Missouri Public Service Commission
Public Hearing – Cass County Justice Center

Missouri Public
Service Commission

Dear Missouri Public Service Commission:

I am a Cass County resident and I am in support of keeping Aquila's South Harper Peaking Facility at its current location in rural Cass County, Missouri.

Thank you for allowing me the opportunity to express my concerns. I have been an Aquila customer for many years. Living in northern Cass County, I am proud to say that we have received excellent service from Aquila and even in the severe ice storm a few years back we still had electricity. That's the service we have come to expect and want to continue receiving.

I am an employee at Aquila and I enjoy working at Aquila. I believed in good faith that the construction of the South Harper Plant was handled properly, however, there clearly needs to be some clarification on site specific permission. With the continued growth in Cass County and the need to cover peaking usage I would ask that the Commission considers allowing the South Harper Peaking Facility to operate as a peaking facility.

It's with pleasure that I work at Aquila. We have a lot of outstanding people who work at Aquila with integrity and heart. We would never wish to cause ill-will or hardship toward anyone. It's the Aquila spirit to volunteer and help our neighbors. I personally work with several organizations and am proud to represent Aquila as a volunteer with Youth Friends, Christmas in October, Minority Supplier Council and the list goes on as needs arise, such as Katrina relief.

Again, thank you for allowing me the opportunity to express my support for Aquila.

Regards,

Ellen A. Berry
