The company proposes to offer the following services:

Applicant proposes to deploy underground and/or aerial fiber optic cable along with fiber and outdoor metro cell nodes. (A metro cell node is comprised of equipment and an antenna most typically mounted on or near a utility pole or light pole.) Over 20,000 such nodes have been deployed across the United States (though not by Applicant). The footprint of a node is typically far, far less intrusive to a municipality than that of a traditional macro cell (i.e., cell tower). Applicant may rely on existing infrastructure (such as leasing fiber or using pole attachments) to deploy its network in some cases. Applicant will, generally, construct its own facilities. Applicant proposes to lease its facilities to wireless carriers in order for the carriers to activate small cell antennas. The antennas will be owned and operated by the wireless carriers. The Applicant will maintain ownership of the fiber and lease the fiber to wireless carriers on Individual Case Basis (ICB) arrangements. Applicant has not yet identified specific areas in which Applicant intends to deploy these services, but is requesting authority to deploy them across the State of Missouri.

Attached is an affidavit signed by an officer or general partner of the Applicant stating the various requirements identified in §392.611.4 and/or §392.550 RSMo, plus confirmation the Applicant's service meets the criteria for these services as defined by §386.020.

WHEREFORE, the Applicant requests the Commission to issue an order granting the Applicant a registration to offer and provide the indicated services identified in this application.

Respectfully submitted,
