DIRECT TESTIMONY

OF

LINDA J. NUNN

CASE NO. ER-2026-0143

I. INTRODUCTION

Q: Please state your name and business address.

A: My name is Linda J. Nunn. My business address is 1200 Main, Kansas City, Missouri 64105.

Q: By whom and in what capacity are you employed?

A: I am employed by Evergy Metro, Inc. I serve as Senior. Manager - Regulatory Affairs for Evergy Metro, Inc. d/b/a as Evergy Missouri Metro (“EMM” or the “Company”), Evergy Missouri West, Inc. d/b/a Evergy Missouri West (“EMW”), Evergy Metro, Inc. d/b/a Evergy Kansas Metro (“EKM”), and Evergy Kansas Central, Inc. and Evergy South, Inc., collectively d/b/a as Evergy Kansas Central (“EKC”) the operating utilities of Evergy, Inc.

Q: On whose behalf are you testifying?

A: I am testifying on behalf of EMM.

Q: What are your responsibilities?

A: My responsibilities include the coordination, preparation, and review of financial information and schedules associated with fuel or transmission impacts on rate case filings, and the coordination, preparation and review of financial information and schedules associated with retail rider mechanism tariff filings for Evergy including: EKC, EKM, EMM, and EMW.

1 **Q: Please describe your education, experience, and employment.**

2 A: I became a Senior Regulatory Analyst with Kansas City Power & Light
3 (“KCP&L”) in 2008, as a part of the acquisition of Aquila, Inc., by Great Plains
4 Energy. In 2013, I was promoted to Supervisor - Regulatory Affairs. In 2018 I
5 became Manager, Regulatory Affairs. In 2025 I became Senior Manager,
6 Regulatory Affairs. Prior to my employment with KCP&L, I was employed by
7 Aquila, Inc. for a total of eleven years. In addition to Regulatory, I have had
8 experience in Accounting, Audit, and Business Services, where I had responsibility
9 for guiding restructuring within the delivery division. In addition to my utility
10 experience, I was the business manager and controller for two area churches. Prior
11 to that, I was an external auditor with Ernst & Whinney. I received a Bachelor of
12 Science Degree in Business Administration with a concentration in Accounting
13 from Northwest Missouri State University.

14 **Q: Have you previously testified in a proceeding before the Missouri Public**
15 **Service Commission (“MPSC” or “Commission”) or before any other utility**
16 **regulatory agency?**

17 A: Yes, I have testified before the MPSC, and I have provided written testimony in
18 various dockets before the MPSC. I have also worked closely with many MPSC
19 Staff on numerous filings as well as on rate case issues. Additionally, I have
20 provided written testimony in Kansas Corporation Commission dockets.

21 **Q: What is the purpose of your direct testimony?**

22 A: The purpose of my direct testimony is to discuss various adjustments made to the
23 test year revenue requirement, and provide the required information associated with
24 requesting to continue the Company’s Fuel Adjustment Clause (“FAC”). As

1 explained in the testimony of Company witness Ronald A. Klote, adjustments are
2 made to the historical test year for known and measurable changes along with the
3 annualization, normalization and amortization of certain assets, liabilities,
4 revenues, and expenses. In the testimony which follows, I discuss adjustments
5 pertaining to nuclear fuel inventory, transmission revenue annualization, removal
6 of FAC over/under collection, transmission of electricity for others and Schedule
7 1A fees.

8 **II. FUEL ADJUSTMENT CLAUSE REQUIREMENTS**

9 **Q: Does the Company currently have an approved FAC?**

10 A: Yes. The FAC was initially approved for EMM in Case No. ER-2014-0370 on
11 September 2, 2015. Several modifications and clarifications have been made to the
12 FAC in subsequent rate cases, all with the intent to improve the FAC and its
13 processes.

14 **Q: Is the Company requesting to continue the FAC?**

15 A: Yes.

16 **Q: What are the rules for continuing an FAC?**

17 A: The requirements for continuing an FAC are found in Section 386.266 RSMo. and
18 Commission rule 20 CSR 4240-20.090(2). The supporting information is included
19 in the attached Schedules LJN - 1 through LJN - 7.

20 **Q: Are you providing any other support for continuation of the FAC?**

21 A: Yes. 20 CSR 4240-20.090 (13)(B) requires a system loss study be conducted no
22 less than every four years to be used in the general rate proceeding necessary to

1 continue to utilize a Rate Adjustment Mechanism (“RAM”). The 2025 loss study
2 is attached to my testimony as Schedule LJN - 4. This study reflects data for 2024.

3 **Q: Has the Company met all of the filing requirements to continue the FAC under**
4 **20 CSR 4240-20.090 (2) and Section 386.266 RSMo?**

5 A: Yes.

6 **Q: Is the Company proposing to make any changes in the FAC tariff?**

7 A: Yes, the Company is proposing to make the following changes to the FAC tariff:

- 8 ▪ The base rate has been re-based;
- 9 ▪ Voltage level loss factors have been updated to take into
10 consideration the output from the line loss study conducted for this
11 case;
- 12 ▪ The percentage of transmission which flows through the FAC has
13 been updated;
- 14 ▪ Added the words “storage” and “transportation” related to natural
15 gas purchases in Federal Energy Regulatory Commission (“FERC”)
16 account 501 to match account 547;
- 17 ▪ The listing of the Southwest Power Pool (“SPP”) charge types was
18 updated for any additions or deletions made by SPP since the
19 Company’s last rate case;
- 20 ▪ Added wording to include purchased power capacity costs or
21 revenues for any contract length which would allow for the
22 appropriate matching recovery/customer credits for the
23 management of capacity needs/sales between rate cases. The
24 proposed changes would also allow EMM to include long-term

1 capacity sales and purchases in the FAC going forward, given the
2 capacity market in SPP continues to tighten and resource adequacy
3 requirements are becoming much more fluid between rate cases as
4 long-term capacity contracts become more prevalent;

- 5 ▪ Updated loss factors contained in the jurisdictional ratio calculation
6 for the new loss study outputs;
- 7 ▪ Added wording to include costs associated with the Company's
8 natural gas fuel supply plan;
- 9 ▪ Add factor RR to reduce the overall actual net energy costs for retail
10 revenues billed related to new large load riders: the Alternative
11 Energy Credit Rider, the Renewable Energy Program Rider, and the
12 Green Solution Connections Rider;
- 13 ▪ Updated factor R to reflect account changes made by FERC related
14 to emissions and environmental credits gains and losses;
- 15 ▪ Removed reference to an account (501420) no longer used; and
16 ▪ Added account 501310 related to a new fuel additive.

17 **Q: Please explain what you mean by the natural gas fuel supply plan.**

18 **A:** Please see the Direct Testimony of Company witness Jessica Tucker.

1 **Q: Will the gains and losses associated with the natural gas fuel supply plan flow**
2 **through the FAC?**

3 A: Yes. As seen in Ms. Tucker's testimony, the Company is requesting to have the costs
4 and benefits associated with both programs included in the FAC.

5 **Q: Will any of the changes to the FAC mentioned above cause any problems with**
6 **the computation or administration of the FAC?**

7 A: No. All costs and revenues associated with the proposed changes will be easily
8 identifiable on the Company's books and records. The changes are intended to
9 provide a more complete view of the costs incurred and revenues received by the
10 Company.

11 **Q: Why is it important to continue the FAC?**

12 A: The FAC is, by design, a balanced recovery mechanism. It provides the Company
13 with recovery of the majority of its fuel and purchased power costs, and a portion
14 of transmission costs net of off system sales and specific other revenues above a
15 base amount that is included in base rates. Importantly, it also provides customers
16 assurance that EMM is not over-recovering net fuel and purchased power costs.
17 The FAC is needed to help address volatile and uncertain net fuel and purchased
18 power costs and to ensure the Company has an opportunity to earn a fair return in
19 order to generally preserve the financial health of the Company. The net fuel and
20 purchased power and transmission costs contained in the FAC for EMM represent
21 approximately 34% of the overall costs of serving customers.

1 **Q: Please explain how the proposed FAC is designed to provide the Company**
2 **with a sufficient opportunity to earn a fair return on equity in compliance with**
3 **Commission Rule 20 CSR 4240-20.090(2)5.**

4 A: The FAC is designed to provide for full and timely recovery of 95% of the changes
5 in net fuel costs by reflecting changes in such costs in rates. The net fuel costs
6 included in the FAC are often much more significant, volatile, uncertain, and more
7 difficult to control than other utility costs. Without the continuation of the FAC,
8 under increasing fuel cost scenarios, the Company would have less of an
9 opportunity to earn the rate of return authorized in this case. Conversely, if net fuel
10 and purchased power, and transmission costs turn out to be lower after the setting
11 of base rates, then the presence of an FAC will protect customers from paying
12 higher prices than the Company's actual experience.

13 Additionally, a continuation of the FAC helps to keep EMM on somewhat
14 more comparable footing with utilities operating in other states as it pertains to fuel
15 cost recovery. As it stands now, EMM is already at a disadvantage as compared to
16 other companies around the country. As supported in the Direct Testimony of
17 Company Witness Ann Bulkley, approximately 90.41 percent of the operating
18 companies in her proxy group either operate in a state that has restructured (*i.e.*, the
19 electric utilities do not own generation) or are allowed to directly recover fuel and
20 purchased power costs without any sharing at all. In addition, her discussion of
21 adjustment mechanisms in general shows that Missouri lags behind other states in
22 this area and that of adjustment mechanisms it allows. Ms. Bulkley identifies that
23 although EMM has access to some regulatory mechanisms, these are limited.

1 Further, removing the use of the FAC would contribute to the already challenging
2 regulatory lag environment. The FAC continues to provide EMM with an increased
3 opportunity to earn a fair return on equity because it mitigates to a certain extent
4 the very significant regulatory lag which is prevalent when dealing with such large,
5 uncertain and often volatile costs, by preventing deterioration in (or augmentation
6 of) the utility's financial position (including relative credit standing, which is a key
7 determinant of borrowing costs), and by ensuring recovery of actual net energy
8 costs, which may vary substantially from expected levels.

9 **Q: Do other protections exist for customers with regard to the FAC?**

10 A: In addition to the semi-annual reviews performed for each filing of the FAC
11 changes, the FAC is also audited through a detailed prudence review by the Staff
12 no less frequently than at eighteen (18)-month intervals. OPC also participates in
13 the review process.

14 **III. ACCOUNTING ADJUSTMENTS**

15 **RB-75 Nuclear Fuel Inventory**

16 **Q: Please explain adjustment RB-75.**

17 A: The Company normalized this balance based on an 18-month average, to coincide
18 with the 18-month Wolf Creek refueling cycle. Nuclear fuel inventory balances
19 increase significantly at the time of a refueling outage and then decrease
20 systematically until the next refueling outage. An averaging method minimizes
21 these ups and downs.

22 **Q: What months are included in the eighteen-month average used in this case?**

23 A: The Company used the period of January 2025 through June 2026.

1 **R-82 Transmission Revenue Annualization**

2 **Q: Please explain adjustment R-82.**

3 A: The Company annualized transmission revenue recorded in FERC account 456100
4 - Trans of Elec for Others based on forecasted levels from January 2026 to June
5 2026.

6 **CS-23 Remove FAC Over/Under-Collection**

7 **Q: Please explain adjustment CS-23.**

8 A: This adjustment reverses the amount of over and under recovery relating to the Fuel
9 Adjustment Clause recorded during the test year. Under recoveries are recorded to
10 FERC account 501600. This account is offset by the current year recoveries of prior
11 under recoveries in FERC account 501610. These accounts are used because
12 generally accepted accounting principles (“GAAP”) do not allow for the recording
13 of a regulatory asset to be offset by revenue. Therefore, negative expenses are
14 recorded when there is an under recovery. Any over recoveries are posted to FERC
15 account 449110 offset by a regulatory liability. All of these balances are reversed
16 in the rate case in order to remove all impacts of prior periods’ FAC from the
17 revenue requirement. Doing this allows for the rebasing of the FAC according to
18 requirements in the Code of State Regulations.

19 **CS-45 Transmission of Electricity by Others**

20 **Q: Please explain adjustment CS-45.**

21 A: The Company annualized transmission expenses recorded in FERC accounts
22 565000 - Trans Of Elec By Other and 565030 - Trans By Other Off system based
23 on forecasted costs for March 2026 through June 2026.

1 **CS-86 Schedule 1A Fees**

2 **Q: Please explain adjustment CS-86.**

3 A: EMM annualized SPP Schedule 1-A fees based upon projected rates for June 2026
4 times the 12 months projected June 2026 volumes. EMM also annualized the North
5 American Electric Reliability Corporation (“NERC”) fees using the most recent
6 quarterly NERC assessment multiplied times four.

