

Sprint Integrated T1 Bundle

You can simplify and save with our local, long distance and high-speed Internet access bundle

FILED

FEB 09 2004

Missouri Public Service Commission

Meet your communications needs with the Sprint Integrated T1 Bundle, a full suite of complementary communications services that can help your company work more efficiently, faster and smarter. In addition to customary long distance calling plans, you receive flat-rated, unlimited local calling and high-speed Internet access run on one of the most reliable Tier 1 Internet backbones in the world.

Say hello to simplicity and convenience

The Sprint Integrated T1 Bundle can quickly untangle today's complex corporate communications requirements. It's a complete solution that can provide what your business needs — local and long distance voice, Internet and equipment — all on one monthly bill.

Flexible today, scalable tomorrow

The Sprint Integrated T1 Bundle is built to work with your existing technology and can provide a clear migration path to the future, helping your company minimize required resources and maximize efficiencies. Consolidate your communications by selecting a mix of local and long distance voice channels and Internet access speeds on your T1 line.

Use more, pay less

Consolidating services with Sprint can simply make sense. In addition to price breaks for

purchasing multiple services through the Sprint Integrated T1 Bundle, you save on domestic long distance rates based on the combined usage of your communications services. The more you use, the less you'll pay. Furthermore, by having Sprint take care of your company's complete communications needs, you'll streamline technical and administrative expenses normally associated with the time and effort required to integrate unbundled solutions.

Services

The Sprint Integrated T1 Bundle can cost effectively combine analog or digital voice and data applications over the same line on the same bill.

Local. Select from six to 20 voice channels per T1 line, with unlimited calling. Choose from all of the popular calling features, but receive touchtone, local number portability, hunting and caller ID.

Support services include:

- directory listing (white/yellow pages)
- directory assistance/operator services
- blocking services (toll restriction)
- emergency services (911)
- CALEA/security

One Sprint. Many Solutions.™

Voice/Data PCS Wireless Internet Services E-Business Solutions Managed Services

Long distance. Sprint Voice SolutionsSM, our long distance calling plan, joins our local calling services to form the Sprint Integrated T1 Bundle. This means you can receive significant discounts on long distance calling rates.

Benefits can include:

- Lower domestic voice rates
- Scalability that can reward business growth
- Flexibility through annual minimum commitments
- Consolidated offering with a single point of contact

Dedicated Internet access. Enjoy maximum speed and reliability 24 x 7 for less than you might pay for a slower connection. Based on bandwidth availability, you're free to select dedicated IP port speeds of 256 Kbps, 384 Kbps, 512 Kbps or 768 Kbps at flat-rate prices only available within this bundle.

Equipment. The Sprint Integrated T1 Bundle includes your choice of ADTRAN integrated access devices (IADs) for seamless voice and data integration over your T1 line. The Total Access[®] 612, 616 and 624 models are three fixed-port IADs that provide up to 24 analog voice interfaces. The Total Access 600R is a carrier-class T1/FT1 access router that provides an interface for digital voice applications.

Installation. Your installation activities, like site power, cabling to the punch-down block and demarc extensions, are typically included. Sprint

will complete most inside wiring extensions from the minimum point of entry in your building to the equipment room in your office suite.

Optional services

Voice mail. Transform your phone into a professional answering service by answering and recording calls 24 x 7 with the clarity of digital recording technology.

Wire maintenance. This service includes diagnosis of any inside wiring problems and necessary repairs.

Why Sprint?

With a rich heritage more than a century strong, Sprint remains one of the most financially stable companies in the telecom industry. When you choose Sprint, you're choosing a global company that wins industry and customer accolades for service reliability and customer satisfaction and one that is committed to developing solutions that can transform the way you get business done.
