customer premise equipment. The monthly charge for Calling Name Delivery includes 250 name deliveries (external database queries). Additional queries are billed at the rate set forth in Section D.

6. Customer Originated Trace

This feature allows an end-user to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening, or harassing calls. After hanging up on a nuisance call, a user can invoke Customer Originated Trace by going off-hook, receiving dial tone, and then dialing the Customer Originated Trace access code *57 on Touch Tone phone (1157 rotary dial).

If the incoming line history block contains valid information about the last calling party, the user receives a confirmation announcement including instructions on following up on the trace request. If a call is traced that has been traced before, the user still receives the confirmation announcement. The customer using the feature would be required to contact the local authorities or police for further action. The customer is not provided the traced number. The results of a successful trace will only be provided to legal authorities with proper authorization.

If the customer makes or receives another call before activating the trace, or if the Call Waiting feature is activated prior to activating the trace, the Customer Originated Trace Feature will not record the correct number.

Customer Originated Trace will trace only those calls which are originated from a location served by the CLASS network. A per activation charge applies to each successful activation of this feature.

7. Selective Distinctive Alert

This feature allows residential and business users to pre-select which calls receive distinctive alerting treatment based on the telephone number of the calling party (up to

Customer Originated Trace will trace only those calls which are originated from a location served by the CLASS network. A per activation charge applies to each successful activation of this feature.

6. Selective Distinctive Alert

This feature allows residential and business users to pre-select which calls receive distinctive alerting treatment based on the telephone number of the calling party (up to 10 calling directory numbers). Distinctive Ringing is limited to four Distinctive Ringing/Call Waiting tone patterns per line. To access this feature, a user picks up the telephone and dials the Selective Distinctive Alert access code *61 from a Touch Tone phone (1161 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or the local exchange carrier standard announcement indicating that the feature cannot be accessed.

To access this feature, a user picks up the telephone and dials the Selective Distinctive Alert access code *61 from a Touch Tone phone (1161 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or the local exchange carrier standard announcement indicating that the feature cannot be accessed.

8. Selective Call Acceptance

This feature allows customers to accept incoming voice calls only from certain calling parties (up to 10 calling directory numbers). To access this feature, a user picks up the phone and dials the Selective Call Acceptance access code *64 from a Touch Tone phone (1164 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or a telephone company standard announcement indicating that the feature cannot be accessed.

9. Selective Call Forwarding

This feature allows users to pre-select calls that will forward based on the telephone number of the calling party (up to 10 directory numbers). To access this feature, a user picks up the telephone and dials the Selective Call Forwarding access code *63 from a Touch Tone phone (1163 rotary dial) and follows the recorded instructions. If the user is not assigned the feature or cannot access the feature, the user receives reorder or a telephone company standard announcement indicating that the feature cannot be accessed.

If the Selective Call Forwarding feature is off, an announcement informs the user to press "3" to turn the feature on. If the user chooses to edit the screening list, the user can add, remove or review the entries currently on the list through interactive announcements.

CLASS SERVICE (Continued)

A. Class Service Description (Continued)

10. Selective Call Rejection

This feature screens terminating calls using user-specified screening list (up to 10 calling directory numbers). To access this feature, a user picks up the telephone and dials the Selective Call Rejection access code *60 from a Touch Tone phone (1160 rotary dial) and follows the recorded instruction. An incoming call from one of those 10 numbers is rerouted to a recorded message and your phone does not ring.

11. Unidentified Call Rejection

Unidentified Call Rejection automatically blocks any unidentified calls without ever ringing at the called party's telephone number. To activate this feature, a user picks up the telephone and dials the Unidentified Call Rejection access code *77 from a Touch Tone phone (1177 rotary dial). The calling party will receive a recorded announcement, the called party does not accept unidentified calls and suggests the calling party unblock delivery of the callers telephone and redial. The user can deactivate this feature by dialing the access code *87 from a Touch Tone phone (1187 rotary dial).

B. General Regulations

1. CLASS features can be provided on a stand alone basis or may be enhanced by use with Custom Calling Service features (Section 4, Sheets 6 - 7).
2. CLASS features are provided from specially equipped Telephone Company Central Offices and enable customers to access various features by dialing specific codes on either a rotary dial or Touch Tone calling basis.
3. The customer of record will be responsible for all rates and charges associated with the CLASS features as described in Rates and Charges. The customer of record will be charged for all features activated on his/her service and charged the applicable monthly subscription rate for each line on which a CLASS feature is provided.

CLASS SERVICE (Continued)

B. General Regulations (Continued)

Calling Number Delivery is the only feature currently available on PBX equipment. Selective Call Acceptance and Selective Call Forwarding, Selective Call Rejection, Unidentified Call Rejection and Selective Distinctive Alert are not available on EBS lines.

9. CLASS features will only be offered in exchanges which meet the necessary technical specifications. In addition, the Company reserves the right to offer specific CLASS features only when and where technologically feasible.