7 **Q: Does this conclude your testimony?**

8 A: Yes, it does.

**BEFORE THE PUBLIC SERVICE COMMISSION
OF THE STATE OF MISSOURI**

In the Matter of Evergy Metro, Inc. d/b/a Evergy)
Missouri Metro's Request for Authority to) Case No. ER-2026-0143
Implement A General Rate Increase for Electric)
Service)

AFFIDAVIT OF LINDA J. NUNN

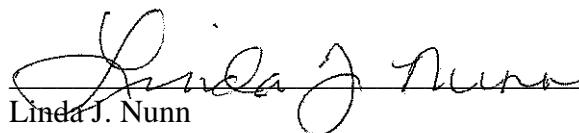

STATE OF MISSOURI)
) ss
COUNTY OF JACKSON)

Linda J. Nunn, being first duly sworn on his oath, states:

1. My name is Linda J. Nunn. I work in Kansas City, Missouri and I am employed by Evergy Metro, Inc. as Sr. Manager, Regulatory Affairs.

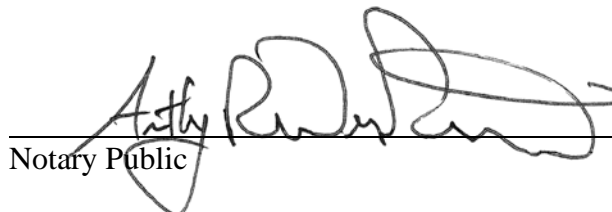

2. Attached hereto and made a part hereof for all purposes is my Direct Testimony on behalf of Evergy Missouri Metro consisting of ten (10) pages, having been prepared in written form for introduction into evidence in the above-captioned docket.

3. I have knowledge of the matters set forth therein. I hereby swear and affirm that my answers contained in the attached testimony to the questions therein propounded, including any attachments thereto, are true and accurate to the best of my knowledge, information and belief.

Linda J. Nunn

Subscribed and sworn before me this 6th day of February 2026.

Notary Public

My commission expires: April 26, 2029

Requirements to Establish, Continue or Modify the Rate Adjustment Mechanism (“RAM”) Evergy Missouri Metro (“EMM”)

20 CSR 4240-20.090

(2) Establishment, Continuance, or Modification of a RAM. An electric utility may only file a request with the commission to establish, continue, or modify a RAM in a general rate proceeding and must rebase base energy costs in each general rate proceeding in which the Fuel Adjustment Clause (“FAC”) is continued or modified. Any party in a general rate proceeding may seek to continue, modify, or oppose the RAM. The commission shall approve, modify, or reject such request only after providing the opportunity for a full hearing in a general rate proceeding. The commission shall consider all relevant factors that may affect the costs or overall rates and charges of the petitioning electric utility.

(A) The electric utility shall file the following supporting information, in electronic format, where available, with all links and formulas intact, as part of, or in addition to, its direct testimony:

1. An example of the notice to be provided to customers during the pendency of the general rate proceeding where the RAM is under consideration, which shall be approved by the commission. The notice shall include a description of how its proposed RAM shall be applied to monthly bills, the amount of the proposed change in base rates caused by the rebase of energy costs, and the estimated impact on a typical residential customer’s bill resulting from the rebase of energy costs;

See Schedule LJJ – 2.

2. An example customer bill(s) covering all of the electric utility’s rate classes showing how the proposed RAM shall be separately identified on affected customers’ bills in accordance with section (12);

See Schedule LJJ - 3

3. Proposed RAM tariff sheets;

See Schedule LJJ - 5

4. A detailed description of the design and intended operation of the proposed RAM;

The design and intended operation of the FAC is the same as approved in Case No. ER-2018-0146. The changes proposed in this filing are for the amounts contained in base rates as well as the changes listed in the body of my Direct Testimony.

Some key features of the FAC include:

- The FAC factor is based upon historical differences between the cost of fuel, energy and certain transmission costs net of off-system sales revenue built into base rates and the actual net costs of these items as incurred during the two six-month accumulation periods.
- There is 95% recovery of the difference between these actual net costs and the amounts built into base rates.

- Items considered in the FAC are non-labor generating plant fuel costs, purchased power energy and capacity charges, natural gas reservation, transportation and storage charges, emission allowance costs, revenues and amortizations, and certain transmission costs. These costs are offset by off system sales revenues, and the revenues from the sale of renewable energy credits net of the cost to sell the credits and retail revenues associated with certain rider offerings. Carrying costs are calculated monthly at the Company's short term debt rate.
- The under or over recovery will be accumulated for 6 months. The collection period for the accumulation is 12 months.
- The base amount in the current tariff is \$0.01829 per kilowatt-hour ("kWh").
- The proposed base amount for EMM FAC base rate is \$0.01741 per kWh.
- The accumulation of actual net energy costs ("ANEC") is compared to the base factor. The difference is the Fuel Adjustment Rate ("FAR").
- The FAR as designed in the rate schedule will be applied to customer bills on a per kWh basis, as adjusted for voltage level (to take into account varying line losses at different service voltage levels).
- There are four voltage levels identified in the FAC tariff, primary, secondary, substation and transmission.
- The FAR formula includes the ability to accommodate adjustments made as a result of the true-up process or any prudence disallowances occurring as a result of prudence reviews.

5. A detailed explanation of how the proposed RAM is reasonably designed to provide the electric utility a sufficient opportunity to earn a fair return on equity;

See the body of my Direct Testimony.

6. A detailed explanation of how the proposed FAC shall be trued-up for over- and under-billing, or how and when the refundable portion of the proposed IEC shall be trued-up;

Each month there is an accrual to reflect the over/under recovered current month FAC fuel costs in General Ledger Account 182700 or 254651. The accrual calculation is Total FAC ANEC less Base Energy Costs times the jurisdictional factor, times 95%.

After the defined 6-month accumulation periods (July-December and January-June) a filing in accordance with 20 CSR 4240-20.090(8)(A) is made with the Missouri Public Service Commission requesting a new cost adjustment factor. The collection/return periods for these FAC factors are 12-month periods (April-March and October-September).

Activity in account 182700 or 254651 is manually tracked by accumulation period and separately identifies the accrual recovery, interest and over/under recovery balance for each open accumulation period.

After the 12-month recovery period is complete, a true-up filing is made, and any remaining over/under recovery identified is included as part of the next FAC filing.

7. A detailed description of how the electric utility's monthly short-term borrowing rate will be defined and how it will be applied, during the accumulation period and the recovery period, to over- and under-billed amounts and prudence disallowances;

The short-term borrowing rate is defined as daily Secured Overnight Financing Rate ("SOFR") plus the applicable Margin. The daily amounts are averaged to get an annual rate for that month. This rate divided by 12 is applied monthly to the outstanding FAC balances one month in arrears. The applicable margin is for Eurodollar Advances as defined in the Pricing Schedule of the current EMW Revolving Credit Agreement.

8. A detailed description of how the proposed RAM is compatible with the requirement for prudence reviews in section (11);

EMM's FAC is compatible with the requirement for prudence reviews for several reasons. EMM's FAC is based on actual fuel and purchased power costs, including transportation and emissions costs and revenues, net of actual off-system sales revenues and the net revenues associated with the sale of RECs and retail revenues associated with certain rider offerings, which simplifies the prudence review. The fuel and purchased power costs included in the FAC are well defined in the FAC tariff, including specific references to the Federal Energy Regulatory Commission ("FERC") accounts in which the costs are recorded. Moreover, 20 CSR 4240-20.090(5), requires the filing monthly of all the supporting data for the fuel and purchased power costs, revenues, plant generation, and related information, all of which can be used as part of the prudence review process. These reports are currently being submitted by EMM on a monthly basis. This includes providing monthly fuel burn and generating statistics for each of the generating plants. All contracts for fuel, transportation, and purchased power will also be available for review in connection with the prudence review process. 20 CSR 4240-20.090 sets forth the definitions, structure, operation, and procedures relevant to a Fuel Adjustment Clause. Section (11) is specific to prudence reviews, requiring a review no less frequently than at eighteen (18)-month intervals.

The Company agrees that prudence reviews should occur no less frequently than at 18-month intervals. This requirement is also in the FAC tariff.

The Company anticipates that parties to any prudence review proceeding would apply the standard of determining whether decisions were prudent given the facts known at the time those decisions were made, as opposed to a "hindsight" review. If Staff or other parties believe that the evidence supports a prudence adjustment, they have the opportunity to bring that proposal to the Commission for an evidentiary hearing and decision.

9. A detailed explanation of the fuel and purchased power costs, including transportation, that are to be considered in determining the amount to be recovered under the proposed RAM with identification of the specific account and any other designation ordered by the commission where that cost will be recorded on the electric utility's book and records.

The FERC Code of Federal Regulations is the basis for the Company's accounting codes. Fuel used in the production of steam for the generation of electricity is included in FERC account 501. Nuclear fuel is included in FERC account 518. Fuel used in other power generation (Combustion Turbines) is included in FERC account 547. Purchased Power is in FERC account 555.

Transmission of electricity by others is included in FERC account 565. Emission Allowance costs and amortizations are in FERC account 509.

Please see the proposed tariff sheets included in Schedule LJN - 5 for the complete listing of all costs that need to be considered for recovery under the proposed continuation of the RAM along with the specific accounts that will be used for each cost item on the Company's utility books and records.

Accounts provided were known as of the time of this filing; however, they may be revised in the future as business needs arise.

10. A detailed explanation of the fuel related revenues that are to be considered in determining the amount to be recovered under the proposed RAM with identification of the specific account and any other designation ordered by the commission where that revenue will be recorded on the electric utility's books and records;

The FERC Code of Federal Regulations is the basis for the Company's accounting codes. Sales or resale are recorded in FERC account 447.

Revenues from the sale of emission allowances and renewable energy credits are recorded in the following FERC accounts: Subaccounts 411.8 and 411.9: gains and losses of the sale of emission allowances and Subaccounts 411.11 and 411.12: for gains and losses on the sale of environmental credits (this will only include Renewable Energy Credits).

Retail revenues in accounts 440 – 444 associated with the Alternative Energy Credit Rider, the Renewable Energy Program Rider, and the Green Solution Connections rider.

Please see the proposed tariff sheets included in Schedule LJN - 5 for the complete listing of all revenue accounts that need to be considered in the determination of the amount eligible for recovery under the proposed continuation of the RAM along with the specific accounts that will be used for each revenue item on the Company's utility books and records.

This accounting process, and the information used to support the recording of these entries, creates an audit trail to enable the audit of the accounts.

11. A detailed explanation of any incentive feature in the proposed RAM with the expected benefit and cost each feature is intended to produce for both the electric utility and its Missouri retail customers;

In the Report and Order for Case No. ER-2014-0370 issued September 2, 2015, the Commission explains the reasoning for allowing only 95% of FAC eligible costs to be collected from customers,

“The Commission finds that allowing KCPL to have 100% recovery of its costs in an FAC would act as a disincentive for KCPL to control those costs. A 95%/5% sharing mechanism, where customers would be responsible for, or receive the benefit of, 95% of any deviation in fuel and purchased power costs

would provide KCPL a sufficient opportunity to earn a fair return on equity while protecting KCPL's customers by providing the company an incentive to control costs. KCPL's FAC shall include an incentive clause providing that 95% deviation in fuel and purchased power costs from the base level shall be passed to customers and 5% shall be retained by KCPL."

In the Report and Order for Case No. ER-2016-0285 issued May 3, 2017, the Commission again finds that the 95%/5% sharing mechanism is appropriate and states the following decision

"The Commission finds that allowing KCPL to keep its 95%/5% sharing mechanism is appropriate. Under this mechanism, customers would be responsible for, or receive the benefit of, 95 percent of any deviation in fuel and purchased power costs.

That, in turn, would provide KCPL a sufficient opportunity to earn a fair return on equity, while protecting KCPL's customers by providing the company an incentive to control costs. KCPL's FAC shall include an incentive clause providing that 95 percent of any deviation in fuel and purchased power costs from the base level shall be passed to customers and 5 percent shall be retained by KCPL."

The 95% pass-through feature remained unchanged in the settlement of Rate Case. Nos. ER-2018-0145 and ER-2022-0129.

12. A detailed explanation of any rate volatility mitigation feature in the proposed RAM;

See the Direct Testimony of Jessica L. Tucker in this case for a discussion of the FAC and mitigation of market risk/price volatility. In addition, accumulating the FAC adjustment for a 6-month period with a corresponding 12-month revenue recovery period lessens rate volatility.

13. A detailed explanation of any feature of the proposed RAM and any existing electric utility policy, procedure, or practice that ensures only prudent fuel and purchased power costs and fuel-related revenues are recovered through the proposed RAM, including, but not limited to, utilization of competitive bidding or other sourcing or sales practices;

The Company's FAC expenses are subject to periodic prudence reviews to ensure that only prudently incurred fuel and purchased power costs are collected from customers through the FAC. Rules and procedures for contracts are outlined in the Sarbanes Oxley documentation.

