GENERAL (Continued)

JUN 20 1984

No distinction is made between a "New Installation or Connection" and an "Outside Move". All changes in location of customer's equipment and service from one premises to another, except as otherwise provided in this section, are treated as new service connections with Service Charges applying. A premise is defined as: The buildings, portion of a building, on continuous property used and/or occupied at one time by the customer in the conduct of his business or as a residence. Where floor space in adjoining building is made continuous at one or more floor levels, all floor space in both buildings is considered as the same premises insofar as the customer who used and occupies such continuous floor space is concerned, the two buildings otherwise being considered as separate buildings.

Service Charges are in addition to other rates and charges normally applying under the Tariffs. They apply in addition to construction charges made because of unusual costs in establishing service and are not in lieu of mileage charges.

MOVE AND CHANGE CHARGES

A move is a transfer of telephone service or equipment from one location to another location on the same premises where there is no interruption of service other than is incident to the work involved.

A change is a substitution of a different type, style or color of a telephone instrument which does not involve a change in location of the instrument.