C. CLASS Features

+Per Call Privacy will block the delivery of the subscriber's number/name for one call only and may be activated by dialing an activation code *67 from a Touch Tone telephone (1167 rotary dial) immediately prior to placing a call. The activation code will initiate Per Call Privacy, which is available at no charge. If the calling party activates Per Call Privacy, the directory number/name will not be transmitted across the line. Instead, Calling Number/Name Delivery customers will receive an anonymous or private indicator. This anonymous or private indicator notifies the Calling Number/Name Deliver customer that the calling party has elected to block the delivery of the telephone number/name.

Per Line Privacy will automatically block delivery of the subscriber's telephone number/name on all calls. Per Line Privacy for the delivery of the calling number/name is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency registers with the Company a need for privacy:

- a. private, nonprofit, tax-exempt, domestic violence enforcement agencies
- b. federal, state and local law enforcement agencies

ISDN - Integrated Services Digital Network¹

**MISSOURI
Public Service Commission**

A. Overview

Today's communications network involves many special networks, physical transmission facilities, and controllers of various types, including computers. ISDN provides integrated access to circuit-switched and packet-switched networks in which all the various needs of the independent networks can be accommodated by a single transport network that handles both voice and data traffic.

Conforming to the International Telecommunication Union-Telecommunication Standardization Sector (ITU-TS) [formerly International Telegraph and Telephone Consultative Committee (CCITT)] recommendations, ISDN is an integrated digital network providing end-to-end connectivity, and supporting a wide range of services. These services include voice and non-voice (that is, data), accessed by users through a set of standard multipurpose user-network interfaces.

Two interfaces defined in the ITU-T (formerly CCITT) recommendations govern the connectivity between switching equipment and customer equipment:

- o Basic Rate Interface (BRI)
- o Primary Rate Interface (PRI).

Both interfaces allow voice and data services simultaneously. Also, both are designed to support both circuit-switched and packet-switched connections.

The idea behind ISDN's single transport network is to provide a single communication interface for the customer so that terminal equipment can be plugged into an outlet as easily as a plain old telephone service (POTS) telephone is plugged in.

Today a business can use many independent networks with little or no interconnection between any of them. For each of these separate networks, there are separate staffs for Operations, Administration, and Maintenance (OA&M). Integrating or combining all these communications systems into one network with ISDN provides the user with economical communications and a network with interconnection and improved service.

ISDN - Integrated Services Digital Network (continued)

**MISSOURI
Public Service Commission**

B. Definitions and Descriptions

ACO - Additional Call Offering, is a feature that notifies the ISDN user through D channel signaling procedures that there is a circuit-switched voice (CSV) or circuit-switched data (CSD) call waiting. The user can answer the incoming call by putting an existing call on hold or by disconnecting an existing call.

BRI - Basic Rate Interface, The ISDN BRI combines two 64Kbps B channels and one 16Kbps D channel (2B+D) over one Digital Subscriber Line (DSL).

B Channel - Bearer Channel, A 64Kbps channel used to convey user information (voice/data); the BRI has two B channels and the PRI has 23.

BPS - Bits per second, A measure of the speed with which data communications can move over a line. The prefixes K (for thousand) or M (for millions) are used to represent higher speeds.

CA - Call Appearance of an ISDN PDN.

CFV - Call Forwarding Variable, see tariff Section 4 Call Forwarding.

CNI - Calling Number Identification, see tariff Section 4 Calling Number Delivery.

CSD - Circuit Switched Data, Data being sent over the circuit switched network similar to most voice calls.

CSV - Circuit Switched Voice, voice calls being sent over the circuit switched network.

D Channel - Delta Channel, The packet-switched channel on a DSL at 16Kbps, or an PRI at 64Kbps that carries signaling messages and packet-switched user data.

DN - Directory Number, the 10 digit telephone number consisting of the area code plus seven digits.

DS1 - the common terminology for T-carrier that multiplexes 24 channels into a single 1.544 million bits per second bit stream.

ISDN - Integrated Services Digital Network (continued)

REC'D NOV 25 1998

B. Definitions and Descriptions (continued)

DSL - Digital Subscriber Line, see BRI or PRI description.

EKTS - Electronic Key Telephone System, this feature allows a user served by an National Integrated Services Digital Network (ISDN) terminal to have access to multiple directory numbers (DNs). In addition, a DN can be accessed by more than one user (that is, a Shared DN). Directory Numbers (DNs) may be shared on the same ISDN basic rate interface (BRI) and/or on different ISDN BRIs. Two or more users with access to the same DN can be simultaneously bridged onto the same call on that DN.

FCO - Flexible Call Offering, the flexible call offering feature informs the called party that a transferred call is waiting. The called party begins alerting while the attendant is connected. (The attendant hears the alerting.) The attendant can disconnect any time after camp-on is activated, and the switch connects the calling party to ringing, tone, announcements, or silence (determined by the customer at subscription).

CACH - Call Appearance Call Handling, is an EKTS terminal which supports multiple call appearances and multiple DNs. One or more DNs and/or call appearances of the CACH EKTS terminal can be shared with other terminals in an EKTS group.

CSA - Customer Serving Area, the physical point where the customer serving facilities originate, normally the central office or digital subscriber cabinet.

ISDN - Integrated Services Digital Network, An international plan by the CCITT to standardize a public communication network to handle circuit switched digital voice, circuit switched data, and packet switched data.

