

Confidential Designation

The information redacted and/or not produced in the Public Redacted version of the above-referenced document has been designated confidential pursuant to the following checked subsection(s) of 20 CSR 4240-2.135(2)(A):

- 1. Customer-specific information;
- 2. Employee-sensitive personnel information;
- 3. Marketing analysis or other market-specific information relating to services offered in competition with others;
- 4. Marketing analysis or other market-specific information relating to goods or services purchased or acquired for use by a company in providing services to customers;
- 5. Reports, work papers, or other documentation related to work produced by internal or external auditors, consultants, or attorneys, except that total amounts billed by each external auditor, consultant, or attorney for services related to general rate proceedings shall always be public;
- 6. Strategies employed, to be employed, or under consideration in contract negotiations;
- 7. Relating to the security of a company's facilities; or
- 8. Concerning trade secrets, as defined in section 417.453, RSMo.

Explanation of Confidential Designation:

The attachments to Appendix D to the Application and Schedule MH-D5 are lists of the names and addresses of the affected landowners who received notice of the Application in this proceeding. ATXI designates those lists as confidential pursuant to 20 CSR 4240-2.135(2)(A)1, which refers to “[c]ustomer-specific information.” ATXI submits that in the context of a transmission line CCN proceeding, the names and addresses of individual landowners from whom ATXI may need to obtain the necessary land rights constitutes customer-specific information under 20 CSR 4240-2.135(2)(A)1 even though such information may be publicly available through other public sources. Pursuant to the Order Regarding Motion to Make Information Public issued by the Missouri Public Service Commission (Commission) on February 27, 2025 in Docket EA-2025-0087, the Commission found that “while the names and addresses of the affected landowners and the location information for the affected tracts of land may not constitute “customer-specific information” in this situation and may be available in public records, the personally identifiable information of the landowners should not unnecessarily be made public.” The Commission also found “that the county and state for each affected tract should be made public.” In accordance with the order, the county and state for each affected tract have not been redacted.
