### THE EMPIRE DISTRICT ELECTRIC COMPANY, d/b/a Liberty

#### **CASE NO. ER-2021-0312**

Jefferson City, Missouri January 2022

\*\* Denotes Confidential Information \*\*

1	SURREBUTTAL TESTIMONY		
2	OF		
3	J LUEBBERT		
4 5	THE EMPIRE DISTRICT ELECTRIC COMPANY, d/b/a Liberty		
6	CASE NO. ER-2021-0312		
7	Q. Please state your name and business address.		
8	A. My name is J Luebbert, and my business address is Missouri Public Service		
9	Commission, P.O. Box 360, Jefferson City, Missouri, 65102.		
10	Q. By whom are you employed and in what capacity?		
11	A. I am employed by the Missouri Public Service Commission ("Commission") as		
12	an Associate Engineer in the Engineering Analysis Department of the Industry Analysis		
13	Division.		
14	Q. Are you the same J Luebbert that contributed to Staff's Cost of Service		
15	Report, which was filed on October 29, 2021 and rebuttal testimony, which was filed on		
16	December 20, 2021 in this case?		
17	A. Yes, I am.		
18	Q. What is the purpose of your surrebuttal testimony?		
19	A. My testimony will provide some background information on the Purchased		
20	Power Agreement replacement value ("PPA RV"), which is included as a term in the		
21	Market Price Protection Mechanism ("MPPM") resulting from the Commission ordered in the		
22	Non-Unanimous Stipulation and Agreement in Case No. EA-2019-0010. I will address the		
23	rebuttal testimony of the Office of the Public Counsel ("OPC") witness Lena Mantle		
24	regarding the PPA RV associated with the MPPM. I will also address OPC witness		

Geoff Marke's recommendation regarding reporting requirements for Empire's future plant
 in-service accounting ("PISA") investments.

#### **PPA Replacement Value**

3

4 Q. How would you summarize OPC witness Mantle's rebuttal testimony as it
5 pertains to the PPA RV of the MPPM?

A. 6 In her rebuttal testimony, Ms. Mantle generally describes the PPA RV as 7 described in the Commission's Report and Order in Case No. EA-2019-0010 as well as the 8 Non-Unanimous Stipulation and Agreement from the same docket. Specifically, Ms. Mantle 9 notes that the Commission's Report and Order does not specify a calculation methodology for 10 the PPA RV while recommending that the Commission "completely remove the PPA replacement value from the MPPM."<sup>1</sup> She then proceeds to explain that Empire does not need 11 all of the energy produced by the current Elk River and Meridian Way wind PPAs to satisfy 12 13 Missouri's Renewable Energy Standard, concluding that if "the PPA replacement value is 14 included in the calculation of the MPPM, it should be only for the amount of resources needed and not based on the energy produced by Elk River and Meridian Way."<sup>2</sup> 15

Q. Did Staff address the PPA RV as related to the MPPM in prior rounds of
testimony in this case?

18

A. No, nor did Staff address the PPA RV in testimony in EA-2019-0010.

19 Q. Why didn't Staff address the issue of PPA RV in prior rounds of testimony of20 this case?

<sup>&</sup>lt;sup>1</sup> Page 53, lines 20-21 of OPC witness Lena Mantle's Rebuttal testimony.

<sup>&</sup>lt;sup>2</sup> Page 55, lines 1-5 of OPC witness Lena Mantle's Rebuttal testimony.

A. 1 The MPPM Guarantee Period, as defined by Appendix B of the aforementioned 2 stipulation and agreement, begins at the first day of the month after the first Wind Projects<sup>3</sup> are 3 placed into rates and will run until the end of the 10th full year (120 months) after the last Wind Project is entered into rates.<sup>4,5</sup> My understanding is that the wind PPAs in question, 4 5 Meridian Way and Elk River, do not expire until December of 2025 and December of 2028,<sup>6</sup> 6 respectively. The PPA RV associated with the MPPM will not be relevant until after the 7 expiration of the respective PPAs and should include actual production values of the new wind 8 projects in the years that follow the expiration dates, which is well beyond the review period 9 that is relevant to this case. To put it simply, unless the existing PPA contracts are altered, the 10 PPA RV as it pertains to the MPPM will not need to be determined until a date much closer to 11 2026. It is also worth noting that 20 CSR 4240-20.090(10)(A) states in part that, "the electric 12 utility must file a general rate case with the effective date of new rates to be no later than four 13 (4) years after the effective date of the commission order implementing the RAM", which should provide an opportunity for all parties to review more relevant production data from the 14 15 existing PPAs, the wind projects included within the context of this rate case, and any additional 16 relevant information or context necessary to provide recommendations to the Commission.

Q. What information regarding the PPA RV was included within the Stipulation
and Agreement in the EA-2019-0010 case?

- 19
- 20

A. The PPA RV is defined by Appendix B to mean the "value associated with replacing the existing wind PPAs during the period of the guarantee, as shown on

<sup>&</sup>lt;sup>3</sup> The wind projects referenced in the MPPM are North Fork Ridge, Kings Point, and Neosho Ridge.

