amortization through May 31, 2007.  
8 Prepayments and Material and Supplies are based on a 13-month  
9 average. The post-employment benefits ("OPEBs") contributed to external  
10 funds included permanent investment recognized by the Commission in  
11 Case No. WR-95-205. Also included is investment as of June 30, 2006,  
12 updated with amortizations through May 31, 2007. Deferred taxes were  
13 calculated based on all plant in service at May 31, 2007, which is the  
14 proposed true-up date, and the deferred taxes associated with the pension  
15 liability costs. Pension Liability reflects the amount of pensions accrued  
16 reduced for any payments.

#### 17 **RATE BASE ELEMENTS-WATER**

18 **Q. WHAT RATE BASE ELEMENTS DO YOU WISH TO DISCUSS?**

19 A. The first is the deferred cost associated with the Company's security efforts.  
20 These costs are being amortized over a ten year period as approved in Case  
21 No. WO-2002-273.

1 **Q. WHAT OTHER RATE BASE ELEMENT WOULD YOU LIKE TO DISCUSS?**

2 A. Working capital is included in a utility's rate base to help compensate  
3 investors for the lag between the time water service is rendered to the  
4 customer and the time it takes to collect revenues from the customer to pay  
5 for the service. In other words, investors had to provide "upfront" capital to  
6 fund the daily operations of the business before customers paid their bills.  
7 The working capital calculation can also properly reflect the impact of the  
8 delay in receiving revenues from customers on depreciation and deferred  
9 taxes as a rate base deduction.

10 The Company has used a Lead/Lag method to calculate its working capital  
11 requirement. The Company and the Missouri Staff have used this method in  
12 the last several rate cases. The Company's Lead/Lag calculation has  
13 incorporated the Staff's calculation from the previous MAWC rate case. A  
14 few changes have been made.

15  
16 **Q. WERE ANY OF THE CHANGES A DEPARTURE FROM THE STAFF'S**  
17 **METHODOLOGY?**

18 A. Yes. One change was made to the expense lags for depreciation and  
19 deferred taxes. The Company is proposing to use an expense lag of zero  
20 days.

21 The purpose of using a zero lag is to recognize that 1) there is a lag in the  
22 collection of the revenues associated with depreciation and deferred taxes,  
23 and 2) because rate base is reduced by accumulated depreciation and

1 deferred taxes, the level of the accumulated depreciation and deferred taxes  
2 does not properly reflect the level that has been collected from the customers.  
3 Therefore, using a zero expense lag for depreciation and deferred taxes  
4 properly states the appropriate level of working capital.

5  
6 **INCOME STATEMENT-WATER**

7 **Q. PLEASE EXPLAIN THE STATEMENTS PRESENTED IN SCHEDULE**  
8 **CAS-8 THROUGH CAS-12 FOR EACH DISTRICT.**

9 A. These schedules were developed by accumulating the 12-month  
10 operating period ended June 30, 2006. The first adjustment column  
11 reflects the pro forma adjustments made to the test year operating income  
12 statement. The next column is the pro forma operating income statement  
13 at present rates, which includes the pro forma adjustments. The next  
14 column reflects the necessary pro forma revenue increase (i.e. grossed up  
15 for income taxes and uncollectible expense) to account for the change in  
16 operating income to obtain the required earnings level. The last column  
17 presents the pro forma operating income statement, at proposed rates,  
18 which includes the Company requested increase for that district and  
19 supports an operating income level before taxes.

20 Schedule CAS-9 for each district is a summary of the test year revenues  
21 by classification, the adjustments to these amounts, and the pro forma  
22 revenue at present rates.

1 Schedule CAS-10 for each district is a summary of the operating and  
2 maintenance expense and general taxes for the test year, the adjustments  
3 to those amounts, and the pro forma expense levels under present rates.  
4 Schedule CAS-11 for each district shows the detail of these pro forma  
5 adjustments in a chart format. Along the top horizontal edge are the  
6 individual schedules that support the adjustments. Down the left vertical  
7 edge are the line items as shown on Schedule CAS-10 for each district.  
8 The chart is very useful since some of the pro forma adjustments affect  
9 more than one line on the summary in Schedule CAS-10 for each district.  
10 Company Witness Grubb explains in his Direct Testimony the income tax  
11 calculation in Schedules CAS-12 for each district.  
12 Schedule CAS-15 contains a detailed explanation of the various pro forma  
13 adjustments requested in this case.

