AVAILABILITY

Customers without AMI metering, either due to opt out or technological barriers preventing installation will be served under this rate schedule. As of April 1, 2026, this rate shall be available as an opt-in option to customers otherwise served under the Company’s Residential Peak Adjustment Service (Schedule RPKA).

Service under this schedule is available to single phase electric service for residential customers that have dwelling unit(s) each having kitchen facilities, sleeping facilities, living facilities and permanent provisions for sanitation. This rate schedule shall also be applicable to ordinary domestic and farm use, including but not limited to well pumps, barns, machine sheds, detached garages, home workshops and other structures used for permanent human occupancy subject to Company approval. However, this schedule is not applicable for crop irrigation, commercial dairies, hatcheries, feed lots, feed mills, dormitories or other structures designed to provide multiple sleeping quarters for unrelated individuals, or any other commercial enterprise. Customers currently served with separately metered space heat may be served under the single meter heat rate (Rate B).

Three-phase electric service is available for residential use solely at the Company’s discretion. Customers approved for three-phase shall bear all incremental costs related to provision of three-phase service.

A "residential" or "domestic" customer under this residential rate classification is a customer who purchases electricity for "domestic use." "Domestic use" under this rate classification includes that portion of electricity that is ultimately consumed at a single-family or individually metered multi-family dwelling, and shall apply to all such purchases regardless of whether the customer is the ultimate consumer.

Where a portion of a residence unit is used for non-residential purposes, the appropriate general service schedule is applicable to all service. However, if the wiring is arranged so that the service for residential purposes and for non-residential purposes can be metered separately, this schedule will be applied to the residential service.

Temporary or seasonal service will not be supplied under this schedule.

5.05 Non-Standard Metering Service

- A. Non-Standard Metering Service is available for any individual Residential Customer whose premise(s) is metered with a Company standard digital meter (Standard Meter) and requests to have metering service utilizing a Company Standard Meter without radio frequency (Non-Standard Meter). Premises equipped with a three-phase energy meter or Current Transformer (CT) metering configuration are not eligible for replacement with a Non-Standard Meter. Refer to Meter Installations Rule 5.01.

- B. In order to begin receiving Non-Standard Metering service under this Rule 5.05, the Customer must complete the following requirements:
 - (1) The Customer must sign and return to the Company the Residential Non-Standard Metering Service Acknowledgment Form (Acknowledgement Form) accepting all fees, requirements, and limitations of this Rule 5.05. The Acknowledgement Form can be obtained by the Customer from the Company website at <http://www.evergy.com>, or by contacting the Company Customer Care Center and requesting a hard copy be mailed to their premise(s).

 - (2) The Customer must pay the required, and non-refundable, Non-Standard Meter Initial Setup Charge of \$125.00 per Non-Standard Meter.

 - (3) The Customer must pay the monthly recurring Non-Standard Meter Charge of \$15.00 per Non-Standard Meter in addition to their applicable residential rates for electric service.

- C. Once the Company has received the signed Acknowledgement Form from the Customer and payment of the Non-Standard Meter Initial Setup Charge has been processed by the Company, the Company will, within 20 business days, furnish, and install, a Non-Standard Meter to be used for billing purposes and service under this Rule 5.05. The Non-Standard Meter Charge will then be added to the customer's monthly bill.

- D. All Company rules shall apply under this Rule 5.05.

- E. Any customer who has requested service under this Rule 5.05 may, at any time, terminate this Non-Standard Metering Service and request that the Company install a Standard Meter on their premise(s); at which point the monthly Non-Standard Meter Charge will no longer be applicable. There is no subsequent charge for a Customer to request a Standard Meter be installed on their premise(s) that previously opted for service under this Rule 5.05.

5.05 Non-Standard Metering Service (continued)

F. Residential Customers choosing to receive Non-Standard Metering and meeting the requirements detailed in Rule 5.05 B may request to self-read their meter. The Company will provide simple written instructions to these Customers explaining how to read and report energy usage by email, through the Company web page, or by phone to Customer Service. All Customer provided readings must comply with the requirements of 20 CSR 4240-13.020.

- (1) The Residential Customer shall accurately read and timely report the energy usage monthly. If the Customer fails to provide the meter-reading on time, the Company shall estimate the Customer's energy usage for that month.
- (2) At least twice a year, at the beginning and end of the summer billing months, the Company shall obtain an actual meter reading of the Customer's energy usage in order to verify the accuracy of readings reported in this manner.
- (3) If the Customer does not read and report their meter for two (2) consecutive months or any three (3) months in a rolling twelve-month period, the Company may resume monthly readings of the meter.
- (4) The Company may assess 5% interest on unpaid amounts resulting from failure to report usage or inaccurate reporting.
