If it is deemed necessary by the Company to safeguard its interests, applicants for service or present customers may be required to make a deposit of an amount not to exceed the sum of two (2) months' monthly recurring charges for services subscribed to plus two (2) months' estimated long distance charges. 5. Any balance of the amount deposited and credited to the customer's account is returned to the customer at the termination of the contract, or it may be returned at any time previous thereto at the option of the Company when it is deemed that the customer has established satisfactory credit.

Service may be terminated prior to the expiration of the minimum contract period upon notice being given to the Company, and upon payment of any applicable termination charges, in addition to any applicable charges due for service which has been furnished.

Contracts for periods longer than one month covering services which installation required line extensions may be terminated upon payment of all charges that would accrue to the end of the contract period. Alternatively, the contract may be transferred to a new applicant who is to occupy the same premises and will subscribe to the service effective on the day following termination by the original subscriber upon agreement by the new applicant to assume the responsibilities of the contract.

E. Central Office (CO) Implemented Coin Line (Cont'd)

3. CO Implemented Coin Line features, including coin line signaling, coin collect and return (where applicable) and answer supervision, are provided by the Telephone Company per the technology available from the Company's facilities. It shall be the responsibility of the CO Implemented Coin Line payphone owner to assure technical and operational compatibility with the coin line features offered by the Telephone Company.

F. Features and Functions

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered. This feature is an additive to the CO Implemented Coin Line.
2. Coin Collection and Return provides an electrical signal on a CO Implemented Line indicating to the payphone equipment to collect or return coin(s) to the calling party. This feature is an additive to the CO Implemented Coin Line.
3. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.
4. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
5. Validation may be performed through Originating-Line Screening (OLS). OLS enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned payphones, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available. The customer has the option to request either Selective Class of Call Screening or OLS.