IXC's - Interexchange Carriers, Long distance common carriers providing intraLATA and interLATA telecommunications services.

+Loudspeaker and Page Access Channel - An analog channel which interfaces digital ISDN service with analog customer CPE for the provision of Loudspeaker or Paging functionality.

B. Definitions and Descriptions (continued)

NFAS - Non Facility Associated Signaling, this feature allows the use of multiple PRI ISDN physical connections to deliver up to 479 B channels to a given location. NFAS is required when using more than one physical link or if an optional backup D channel is needed.

NID - Network Interface Device, The physical Demarcation Point (see Section 5 Demarcation Point) of Company provided outside plant facilities.

NT1 - Network Terminal 1, The CCITT label for ISDN network termination device which terminates the physical layer-1. This device is provided by the customer and is normally associated with the Terminal Adapter.

Packet Switching - A network technique that divides user messages into relatively short blocks and uses geographically distributed switching nodes, to achieve low end-to-end delay for real-time bursty data traffic.

PDN - Primary Directory Number, The number that is the unique identifier of an ISDN terminal.

PVC - Permanent Virtual Circuit, A virtual circuit established for the duration of an agreement between the subscriber and the network authority and is available to send packets in either direction at any time. It has all the features of a virtual call without the call setup and release procedures.

PRI - Primary Rate Interface, The ISDN PRI combines 23 B channels and one 64Kbps D channel on a single line. Also called the Extended Digital Subscriber Line.

RND - Redirecting Number Delivery, this feature provides information associated with call forwarded calls from an ISDN terminal. This display includes the redirecting number, and the reason for redirection. This information is sent to the ISDN terminal where the call is being forwarded.

SDN - Shared Directory Number, Shared directory number of an ISDN terminal.

SPID - Service Profile Identification, a unique number associated with a ISDN terminal device.

MISSOURI
Public Service Commission

B. Definitions and Descriptions (continued)

T1 - T1 facility, a digital transmission standard in North America that carries traffic at the DS1 rate of 1.544 million bits per second.

Terminal Adapter - A device that provides protocol conversion from standard non-ISDN or TE2 interfaces (e.g., X.25, RS-232) to ISDN interfaces.

C. General

ISDN service will be provided where facilities and equipment are available. This tariff section does not obligate Mid-Missouri Telephone Company to construct facilities for the provision of this service. Mid-Missouri Telephone Company only provides ISDN connectivity within its exchanges and makes no warranties as to the interoperability of ISDN when using facilities of IXC's and other connecting carriers.

General Rules and Regulations found in other sections of this tariff are applicable to the provision of ISDN service.

Directory listings may be provided under the regulations governing the furnishing of listings for business and residence subscribers.

A Network Interface Device will be installed at a location determined by the Company. The Network Interface Device (NID) is the Company point of termination. The customer is responsible to provide the NT1 and all wiring beyond the NID.

D. Service Description

ISDN is offered in two different channel structures. The first is Basic Rate Interface (BRI), and the second is Primary Rate Interface (PRI). Both use channels called "B" or Bearer channels and "D" or Delta channel. The B channel provides a transmission path for user information, such as voice and data, while the D channel carries signaling information and packet data.

D. Service Description (continued)

Each B channel is a 64 kilobit per second (Kbps) clear channel connection. The D channel is a 16 Kbps packet channel that is used to send and receive call set-up and signaling messages to the terminal equipment (customer premises equipment), and carry limited packet data.

1. BRI - Basic Rate Interface

The BRI normally includes two B channels and one D channel (2B+D), however it can be configured to only include a D channel, or one D channel and one B channel. The BRI supports the following:

- Simultaneous data and voice communications
- Data channel rates up to 64 Kbps
- Message-based signaling, separate from the voice/data channels
- Reliable packet switched data transmission.

B-Channel

- 64 Kbps per channel
- Voice or data
- Circuit or packet-switched

D-Channel

- 16 Kbps
- Signaling messages and packet data
- Packet-switched
- Defined for customer usage

2. PRI - Primary Rate Interface

The basic PRI includes twenty three B channels and one D channel (23B+D), however it can be configured to include multiple D channels, and up to a maximum of 479 B channels. The PRI supports the following:

D. Service Description (continued)

2. PRI - Primary Rate Interface (continued)

- Non-Facility Associated Signaling (NFAS) - allows multiple DS1 facilities to be controlled by a single PRI D channel.
- PRI D-channel Backup (DCBU) - this capability can only be assigned to a NFAS group and allows a customer access to the network even if the "active" D-channel were to fail. This is accomplished by transferring signaling information to the "standby" D channel.
- Fractional DS1 Switching (N x DS0) Via PRI - allows a multibearer service capability by switching multiple rates of 64Kbps (i.e., N X DS0 - where N is greater than 2 and less than or equal to 24).
- Dedicated - the entire trunk group is dedicated to a specific service (data, 800 service, DID, etc.)
- Call-by-call - different types of service can be included in the same trunk group (IXC access, OUTWATS, DOD, etc.) Any call can be used for any service as long as there are available facilities (both B channels and service type) for the call.

