

**BEFORE THE PUBLIC SERVICE COMMISSION  
OF THE STATE OF MISSOURI**

In the Matter of the Application of Spire Missouri )  
Inc. d/b/a Spire for a Permanent Waiver from the )  
Requirement to use a “device” for Overpressure ) File No. GE-2023-0112  
Protection in 20 CSR 4240-40.030 (4)(12) and )  
(13) for Certain Spire East Facilities )

**QUARTERLY UPDATE**

**COMES NOW** Spire Missouri Inc. (“Spire Missouri” or “Company”) and submits this Quarterly Update in accordance with the *Full and Unanimous Stipulation and Agreement* (“Stipulation”) filed in this docket, stating the following:

1. This Quarterly Update provides Spire Missouri’s progress on the installation of temporary stations at or abandonment of Reynolds regulator stations. The information provided is current as of the date of this filing.

2. Spire Missouri has installed temporary stations at all seven (7) Reynolds regulator stations contemplated in Phase One of the Reynolds Station Replacement Schedule.

3. For Phase Two, the Company determined that an additional temporary station is needed due to the timeline of the grid replacement. To ensure that the Replacement Schedule deadline of December 2025 is met, instead of abandoning the regulator station at Sidney & Nebraska, Reg. Station 110, the Company is now installing a temporary station. This increases the number of temporary stations to be installed in Phase Two from six (6) to seven (7), and decreases the total number of regulatory stations to be abandoned to twelve (12).

4. Spire Missouri has completed the right of way acquisitions for Phase two, receiving the necessary right of way acquisitions for all seven (7) temporary stations to be installed. Flows and sizings of the temporary regulator stations have been confirmed based on the acquired

easement locations. Engineering design is in final review for six (6) of the seven (7) temporary stations. One (1) temporary station is fully designed and materials are on order.

5. Spire Missouri has abandoned six (6) of the twelve (12) Reynolds regulator stations planned to be abandoned. The abandoned stations are the following:

- a. Page & Walton, Reg. Station 116
- b. Missouri & Lynch, Reg. Station 97
- c. Virginia & Osceola, Reg. Station 515
- d. Ridgewood & Chippewa, Reg. Station 22
- e. Broadway N of Keokuk, Reg. Station 16
- f. Tower Grove & Magnolia, Reg. Station 104

6. The Company has updated the system modeling with the installation of the temporary stations and the abandonment of the above Reynolds regulatory stations, and there are no issues with system balance.

**WHEREFORE**, Spire Missouri respectfully requests that the Commission accept this Quarterly Update.

Respectfully submitted,

*/s/ J. Antonio Arias*
