Re: Water Quality Usage

Dear Mr. Pruitt:

Per your inquiry, Public Water Supply District #7 operates the water treatment plant on a daily basis to meet our customer usage demand. The volume required to meet the daily demand does not affect in any way the quality of our effluent water.

The United States Environmental Protection Agency and the Missouri Department of Natural Resources establish the water quality standards for all water system purveyors to meet. Our treatment procedures are established to meet these parameters and are not influenced in any other way.

The plant operators work diligently to meet or exceed these water quality standards set forth. The quality and quantity of our treated effluent water is not influenced what so ever by any individual customer.

If we may be of any further assistance please feel free to call our office at (816) 250-2300.

Sincerely,

Leonard Whiting
System Manager