B-Channel

- 64Kbps per channel
- Voice or data
- Circuit-switched
- Up to 479 channels per PRI (using multiple physical connections) defined as required for customer usage and where facilities permit.

D-Channel

- 1 required, 2 if optional back-up selected and more than one physical link is used.
- 64 Kbps per channel
- Control and signaling messages

PRI ISDN is usually provisioned using one or more T-1 facilities. The Facility Charge listed under Rates applies for each additional 1/4 cable mile from the serving central office or CSA.

1. Basic Rate Interface

Capability Package A (0B+D), includes basic D-channel packet. No voice capabilities are provided.

Capability Package B (1B), includes circuit-switched data on one B channel. Data capabilities include Calling Number Identification. No voice capabilities are provided.

Capability Package C (1B), includes alternate voice/circuit-switched data on one B channel. Data and voice capabilities include Calling Number Identification.

Capability Package D (1B+D), includes voice on one B channel and basic D-channel packet. Only basic voice capabilities are provided with no features.

Capability Package E (1B+D), includes voice on one B channel and basic D-channel packet. This package provides non-EKTS voice features, including Flexible Calling, Additional Call Offering, and Calling Number Identification.

Capability Package F (1B+D), is equivalent to Capability Package E, with the change that Call Appearance Call Handling (CACH) EKTS service is used for the voice service. (Note that Additional Call Offering functionality is incorporated in the EKTS service).

Capability Package G (2B), includes voice on one B channel and circuit-switched data on the other B channel. This package provides non-EKTS voice features, including Flexible Calling, Additional Call Offering, and Calling Number Identification. Data capabilities include Calling Number Identification.

Capability Package H (2B), is equivalent to Capability Package G, with the change that CACH EKTS service is used for the voice service. (Note that Additional Call Offering functionality is incorporated in the EKTS service).

Capability Package I (2B), includes circuit-switched data on two B channels. Data capabilities include Calling Number Identification. No voice capabilities are provided.

E. Service Configurations (Continued)

1. Basic Rate Interface (continued)

Capability Package Q (2B+D), is equivalent to Capability Package P with the change that CACH EKTS service is used for the voice service. (Note that Additional Call Offering functionality is incorporated in the EKTS service.)

Capability Package R (2B), includes circuit-switched data on two B channels. Data capabilities include Calling Number Identification. No voice capabilities are provided.²

Capability Package S (2B), includes alternate voice/circuit-switched data on two B channels. Data and voice capabilities include Calling Number Identification.

Capability Package T (2B+D), includes voice on two B channels and basic D-Channel packet. Only basic voice capabilities are provided, with no features.

Capability Package U (2B), includes alternate voice/circuit-switched data on two B channels. This package provides non-EKTS voice features, including Flexible Calling, Call Forwarding Variable, Additional Call Offering, and Calling Number Identification (which includes Redirecting Number Delivery). Data capabilities include Calling Number Identification (which includes Redirecting Number Delivery).

Capability Package V (2B), includes alternate voice/circuit-switched data on two B channels. This package provides non-EKTS voice features, including Flexible Calling, Advanced Call Forwarding (i.e., Call Forwarding Variable, Call Forwarding interface Busy, Call Forwarding Don't Answer, and Message Waiting Indicator), Additional Call Offering, and Calling Number Identification (which includes Redirecting Number Delivery). Data capabilities include Calling Number Identification (which includes Redirecting Number Delivery).

² Capability Packages R and S are closely related to Capability Packages I and M; the main difference is that the Capability Packages R and S consistently assign two Directory Numbers to the interface, whereas the Capability Packages I and M only assign one.

E. Service Configurations (Continued)

2. Primary Rate Interface

Basic PRI configuration includes 23 B + D channels using one T1 facility.

Optional PRI configuration includes (n) B + 2 D using NFAS signaling where "n" is between 24 and 479 utilizing multiple T1 facilities.

F. Rate Application

1. General

If the customer cancels a request for service prior to the installation being completed, the customer agrees to pay all expenses the company has incurred at the time of notice of cancellation or the actual installation charges for the service, whichever is less. Customers may request the installation cost be spread over a period not to exceed three months from service initiation. In addition to the rates listed below, the Service Order Preparation and the Line Connection charges in Section 5 apply to the initial installation or making any changes thereto (these charges are not waived with 12 month service commitment).

2. Rate Schedule

ISDN Physical Channel Installation	\$100.00 ³
------------------------------------	-----------------------

³ Installation charge applies for each physical channel installed (minimum of one). All installation charges are waived with a 12 month service commitment. Should the customer disconnect prior to the service commitment the full installation charges would apply.

GENERAL SERVICES

HUNT GROUP SERVICE +

Hunt Group Service+ enables a customer to receive incoming calls on more than one line listed under a single number. The feature of this special equipment, installed at the Central Dial Office, is that this equipment will hunt a line that is not busy and ring the customer over it.

The rate for Hunt Group Service+, per month, is \$6.00 more than the one-party rate per month. +

TOLL ACCESS RESTRICTION

Monthly Rate \$6.00

The service connection charges as set out elsewhere in this tariff also apply.

Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network by direct dial access.

The service may be provided to customers in exchanges equipped to program the service without alteration of the central office equipment. Toll access restrictions may be provided on access lines to PBX, ISDN, or Centrex service.

