**CASE NO. ER-2024-0189**

*Jefferson City, Missouri*  
*September 10, 2024*

1           A.     Yes. Staff made a true-up annualization adjustment to the Large Power Service  
2 (“LPS”) class.<sup>1</sup> The adjustment reflects the level of kilowatt hour (“kWh”) sales, kilowatt  
3 (“kW”) demand and rate revenue that would have occurred if the number of customers taking  
4 service at the end of June 2024 had existed throughout the entire 12 months ending  
5 December 2023.

6           **MEEIA**

7           Q.     Did Staff make a true-up MEEIA adjustment?

8           A.     Yes. Staff witness Hari K. Poudel provided true-up MEEIA adjustments.  
9 Unlike in direct testimony, Staff did not have the MEEIA adjustments by individual customer,  
10 but instead for the entire LPS class as a lump sum. For this reason, Staff applied the same  
11 distribution of net kWh saved calculated in the update period across the four different rate codes  
12 within the LPS class (Primary, Secondary, Substation, and Transmission) to the net kWh saved  
13 calculated for true-up. After distributing the net kWh saved across the different rate codes,  
14 Staff applied the true-up adjustments in the same manner as was done in direct testimony.  
15 Mr. Poudel discusses these adjustments in his true-up direct testimony.

16           **CONCLUSION**

17           Q.     What is Staff’s summary of the direct true-up issues discussed in this testimony?

18           A.     Staff recommends that the Commission:

- 19                   a. accept Staff’s true-up annualization adjustment, and  
20                   b. accept Staff’s true-up MEEIA adjustment.

21           Q.     What are your recommended rate revenue adjustments?

---

<sup>1</sup> Staff witness Kim Cox performed the Residential, Small General Service, and Large General Service true-up direct adjustments.

True-up Direct Testimony of

4           A.     Yes it does.