#### **SEWER ADJUSTMENTS**

17 **Q. ARE YOU SPONSORING ANY SCHEDULES THAT DEPICT THE**  
18 **MAJOR COMPONENTS OF THE RATE REQUEST?**

19 **A.** Yes. Schedules CAS-2-PKS, CAS-2-CDH, and CAS-2-WCS calculate the  
20 overall revenue deficiency in this rate case. The schedule titled, "Overall  
21 Revenue Requirement Summary for the Test Year Ended June 30, 2006,"  
22 is the lead schedule and summarizes the financial information needed to  
23 calculate the Company's revenue deficiency.

1   **Q.    PLEASE EXPLAIN THE REVENUE REQUIREMENT CALCULATION**  
2       **PRESENTED IN SCHEDULE CAS-2 FOR EACH DISTRICT.**

3    A.    The revenue requirement calculation was determined by multiplying the  
4       Company's pro forma rate base by the requested rate of return to derive  
5       the required operating income. The recommended 8.52% overall rate of  
6       return is based upon an 11.3% common equity return requirement as  
7       supported by Company Witnesses Jenkins and Ahern. Company Witness  
8       Jenkins discusses the Cost of Capital schedule in detail in his Direct  
9       Testimony. The operating income requirement is then compared to pro  
10      forma earnings at present rates to determine the Company's operating  
11      income deficiency. When multiplied by the gross revenue conversion  
12      factor that adjusts for income taxes and uncollectibles, the result is a  
13      revenue deficiency. When added to the adjusted operating revenue, the  
14      result is the total revenue requirement for the district.

15  
16                                   **RATE BASE - SEWER**

17   **Q.    PLEASE DISCUSS THE CALCULATION OF EACH COMPONENT OF**  
18       **RATE BASE.**

19    A.    The Company's rate base is shown on CAS-3 that includes the actual  
20      June 30, 2006 balance for UPIS, Accumulated Reserve, Customer  
21      Advances, Contributions in Aid of Construction ("CIAC"), and Deferred  
22      ITC. Schedule CAS-4 through CAS-7 contains detailed schedules for  
23      UPIS, Accumulated Reserve, Customer Advances, CIAC, and Working

1 Capital. UPIS is updated for true-up additions and retirements through  
2 May 31, 2007. Accumulated Reserve is updated for true-up retirements,  
3 depreciation, and net cost of removal through May 31, 2007, utilizing  
4 depreciation rates approved in Case No. WR-95-205. Customer  
5 Advances and CIAC were updated for true-up advances and contributions  
6 through May 31, 2007. The CIAC and Deferred ITC were updated for the  
7 amortization through May 31, 2007. Prepayments and Materials and  
8 Supplies are based on a 13-month average. The post-employment  
9 benefits ("OPEBs") contributed to external funds included permanent  
10 investment recognized by the Commission in Case No. WR-95-205. Also  
11 included is investment of June 30, 2006, updated with amortizations  
12 through May 31, 2007. Deferred taxes were calculated based on all plant  
13 in service at May 31, 2007, which is the proposed true-up date, and the  
14 deferred taxes associated with the pension liability and security costs.  
15 Pension Liability reflects the amount of pensions accrued reduced for any  
16 payments.  
17 Company Witness Jenkins explains in his Direct Testimony the rate base  
18 adjustments related to cash working capital.  
19

#### 20 **RATE BASE ELEMENTS-SEWER**

21 **Q. WHAT RATE BASE ELEMENTS DO YOU WISH TO DISCUSS?**

1 A. The first is the deferred cost associated with the Company's security efforts.  
2 These costs are being amortized over a ten year period as approved in Case  
3 No. WO-2002-273.

4 **Q. WHAT OTHER RATE BASE ELEMENT WOULD YOU LIKE TO DISCUSS?**

5 A. Working capital is included in a utility's rate base to help compensate  
6 investors for the lag between the time water service is rendered to the  
7 customer and the time it takes to collect revenues from the customer to pay  
8 for the service. In other words, investors had to provide "upfront" capital to  
9 fund the daily operations of the business before customers paid their bills.  
10 The working capital calculation can also properly reflect the impact of the  
11 delay in receiving revenues from customers on depreciation and deferred  
12 taxes as a rate base deduction.

13 The Company has used a Lead/Lag method to calculate its working capital  
14 requirement. The Company and the Missouri Staff have used this method in  
15 the last several rate cases. The Company's Lead/Lag calculation has  
16 incorporated the Staff's calculation from the previous MAWC rate case. A  
17 few changes have been made.

18 **Q. WERE ANY OF THE CHANGES A DEPARTURE FROM THE STAFF'S**  
19 **METHODOLOGY?**

20 A. Yes. One change was made to the expense lags for depreciation and  
21 deferred taxes. The Company is proposing to use an expense lag of zero  
22 days.