The customer indemnifies and saves harmless The Company from any and all claims, losses, and damages caused by the restriction to any services.

Toll Access Restriction is provisioned in three different configurations.

Basic Restriction – This restriction applies only to 1+ long distances calls; (0+/- operator calls will be handled as usual and will be billed accordingly). Basic Restriction does not block access to 911 emergency calls in areas that have implemented 911 services.

Basic PIN Restriction – This restriction is the same as Basic Restriction except the customer has the ability to dial *94 (1194 Rotary) and enter a 4 digit PIN code. Once the correct PIN code is entered the customer is given a second dial tone temporarily suspending Basic Restriction, allowing the customer to direct dial 1+ long distance calls.

Optional PIN Restriction – This restriction is the same as Basic PIN Restriction except that all 1+ and 0+/- calls are blocked and the customer must enter the correct 4 digit PIN code to be able to dial calls using the long distance message network. This restriction is only available in areas where 911 service is available.

A. General Regulations

1. Foreign exchange service is exchange service furnished to a subscriber from a central office of an exchange other than the one that normally serves the area in which the subscriber is located.
2. For the purpose of this Tariff, the term, "Foreign Exchange", shall mean the exchange from which the foreign exchange service dial tone is furnished. The term, "Normal Exchange", shall mean the exchange normally serving the area in which the subscriber's premise is located.
3. Foreign exchange service does not come within the Telephone Company's general undertaking, nor does the Telephone Company obligate itself to furnish such service generally; but will do so where facilities of such a character are available as will permit satisfactory telephone transmission, and where the service is warranted by the circumstances involved.
4. Foreign exchange service will be furnished to exchanges within the same LATA as the normal exchange.
5. Foreign exchange service may be provided only in connection with private branch exchange trunk lines, and individual line business or residence service. The service will be furnished only at one premises for each channel or circuit.
6. Where the normal exchange is operated by this Telephone Company, foreign exchange service is furnished only on the condition that the applicant is a subscriber to individual line business or residence service, or private branch exchange service, in the normal exchange, and at the same location where such service is proposed to be installed. Under this condition, when a foreign exchange service subscriber discontinues normal

GENERAL SERVICES

FOREIGN EXCHANGE SERVICE

A. General Regulations

1. Foreign exchange service is exchange service furnished to a subscriber from a central office of an exchange other than the one that normally serves the area in which the subscriber is located.
2. The rates and regulations, herein stated, shall not apply to existing services of this type, where existing rates and regulations conflict with the provisions of this section, unless subsequently modified by Commission action.
3. For the purpose of this Tariff, the term "Foreign Exchange" shall mean the exchange from which foreign exchange service is furnished. The term "Normal Exchange" shall mean the exchange normally serving the area in which the subscriber's premises is located. The term "Interexchange Channel" designates that portion of the foreign exchange service circuit which is provided between the toll rate centers of the foreign and normal exchanges.
4. Foreign exchange service does not come within the Telephone Company's general undertaking, nor does the Telephone Company obligate itself to furnish such service generally, but will do so, at its option, where facilities of such a character are available as will permit satisfactory telephone transmission, and where the service is warranted by the circumstances involved.
5. Foreign exchange service will be furnished only when both the normal and foreign exchanges are located within this state.
6. Foreign exchange service may be provided only in connection with private branch exchange trunk lines, and individual line business or residence service. The service will be furnished only at one premises for each channel or circuit.

exchange service, the normal exchange shall immediately notify such foreign exchange subscriber and foreign exchange business office, that the foreign exchange service will be discontinued ten (10) days thereafter. MISSOURI Public Service Commission

7. Where the foreign exchange is operated by another telephone company, foreign exchange service will be provided only when satisfactory arrangements can be negotiated with such company to furnish a portion of the necessary facilities.

8. Foreign exchange service will be furnished at the rates outlined hereafter, provided the necessary facilities and equipment are available. Where the facilities and/or equipment are not available, and extraordinary facility costs, equipment costs, special operating expenses, and/or other special considerations are incurred in making such service available, the subscriber may be required to pay an additional charge to cover all or a portion of such unusual expenses, or be required to contract for service beyond the initial period, or both.

9.

No off premise extensions will be furnished in connection with foreign exchange service.

10. The use of the service is limited to the subscriber and his employees for business purposes, and in the case of residence service, to the members of his immediate household. Foreign exchange service calls will be further limited to calls within the local calling area (including any RAS locations) of the foreign exchange. If any customer to this service is found to be transferring or transmitting messages for parties other than authorized above, in the normal exchange area, and/or making toll calls through the foreign exchange, such subscriber and foreign exchange business office shall be notified that the practice must be discontinued or the foreign exchange service may be terminated ten (10) days after the date of such notice.