The Company's books and records are audited annually by an independent public accounting firm. The Company's internal audit staff performs periodic audits on the controls in place associated with the FAC.

14. A detailed explanation of any change to the electric utility's business risk resulting from implementation of the proposed RAM, in addition to any other changes in business risk the electric utility may experience;

See the Direct Testimony of Ann E. Bulkley.

15. A level of efficiency for each of the electric utility's generating units determined by the results of heat rate/efficiency tests or monitoring that were conducted or obtained on each of the electric utility's steam generators, including nuclear steam generators, heat recovery steam generators, steam turbines and combustion turbines within twenty-four (24) months preceding the filing of the general rate increase case.

A. The results should be filed in a table format by generating unit type, rated megawatt (MW) output rating, the numerical value of the latest result and the date of the latest result;

B. The electric utility shall provide documentation of the actual test/monitoring procedures. The electric utility may, in lieu of filing the documentation of these procedures with the commission, provide them to the staff, OPC, and to other parties as part of the workpapers it provides in connection with its direct case filing. If the electric utility submits the results in workpapers, it will provide a statement in its testimony as to where the results can be found in workpapers;

See the Direct Testimony of Hsin Foo.

16. Information that shows that the electric utility has in place a long-term resource planning process;

See the Direct Testimony of Hsin Foo.

17. If the electric utility proposes to include emissions allowances costs or sales revenue in the proposed FAC and not in an environmental cost recovery mechanism, a detailed explanation of its emissions management policy, and its forecasted environmental investments, emissions allowances purchases, and emissions allowances sales;

See Direct Testimony of Jessica L. Tucker for the discussion of the allowance purchases and sales and the direct testimony of Hsin Foo for the explanation of forecasted environmental investments.

18. For each power generating unit the electric utility owns or controls, in whole or in part, the electric utility shall file graphs, accompanied by the data supporting the graphs, for each month over the immediately preceding five (5) years, showing the monthly equivalent availability factor, the monthly equivalent forced outage rate, and the length and timing of each planned outage of that unit; and

Please see Schedules LJN – 6 and LJN – 7 for the required information.

19. Authorization for the staff to release to all parties to the general rate proceeding in which the establishment, continuation, or modification of a RAM is requested, the previous five (5) years of historical surveillance monitoring reports the electric utility submitted in EFIS.

EMM authorizes the Staff to release to all parties to this case its previous five years of historical surveillance monitoring reports in accordance with 20 CSR 4240-20.090(2)(A)19.

Additional Ways to Provide Comments and Feedback

If you are unable to attend a public hearing, or if you would like to make written comments or receive additional information, you may contact the PSC directly at:

Missouri Public Service Commission

P.O. Box 360
Jefferson City, Missouri 65102
Telephone: 800-392-4211
Email: pscinfo@psc.mo.gov

In addition, you may also provide comments or request additional information from the OPC, a state agency tasked with representing the interests of the public in proceedings before the PSC, by contacting the OPC directly at:

Office of the Public Counsel

P.O. Box 2230
Jefferson City, Missouri 65102
Telephone: 866-922-2959 (toll free)
or 573-751-4857
Email: opcservice@opc.mo.gov

Comments may also be submitted electronically using the PSC's Electronic Filing Information System ("EFIS") at https://psc.mo.gov/General/Submit_Comments. From this webpage, click on "Submit comments" under the heading "Submit Comments in Writing." When submitting comments please reference File No. ER-2026-0143.

All documents filed as part of the rate review can be found on the PSC's EFIS at psc.mo.gov/general/efis, click on "Docket Sheet" under the heading "EFIS Shortcuts," and enter Case No. ER-2026-0143.

Important Notice

Evergy Missouri Metro ("Evergy") has filed a rate increase request with the Missouri Public Service Commission ("PSC"). Evergy has requested an increase of \$xx million, or X%. When adjusted for fuel, the request is \$xx million or X%.

For the average residential customer, the proposed increase would result in an increase of about \$X.XX per month.

Evergy has also asked the PSC to continue the Fuel Adjustment Clause ("FAC"). The FAC allows Evergy to adjust customers' bills two times per year based on the varying cost of fuel and power purchased in the current volatile market. The FAC adjustment is applied to customers' bills based on the customer's usage.

Any increase or decrease in fuel costs is reflected in the FAC. This means the customer bill is based on more current fuel costs.

Local Public Hearing Information

The PSC is holding public hearings where customers can ask questions and testify about Evergy's rate request. Customers are encouraged to participate in the hearings.

Each hearing is divided into two parts. In the first part, you may ask questions of Everygy, the Missouri Office of the Public Counsel (“OPC”), and the PSC Staff. The PSC Commissioners and the regulatory law judge will not attend the informal question and answer session. Your questions and the answers provided will not be part of the evidence the PSC reviews. In the second part, PSC Commissioners and a regulatory law judge will be present, and you may testify as part of the official record of the case.

Public hearings will be held in person and virtually according to the following schedule:

Date/Time	Location/Access Information
TBD	TBD
TBD	Phone number: 855-718-6621 ; WebEx Access Code: TBD

Anyone is welcome to attend the in-person local public hearings at the addresses and times listed above.

To attend a virtual local public hearing by telephone, at the time of the hearing call toll-free, listen to the prompt and enter the corresponding meeting number listed above followed by # (pound/hashtag symbol). If prompted for a password, enter the corresponding password listed above. To attend a virtual local public hearing by WebEx video (internet), visit the website www.webex.com. You can also download the Cisco WebEx meetings application on your mobile device, laptop, desktop, or tablet prior to the hearing and join the meeting at the hearing time by entering the corresponding meeting number and password listed above.

To facilitate an orderly presentation that can be preserved for the record, members of the public who wish to participate in the WebEx question-and-answer session or make comment to the Commission during a WebEx hearing should register by calling 1-800-392-4211 by 5:00 p.m. the day before the hearing.

Any individuals needing special accommodations to participate in the hearings should contact the PSC at least ten days prior to the hearing at one of the following numbers: Consumer Services Hotline 1-800-392-4211 or TDD Hotline 1-800-829-7541.

For billing and service information call toll-free : **1-888-471-5275**

For emergencies or lights out : **1-888-544-4852**

Evergy 2025 System Loss Study

Prepared by Evergy Long-Term T&D Planning

November 7, 2025

Executive Summary

Introduction

This report presents Evergy's 2025 analysis of system losses for its Metro (Kansas, Missouri, and combined) portion of the power system. Evergy Staff performed the study using 2024 data and developed separate demand (MW) and energy (MWh) loss factors for the major component sectors of Evergy's power system: transmission, transmission-to-distribution substations, primary distribution, and secondary distribution.

Conclusion

The results of the study yielded the following loss factors:

Table 1: Cumulative Loss Factors for Evergy Metro - Missouri

	Demand Loss Factor	Energy Loss Factor
Transmission	1.01250	1.00879
T-to-D Substation	1.01540	1.00982
Primary Distribution	1.02581	1.02400
Secondary Distribution	1.03352	1.04902

Table 2: Cumulative Loss Factors for Evergy Metro - Kansas

	Demand Loss Factor	Energy Loss Factor
Transmission	1.01000	1.00671
T-to-D Substation	1.01302	1.00812
Primary Distribution	1.03075	1.02533
Secondary Distribution	1.03364	1.04273

Table 3: Cumulative Loss Factors for Evergy - Combined

	Demand Loss Factor	Energy Loss Factor
Transmission	1.01130	1.00788
T-to-D Substation	1.01425	1.00911
Primary Distribution	1.02639	1.02362
Secondary Distribution	1.03322	1.04629

Table 4: Losses as a Percent of Total Load

Section 1: Introduction

1.1 Purpose

This report presents Evergy's 2025 analysis of system losses for its Metro (Kansas, Missouri, and combined) portion of the power system. Evergy Staff performed the study using 2024 data and developed separate demand (MW) and energy (MWh) loss factors for the major component sectors of Evergy's power system: transmission, transmission-to-distribution substations, primary distribution, and secondary distribution.

1.2 Project Description/Background

One source of a utility's total system energy, peak demand, and system losses for any year is those reported annually to the Federal Government via the FERC Form 1, Page 401.

This study seeks to use demand, energy, and loss numbers reported for a given year via FERC Form 1 in conjunction with Evergy's system data (both known and assumed) to estimate losses for the major component sectors of the power system: transmission, transmission-to-distribution substations, primary distribution, and secondary distribution.

Section 2: Objective and Study Approach

The objective of this study is to determine peak demand (MW) and energy (MWh) loss factors for the major component sectors (i.e., transmission, transmission-to-distribution substation, primary distribution, and secondary distribution) for a portion of Evergy's power system.

2.1 Overall Study Approach

Evergy followed a methodology developed by Martin Gustafson and Jill Baylor of Stone & Webster Management Consultants, Inc., and described in a 1988 article published by the IEEE Power Engineering Society. This method includes the development of an algebraic expression to describes losses in terms of "load" loss (those losses that increase with usage, a.k.a. I^2R losses) and "no-load" loss (those losses incurred, but do not vary with system load changes). Once the total load and no-load loss values have been determined for the Evergy system, they can be split into the major component sectors using known and assumed information about Evergy's electric system (e.g., estimated losses and population of secondary transformers, calculated losses on a sample of Evergy's primary distribution system, estimated losses for an average secondary service, etc.). The study follows the general flow depicted in Figure 1:

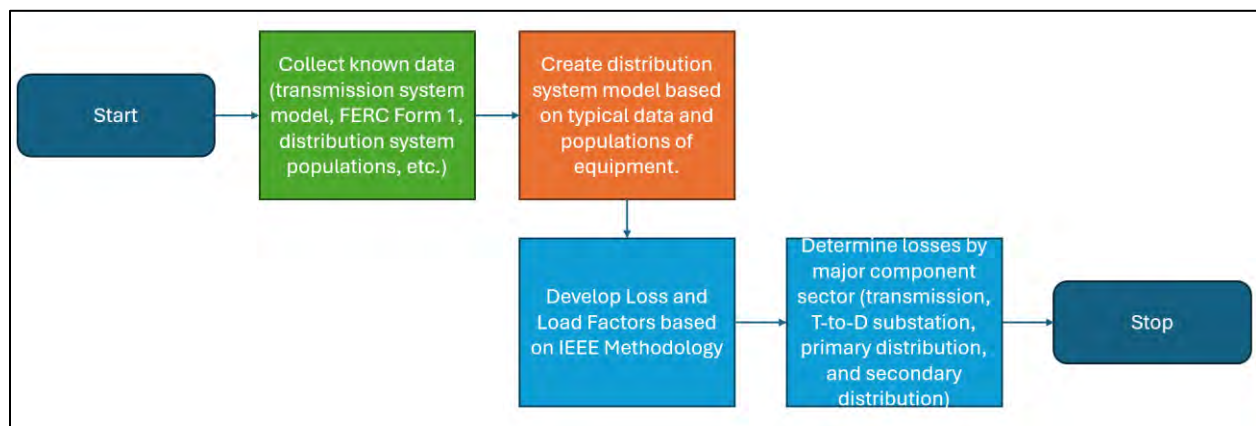

Figure 1: General Study Flow Diagram

2.2 Transformer Models

Evergy has explicit models for those transformers connected to transmission voltages (i.e., those with a low-sided voltage of 69kV or greater) to represent the load loss and no-load loss components in the loss study.

As transformer populations increase, it is difficult to maintain detailed models for all transformers due to the sheer volume of information and frequency with which changes are made. Therefore, average/typical values are applied to create an estimate for losses of transmission-to-distribution and primary-to-secondary distribution transformers. Once the population of distribution transformers is known, typical values allow the load and no-load losses to be modeled.

2.3 Transmission Line Models

Evergy maintains a model of the transmission system to represent the transmission line losses. Unlike transformers, however, transmission line models do not differentiate between load and no-load losses. Therefore, line mileage at each transmission voltage class (e.g., 345kV, 161kV, 69kV, etc.) is used to estimate the corona (i.e., no-load) losses.

2.4 Distribution Line Models

As line population increases, it is difficult to maintain detailed models for all lines due to the sheer volume of information and frequency with which changes are made. Evergy's approach is to use existing detailed models for a representative subset of the distribution line population and simulate the losses at peak to determine a typical value for loss by voltage class. This typical value is then applied to individual voltage classes based on the number of miles.

Corona (i.e., no-load) losses are negligible at voltages below 60kV. Therefore, no accommodation for corona losses is made for distribution lines.

