**Re: Tariff Schedule to Adjust FAC Rates of Evergy Missouri Metro**

Dear Ms. Dippell:

Pursuant to 20 C.S.R. 4240-20.090(8) of the regulations of the Missouri Public Service Commission (“Commission”), Evergy Metro, Inc. d/b/a Evergy Missouri Metro (“EMM”) hereby submits proposed rate schedules to adjust charges related to the approved Fuel Adjustment Clause (“FAC”). The proposed rate schedules bear an issue date of January 30, 2026, and an effective date of April 1, 2026.

This FAC tariff filing consists of actual fuel and purchased power costs, net of off-system sales revenues incurred by EMM. For the 21st accumulation period covering the period of July 2025 through December 2025, EMM’s actual FAC includable costs were higher than the base energy costs included in base rates by approximately \$6 million. In accordance with the Commission’s rule and the Company’s approved FAC, EMM has calculated the FAC tariff that provides for a change in rates to recover 95% of those cost changes, or approximately \$5.7 million to be collected from customers. This amount is before true-up, interest or any other adjustments.

In addition, a true-up filing is being made concurrent with this filing covering the 18th accumulation period of January 2024 through June 2024 and its corresponding recovery period of October 2024 through September 2025. The proposed 18th recovery period results in a true-up amount of \$439,710 to be collected from customers. In summary, these amounts combined with interest amounting to \$247,842 result in a proposed Fuel and Purchased Power Adjustment (“FPA”) of approximately \$6.4 million.

The proposed FAC charge for Missouri residential customers is a charge of \$0.00142 per kWh. Based on usage of 1,000 kWh per month, the customer will see a monthly charge of \$1.42. This represents an increase of \$0.41 to an EMM residential customer’s monthly bill compared to the current monthly FAC charge of \$1.01.