FOREIGN EXCHANGE SERVICE (Continued)

JAN 20 1977

A. General Regulations (Continued)

7. Where the normal exchange is operated by this Telephone Company, foreign exchange service is furnished only on the condition that the applicant is a subscriber to individual line business or residence service, or private branch exchange service, in the normal exchange, and at the same location where such service is proposed to be installed. Under this condition, when a foreign exchange service subscriber discontinues normal exchange service, the normal exchange shall immediately notify such foreign exchange subscriber and foreign exchange business office that the foreign exchange service may be discontinued ten (10) days thereafter.
8. Where the foreign exchange is operated by another telephone company, foreign exchange service will be provided only when satisfactory arrangements can be negotiated with such company to furnish a portion of the necessary facilities.
9. Foreign exchange service will be furnished at the rates contained in this tariff section, provided the necessary facilities and equipment are available. Where the facilities and/or equipment are not available, and extraordinary facility costs, equipment costs, special operating expenses, and/or other special considerations are incurred in making such service available, the subscriber may be required to pay an additional charge to cover all or a portion of such unusual expenses, or be required to contract for service beyond the initial period, or both.
10. Standard extensions may be furnished in accordance with Local Exchange Tariffs and extension line mileage charge rates and regulations where applicable. No off-premises extensions will be furnished in connection with foreign exchange service.

FOREIGN EXCHANGE SERVICE (Cont'd)

MISSOURI
Public Service Commission

B. Rates

1. Rates for foreign exchange service will include rates for local service at the foreign exchange and rates for private line service from the foreign exchange to the customer location in the normal exchange.
2. The charge for local service at the foreign exchange is the established monthly service rate, and non-recurring service connection charge of the foreign exchange for the grade of service (individual line business or residence, or PBX and PABX trunks) with which the foreign exchange service is to be associated. In addition, the applicable exchange mileage rate will apply where the subscriber's premises is located outside the Initial Rate Area boundary.
3. The charges for private line service from the foreign exchange to the customer location in the normal exchange will be as follows:
 - a. For private line facilities provided by this Telephone Company, the rates outlined in this Telephone Company's concurrence in the Oregon Farmers Mutual Telephone Company private line tariff will apply.
 - b. Where all or a portion of the private line facilities are furnished by another telephone company, charges for those facilities shall apply as specified in the regulations of such participating company.

GENERAL SERVICES

FOREIGN EXCHANGE SERVICE (Continued)

A General Regulations (Continued)

11. The use of the service is limited to the subscriber and his employees for business purposes, and in the case of residence service, to the members of his immediate household. Foreign exchange service calls will be further limited to calls to other stations of the foreign exchange. If any subscriber to this service is found to be transferring or transmitting messages for parties other than authorized above, in the normal exchange area, and/or making toll calls through the foreign exchange, such subscriber and foreign exchange business office shall be notified that the practice must be discontinued or the foreign exchange service may be terminated ten (10) days after the date of such notice.

12. Mileage Measurements

- a Interexchange mileage is the route distance between the toll rate centers of the two exchanges involved for that portion of the interexchange channel facilities furnished by this Telephone Company. For the portion of the interexchange channel facilities furnished by another telephone company, between toll rate centers of the two exchanges involved, the interexchange channel facility mileage charges of such company will apply.

When the subscriber is located outside the Initial Rate Area boundary, but within the Exchange Area boundary of the normal exchange, exchange mileage charges shall apply between the subscriber's premises and the closest point of the Initial Rate Area boundary, at the rate specified in the Local Exchange Tariffs.

B. Rates

1. The charge for foreign exchange service is the established monthly service rate, and non-recurring service connection charge of the foreign exchange, for the grade of service (individual line business or residence, or PBX and PABX trunks) with which foreign exchange service is to be associated. In addition, the following monthly charges apply:

MILEAGE CHARGES

JAN 25 1977

Excess Mileage Beyond Base Rate Area:

- A. In connection with 1 and 2 party lines circuits extending beyond the base rate area boundary, the following excess mileage charges apply. These charges are in addition to the base rates specified in the Local Exchange Tariff, and construction charges where applicable.

Monthly Rate for 1/4
Mile or Fraction Thereof

Class of Service

1. One-party line telephones, private branch exchange trunks, toll terminals, each..... \$.70
 2. Two-party lines telephones, each..... .40
- B. Shortest air-line measurement from customer's premises to the base rate area boundary is used in computing excess mileage charges. In those cases where the base rate area boundary follows the center line of a street or highway, all dwellings or structures facing or adjoining the street or highway and within 150 feet of the center line of the street or highway shall be considered within the base rate area.
- C. Where a party line customer has the exclusive use of one-half mile or more of a circuit outside the base rate area, and there are no prospects of obtaining additional customers to share the circuit within a reasonable length of time, the customer is charged the one-party line excess mileage rate for the portion of the circuit so used.
- D. Excess mileage charges are payable in the same manner as charges for the associated service.

The distance is computed between the building housing the main station equipment and the building housing the extension equipment.
2. For rules and regulations and rates other than mileage charges covering tie-line and extension lines, refer to the "Private Branch Exchange Service Off-Premises Stations and Tie-Lines" and "Extension Stations" sections of this Tariff.
3. The rates in this section apply, provided the necessary facilities are available. If facilities are not available, and unusual expenditures are involved in making them available, the customer may be required to pay an additional charge to cover the unusual expenditure or to contract for service beyond the initial period or both.