1 The purpose of using a zero lag is to recognize that 1) there is a lag in the  
2 collection of the revenues associated with depreciation and deferred taxes,  
3 and 2) because rate base is reduced by accumulated depreciation and  
4 deferred taxes, the level of the accumulated depreciation and deferred taxes  
5 does not properly reflect the level that has been collected from the customers.  
6 Therefore, using a zero expense lag for depreciation and deferred taxes  
7 properly states the appropriate level of working capital.

8  
9 **INCOME STATEMENT-SEWER**

10 **Q. PLEASE EXPLAIN THE STATEMENTS PRESENTED IN SCHEDULE**  
11 **CAS-8 THROUGH CAS-12.**

12 **A.** These schedules were developed by accumulating the 12-month  
13 operating period ended June 30, 2006. The first adjustment column  
14 reflects the pro forma adjustments made to the test year operating income  
15 statement. The next column is the pro forma operating income statement  
16 at present rates, which includes the pro forma adjustments. The next  
17 column reflects the necessary pro forma revenue increase (i.e. grossed up  
18 for income taxes and uncollectible expense) to account for the change in  
19 operating income to obtain the required earnings level. The last column  
20 presents the pro forma operating income statement at proposed rates,  
21 which includes the Company requested increase for that district and  
22 supports an operating income level before taxes.

1 Schedule CAS-9 is a summary of the test year revenues by classification,  
2 the adjustments to these amounts, and the pro forma revenue at present  
3 rates.

4 Schedule CAS-10-PKS is a summary of the operating and maintenance  
5 expense categories for the test year, the adjustments to those amounts,  
6 and the pro forma expense levels under present rates.

7 Schedule CAS-11-PKS shows the detail of these pro forma adjustments in  
8 a chart format. Along the top horizontal edge are the individual schedules  
9 that support the adjustments. Down the left vertical edge are the line  
10 items as shown on Schedule CAS-10-PKS. The chart is very useful since  
11 some of the pro forma adjustments affect more than one line on the  
12 summary in Schedule CAS-10-PKS.

13 Company Witness Grubb explains in his Direct Testimony the income tax  
14 calculation in Schedule CAS-12-PKS.

15 A detailed explanation of the various pro forma adjustments requested in  
16 this case contained in Schedule CAS-15.

17  
18 **ALLOCATION OF CORPORATE EXPENSES**

19 **Q. PLEASE DISCUSS THE ALLOCATION OF CORPORATE EXPENSES.**

20 A. Corporate expenses include Missouri American employees that have  
21 statewide responsibilities and expenses paid at the state level (Insurance  
22 Other Than Group, PSC Assessment, Franchise Tax, etc.) These  
23 expenses are primarily allocated to the operating districts based on the

1 number of customers. Workers Compensation is allocated based on  
2 payroll percentage.

3  
4 **LABOR AND LABOR-RELATED EXPENSES**

5 **Q. PLEASE EXPLAIN THE COMPANY'S PRO FORMA ADJUSTMENT TO**  
6 **THE LABOR AND LABOR-RELATED EXPENSES.**

7 **A.** The Company has proposed adjustments to its Labor Expense, Group  
8 Insurance, Pension Expense, 401K, and Payroll Taxes.

9 Shown below is a list of the expense adjustment categories and their  
10 corresponding schedule within the Company's filing. Each of the schedules  
11 provides an explanation of the adjustment. Company Witness Grubb explains  
12 in his testimony the adjustments to Pensions and OPEBs related to Group  
13 Insurance.

14

<u>Expense Adjustment</u>	<u>Schedule Reference</u>
Labor/Incentive Plan	CAS-15, page 1
Group Insurance	CAS-15, page 2
Pensions	CAS-15, page 3
401K	CAS-15, page 4
Payroll Taxes	CAS-15, page 5

21  
22 **FUEL AND POWER**

1 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
2 **RELATED TO FUEL AND POWER.**

3 A. The purpose of this adjustment is to annualize fuel and power expense for  
4 changes that have occurred, or are expected to occur, by the true-up date.  
5 The details of this adjustment can be found at Schedule CAS-15, page 6.

6  
7 **CHEMICALS**

8 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
9 **RELATED TO CHEMICALS.**

10 A. The purpose of this adjustment is to annualize chemical expense to achieve a  
11 normal level needed to treat water produced by the Company under normal  
12 conditions and demands at current contract prices. The details of this  
13 adjustment can be found at Schedule CAS-15, page 7.

