# ORDER ESTABLISHING SPECIAL CONTEMPORARY RESOURCE PLANNING ISSUES

Issue Date: October 22, 2025 Effective Date: November 1, 2025

A provision in the Commission's electric utility resource planning rule, 20 CSR 4240-22.080(4), requires Missouri's electric utilities to consider and analyze special contemporary issues in their integrated resource plan (IRP) triennial compliance filings or in their annual IRP update reports. The regulation provides that by September 15 of each year, the Commission's Staff (Staff), the Office of the Public Counsel (OPC), and other interested stakeholders may file suggested issues for consideration. The regulation allows the utilities and other stakeholders until October 1 to file comments regarding the suggested issues. The Commission is then to

issue an order by November 1 of each year specifying the list of special contemporary issues that each electric utility must address.

Staff and OPC filed suggested special contemporary issues for Evergy Metro, Inc. d/b/a Evergy Missouri Metro (Evergy Missouri Metro) and Evergy Missouri West, Inc. d/b/a Evergy Missouri West (Evergy Missouri West)(collectively, Evergy) to analyze and respond to in their annual update IRP Filing. Evergy filed responses to those suggestions. The Commission must now determine what special contemporary issues Evergy should address.

In this case, the Commission does not need to hear evidence before reaching a decision and does not need to make findings of fact and conclusions of law in announcing that decision.<sup>1</sup> The Commission's rule gives the Commission broad discretion in determining what issues a utility should be required to address, indicating:

[t]he purpose of the contemporary issues lists is to ensure that evolving regulatory, economic, financial, environmental, energy, technical, or customer issues are adequately addressed by each utility in its electric resource planning. Each special contemporary issues list will identify new and evolving issues but may also include other issues such as unresolved deficiencies or concerns from the preceding triennial compliance filing.<sup>2</sup>

After considering these factors, the Commission will adopt the list of special contemporary issues set forth in this order. The Commission has chosen these issues because they are of particular interest and importance and should be addressed in Evergy's IRP filings. Evergy may already plan to address these issues in its triennial IRP filing apart from their designation as special contemporary issues, or it may believe it has already adequately addressed some of these issues in a previous IRP filing, or some

<sup>&</sup>lt;sup>1</sup> State ex rel. Public Counsel v. Public Service Com'n, 259 S.W.3d 23, 29 (Mo. App. W.D. 2008).

<sup>&</sup>lt;sup>2</sup> 20 CSR 4240-22.080(4).

other filing. If that is so, it does not need to undertake any additional analysis because of this designation and may simply explain in its upcoming IRP filing exactly where the Commission can find that other analysis. The Commission does not intend that a utility spend an unreasonable amount to address any special contemporary issue. If Evergy finds that the cost to address a special contemporary issue is excessive, it may explain its concerns in its next IRP filings, while addressing the issue to the extent reasonably possible.

To give Evergy as much time as possible to examine these issues before its next IRP filing, the Commission will make this order effective in ten days.

#### THE COMMISSION ORDERS THAT:

- 1. Evergy shall analyze and document the following special contemporary issues in its 2026 IRP filings:
  - A. Discrete timeline for permitting processes and construction activities of a nuclear power plant:
    - i. At an existing site;
      - a. Include discussion on transmission capacity needs;
    - ii. At a greenfield site;
  - iii. Tax credit availability and likelihood of being able to achieve current milestones; and
  - iv. Discussion on systems that track nuclear-based energy attribute certificates/credits and discussion on State policies (renewable or clean energy standards) that include nuclear-based energy attributes.
    - B. Large load customers:

- i. Current pipeline of large load customers and which are likely to materialize;
  - ii.. Discussion on interconnection;
- C. Model Renewable Energy Standard (RES) Requirement Generation in Various Large Load Scenarios;
  - D. Geologic Hydrogen Onsite or Near Natural Gas Storage.
- 2. This order shall become effective on November 1, 2025.

BY THE COMMISSION

Nancy Dippell