GENERAL SERVICES

SEASONAL AND VACATION

JAN 23 1977

A. General

Seasonal and Vacation Rate Service is provided to residence customers whose requirements for telephone services are less than that which might normally be provided in any 12 month period.

B. Rates⊕

1. The monthly rate will be based upon 50% of the regular rate for the basic and associated additional services suspended for a minimum of 30 days and a maximum of 120 days. One reconnection per calendar year will be allowed without charge.
2. No other charges will apply for the suspension and subsequent restoral of service.

⊕Section B applies to 1-party service only.

C. Conditions

1. Seasonal and vacation rates service will be furnished under the following conditions:
 - a. Outward service may be provided at the Company's option during the period of suspension if equipment capabilities permit.
 - b. Charges may be billed in total prior to the suspension of service, or monthly at the option of the Company.

2. Certain types of telephones are equipped with retractable cords as a standard feature; in such instances, no charge will apply.
3. Requirements for the provision of special cords, not covered above, will be at cost, including the labor of installing cord.
4. No charge will apply to a change from a long cord to a cord of standard length, or for the renewal of a worn or defective cord with a long cord of the same length or a shorter length. Where telephone service is continued at a different premise in the same exchange for a customer having a long cord, a long cord of the same length or a shorter length will be provided at the new location without charge. When a customer having a long cord moves from an exchange but returns at a later date, the installation charge for the long cord will apply. Where a customer takes service at a location where a long cord is in place and retains the long cord, no charge will apply to it.
5. The Company, may at its option, provide line cords in neutral or silver color as available from the manufacturers.
6. The customer indemnifies and saves the Telephone Company harmless from any claims, losses, or suits for injury to, or death of any person, or damage to any property which arises from the use, placement, or presence of such a cord on the customer's premises.

Directory Listings

A. General

The following rates are applicable to the alphabetic section
of the Telephone Directory, for business or residence customers.

B. Rates

Monthly
Rate

- | | |
|--|--------|
| 1. Additional or alternate listings, per
listing..... | \$.25 |
| (Extra Directory Listings, or EDL) | |
| 2. Unlisted service, per listing..... | .25 |
| 3. Non-publish service, per listing..... | .25 |
| 4. Foreign exchange or non-subscriber ser-
vice per listing (See Condition 4).. | 1.00 |

C. Conditions

1. A primary listing, which may include the name, address and telephone number of the individual, organization, firm or corporation for whom the service has been contracted, will be furnished at no charge.

- a. Listings will be limited to such information as is necessary for proper identification.

The length of a listing may be limited by the use of abbreviations where the clarity of the listing and the identification of the customer will not be impaired.

- c. The Company may refuse to insert any listing which, in its judgment, does not facilitate the use of the directory.

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

Directory Listings (Continued)

C. Conditions (Continued)

2. An additional listing may include the same address and telephone number as the primary listing, except that a different address may be shown for off-premises stations located on other premises occupied solely by the customer.
 - a. Additional listings may be furnished with business or residence service for persons who occupy the same premises at the rates shown above. (See Joint User Service.)
3. An alternate call listing refers a calling party to certain other telephone numbers after business hours or on Sundays or holidays or if there is no answer on the first listed number.
 - a. Where the alternate call number is to be that of another customer, the listing will be furnished only with written approval of the other customer.
4. A foreign or non-subscriber listing may be furnished customers requesting that their listing be included in a directory of an exchange other than that from which service is rendered. The rate for a foreign company listing will be the rate of the company in whose directory the listing appears.
5. Unlisted service is the omission of a customer's listing from the telephone directory only. It may be obtained from the information operator.

Original Sheet 40

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

Directory Listings (Continued)

C. Conditions (Continued)

6. Non-publish service is the omission of a customer's listing from both the telephone directory and information records.
 - a. When non-publish service is to be furnished, the customer will hold the Company harmless from any damages which might arise, and will absolve the Company from any responsibility for the failure of the customer to receive calls because of the non-published listing.
 - b. The rate for non-publish service is specified in "B" above.
7. The charge for additional alternate, unlisted or non-published listings begins on the day the information records are posted.
8. The length of contract period for directory listings, where the listing actually appears in the directory, is the directory period. The directory period is from the day on which the directory is distributed to the customers to the day the succeeding directory is distributed to the customers. Unless the listing no longer serves the customer because of disconnection, removal, etc., of the service, the minimum contract period will be for at least thirty (30) days.

Elevator Telephones

A. General

Telephones for use in elevators may be furnished in connection with individual line service (except coin telephone service), private branch exchange service, Centrex Service, or private line telephone service, connected to the elevator by a flexible cable installed in the elevator shaft.

B. Rates	Monthly Rate	Installation Or Move Charge
1. Flush type.....	\$ 2.00 [Ⓞ]	\$25.00

C. Conditions

1. The customer shall furnish, install and maintain a flexible cable between the outlet box in the elevator cab and a point outside the shaft designated by the Company. This cable shall contain only telephone circuits, unless otherwise approved by the Company.
2. The customer shall provide a suitable opening in the wall of the elevator and for the installation of an outlet box.
3. No allowance is made for interruptions of service due to failure of the customer's facilities.
4. No other installation charge will be applicable in the provision of the service.
5. Regular service connection charges filed in Section 5 for the class of service furnished are applicable to elevator telephones reconnected in place.

