

# Missouri StopAquila.org Membership Form

Membership in StopAquila.org is free. Members of StopAquila.org share the conviction that utility companies, including Aquila Inc., should be required to abide by laws set forth in the states in which they operate. To become a member, simply complete the form. Required fields are **bolded**. Most members agree with the statements below. If you want to become a member and disagree with any of the belief statements, simply mark through the statement that you do not agree with. Your personal information will not be used or distributed except to legal entities requesting verification of StopAquila.org membership.

As a resident of the State of Missouri, I am concerned about the regulation of utilities and am a member of StopAquila.org. As a member of StopAquila.org, I believe that:

- Utility companies must be required to seek and obtain the zoning and permitting from the appropriate local authority as set forth in the Missouri Constitution prior to building facilities specified in the Constitution.
- Utility companies must abide by the rules and regulations of the Missouri Public Service Commission.
- Rate payers should not be asked or required to subsidize facilities that are not truly needed to ensure power. A utility that purposefully divests itself of facilities and contracts for power is not justified in claiming "need" for a new facility if the need appears to be associated with divestiture from existing resources.
- Rate payers should not be required to subsidize the South Harper plant that was built without adherence to applicable Missouri laws, County zoning and permitting, and rules and regulations of the Missouri Public Service Commission.
- The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.
- Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.

## Missouri StopAquila.org Membership Form

Membership in StopAquila.org is free. Members of StopAquila.org share the conviction that utility companies, including Aquila Inc., should be required to abide by laws set forth in the states in which they operate. To become a member, simply complete the form. Required fields are bolded. Most members agree with the statements below. If you want to become a member and disagree with any of the belief statements, simply mark through the statement that you do not agree with. Your personal information will not be used or distributed except to legal entities requesting verification of StopAquila.org membership.

As a citizen of the State of Missouri, I am concerned about the regulation of utilities and am a member of StopAquila.org. As a member of StopAquila.org, I believe that:

- Utility companies must be required to seek and obtain the zoning and permitting from the appropriate local authority as set forth in the Missouri Constitution prior to building facilities specified in the Constitution.
- Utility companies must abide by the rules and regulations of the Missouri Public Service Commission.
- Rate payers should not be asked or required to subsidize facilities that are not truly needed to ensure power. A utility that purposefully divests itself of facilities and contracts for power is not justified in claiming "need" for a new facility if the need appears to be associated with divestiture from existing resources.
- Rate payers should not be required to subsidize the South Harper plant that was built without adherence to applicable Missouri laws, County zoning and permitting, and rules and regulations of the Missouri Public Service Commission.
- The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.
- Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.

## Missouri StopAquila.org Membership Form

Membership in StopAquila.org is free. Members of StopAquila.org share the conviction that utility companies, including Aquila Inc., should be required to abide by laws set forth in the states in which they operate. To become a member, simply complete the form. Required fields are **bolded**. Most members agree with the statements below. If you want to become a member and disagree with any of the belief statements, simply mark through the statement that you do not agree with. Your personal information will not be used or distributed except to legal entities requesting verification of StopAquila.org membership.

As a resident of the State of Missouri, I am concerned about the regulation of utilities and am a member of StopAquila.org. As a member of StopAquila.org, I believe that:

- Utility companies must be required to seek and obtain the zoning and permitting from the appropriate local authority as set forth in the Missouri Constitution prior to building facilities specified in the Constitution.
- Utility companies must abide by the rules and regulations of the Missouri Public Service Commission.
- Rate payers should not be asked or required to subsidize facilities that are not truly needed to ensure power. A utility that purposefully divests itself of facilities and contracts for power is not justified in claiming "need" for a new facility if the need appears to be associated with divestiture from existing resources.
- Rate payers should not be required to subsidize the South Harper plant that was built without adherence to applicable Missouri laws, County zoning and permitting, and rules and regulations of the Missouri Public Service Commission.
- The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.
- Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.

- Utility companies must be required to seek and obtain the zoning and permitting from the appropriate local authority as set forth in the Missouri Constitution prior to building facilities specified in the Constitution.
- Utility companies must abide by the rules and regulations of the Missouri Public Service Commission.
- Rate payers should not be asked or required to subsidize facilities that are not truly needed to ensure power. A utility that purposefully divests itself of facilities and contracts for power is not justified in claiming "need" for a new facility if the need appears to be associated with divestiture from existing resources.
- Rate payers should not be required to subsidize the South Harper plant that was built without adherence to applicable Missouri laws, County zoning and permitting, and rules and regulations of the Missouri Public Service Commission.
- The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.
- Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.

## Missouri StopAquila.org Membership Form

Membership in StopAquila.org is free. Members of StopAquila.org share the conviction that utility companies, including Aquila Inc., should be required to abide by laws set forth in the states in which they operate. To become a member, simply complete the form. Required fields are **bolded**. Most members agree with the statements below. If you want to become a member and disagree with any of the belief statements, simply mark through the statement that you do not agree with. Your personal information will not be used or distributed except to legal entities requesting verification of StopAquila.org membership.

As a resident of the State of Missouri, I am concerned about the regulation of utilities and am a member of StopAquila.org. As a member of StopAquila.org, I believe that:

- Utility companies must be required to seek and obtain the zoning and permitting from the appropriate local authority as set forth in the Missouri Constitution prior to building facilities specified in the Constitution.
- Utility companies must abide by the rules and regulations of the Missouri Public Service Commission.
- Rate payers should not be asked or required to subsidize facilities that are not truly needed to ensure power. A utility that purposefully divests itself of facilities and contracts for power is not justified in claiming "need" for a new facility if the need appears to be associated with divestiture from existing resources.
- Rate payers should not be required to subsidize the South Harper plant that was built without adherence to applicable Missouri laws, County zoning and permitting, and rules and regulations of the Missouri Public Service Commission.
- The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.
- Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.

- The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.
- Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.

Missouri StopAquila.org Membership Form

Membership in StopAquila.org is free. Members of StopAquila.org share the conviction that utility companies, including Aquila Inc., should be required to abide by laws set forth in the states in which they operate. To become a member, simply complete the form. Required fields are bolded. Most members agree with the statements below. If you want to become a member and disagree with any of the belief statements, simply mark through the statement that you do not agree with. Your personal information will not be used or distributed except to legal entities requesting verification of StopAquila.org membership.

As a resident of the State of Missouri, I am concerned about the regulation of utilities and am a member of StopAquila.org. As a member of StopAquila.org, I believe that:

Utility companies must be required to seek and obtain the zoning and permitting from the appropriate local authority as set forth in the Missouri Constitution prior to building facilities specified in the Constitution.

Utility companies must abide by the rules and regulations of the Missouri Public Service Commission.

Rate payers should not be asked or required to subsidize facilities that are not truly needed to ensure power. A utility that purposefully divests itself of facilities and contracts for power is not justified in claiming "need" for a new facility if the need appears to be associated with divestiture from existing resources.

Rate payers should not be required to subsidize the South Harper plant that was built without adherence to applicable Missouri laws, County zoning and permitting, and rules and regulations of the Missouri Public Service Commission. The order of Judge Dandurand, that Aquila originally agreed to, requiring that the South Harper plant be dismantled should appeals fail to overturn his judgment should be enforced.

Aquila management should be held accountable for knowingly failing to abide by the applicable laws set forth in the Missouri Constitution, the County of Cass, and the rules and regulations of the Missouri Public Service Commission.