Section 3: Conclusion

The results of the study yielded the following loss factors:

Table 5: Cumulative Loss Factors for Evergy Metro - Missouri

	Demand Loss Factor	Energy Loss Factor
Transmission	1.01250	1.00879
T-to-D Substation	1.01540	1.00982
Primary Distribution	1.02581	1.02400
Secondary Distribution	1.03352	1.04902

Table 6: Cumulative Loss Factors for Evergy Metro - Kansas

	Demand Loss Factor	Energy Loss Factor
Transmission	1.01000	1.00671
T-to-D Substation	1.01302	1.00812
Primary Distribution	1.03075	1.02533
Secondary Distribution	1.03364	1.04273

Table 7: Cumulative Loss Factors for Evergy - Combined

	Demand Loss Factor	Energy Loss Factor
Transmission	1.01130	1.00788
T-to-D Substation	1.01425	1.00911
Primary Distribution	1.02639	1.02362
Secondary Distribution	1.03322	1.04629

Table 8: Losses as a Percent of Total Load

		Internal Demand [MW]	Internal Energy [MWh]	Municipal Demand [MW]	Municipal Energy [MWh]

FUEL ADJUSTMENT CLAUSE — Rider FAC
FUEL AND PURCHASE POWER ADJUSTMENT-ELECTRIC
(Applicable to Service Provided June 8, 2017 through December 5, 2018)

DEFINITIONS

Reserved for Future Use

~~ACCUMULATION PERIODS, FILING DATES AND RECOVERY PERIODS~~ — An accumulation period is the six calendar months during which the actual costs and revenues subject to this rider will be accumulated for the purposes of determining the Fuel Adjustment Rate ("FAR"). The two six-month accumulation periods each year through May 27, 2021, the two corresponding twelve-month recovery periods and the filing dates are as shown below. Each filing shall include detailed work papers in electronic format with formulas intact to support the filing.

Accumulation Periods

January — June
July — December

Filing Dates

By August 1
By February 1

Recovery Periods

October — September
April — March

~~A recovery period consists of the months during which the FAR is applied to retail customer billings on a per kilowatt-hour (kWh) basis.~~

~~COSTS AND REVENUES~~ — Costs eligible for the Fuel and Purchased Power Adjustment ("FPA") will be the Company's allocated jurisdictional costs for the fuel component of the Company's generating units, purchased power energy charges including applicable Southwest Power Pool ("SPP") charges, emission allowance costs and amortizations, cost of transmission of electricity by others associated with purchased power and off-system sales — all as incurred during the accumulation period. These costs will be offset by jurisdictional off-system sales revenues, applicable SPP revenues, and revenue from the sale of Renewable Energy Certificates or Credits ("REC"). Eligible costs do not include the purchased power demand costs associated with purchased power contracts in excess of one year. Likewise, revenues do not include demand or capacity receipts associated with power contracts in excess of one year.

APPLICABILITY

The price per kWh of electricity sold to retail customers will be adjusted (up or down) periodically subject to application of the Rider FAC and approval by the Missouri Public Service Commission ("MPSC" or "Commission").

The FAR is the result of dividing the FPA by forecasted Missouri retail net system input ("SRP") for the recovery period, expanded for Voltage Adjustment Factors ("VAF"), rounded to the nearest \$0.00001, and aggregating over two accumulation periods. The amount charged on a separate line on retail customers' bills is equal to the current annual FAR multiplied by kWh billed.

FPA ~~=====~~ 95% * ((ANEC - B) * J) + T + I + P

ANEC ~~=====~~ Actual Net Energy Costs = (FC + E + PP + TC - OSSR - R)

FC ~~=====~~ Fuel Costs Incurred to Support Sales:

The following costs reflected in FERC Account Number 501:

Subaccount 501000: coal commodity and transportation, side release and freeze conditioning agents, dust mitigation agents, accessorial charges as delineated in railroad accessorial tariffs [additional crew, closing hopper railcar doors, completion of loading of a unit train and its release for movement, completion of unloading of a unit train and its release for movement, delay for removal of frozen coal, destination detention, diversion of empty unit train (including administration fee, holding charges, and out-of-route charges which may include fuel surcharge), diversion of loaded coal trains, diversion of loaded unit train fees (including administration fee, additional mileage fee or out-of-route charges which may include fuel surcharge), fuel surcharge, held in transit, hold charge, locomotive release, miscellaneous handling of coal cars, origin detention, origin re-designation, out-of-route charges (including fuel surcharge), out-of-route movement, pick-up of locomotive power, placement and pick-up of loaded or empty private coal cars on railroad-supplied tracks, placement and pick-up of loaded or empty private coal cars on shipper-supplied tracks, railcar storage, release of locomotive power, removal, rotation and/or addition of cars, storage charges, switching, trainset positioning, trainset storage, and weighing]; unit train maintenance and leases, applicable taxes, natural gas costs, fuel quality adjustments, fuel adjustments included in commodity and transportation costs, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), oil costs for commodity, transportation, storage, taxes, fees, and fuel losses, coal and oil inventory adjustments, and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 501 Accounts.

Subaccount 501020: the allocation of the allowed costs in the 501000, 501300, and 501400 accounts attributed to native load;

Subaccount 501030: the allocation of the allowed costs in the 501000, 501300, and 501400 accounts attributed to off system sales;

Subaccount 501300: fuel additives and consumable costs for Air Quality Control Systems ("AQCS") operations, such as ammonia, hydrated lime, lime, limestone, powder activated carbon, sulfur, and RESPond, or other consumables which perform similar functions;

Subaccount 501400: residual costs and revenues associated with combustion product, slag and ash disposal costs and revenues including contractors, materials and other miscellaneous expenses.

The following costs reflected in FERC Account Number 518:

Subaccount 518000: nuclear fuel commodity and hedging costs;

Subaccount 518201: nuclear fuel waste disposal expense;

Subaccount 518100: nuclear fuel oil.

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

Reserved for Future Use

The following costs reflected in FERC Account Number 547:
Subaccount 547000: natural gas and oil costs for commodity, transportation, storage, taxes, fees and fuel losses, and settlement proceeds, insurance recoveries, subrogation recoveries for increased fuel expenses, and broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers);
Subaccount 547020: the allocation of the allowed costs in the 547000 and 547300 accounts attributed to native load;
Subaccount 547030: the allocation of the allowed costs in the 547000 and 547300 accounts attributed to off system sales;
Subaccount 547300: fuel additives.

E — **Net Emission Costs**

The following costs and revenues reflected in FERC Account Number 509:
Subaccount 509000: NO_x and SO₂ emission allowance costs and revenue amortizations offset by revenues from the sale of NO_x and SO₂ emission allowances, and broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers).

PP — **Purchased Power Costs**

The following costs or revenues reflected in FERC Account Number 555:
Subaccount 555000: purchased power costs, energy charges from capacity purchases of any duration, insurance recoveries, and subrogation recoveries for purchased power expenses, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), charges and credits related to the SPP Integrated Marketplace ("IM") or other IMs including energy, revenue neutrality, make whole and out of merit payments and distributions, over-collected losses payments and distributions, Transmission Congestion Rights ("TCR") and Auction Revenue Rights ("ARR") settlements, virtual energy costs, revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, load/export charges, ancillary services including non-performance and distribution payments and charges and other miscellaneous SPP Integrated Market charges including uplift charges or credits;
Subaccount 555005: capacity charges for capacity purchases one year or less in duration;
Subaccount 555030: the allocation of the allowed costs in the 555000 account attributed to purchases for off system sales.

- TC — Transmission Costs:
The following costs reflected in FERC Account Number 565:
Subaccount 565000: non-SPP transmission used to serve off system sales or to make purchases for load and 20.91% of the SPP transmission service costs which includes the schedules listed below as well as any adjustment to the charges in the schedules below:
— Schedule 7 — Long Term Firm and Short Term Point to Point Transmission Service
— Schedule 8 — Non Firm Point to Point Transmission Service
— Schedule 9 — Network Integration Transmission Service
— Schedule 10 — Wholesale Distribution Service
— Schedule 11 — Base Plan Zonal Charge and Region Wide Charge
Subaccount 565020: the allocation of the allowed costs in the 565000 account attributed to native load;
Subaccount 565027: the allocation of the allowed costs in the 565000 account attributed to transmission demand charges;
Subaccount 565030: the allocation of the allowed costs in account 565000 attributed to off system sales.
- OSSR — Revenues from Off-System Sales:
The following revenues or costs reflected in FERC Account Number 447:
Subaccount 447020: all revenues from off-system sales. This includes charges and credits related to the SPP IM including, energy, ancillary services, revenue sufficiency (such as make whole payments and out of merit payments and distributions), revenue neutrality payments and distributions, over collected losses payments and distributions, TCR and ARR settlements, demand reductions, virtual energy costs and revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, generation/export charges, ancillary services including non-performance and distribution payments and SPP uplift revenues or credits. Off-system sales revenues from full and partial requirements sales to municipalities that are served through bilateral contracts in excess of one year shall be excluded from OSSR component;
Subaccount 447012: capacity charges for capacity sales one year or less in duration;
Subaccount 447030: the allocation of the includable sales in account 447020 not attributed to retail sales.
- R — Renewable Energy Credit Revenue:
Revenues reflected in FERC account 509000 from the sale of Renewable Energy Credits that are not needed to meet the Renewable Energy Standards.

Any cost identified above which is a Missouri-only cost shall be grossed-up by the current kWh energy factor, included in the ANEC calculation and allocated as indicated in component J below. Any cost identified above which is a Kansas-only cost shall be excluded from the ANEC calculation.

Costs and revenues not specifically detailed in Factors FC, PP, E, TC, OSSR, or R shall not be included in the Company's FAR filings; provided however, in the case of Factors PP, TC or OSSR, the market settlement charge types under which SPP or another centrally administered market (e.g., PJM or MISO) bills/credits a cost or revenue need not be detailed in Factors PP or OSSR for the costs or revenues to be considered specifically detailed in Factors PP or OSSR; and provided further, should the SPP or another centrally administered market (e.g., PJM or MISO) implement a new market settlement charge type not listed below or a new schedule not listed in TC:

- A. The Company may include the new schedule, charge type cost or revenue in its FAR filings if the Company believes the new schedule, charge type cost or revenue possesses the characteristics of, and is of the nature of, the costs or revenues listed below or in the schedules listed in TC, as the case may be, subject to the requirement that the Company make a filing with the Commission as outlined in B below and also subject to another party's right to challenge the inclusion as outlined in E below;
- B. The Company will make a filing with the Commission giving the Commission notice of the new schedule or charge type no later than 60 days prior to the Company including the new schedule, charge type cost or revenue in a FAR filing. Such filing shall identify the proposed accounts affected by such change, provide a description of the new charge type demonstrating that it possesses the characteristics of, and is of the nature of, the costs or revenues listed in factors PP, TC or OSSR as the case may be, and identify the preexisting schedule, or market settlement charge type(s) which the new schedule or charge type replaces or supplements;
- C. The Company will also provide notice in its monthly reports required by the Commission's fuel adjustment clause rules that identifies the new schedule, charge type costs or revenues by amount, description and location within the monthly reports;
- D. The Company shall account for the new schedule, charge type costs or revenues in a manner which allows for the transparent determination of current period and cumulative costs or revenues;
- E. If the Company makes the filing provided for in B above and a party challenges the inclusion, such challenge will not delay approval of the FAR filing. To challenge the inclusion of a new schedule or charge type, a party shall make a filing with the Commission based upon that party's contention that the new schedule, charge type costs or revenues at issue should not have been included, because they do not possess the characteristics of the schedules, costs or revenues listed in Factors PP, TC or OSSR, as the case may be. A party wishing to challenge the inclusion of a schedule or charge type shall include in its filing the reasons why it believes the Company did not show that the new schedule or charge type possesses the characteristics of the costs or revenues listed in Factors TC, PP or OSSR, as the case may be, and its filing shall be made within 30 days of the Company's filing under B above. In the event of a timely challenge, the Company shall bear the burden of proof to support its decision to include a new schedule or charge type in a FAR filing. Should such challenge be upheld by the Commission, any such costs will be refunded (or revenues retained) through a future FAR filing in a manner consistent with that utilized for Factor P; and

F.—A party other than the Company may seek the inclusion of a new schedule or charge type in a FAR filing by making a filing with the Commission no less than 60 days before the Company's next FAR filing date of August 1 or February 1. Such a filing shall give the Commission notice that such party believes the new schedule or charge type should be included because it possesses the characteristics of, and is of the nature of, the costs or revenues listed in factors PP, TC or OSSR, as the case may be. The party's filing shall identify the proposed accounts affected by such change, provide a description of the new schedule or charge type demonstrating that it possesses the characteristics of, and is of the nature of, the schedules, costs or revenues listed in factors PP, TC or OSSR as the case may be, and identify the preexisting schedule or market settlement charge type(s) which the new schedule or charge type replaces or supplements. If a party makes the filing provided for by this paragraph F and a party (including the Company) challenges the inclusion, such challenge will not delay inclusion of the new schedule or charge type in the FAR filing or delay approval of the FAR filing. To challenge the inclusion of a new schedule or charge type, the challenging party shall make a filing with the Commission based upon that party's contention that the new schedule or charge type costs or revenues at issue should not have been included, because they do not possess the characteristics of the schedules, costs or revenues listed in Factors PP, TC, or OSSR, as the case may be. The challenging party shall make its filing challenging the inclusion and stating the reasons why it believes the new schedule or charge type does not possess the characteristic of the costs or revenues listed in Factors PP, TC or OSSR, as the case may be, within 30 days of the filing that seeks inclusion of the new schedule or charge type. In the event of a timely challenge, the party seeking the inclusion of the new schedule or charge type shall bear the burden of proof to support its contention that the new schedule or charge type should be included in the Company's FAR filings. Should such challenge be upheld by the Commission, any such costs will be refunded (or revenues retained) through a future FAR filing in a manner consistent with that utilized for Factor P.