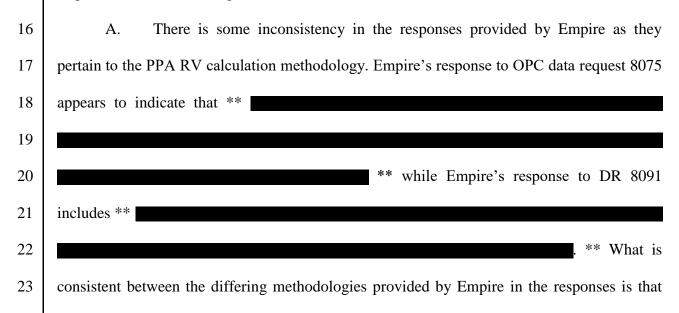

<sup>&</sup>lt;sup>4</sup> Non-unanimous Stipulation and Agreement in Case No. EA-2019-0010.

<sup>&</sup>lt;sup>5</sup> Assuming all three wind projects are included in their entirety in rates resulting from this general rate case, the MPPM Guarantee period will begin on the first day of the month after the effective date of rates.

<sup>&</sup>lt;sup>6</sup> Empire response to OPC data request 8004 and Empire's 2019 integrated resource plan triennial compliance filing.

Exhibit C (row 15 excel)." Exhibit C – PPA Replacement Value included estimated
gigawatt hours ("GWh") of production from each of the respective wind farms, an estimate of
the number of PPA replacement GWh replaced by new wind during the guarantee period, an
estimation of allocated benefit of PPA replacement GWh, and an estimate of the reduction in
revenue requirement from the PPA replacement.

- Q. Does Appendix C of the Stipulation and Agreement define how to calculate the
  "allocated benefit of PPA replacement GWh" or "reduction in revenue requirement from PPA
  replacement"?
- A. No. Exhibit C of the Stipulation and Agreement is a PDF of an excel file. The
  actual attachment does not define the terms "PPA replacement GWh replaced by New Wind
  during the Guarantee Period, Allocated Benefit of PPA replacement GWh, or Reduction in
  Revenue Requirement from PPA replacement, nor does the Exhibit show the methodology that
  should be utilized to estimate those terms.
- Q. Has Empire provided a consistent methodology for determining the PPA RV in
  response to OPC's data requests in this rate case?

1	the **			
2	**			
3	in a given year during the MPPM guarantee period.			
4	Q. What was Empire's response regarding the purpose of the PPA RV with respect			
5	to the MPPM?			
6	A. Empire's response to OPC data request 8090 suggests that "[t]he purpose of the			
7	PPA Replacement value in the MPPM is to reflect the value that the new wind farms will			
8	have regarding meeting the Renewable Energy Standards as a replacement for the current wind			
9	purchase power agreements when they expire (December 2024 for Elk River Wind Farm			
10	and December 2028 Meridian Way Wind Farm)."			
11	Q. Will the wind farms contribute to Empire's compliance with the Renewable			
12	Energy Standard ("RES")?			
13	A. Based on Empire's current Missouri electric retail sales, expected generation of			
14	the new wind farms, Renewable Energy Credits ("RECs") generated by other Empire owned or			
15	purchased renewable energy resources, and current RES requirements, Empire should be able			
16	to comply with the RES requirements by utilizing a portion of the RECs generated by the new			
17	wind projects once the PPAs expire. The exact number of RECs (and accordingly the portion			
18	of the RECs generated by the new wind projects) necessary for future compliance is unknown			
19	at this time and is dependent on Empire's future Missouri electric retail sales, RECs generated			
20	by other Empire owned or purchased renewable energy resources, and the RES requirements.			
21	Q. Do the methodologies provided by Empire in response to OPC data request 8075			
22	and 8091 accurately "reflect the value that the new wind farms will have regarding meeting the			
23	Renewable Energy Standards as a replacement for the current wind purchase power agreements			

when they expire (December 2024 for Elk River Wind Farm and December 2028 Meridian Way
 Wind Farm)."<sup>7</sup>

A. Based on the information available at this time, both of Empire's methodologies
to calculate the PPA RVs likely overvalue the impact that the new wind farms will have
regarding meeting the RES requirements.

Q. Does Staff concur with Ms. Mantle's conclusion that Empire does not need all of the energy produced by the Elk River and Meridian Way wind PPAs to satisfy the RES requirements?

A. Yes. Based on Empire's 2021 Annual Renewable Energy Standard Compliance
Plan,<sup>8</sup> Empire expects to produce RECs in excess of the non-solar RES requirement by
more than 14% in years 2021, 2022, and 2023.<sup>9</sup> The projected compliance information
includes REC production from Empire's Ozark Beach Hydroelectric facility, but projected
REC production from the Meridian Way and Elk River PPAs also exceed the expected
non-solar REC production requirement.

Q. Ms. Mantle refers to Liberty's response to a data request regarding the
calculation methodology of the PPA RV within her rebuttal testimony. Should the estimation
provided by Liberty be relied upon to set a PPA RV as it pertains to the MPPM within the
context of this case?

