

**BEFORE THE PUBLIC SERVICE COMMISSION OF THE  
STATE OF MISSOURI**

In the Matter of Union Electric Company d/b/a	)	
Ameren Missouri's Annual Vegetation	)	
Management Report Pursuant to	)	File No. EO-2015-
4 CSR 240-23.030(6)(C).	)	

**ANNUAL REPORT FILING**

COMES NOW Union Electric Company d/b/a Ameren Missouri (Ameren Missouri or the Company) and, in compliance with the above-referenced Commission rule, hereby files its annual report relating to vegetation management for 2014.

1. Summary of the Documentation Required by 4 CSR 240-23.030(6)(B):

a. *Identification of each circuit and substation where vegetation management work was performed:* See attached files *2014 Distribution Circuits* and *2015 Distribution Circuits* to show which circuits were trimmed in 2014 and which circuits are scheduled to be trimmed in 2015. See attached file *AmerenAnnualTXWorkplan2014.CompletedWork* for 138kV and above for work performed in 2014. See attached file *AmerenAnnualTXWorkplan2015.ScheduledWork* for 138kV and above for work scheduled to be performed in 2015.

b. *The type of vegetation management performed including removal, trimming and spraying and methods used:* See the general guidelines for removal, trimming and spraying and the methods that are used as described in the *AmerenUE Vegetation Management Program and Practices* document filed on July 1, 2008 in Case No. EO-2009-0012.

c. *The crew size and supervisor's name:* Tree trimming crew sizes can vary from one to six or more crew members depending on the work. Each contractor supervisor is typically responsible for six to twelve crews. See attached file *Example Crew Numbers(6)(B)3HC* for an example of one contractor only, for one month on distribution. The entire file(s), along with hard copies of corresponding timesheets, as discussed with staff, can be updated and supplied upon request.

d. *The date of activity: See attached files 2014 Distribution Circuits and AmerenAnnualTXWorkplan2014.Completed Work.*

e. *Any safety hazards encountered:* Due to the nature of vegetation management work on any given day, multiple safety hazards exist for each person engaged in the work. As part of Performance Management, Ameren Missouri required each vendor in the area of safety to

(i) report occurrences that result in an OSHA Recordable;

(ii) develop annual safety action plans; and

(iii) have individual goals each year for OSHA Recordable.

f. *Any unexpected occurrence or accident resulting in death, life threatening or serious injury to a person assigned to perform vegetation management activities or the public:* In 2014 there were no unexpected occurrences or accident resulting in death, life-threatening or serious injury to the public that Ameren Missouri is aware of, as a result of any vegetation management work.

2. Other information required by 4 CSR 240-23.030(6)(C):

a. *Expenditures for vegetation management in the preceding year: See attached file Vegetation Management(Historical Spend)includes Labor and Major.*

b. *Vegetation management budget for the current year:* The 2015 budget for vegetation management on the transmission and distribution system is \$57.1 M.

c. *Circuits, completion dates and miles trimmed in the preceding year: See attached file 2014 Distribution Circuits.* The tab marked “Distribution Feeder Data” has all feeders that were completed in 2014 marked with completion dates in red. The tab marked “Distribution” shows that for 2014 a total of 3,935 distribution miles were completed. *See also attached file AmerenAnnualTXWorkplan2014.CompletedWork* which shows a total of 983 circuit miles for all activities, as shown, were completed on lines rated at 138kV and greater.

d. *Circuits, completion dates and miles scheduled for the current year: See attached file 2015 Distribution Circuits.* The tab marked “Distribution Feeder Data” has all feeders that are scheduled to be trimmed in 2015 in black. The tab marked “Distribution” shows that for 2015 a total of 3,933 distribution miles are scheduled. *See also attached filed AmerenAnnualTXWorkplan2015.Scheduled Work* which shows a total of 1,082 circuit miles, for all activities are scheduled for lines rated at 138kV or greater.

e. *Total distribution miles for the system and corresponding classification between rural and urban: See attached file 2014 Distribution Circuits.* The tab marked “Distribution” shows that the Ameren Missouri system has a total of 21,357 overhead miles, of which 8,170 miles are classified as urban and 13,187 miles are classified as rural. Note every three to four years, Ameren Missouri takes the most current information on data files for all distribution circuits in order to determine current distribution classifications (urban/rural). The 2015 Distribution Circuit file is the most current file and compared to the 2014 Distribution Circuit file (originally established in 2012) the overall overhead distribution miles for Ameren Missouri remained relatively the same with minor shifting on feeder classification from rural to urban.

WHEREFORE Ameren Missouri submits the attached documents as required by 4 CSR 240-23.030.

Respectfully submitted,

UNION ELECTRIC COMPANY, d/b/a  
Ameren Missouri