Should FERC require any item covered by components FC, E, PP, TC, OSSR or R to be recorded in an account different than the FERC accounts listed in such components, such items shall nevertheless be included in component FC, E, PP, TC, OSSR or R. In the month that the Company begins to record items in a different account, the Company will file with the Commission the previous account number, the new account number and what costs or revenues that flow through the Rider FAC to be recorded in the account.

B = Net base energy costs ordered by the Commission in the last general rate case consistent with the costs and revenues included in the calculation of the FPA. Net Base Energy costs will be calculated as shown below:

$S_{AP} \times \text{Base Factor ("BF")}$

S_{AP} = Net system input ("NSI") in kWh for the accumulation period

BF = Company base factor costs per kWh: \$0.01542

J = Missouri Retail Energy Ratio = $(\text{MO Retail kWh Sales} + \text{MO Losses}) / (\text{MO Retail kWh Sales} + \text{MO Losses} + \text{KS Retail kWh Sales} + \text{KS Losses} + \text{Sales for Resale, Municipals kWh Sales [includes border customers]} + \text{Sales for Resale, Municipals Losses})$
MO Losses = 6.32%; KS Losses = 7.52%; Sales for Resale, Municipals Losses = 6.84%

T = True-up amount as defined below.

I = Interest applicable to (i) the difference between Missouri Retail ANEC and B for all kWh of energy supplied during an AP until those costs have been recovered; (ii) refunds due to prudence reviews ("P"), if any; and (iii) all under- or over-recovery balances created through operation of this FAC, as determined in the true-up filings ("T") provided for herein. Interest shall be calculated monthly at a rate equal to the weighted average interest paid on the Company's short-term debt, applied to the month-end balance of items (i) through (iii) in the preceding sentence.

P = Prudence disallowance amount, if any, as defined in this tariff.

$FAR = FPA/S_{RP}$

Single Accumulation Period Transmission/Substation Voltage $FAR_{Trans/Sub} = FAR * VAF_{Trans/Sub}$

Single Accumulation Period Primary Voltage $FAR_{Prim} = FAR * VAF_{Prim}$

Single Accumulation Period Secondary Voltage $FAR_{Sec} = FAR * VAF_{Sec}$

Annual Primary Voltage $FAR_{Trans/Sub} =$ Aggregation of the two Single Accumulation Period Transmission/Substation Voltage FARs still to be recovered

Annual Primary Voltage $FAR_{Prim} =$ Aggregation of the two Single Accumulation Period Primary Voltage FARs still to be recovered

Annual Secondary Voltage $FAR_{Sec} =$ Aggregation of the two Single Accumulation Period Secondary Voltage FARs still to be recovered

Where:

$FPA =$ Fuel and Purchased Power Adjustment

$S_{RP} =$ Forecasted recovery period Missouri retail NSI in kWh, at the generation level

$VAF =$ Expansion factor by voltage level

$VAF_{Trans/Sub} =$ Expansion factor for transmission/substation and higher voltage level customers

$VAF_{Prim} =$ Expansion factor for between primary and trans/sub voltage level customers

$VAF_{Sec} =$ Expansion factor for lower than primary voltage customers

TRUE-UPS

After completion of each RP, the Company shall make a true-up filing by the filing date of its next FAR filing. Any true-up adjustments shall be reflected in component "T" above. Interest on the true-up adjustment will be included in component "I" above.

The true-up amount shall be the difference between the revenues billed and the revenues authorized for collection during the RP as well as any corrections identified to be included in the current FAR filing. Any corrections included will be discussed in the testimony accompanying the true-up filing.

PRUDENCE REVIEWS

Prudence reviews of the costs subject to this Rider FAC shall occur no less frequently than every eighteen months, and any such costs which are determined by the Commission to have been imprudently incurred or incurred in violation of the terms of this Rider FAC shall be returned to customers. Adjustments by Commission order, if any, pursuant to any prudence review shall be included in the FAR calculation in component "P" above unless a separate refund is ordered by the Commission. Interest on the prudence adjustment will be included in component "I" above.

FUEL ADJUSTMENT CLAUSE – Rider FAC
FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
(Applicable to Service Provided December 6, 2018 through January 8, 2023~~the Day Prior to the~~
~~Effective Date of Tariff Sheets 50.32 through 50.42~~)

DEFINITIONS

ACCUMULATION PERIODS, FILING DATES AND RECOVERY PERIODS: An accumulation period is the six calendar months during which the actual costs and revenues subject to this rider will be accumulated for the purposes of determining the Fuel Adjustment Rate ("FAR"). The two six-month accumulation periods each year through four years from the effective date of this tariff sheet, the two corresponding twelve-month recovery periods and the filing dates are as shown below. Each filing shall include detailed work papers in electronic format with formulas intact to support the filing.

Accumulation Periods

January – June
July – December

Filing Dates

By August 1
By February 1

Recovery Periods

October – September
April – March

A recovery period consists of the months during which the FAR is applied to retail customer billings on a per kilowatt-hour (kWh) basis.

COSTS AND REVENUES: Costs eligible for the Fuel and Purchased Power Adjustment ("FPA") will be the Company's allocated jurisdictional costs for the fuel component of the Company's generating units, purchased power energy charges including applicable Southwest Power Pool ("SPP") charges, emission allowance costs and amortizations, cost of transmission of electricity by others associated with purchased power and off system sales – all as incurred during the accumulation period. These costs will be offset by jurisdictional off-system sales revenues, applicable SPP revenues, and revenue from the sale of Renewable Energy Certificates or Credits ("REC"). Eligible costs do not include the purchased power demand costs associated with purchased power contracts in excess of one year. Likewise, revenues do not include demand or capacity receipts associated with power contracts in excess of one year.

APPLICABILITY

The price per kWh of electricity sold to retail customers will be adjusted (up or down) periodically subject to application of the Rider FAC and approval by the Missouri Public Service Commission ("MPSC" or "Commission").

The FAR is the result of dividing the FPA by forecasted Missouri retail net system input ("SRP") for the recovery period, expanded for Voltage Adjustment Factors ("VAF"), rounded to the nearest \$0.00001, and aggregating over two accumulation periods. The amount charged on a separate line on retail customers' bills is equal to the current annual FAR multiplied by kWh billed.

FORMULAS AND DEFINITIONS OF COMPONENTS

FPA = $95\% * ((ANEC - B) * J) + T + I + P$

ANEC = Actual Net Energy Costs = $(FC + E + PP + TC - OSSR - R)$

FC = Fuel Costs Incurred to Support Sales:

The following costs reflected in FERC Account Number 501:

Subaccount 501000: coal commodity and transportation, side release and freeze conditioning agents, dust mitigation agents, applicable taxes, accessorial charges as delineated in railroad accessorial tariffs [additional crew, closing hopper railcar doors, completion of loading of a unit train and its release for movement, completion of unloading of a unit train and its release for movement, delay for removal of frozen coal, destination detention, diversion of empty unit train (including administration fee, holding charges, and out-of-route charges which may include fuel surcharge), diversion of loaded coal trains, diversion of loaded unit train fees (including administration fee, additional mileage fee or out-of-route charges which may include fuel surcharge), fuel surcharge, held in transit, hold charge, locomotive release, miscellaneous handling of coal cars, origin detention, origin re-designation, out-of-route charges (including fuel surcharge), out-of-route movement, pick-up of locomotive power, placement and pick-up of loaded or empty private coal cars on railroad supplied tracks, placement and pick-up of loaded or empty private coal cars on shipper supplied tracks, railcar storage, release of locomotive power, removal, rotation and/or addition of cars, storage charges, switching, trainset positioning, trainset storage, and weighing], unit train maintenance, leases, taxes and depreciation, natural gas costs, fuel quality adjustments, fuel adjustments included in commodity and transportation costs, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), oil costs for commodity, transportation, storage, taxes, fees, and fuel losses, coal and oil inventory adjustments, and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 501 Accounts.

Subaccount 501020: the allocation of the allowed costs in the 501000, 501300, and 501400 accounts attributed to native load;

Subaccount 501030: the allocation of the allowed costs in the 501000, 501300, and 501400 accounts attributed to off system sales;

Subaccount 501300: fuel additives and consumable costs for Air Quality Control Systems ("AQCS") operations, such as ammonia, hydrated lime, lime, limestone, limestone inventory adjustments, powder activated carbon, calcium bromide, sulfur, and RESPond, or other consumables which perform similar functions;

Subaccount 501400: residuals costs and revenues associated with combustion byproducts, slag and ash disposal costs and revenues including contractors, materials and other miscellaneous expenses.

The following costs reflected in FERC Account Number 518:

Subaccount 518000: nuclear fuel commodity and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 518 Accounts

Subaccount 518201: nuclear fuel waste disposal expense;

Subaccount 518100: nuclear fuel oil.

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

The following costs reflected in FERC Account Number 547:

Subaccount 547000: natural gas and oil costs for commodity, transportation, storage, taxes, fees and fuel losses, and settlement proceeds, insurance recoveries, subrogation recoveries for increased fuel expenses, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers);

Subaccount 547020: the allocation of the allowed costs in the 547000 and 547300 accounts attributed to native load;

Subaccount 547030: the allocation of the allowed costs in the 547000 and 547300 accounts attributed to off system sales;

Subaccount 547300: fuel additives and consumable costs for Air Quality Control Systems ("AQCS") operations, such as ammonia or other consumables which perform similar functions.

E = Net Emission Costs:

The following costs and revenues reflected in FERC Account Number 509:

Subaccount 509000: NO_x and SO₂ emission allowance costs, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers) offset by revenue amortizations and revenues from the sale of NO_x and SO₂ emission allowances.

PP = Purchased Power Costs:

The following costs or revenues reflected in FERC Account Number 555:

Subaccount 555000: purchased power costs, energy charges from capacity purchases of any duration, insurance recoveries, and subrogation recoveries for purchased power expenses, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), charges and credits related to the SPP Integrated Marketplace ("IM") or other IMs, including energy, revenue neutrality, make whole and out of merit payments and distributions, over collected losses payments and distributions, Transmission Congestion Rights ("TCR") and Auction Revenue Rights ("ARR") settlements, virtual energy costs, revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, load/export charges, ancillary services including non-performance and distribution payments and charges and other miscellaneous SPP Integrated Market charges including uplift charges or credits, excluding (1) the amounts associated with purchased power agreements associated with the Renewable Energy Rider tariff and (2) the Missouri allocated portion of the difference between the amount of the bilateral contract for hydro energy purchased from CNPPID and the average monthly LMP value at the CNPPID nodes times the amount of energy sold to the SPP at the CNPPID nodes. The CNPPID nodes are defined as NPPD.KCPL.JFY1, NPPD.KCPL.JFY2, NPPD.KCPL.JHN1, NPPD.KCPL.JN11, NPPD.KCPL.JN12;

Subaccount 555005: capacity charges for capacity purchases one year or less in duration;

Subaccount 555030: the allocation of the allowed costs in the 555000 account attributed to purchases for off system sales.