19

6

7

8

20

A. No. The estimation of the PPA RV provided by Empire in response to the OPC data request assumes production values for multiple future years. The PPA RV should be based

<sup>&</sup>lt;sup>7</sup> Empire response to OPC data request 8090.

<sup>&</sup>lt;sup>8</sup> Case No. EO-2021-0344.

<sup>&</sup>lt;sup>9</sup> It is important to note that Empire's Annual Renewable Energy Standard Compliance Plan is based upon projections of Empire's Missouri electric retail sales and production values from renewable resources. Future compliance with the Missouri RES requirements are dependent on realized Empire Missouri electric retail sales and actual production from the renewable generation resources.

upon the most contemporary actual generation data and other relevant information available at
 the point in time that the PPA RV is relevant in the context of the MPPM.

Q. Does the PPA RV affect the revenue requirement or rates that will be set within
the context of this rate case?

A. No.

5

Q. Is it appropriate to assign a PPA RV as it pertains to the MPPM in future years
within this rate case?

A. No. As stated on the attachments to the non-unanimous stipulation and
agreement in Case No. EA-2019-0010, "All numbers utilized, unless specified elsewhere in
the STIP, are for example only, actual values will be input into the calculation during the life
of the MPP."

Q. Alternatively, is it appropriate for the Commission to clarify how the PPA RV
as it pertains to the MPPM should be calculated at the time that the relevant information and
the most contemporary actual production values are available?

A. If the Commission determines that clarification of the calculation methodology for the PPA RV is necessary within the context of this case given the ambiguity of the EA-2019-0010 Stipulation and Agreement, an order describing the methodology may be appropriate. However, the MPPM will not be finally calculated and included in rates until the end of guarantee period, a period of ten years. It is possible that the Commission would have the benefit of a more substantially complete record upon which to make a decision regarding the issue of the PPA RV by abstaining from a decision in this case.

**PISA Reporting Requirement Recommendation** 1 Please provide a brief overview of OPC witness Geoff Marke's recommendation 2 Q. 3 to the Commission regarding reporting requirements for Empire's future PISA investments. 4 A. Dr. Marke recommends that the Commission order Liberty to conform to the 5 same, or very similar, standards that were agreed upon between the signatories of the Unanimous Stipulation and Agreement in Ameren Missouri's most recent general rate case.<sup>10</sup> 6 7 Q. Does Staff agree with Dr. Marke's recommendation regarding reporting 8 requirements for Empire's future PISA investments? 9 A. Yes. 10 Q. Why is it important for an objective quantitative evaluation methodology for 11 future PISA investments to be developed? A. It is important because in a future case at least one of the investor-owned utilities 12 13 is likely to request an extension of Plant in Service Accounting ("PISA") beyond 2023 as 14 contemplated in 393.1400.5. RSMo. That statute states in part that: The commission shall have the authority to grant or deny such approval based 15 16 upon the commission's evaluation of the costs and benefits of such continuation to 17 electrical corporations and consumers, but shall not be authorized to condition such approval 18 or otherwise modify the deferrals authorized by subsection 2 of this section, or the discounts 19 authorized by section 393.1640. In deciding whether to extend the program for an 20 additional five years, the commission shall develop an objective analytical framework to 21 determine whether there is a continuing need. [Emphasis added.]

<sup>&</sup>lt;sup>10</sup> Unanimous Stipulation and Agreement filed on November 24, 2021, and approved on December 22, 2021 in Case No. ER-2021-0240.

1 The level of capital expenditure projected by Liberty and the language 2 within 393.1400.5, RSMo, highlight the importance of a transparent review process 3 regarding the decision making for the associated projects. The information included within 4 Mr. Marke's recommendation will afford all parties, and the Commission, a more transparent 5 review process for the substantial capital expenditures associated with Liberty's PISA capital 6 expenditure plans, provide all parties another data point for consideration of the prudency of a 7 given project, and potentially aid the Commission in determining whether an extension of the 8 opportunities afforded by 393.1400 RSMo is reasonable and necessary. It is worth noting that 9 Liberty is financially incentivized to build rate base through investments and given that 10 incentive it is important to ensure that the costs of the projects are prudent and necessary to provide safe and reliable service. 11

12

Does this conclude your surrebuttal testimony?

13

A. Yes.

Q.

#### BEFORE THE PUBLIC SERVICE COMMISSION

#### OF THE STATE OF MISSOURI

In the Matter of the Request of The Empire District Electric Company d/b/a Liberty for Authority to File Tariffs Increasing Rates for Electric Service Provided to Customers in its Missouri Service Area

Case No. ER-2021-0312

#### **AFFIDAVIT OF J LUEBBERT**

)

STATE OF MISSOURI	)	<b>SS</b> .
COUNTY OF COLE	)	00.

**COMES NOW J LUEBBERT** and on his oath declares that he is of sound mind and lawful age; that he contributed to the foregoing *Surrebuttal Testimony of J Luebbert*; and that the same is true and correct according to his best knowledge and belief.

Further the Affiant sayeth not.

**J LUEBBER**