14  
15 **PURCHASED WATER**

16 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
17 **RELATED TO PURCHASED WATER.**

18 A. The purpose of this adjustment is to annualize the Company's expense  
19 associated with water purchases and recognize that the St. Louis District  
20 supplies nearly 100% of the water demand for the St. Charles District. The  
21 details of this adjustment can be found at Schedule CAS-15, page 8.

1 **Q. DO THE FUEL AND POWER, CHEMICALS, AND PURCHASED WATER**  
2 **ADJUSTMENTS YOU HAVE DISCUSSED INCLUDE A PRO FORMA**  
3 **SALES ADJUSTMENT?**

4 **A.** Yes. For all three adjustments noted above, each expense was also adjusted  
5 to incorporate the pro forma sales adjustment as discussed by Mr. Grubb in  
6 his Direct Testimony.

7  
8 **WASTE DISPOSAL**

9 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
10 **RELATED TO WASTE DISPOSAL.**

11 **A.** The purpose of this adjustment is to annualize the Company's expense  
12 related to waste disposal. The details of this adjustment can be found at  
13 Schedule CAS-15, page 9.

14  
15 **TANK PAINTING EXPENSE**

16 **Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES**  
17 **RELATED TO TANK PAINTING EXPENSE.**

18 **A.** The purpose of this adjustment is to reflect tank painting expenses on an  
19 annualized level. The adjustment estimates the cost of interior and  
20 exterior painting and inspection for all Missouri-American tank sites.  
21 These costs are then amortized primarily over an eight-year life for interior  
22 and a twelve-year life for exterior painting. The details of this adjustment  
23 can be found at Schedule CAS-15, page 19.

1

2

**UNCOLLECTIBLE EXPENSE**

3

**Q. PLEASE DESCRIBE THE ADJUSTMENT TO OPERATING EXPENSES  
RELATED TO UNCOLLECTABLE EXPENSE.**

4

5

**A. The purpose of this adjustment is to annualize uncollectible expense to a  
two-year average ratio of net charge-offs to present billed water rates.**

6

7

The two-year average is then applied to the pro forma present rate water  
revenues. The details of this adjustment can be found at Schedule

8

9

CAS-15, page 21.

10

11

**Q. DOES THIS CONCLUDE YOUR TESTIMONY?**

12

**A. Yes, it does.**

**DONALD J. PETRY**

Mr. Petry's main responsibilities as Senior Financial Analyst, Rates & Regulations involve providing the following services to American Water utility subsidiaries in the Central Region, including Missouri American Water Company, Inc. ("Missouri American" or "Company"):

- 1) Preparing and presenting all rate increase applications and supporting documents and exhibits as prescribed by management policies, guidelines and regulatory commission requirements;
- 2) Preparing rate analyses and studies to evaluate the effect of proposed rates on the revenues, rate of return and tariff structures;
- 3) Executing the implementation of rate orders, including development of the revised tariff pricing necessary to produce the proposed revenue level;
- 4) Overseeing the preparation of revenue and capital requirements budgets and analyses;
- 5) Providing support for financial analysis of proposed acquisitions and expansion of service territory, including preparation of applicable regulatory commission filings.

In May 1981, Mr. Petry was awarded a Bachelor of Science Degree in Accounting from Manchester College. In May 1995, he completed a Masters of Business Administration from Tiffin University. He attended the NARUC Utility Rate School sponsored by the National Association of Regulatory Utility Commissioners in September, 2005.

Mr. Petry began his career in 1981 with American Water Works Service Co., Inc. as an Internal Auditor. As an Internal Auditor, he conducted financial and procedural audits of American System operating companies. In 1983, he was promoted to Business Manager of Ohio-American Water Company, Tiffin District. His responsibilities included preparation and management of the annual budget, cash forecasting, and customer service (customer billing, payments and inquiries, meter readers, and field service representatives) for the District. In 1994, he was promoted to Customer Service Superintendent. Responsibilities there included customer billing, cash collections, and the call center for all Ohio-American Districts and supervision of the meter readers and field service representatives of the Marion District.

In January 2001, Mr. Petry was promoted to Manager – Operations and Performance of the national Customer Service Center (CSC) for American Water Works Service Company, Inc. His responsibilities included preparation of the CSC budget, analysis and reporting of the CSC performance, scheduling of the workforce, and operation of the facility. December, 2002, he was promoted to Manager – Billing & Collections for the CSC where he was responsible for the processing of all billing and collection activities. In November, 2004, he transferred to Manager – Operations for the CSC to become responsible for the budgeting, workforce management, and facilities for the CSC.

In September, 2005, Mr. Petry was appointed to his current position. He has prepared testimony for the Public Utilities Commission of Ohio.