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

- TC = Transmission Costs:
 The following costs reflected in FERC Account Number 565:
 Subaccount 565000: non-SPP transmission used to serve off system sales or to make purchases for load and 26.40% of the SPP transmission service costs which includes the schedules listed below as well as any adjustment to the charges in the schedules below:
 Schedule 7 – Long Term Firm and Short Term Point to Point Transmission Service
 Schedule 8 – Non Firm Point to Point Transmission Service
 Schedule 9 – Network Integration Transmission Service
 Schedule 10 – Wholesale Distribution Service
 Schedule 11 – Base Plan Zonal Charge and Region Wide Charge
 excluding amounts associated with portions of purchased power agreements dedicated to specific customers under the Renewable Energy Rider tariff.
 Subaccount 565020: the allocation of the allowed costs in the 565000 account attributed to native load;
 Subaccount 565027: the allocation of the allowed costs in the 565000 account attributed to transmission demand charges;
 Subaccount 565030: the allocation of the allowed costs in the 565000 account attributed to off system sales.
- OSSR = Revenues from Off-System Sales:
 The following revenues or costs reflected in FERC Account Number 447:
 Subaccount 447020: all revenues from off-system sales. This includes charges and credits related to the SPP IM, or other IMs, including, energy, ancillary services, revenue sufficiency (such as make whole payments and out of merit payments and distributions), revenue neutrality payments and distributions, over collected losses payments and distributions, TCR and ARR settlements, demand reductions, virtual energy costs and revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, generation/export charges, ancillary services including non-performance and distribution payments and SPP uplift revenues or credits, but excluding (1) off-system sales revenues from full and partial requirements sales to municipalities that are served through bilateral contracts in excess of one year and (2) the amounts associated with purchased power agreements associated with the Renewable Energy Rider tariff. Additional revenue will be added at an imputed 75% of the unsubscribed portion associated with the Solar Subscription Rider valued at market price;
 Subaccount 447012: capacity charges for capacity sales one year or less in duration;
 Subaccount 447030: the allocation of the includable sales in account 447020 not attributed to retail sales.
- R = Renewable Energy Credit Revenue:
 Revenues reflected in FERC account 509000 from the sale of Renewable Energy Credits that are not needed to meet the Renewable Energy Standards.

Any cost identified above which is a Missouri-only cost shall be grossed up by the current kWh energy factor, included in the ANEC calculation and allocated as indicated in component J below. Any cost identified above which is a Kansas-only cost shall be excluded from the ANEC calculation.

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

Costs and revenues not specifically detailed in Factors FC, PP, E, TC, OSSR, or R shall not be included in the Company's FAR filings; provided however, in the case of Factors PP, TC or OSSR, the market settlement charge types under which SPP or another centrally administered market (e.g., PJM or MISO) bills/credits a cost or revenue need not be detailed in Factors PP or OSSR for the costs or revenues to be considered specifically detailed in Factors PP or OSSR; and provided further, should the SPP or another centrally administered market (e.g. PJM or MISO) implement a new market settlement charge type not listed below or a new schedule not listed in TC:

- A. The Company may include the new schedule, charge type cost or revenue in its FAR filings if the Company believes the new schedule, charge type cost or revenue possesses the characteristics of, and is of the nature of, the costs or revenues listed below or in the schedules listed in TC, as the case may be, subject to the requirement that the Company make a filing with the Commission as outlined in B below and also subject to another party's right to challenge the inclusion as outlined in E. below;
- B. The Company will make a filing with the Commission giving the Commission notice of the new schedule or charge type no later than 60 days prior to the Company including the new schedule, charge type cost or revenue in a FAR filing. Such filing shall identify the proposed accounts affected by such change, provide a description of the new charge type demonstrating that it possesses the characteristics of, and is of the nature of, the costs or revenues listed in factors PP, TC or OSSR as the case may be, and identify the preexisting schedule, or market settlement charge type(s) which the new schedule or charge type replaces or supplements;
- C. The Company will also provide notice in its monthly reports required by the Commission's fuel adjustment clause rules that identifies the new schedule, charge type costs or revenues by amount, description and location within the monthly reports;
- D. The Company shall account for the new schedule, charge type costs or revenues in a manner which allows for the transparent determination of current period and cumulative costs or revenues;
- E. If the Company makes the filing provided for in B above and a party challenges the inclusion, such challenge will not delay approval of the FAR filing. To challenge the inclusion of a new schedule or charge type, a party shall make a filing with the Commission based upon that party's contention that the new schedule, charge type costs or revenues at issue should not have been included, because they do not possess the characteristics of the schedules, costs or revenues listed in Factors PP, TC or OSSR, as the case may be. A party wishing to challenge the inclusion of a schedule or charge type shall include in its filing the reasons why it believes the Company did not show that the new schedule or charge type possesses the characteristics of the costs or revenues listed in Factors TC, PP or OSSR, as the case may be, and its filing shall be made within 30 days of the Company's filing under B above. In the event of a timely challenge, the Company shall bear the burden of proof to support its decision to include a new schedule or charge type in a FAR filing. Should such challenge be upheld by the Commission, any such costs will be refunded (or revenues retained) through a future FAR filing in a manner consistent with that utilized for Factor P; and

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

- F. A party other than the Company may seek the inclusion of a new schedule or charge type in a FAR filing by making a filing with the Commission no less than 60 days before the Company's next FAR filing date of August 1 or February 1. Such a filing shall give the Commission notice that such party believes the new schedule or charge type should be included because it possesses the characteristics of, and is of the nature of, the costs or revenues listed in factors PP, TC or OSSR, as the case may be. The party's filing shall identify the proposed accounts affected by such change, provide a description of the new schedule or charge type demonstrating that it possesses the characteristics of, and is of the nature of, the schedules, costs or revenues listed in factors PP, TC or OSSR as the case may be, and identify the preexisting schedule or market settlement charge type(s) which the new schedule or charge type replaces or supplements. If a party makes the filing provided for by this paragraph F and a party (including the Company) challenges the inclusion, such challenge will not delay inclusion of the new schedule or charge type in the FAR filing or delay approval of the FAR filing. To challenge the inclusion of a new schedule or charge type, the challenging party shall make a filing with the Commission based upon that party's contention that the new schedule or charge type costs or revenues at issue should not have been included, because they do not possess the characteristics of the schedules, costs or revenues listed in Factors PP, TC, or OSSR, as the case may be. The challenging party shall make its filing challenging the inclusion and stating the reasons why it believes the new schedule or charge type does not possess the characteristic of the costs or revenues listed in Factors PP, TC or OSSR, as the case may be, within 30 days of the filing that seeks inclusion of the new schedule or charge type. In the event of a timely challenge, the party seeking the inclusion of the new schedule or charge type shall bear the burden of proof to support its contention that the new schedule or charge type should be included in the Company's FAR filings. Should such challenge be upheld by the Commission, any such costs will be refunded (or revenues retained) through a future FAR filing in a manner consistent with that utilized for Factor P.

Should FERC require any item covered by components FC, E, PP, TC, OSSR or R to be recorded in an account different than the FERC accounts listed in such components, such items shall nevertheless be included in component FC, E, PP, TC, OSSR or R. In the month that the Company begins to record items in a different account, the Company will file with the Commission the previous account number, the new account number and what costs or revenues that flow through the Rider FAC to be recorded in the account.

B = Net base energy costs ordered by the Commission in the last general rate case consistent with the costs and revenues included in the calculation of the FPA. Net Base Energy costs will be calculated as shown below:

$S_{AP} \times \text{Base Factor ("BF")}$

S_{AP} = Net system input ("NSI") in kWh for the accumulation period

BF = Company base factor costs per kWh: \$0.01675

J = Missouri Retail Energy Ratio = (MO Retail kWh sales + MO Losses) / (MO Retail kWh Sales + MO Losses + KS Retail kWh Sales + KS Losses + Sales for Resale, Municipals kWh Sales [includes border customers] + Sales for Resale, Municipals Losses)
MO Losses = 6.32%; KS Losses = 7.52%; Sales for Resale, Municipals Losses = 6.84%

T = True-up amount as defined below.

I = Interest applicable to (i) the difference between Missouri Retail ANEC and B for all kWh of energy supplied during an AP until those costs have been recovered; (ii) refunds due to prudence reviews ("P"), if any; and (iii) all under- or over-recovery balances created through operation of this FAC, as determined in the true-up filings ("T") provided for herein. Interest shall be calculated monthly at a rate equal to the weighted average interest paid on the Company's short-term debt, applied to the month-end balance of items (i) through (iii) in the preceding sentence.

P = Prudence disallowance amount, if any, as defined in this tariff.

TRUE-UPS

After completion of each RP, the Company shall make a true-up filing by the filing date of its next FAR filing. Any true-up adjustments shall be reflected in component “T” above. Interest on the true-up adjustment will be included in component “I” above.

The true-up amount shall be the difference between the revenues billed and the revenues authorized for collection during the RP as well as any corrections identified to be included in the current FAR filing. Any corrections included will be discussed in the testimony accompanying the true-up filing.

PRUDENCE REVIEWS

Prudence reviews of the costs subject to this Rider FAC shall occur no less frequently than every eighteen months, and any such costs which are determined by the Commission to have been imprudently incurred or incurred in violation of the terms of this Rider FAC shall be returned to customers. Adjustments by Commission order, if any, pursuant to any prudence review shall be included in the FAR calculation in component “P” above unless a separate refund is ordered by the Commission. Interest on the prudence adjustment will be included in component “I” above.

FUEL ADJUSTMENT CLAUSE – Rider FAC
FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
(Applicable to Service Provided January 9, 2023 through the Day Prior to the Effective Date of This Tariff
~~Sheet and Thereafter~~)

DEFINITIONS

ACCUMULATION PERIODS, FILING DATES AND RECOVERY PERIODS - An accumulation period is the six calendar months during which the actual costs and revenues subject to this rider will be accumulated for the purposes of determining the Fuel Adjustment Rate ("FAR"). The two six-month accumulation periods each year through four years from the effective date of this tariff sheet, the two corresponding twelve-month recovery periods and the filing dates are as shown below. Each filing shall include detailed work papers in electronic format with formulas intact to support the filing.

Accumulation Periods

January – June
July – December

Filing Dates

By August 1
By February 1

Recovery Periods

October – September
April – March

A recovery period consists of the months during which the FAR is applied to retail customer billings on a per kilowatt-hour (kWh) basis.

COSTS AND REVENUES - Costs eligible for the Fuel and Purchased Power Adjustment ("FPA") will be the Company's allocated jurisdictional costs for the fuel component of the Company's generating units, reservation charges, purchased power energy charges including applicable Southwest Power Pool ("SPP") charges, emission allowance costs and amortizations, cost of transmission of electricity by others associated with purchased power and off-system sales – all as incurred during the accumulation period. These costs will be offset by jurisdictional off-system sales revenues, applicable SPP revenues, and revenue from the sale of Renewable Energy Certificates or Credits ("REC"). Eligible costs do not include the purchased power demand costs associated with purchased power contracts in excess of one year. Likewise, revenues do not include demand or capacity receipts associated with power contracts in excess of one year.

APPLICABILITY

The price per kWh of electricity sold to retail customers will be adjusted (up or down) in April and October subject to application of the Rider FAC and approval by the Missouri Public Service Commission ("MPSC" or "Commission").

The FAR is the result of dividing the FPA by forecasted Missouri retail net system input ("SRP") for the recovery period, expanded for Voltage Adjustment Factors ("VAF"), rounded to the nearest \$0.00001, and aggregating over two accumulation periods. The amount charged on a separate line on retail customers' bills is equal to the current annual FAR multiplied by kWh billed.

FORMULAS AND DEFINITIONS OF COMPONENTS

FPA = $95\% * ((ANEC - B) * J) + T + I + P$

ANEC = Actual Net Energy Costs = $(FC + E + PP + TC - OSSR - R)$

FC = Fuel costs, excluding decommissioning and retirement costs, incurred to support sales and revenues associated with the Company's in-service generating plants:
The following costs reflected in Federal Energy Regulatory Commission ("FERC") Account Number 501:

Subaccount 501000: coal commodity and transportation, side release and freeze conditioning agents, dust mitigation agents, applicable taxes, accessorial charges as delineated in railroad accessorial tariffs [additional crew, closing hopper railcar doors, completion of loading of a unit train and its release for movement, completion of unloading of a unit train and its release for movement, delay for removal of frozen coal, destination detention, diversion of empty unit train (including administration fee, holding charges, and out-of-route charges which may include fuel surcharge), diversion of loaded coal trains, diversion of loaded unit train fees (including administration fee, additional mileage fee or out-of-route charges which may include fuel surcharge), fuel surcharge, held in transit, hold charge, locomotive release, miscellaneous handling of coal cars, origin detention, origin re-designation, out-of-route charges (including fuel surcharge), out-of-route movement, pick-up of locomotive power, placement and pick-up of loaded or empty private coal cars on railroad supplied tracks, placement and pick-up of loaded or empty private coal cars on shipper supplied tracks, railcar storage, release of locomotive power, removal, rotation and/or addition of cars, storage charges, switching, trainset positioning, trainset storage, and weighing], unit train maintenance, leases, taxes and depreciation, natural gas costs including reservation charges, fuel quality adjustments, fuel adjustments included in commodity and transportation costs, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), oil costs for commodity, transportation, storage, taxes, fees, and fuel losses, coal and oil inventory adjustments, and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 501 Accounts.

