It includes the services provided by the lines and equipment associated with the service arrangement, for the answering, transferring, and dispatching of public emergency telephone calls dialed to 911.
2. Equipment used in conjunction with Enhanced 911 Services located at the PSAP is the responsibility of the customer.

A. General (Cont'd)

5. Enhanced 911 Service is available in four elements as follows: (Cont'd)

b. (Cont'd)

- (1) ANI Spill does not guarantee the capability of forwarding the number of an off premise extension; or stations behind business systems will possess the identity of the main billing number.
- (2) ANI Spill can only be provided with the use of dedicated facilities from the central office serving the end user to the PSAP.
- (3) The PSAP's premises equipment used in conjunction with E911 ANI Spill Service must be reviewed by the Telephone Company to determine the compatibility of the unit with the E911 Service requested.

c. PSAP Data Base Update Service - Provides the PSAP with an initial list, as well as periodic updates, of customer names, telephone numbers, and addresses. Procedures and timing will be mutually agreed upon by the Customer and the Company.

d. Selective Routing Service - Available when an E911 System is served by more than one PSAP or when a central office is split by a political boundary and one of the political areas does not subscribe to 911 Services. This service routes the call to the correct PSAP or to a recording/operator, as appropriate, based on the caller's telephone number. Selective routing is available only in central offices equipped for digital operation.
