RE: Aquila Rezoning Request

Dear Members of the Board:

I'm sure you may be aware the City of Peculiar has been working cooperatively with Aquila to locate their proposed gas turbine peaking facility in Peculiar.   We understand that a part of the infrastructure upgrades, which are a part of the project, is the construction of a substation. The function of the substation will be to interconnect the transmission lines from the peaking facility into the 345KV distribution lines in northern Cass County.

The City supports Aquila's rezoning request for the rezoning, understanding the property is needed for the substation, which is required for the total project. We also understand that under County zoning regulations, the requested zoning class is appropriate for the substation.

Sincerely,

Michael J. Fisher,
City Administrator