Subaccount 501020: the allocation of the allowed costs in the 501000, 501300, 501400 and 501420 accounts attributed to native load;

Subaccount 501030: the allocation of the allowed costs in the 501000, 501300, 501400 and 501420 accounts attributed to off system sales;

Subaccount 501300: fuel additives and consumable costs for Air Quality Control Systems ("AQCS") operations, such as ammonia, hydrated lime, lime, limestone, limestone inventory adjustments, powder activated carbon, calcium bromide, sulfur, and RESPond, or other consumables which perform similar functions;

Subaccount 501400 and 501420: residuals costs and revenues associated with combustion byproducts, slag and ash disposal costs and revenues including contractors, materials and other miscellaneous expenses.

The following costs reflected in FERC Account Number 518:

Subaccount 518000: nuclear fuel commodity and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 518 Accounts

Subaccount 518201: nuclear fuel waste disposal expense;

Subaccount 518100: nuclear fuel oil.

FUEL ADJUSTMENT CLAUSE – Rider FAC
FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
(Applicable to Service Provided January 9, 2023 though the Day Prior to the Effective Date of This Tariff Sheet
and Thereafter)

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

The following costs reflected in FERC Account Number 547:

Subaccount 547000: natural gas and oil costs for commodity, transportation, storage, taxes, fees and fuel losses, and settlement proceeds, insurance recoveries, subrogation recoveries for increased fuel expenses, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers)

Subaccount 547020: the allocation of the allowed costs in the 547000 and 547300 accounts attributed to native load;

Subaccount 547027: natural gas reservation charges;

Subaccount 547030: the allocation of the allowed costs in the 547000 and 547300 accounts attributed to off system sales;

Subaccount 547300: fuel additives and consumable costs for Air Quality Control Systems ("AQCS") operations, such as ammonia or other consumables which perform similar functions.

E = Net Emission Costs:

The following costs and revenues reflected in FERC Account Number 509:

Subaccount 509000: NO_x and SO₂ emission allowance costs, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers) offset by revenue amortizations and revenues from the sale of NO_x and SO₂ emission allowances.

PP = Purchased Power Costs:

The following costs or revenues reflected in FERC Account Number 555:

Subaccount 555000: purchased power costs, energy charges from capacity purchases of any duration, insurance recoveries, and subrogation recoveries for purchased power expenses, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), charges and credits related to the SPP Integrated Marketplace ("IM") or other IMs, including energy, revenue neutrality, make whole and out of merit payments and distributions, over collected losses payments and distributions, Transmission Congestion Rights ("TCR") and Auction Revenue Rights ("ARR") settlements, virtual energy costs, revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, load/export charges, ancillary services including non-performance and distribution payments and charges and other miscellaneous SPP Integrated Market charges including uplift charges or credits, excluding (1) the amounts associated with purchased power agreements ("PPA") associated with the Renewable Energy Rider tariff, (2) costs associated with the CNPPID Hydro PPA, and (3) net costs associated with wind PPA entered into after May 2019 whose costs exceed their revenues resulting in a net loss;

FORMULAS AND DEFINITIONS OF COMPONENTS (continued)

OSSR = Revenues from Off-System Sales:
The following revenues or costs reflected in FERC Account Number 447:
Subaccount 447020: all revenues from off-system sales. This includes charges and credits related to the SPP IM, or other IMs, including, energy, ancillary services, revenue sufficiency (such as make whole payments and out of merit payments and distributions), revenue neutrality payments and distributions, over collected losses payments and distributions, TCR and ARR settlements, demand reductions, virtual energy costs and revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, generation/export charges, ancillary services including non-performance and distribution payments and SPP uplift revenues or credits, but excluding (1) off-system sales revenues from full and partial requirements sales to municipalities that are served through bilateral contracts in excess of one year, (2) the amounts associated with PPA associated with the Renewable Energy Rider tariff, (3) SPP revenues associated with the CNPPID Hydro PPA and (4) net costs associated with wind PPA entered into after May 2019 whose costs exceed their revenues resulting in a net loss.

Notwithstanding anything to the contrary contained in the tariff sheets for Rider FAC, factors PP and OSSR shall not include costs and revenues for any undersubscribed portion of a permanent Solar Subscription Rider resource allocated to shareholders under the approved stipulation in File No. ER-2022-0129.

Subaccount 447012: capacity charges for capacity sales one year or less in duration;

Subaccount 447030: the allocation of the includable sales in account 447020 not attributed to retail sales.

R = Renewable Energy Credit Revenue:
Revenues reflected in FERC account 509000 and gains or losses to be recorded in FERC accounts 411800 and 411900 from the sale of Renewable Energy Credits (RECs) that are not needed to meet the Missouri Renewable Energy Standards less the cost associated with making the sale.

Any cost identified above which is a Missouri-only cost shall be grossed up by the current kWh energy factor, included in the ANEC calculation and allocated as indicated in component J below. Any cost identified above which is a Kansas-only cost shall be excluded from the ANEC calculation.

FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
(Applicable to Service Provided January 9, 2023 through the Day Prior to the Effective Date of This Tariff
~~Sheet and Thereafter~~)

Should FERC require any item covered by components FC, E, PP, TC, OSSR or R to be recorded in an account different than the FERC accounts listed in such components, such items shall nevertheless be included in component FC, E, PP, TC, OSSR or R. In the month that the Company begins to record items in a different account, the Company will file with the Commission the previous account number, the new account number and what costs or revenues that flow through the Rider FAC to be recorded in the account.

B = Net base energy costs ordered by the Commission in the last general rate case consistent with the costs and revenues included in the calculation of the FPA. Net Base Energy costs will be calculated as shown below:

$S_{AP} \times \text{Base Factor ("BF")}$

S_{AP} = Net system input ("NSI") in kWh for the accumulation period

BF = Company base factor costs per kWh: \$0.01829

J = Missouri Retail Energy Ratio = (MO Retail kWh sales + MO Losses) / (MO Retail kWh Sales + MO Losses + KS Retail kWh Sales + KS Losses + Sales for Resale, Municipals kWh Sales [includes border customers] + Sales for Resale, Municipals Losses)
MO Losses = 6.09%; KS Losses = 6.51%; Sales for Resale, Municipals Losses = 6.84%

T = True-up amount as defined below.

I = Interest applicable to (i) the difference between Missouri Retail ANEC and B for all kWh of energy supplied during an AP until those costs have been recovered; (ii) refunds due to prudence reviews ("P"), if any; and (iii) all under- or over-recovery balances created through operation of this FAC, as determined in the true-up filings ("T") provided for herein. Interest shall be calculated monthly at a rate equal to the weighted average interest paid on the Company's short-term debt, applied to the month-end balance of items (i) through (iii) in the preceding sentence.

P = Prudence disallowance amount, if any, as defined in this tariff.

FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
(Applicable to Service Provided January 9, 2023 through the Day Prior to the Effective Date of This Tariff
Sheet ~~and Thereafter~~)

FAR = FPA/S_{RP}

Single Accumulation Period Transmission Voltage FAR _{Trans}	= FAR * VAF _{Trans}
Single Accumulation Period Substation Voltage FAR _{Sub}	= FAR * VAF _{Sub}
Single Accumulation Period Primary Voltage FAR _{Prim}	= FAR * VAF _{Prim}
Single Accumulation Period Secondary Voltage FAR _{Sec}	= FAR * VAF _{Sec}

Annual Primary Voltage FAR_{Trans} = Aggregation of the two Single Accumulation Period Transmission Voltage FARs still to be recovered
Annual Primary Voltage FAR_{Sub} = Aggregation of the two Single Accumulation Period Substation Voltage FARs still to be recovered
Annual Primary Voltage FAR_{Prim} = Aggregation of the two Single Accumulation Period Primary Voltage FARs still to be recovered
Annual Secondary Voltage FAR_{Sec} = Aggregation of the two Single Accumulation Period Secondary Voltage FARs still to be recovered

Where:

FPA = Fuel and Purchased Power Adjustment

S_{RP} = Forecasted recovery period Missouri retail NSI in kWh, at the generation level

VAF = Expansion factor by voltage level

VAF_{Trans} = Expansion factor for transmission voltage level customers

VAF_{Sub} = Expansion factor for substation to transmission voltage level customers

VAF_{Prim} = Expansion factor for between primary and substation voltage level customers

VAF_{Sec} = Expansion factor for lower than primary voltage customers

TRUE-UPS

After completion of each RP, the Company shall make a true-up filing by the filing date of its next FAR filing. Any true-up adjustments shall be reflected in component “T” above. Interest on the true-up adjustment will be included in component “I” above.

The true-up amount shall be the difference between the revenues billed and the revenues authorized for collection during the RP as well as any corrections identified to be included in the current FAR filing. Any corrections included will be discussed in the testimony accompanying the true-up filing.

For Missouri Retail Service Area

FUEL ADJUSTMENT CLAUSE – Rider FAC
FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
(Applicable to Service Provided the Effective Date of This Tariff Sheet and Thereafter)

DEFINITIONS

ACCUMULATION PERIODS, FILING DATES AND RECOVERY PERIODS - An accumulation period is the six calendar months during which the actual costs and revenues subject to this rider will be accumulated for the purposes of determining the Fuel Adjustment Rate ("FAR"). The two six-month accumulation periods each year through four years from the effective date of this tariff sheet, the two corresponding twelve-month recovery periods and the filing dates are as shown below. Each filing shall include detailed work papers in electronic format with formulas intact to support the filing.

Accumulation Periods

January – June
July – December

Filing Dates

By August 1
By February 1

Recovery Periods

October – September
April – March

A recovery period consists of the months during which the FAR is applied to retail customer billings on a per kilowatt-hour (kWh) basis.

COSTS AND REVENUES - Costs eligible for the Fuel and Purchased Power Adjustment ("FPA") will be the Company's allocated jurisdictional costs for the fuel component of the Company's generating units, reservation charges, purchased power energy charges including applicable Southwest Power Pool ("SPP") charges, emission allowance costs and amortizations, cost of transmission of electricity by others associated with purchased power and off-system sales, and the cost described below associated with the company's natural gas fuel supply plan – all as incurred during the accumulation period. These costs will be offset by jurisdictional off-system sales revenues, applicable SPP revenues, and revenue from the sale of Renewable Energy Certificates or Credits ("REC"). ~~Eligible costs do not include the purchased power demand costs associated with purchased power contracts in excess of one year. Likewise, revenues do not include demand or capacity receipts associated with power contracts in excess of one year.~~

APPLICABILITY

The price per kWh of electricity sold to retail customers will be adjusted (up or down) in April and October subject to application of the Rider FAC and approval by the Missouri Public Service Commission ("MPSC" or "Commission").

The FAR is the result of dividing the FPA by forecasted Missouri retail net system input ("SRP") for the recovery period, expanded for Voltage Adjustment Factors ("VAF"), rounded to the nearest \$0.00001, and aggregating over two accumulation periods. The amount charged on a separate line on retail customers' bills is equal to the current annual FAR multiplied by kWh billed.

FORMULAS AND DEFINITIONS OF COMPONENTS

FPA = $95\% * ((ANEC - B) * J) + T + I + P$

ANEC = Actual Net Energy Costs = $(FC + E + PP + TC - OSSR - R - RR)$

FC = Fuel costs, excluding decommissioning and retirement costs, incurred to support sales and revenues associated with the Company's in-service generating plants:
The following costs reflected in Federal Energy Regulatory Commission ("FERC") Account Number 501:
Subaccount 501000: coal commodity and transportation, side release and freeze conditioning agents, dust mitigation agents, applicable taxes, accessorial charges as delineated in railroad accessorial tariffs [additional crew, closing hopper railcar doors, completion of loading of a unit train and its release for movement, completion of unloading of a unit train and its release for movement, delay for removal of frozen coal, destination detention, diversion of empty unit train (including administration fee, holding charges, and out-of-route charges which may include fuel surcharge), diversion of loaded coal trains, diversion of loaded unit train fees (including administration fee, additional mileage fee or out-of-route charges which may include fuel surcharge), fuel surcharge, held in transit, hold charge, locomotive release, miscellaneous handling of coal cars, origin detention, origin re-designation, out-of-route charges (including fuel surcharge), out-of-route movement, pick-up of locomotive power, placement and pick-up of loaded or empty private coal cars on railroad supplied tracks, placement and pick-up of loaded or empty private coal cars on shipper supplied tracks, railcar storage, release of locomotive power, removal, rotation and/or addition of cars, storage charges, switching, trainset positioning, trainset storage, and weighing], unit train maintenance, leases, taxes and depreciation, natural gas costs including reservation charges, storage, transportation, fuel quality adjustments, natural gas fuel supply plan costs, fuel adjustments included in commodity and transportation costs, broker commissions and fees (fees charged by an agent, or agent's company to facilitate transactions between buyers and sellers), and margins (cash or collateral used to secure or maintain the Company's fixed natural gas fuel cost position with a brokerage or exchange), oil costs for commodity, transportation, storage, taxes, fees, and fuel losses, coal and oil inventory adjustments, and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 501 Accounts.
Subaccount 501020: the allocation of the allowed costs in the 501000, 501300, and 501400 and ~~501420~~ accounts attributed to native load;
Subaccount 501030: the allocation of the allowed costs in the 501000, 501300, and 501400 and ~~501420~~ accounts attributed to off system sales;
Subaccount 501300: fuel additives and consumable costs for Air Quality Control Systems ("AQCS") operations, such as ammonia, hydrated lime, lime, limestone, limestone inventory adjustments, powder activated carbon, calcium bromide, sulfur, and RESPond, or other consumables which perform similar functions;
Subaccount 501310: Glycol additive
~~Subaccount 501400 and 501420:~~ residuals costs and revenues associated with combustion byproducts, slag and ash disposal costs and revenues including contractors, materials and other miscellaneous expenses.
The following costs reflected in FERC Account Number 518:
Subaccount 518000: nuclear fuel commodity and insurance recoveries, subrogation recoveries and settlement proceeds for increased fuel expenses in the 518 Accounts
Subaccount 518201: nuclear fuel waste disposal expense;
Subaccount 518100: nuclear fuel oil.

 Subaccount 447020: all revenues from off-system sales. This includes charges and credits related to the SPP IM, or other IMs, including, energy, ancillary services, revenue sufficiency (such as make whole payments and out of merit payments and distributions), revenue neutrality payments and distributions, over collected losses payments and distributions, TCR and ARR settlements, demand reductions, virtual energy costs and revenues and related fees where the virtual energy transaction is a hedge in support of physical operations related to a generating resource or load, generation/export charges, ancillary services including non-performance and distribution payments and SPP uplift revenues or credits, but excluding (1) off-system sales revenues from full and partial requirements sales to municipalities that are served through bilateral contracts in excess of one year, (2) the amounts associated with PPA associated with the Renewable Energy Rider tariff, (3) SPP revenues associated with the CNPPID Hydro PPA and (4) net costs associated with wind PPA entered into after May 2019 whose costs exceed their revenues resulting in a net loss.

Notwithstanding anything to the contrary contained in the tariff sheets for Rider FAC, factors PP and OSSR shall not include costs and revenues for any undersubscribed portion of a permanent Solar Subscription Rider resource allocated to shareholders under the approved stipulation in File No. ER-2022-0129.

Subaccount 447012: capacity charges for capacity sales one year or less in duration;
Subaccount 447016: capacity charges for capacity sales greater than one year in duration;
 Subaccount 447030: the allocation of the includable sales in account 447020 not attributed to retail sales.

R = Emissions and Environmental Credits (this will only include Renewable Energy Credits) Gains or losses:

Subaccounts 411.8 and 411.9: gains and losses of the sale of emission allowances in the current FAC accumulation period.

Subaccounts 411.11 and 411.12: for gains and losses on the sale of environmental credits (this will only include Renewable Energy Credits) in the current FAC accumulation period.

Renewable Energy Credit Revenue:

~~Revenues reflected in FERC account 509000 and gains or losses to be recorded in FERC accounts 411800 and 411900 from the sale of Renewable Energy Credits (RECs) that are not needed to meet the Missouri Renewable Energy Standards less the cost associated with making the sale.~~

RR = The following retail revenues reflected in FERC Account Numbers 440 – 444:
Accounts 440-444 Retail revenue billed for resource XXXX, Alternative Energy Credit Rider (Schedule AEC), resource XXXX, Renewable Energy Program Rider (Schedule RENEW), resource XXXX, Green Solution Connections Rider (Schedule GSR). These revenues will be net of any costs.

Any cost identified above which is a Missouri-only cost shall be grossed up by the current kWh energy factor, included in the ANEC calculation and allocated as indicated in component J below. Any cost identified above which is a Kansas-only cost shall be excluded from the ANEC calculation.

Fuel Supply Plan costs are defined as realized losses and costs (including broker commissions, fees, and margins) minus realized gains associated with mitigating volatility in the Company's cost of natural gas limited to the Company's use of derivatives in the form of forward contracts.

Should FERC require any item covered by components FC, E, PP, TC, OSSR or R to be recorded in an account different than the FERC accounts listed in such components, such items shall nevertheless be included in component FC, E, PP, TC, OSSR or R. In the month that the Company begins to record items in a different account, the Company will file with the Commission the previous account number, the new account number and what costs or revenues that flow through the Rider FAC to be recorded in the account.

B = Net base energy costs ordered by the Commission in the last general rate case consistent with the costs and revenues included in the calculation of the FPA. Net Base Energy costs will be calculated as shown below:

$SAP \times \text{Base Factor ("BF")}$

SAP = Net system input ("NSI") in kWh for the accumulation period

BF = Company base factor costs per kWh: \$0.01 ~~741~~829

FUEL ADJUSTMENT CLAUSE – Rider FAC
FUEL AND PURCHASE POWER ADJUSTMENT ELECTRIC
 (Applicable to Service Provided the Effective Date of This Tariff Sheet and Thereafter)

J = Missouri Retail Energy Ratio = (MO Retail kWh sales + MO Losses) / (MO Retail kWh Sales + MO Losses + KS Retail kWh Sales + KS Losses + Sales for Resale, Municipals kWh Sales [includes border customers] + Sales for Resale, Municipals Losses)

MO Losses = ~~6.09~~2.66%; KS Losses = ~~6.54~~2.63%; Sales for Resale, Municipals Losses = 6.842.08%

T = True-up amount as defined below.

I = Interest applicable to (i) the difference between Missouri Retail ANEC and B for all kWh of energy supplied during an AP until those costs have been recovered; (ii) refunds due to prudence reviews ("P"), if any; and (iii) all under- or over-recovery balances created through operation of this FAC, as determined in the true-up filings ("T") provided for herein. Interest shall be calculated monthly at a rate equal to the weighted average interest paid on the Company's short-term debt, applied to the month-end balance of items (i) through (iii) in the preceding sentence.

P = Prudence disallowance amount, if any, as defined in this tariff.

FAR = FPA/S_{RP}

Single Accumulation Period Transmission Voltage FAR _{Trans}	= FAR * VAF _{Trans}
Single Accumulation Period Substation Voltage FAR _{Sub}	= FAR * VAF _{Sub}
Single Accumulation Period Primary Voltage FAR _{Prim}	= FAR * VAF _{Prim}
Single Accumulation Period Secondary Voltage FAR _{Sec}	= FAR * VAF _{Sec}

Annual Primary Voltage FAR_{Trans} = Aggregation of the two Single Accumulation Period Transmission Voltage FARs still to be recovered

Annual Primary Voltage FAR_{Sub} = Aggregation of the two Single Accumulation Period Substation Voltage FARs still to be recovered

Annual Primary Voltage FAR_{Prim} = Aggregation of the two Single Accumulation Period Primary Voltage FARs still to be recovered

Annual Secondary Voltage FAR_{Sec} = Aggregation of the two Single Accumulation Period Secondary Voltage FARs still to be recovered

Where:

FPA = Fuel and Purchased Power Adjustment

S_{RP} = Forecasted recovery period Missouri retail NSI in kWh, at the generation level

VAF = Expansion factor by voltage level

VAF_{Trans} = Expansion factor for transmission voltage level customers

VAF_{Sub} = Expansion factor for substation to transmission voltage level customers

VAF_{Prim} = Expansion factor for between primary and substation voltage level customers

VAF_{Sec} = Expansion factor for lower than primary voltage customers

TRUE-UPS

After completion of each RP, the Company shall make a true-up filing by the filing date of its next FAR filing. Any true-up adjustments shall be reflected in component “T” above. Interest on the true-up adjustment will be included in component “I” above.

The true-up amount shall be the difference between the revenues billed and the revenues authorized for collection during the RP as well as any corrections identified to be included in the current FAR filing. Any corrections included will be discussed in the testimony accompanying the true-up filing.

PRUDENCE REVIEWS

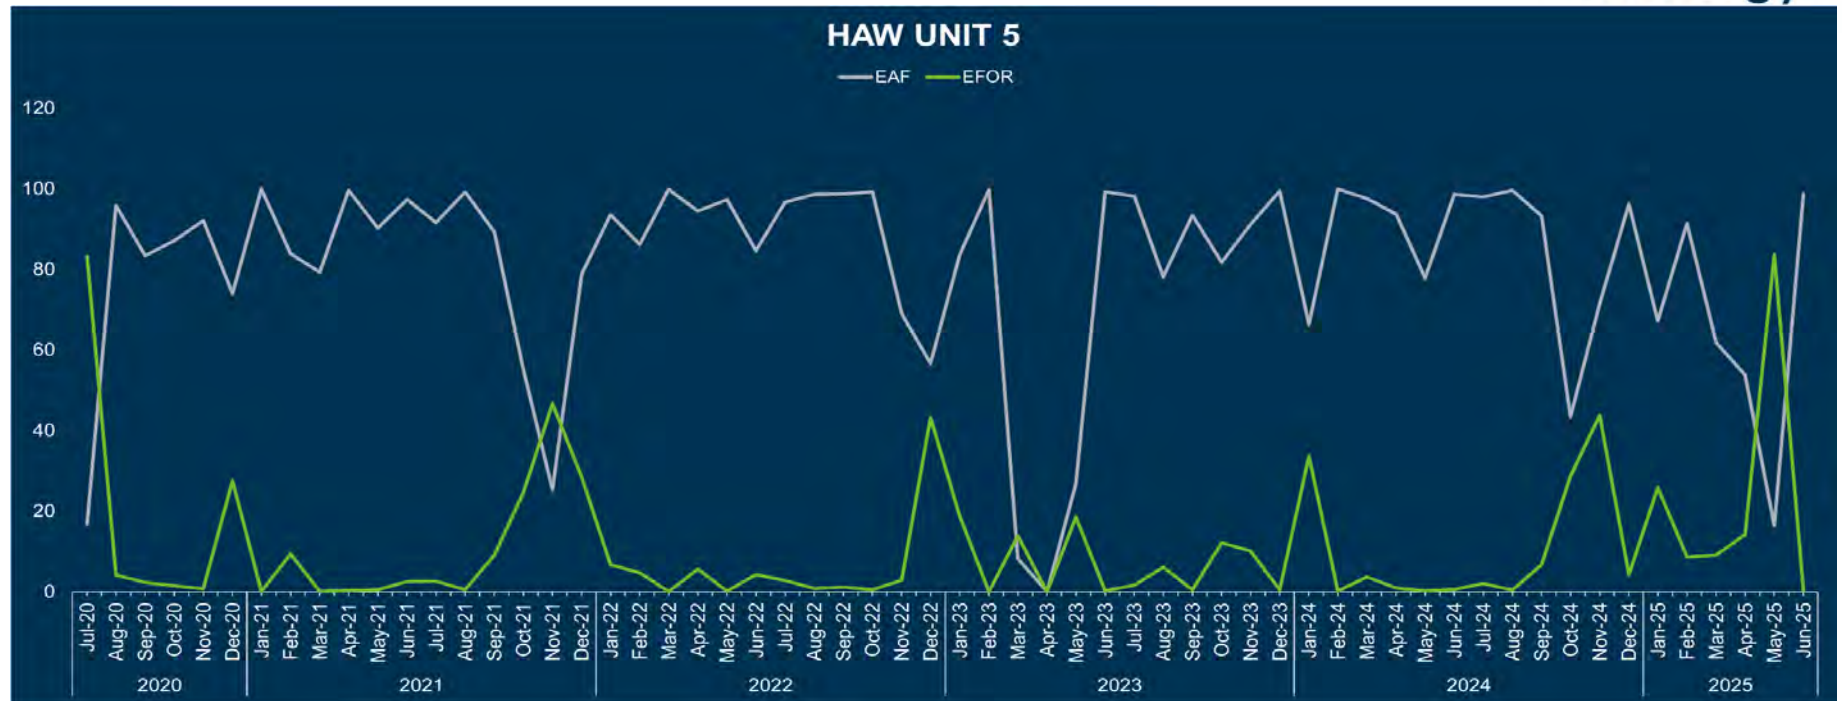

Prudence reviews of the costs subject to this Rider FAC shall occur no less frequently than every eighteen months, and any such costs which are determined by the Commission to have been imprudently incurred or incurred in violation of the terms of this Rider FAC shall be returned to customers. Adjustments by Commission order, if any, pursuant to any prudence review shall be included in the FAR calculation in component “P” above unless a separate refund is ordered by the Commission. Interest on the prudence adjustment will be included in component “I” above.