1. The customer may be required to provide a suitable opening for the installation of the panel telephone and make the necessary arrangements for concealing the wiring. The wall box designed to house the telephone will be provided by the Company.
2. No other installation charge will be applicable in the provision of this service.
3. Regular service connection charges filed in Section 5 for the class of service furnished are applicable to panel telephones reconnected in place.
4. Should customer have panel phone removed, the Company will not be liable to the customer, his landlord, or any party in regard to repairing or restoring to original condition the location of the panel telephone. The Company may require a written statement from the customer.

⊕Regular monthly rate for class and grade of service applies.

Section 4
Original Sheet 56

GENERAL SERVICES

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

School to Home Service (Continued)

C. Conditions

1. School to home service employs channels and station equipment designed for the transmission of speech and is particularly adapted for use in conjunction with the education of handicapped students unable to attend classes in person. It may also be provided in other cases where the service is suitable and where it will meet the customer's requirements.
2. The master station set consists of a combined speaker-microphone and amplifier with volume control and nonlocking "listen-talk" switch. Controller station equipment consists of one or more speaker-microphone sets with volume control and a separate amplifier common to the controlled station equipment. Controlled station speaker-microphone sets are not equipped with "listen-talk" switches. The equipment is arranged for normal transmission from controlled to master station set. Direction of transmission may be reversed by operation of the "listen-talk" switch of the master station set. Each portable set is equipped with a cord and plug to permit its use in connection with jack installations as covered by the schedule.
3. Mileage measurement - channels.
 - a. When the terminals of the channel are located in the same central office area and the channel does not pass through the central office, the air-line mileage is measured between terminals.
 - b. When the terminals are located in the same central office area and the channel passes through the central office, the air-line mileage is determined separately from each station to the central office.

SUPPLEMENTAL EQUIPMENT SERVICES (Continued)

School to Home Service (Continued)

C. Conditions (Continued)

3. Mileage measurement - channels (Continued)

- c. When the terminals are located in different central office areas and the channel passes through two or more central offices, the air-line mileage is measured separately between central offices and from each terminal to its serving central office.
 - d. When the terminals are located in different exchange areas, the air-line mileage is measured from the terminal to the principal central office where connection is made with interexchange facilities of the connecting company. Interexchange channel rates shown under Rates above apply when the interexchange facilities are provided by the Company. Interexchange facilities provided by another company are furnished at applicable rates of that company.
- 4. The rates and charges for the station equipment contemplate not more than 150 feet of shielded wiring with each controlled station set or jack.
 - 5. Connection of a channel, directly or indirectly, to exchange lines, or other wire facilities, not authorized by the Company, is not permitted.
 - 6. The customer will not be permitted to create additional channels from the facilities provided by the Company.
 - 7. Where commercial power is required for the operation of equipment for use in the provision of this service, it shall be the responsibility of the customer to furnish convenient power outlets and all associated wiring.

GENERAL SERVICES

811 SERVICE

A. DESCRIPTION

811 Service is a three-digit abbreviated local dialing arrangement which allows local exchange end-users to reach the providers of Missouri's One Call Notification System (811 Customer). 811 Service is used by the One Call Notification system to provide notice of excavation activities to operators of underground facilities.

811 Service determines the central office serving the calling party, translates the dialed digits to an 811 Customer provided designated toll free telephone number, and routes the call to that number.

B. TERMS AND CONDITIONS

1. The Company and the 811 Customer will negotiate the installation date for the 811 Service.
2. There can be only one 811 Customer for each stand-alone, host, or remote central office NAP-NXX serving area.
3. The Company will route calls based upon the serving central office.
4. The 811 Customer must provide a toll-free number to the Company to ensure that toll charges are not incurred by the end-user. At all times it shall be the obligation of the 811 Customer to test and be aware of any translation errors or other mistakes in routing 811 calls to the customer provided toll free number.
5. 811 Service can only be accessed by end-users that subscribe to the Company's local exchange service. 811 Service will not complete calls dialed using 0 + 811 or 1 + 811. 811 calls are not permitted where local calling is restricted.
6. 811 Service does not include operator-assisted calls, and will only be available to PBX, Centrex, and Key switching systems when those systems have been correctly programmed. The Company does not undertake to perform, nor shall it be responsible, for such programming.

Section 4
Original Sheet 65

811 SERVICE (Continued)

7. 811 Service is provided as a community service. There will be no recurring or non-recurring charges for the service.

C. LIMITATION OF LIABILITY

1. 811 Service is provisioned solely for the benefit of the 811 Customer. The provision of such service shall not be interpreted, construed, or regarded as being for the benefit of or creating any obligation toward, or any right of action on behalf of, any third person or other legal entity, including but not limited to end-users of the Company or any other providers of telecommunications service.
2. The Company will make commercially reasonable efforts to route 811 calls to the toll-free number provided by the 811 Customer, however the Company will not be responsible, or held responsible, for routing mistakes and errors, interruptions of service, or intervening Acts of God or other acts that interfere with telephone service and/or routing. The Company's obligation under this 811 Service applies solely to the transmission of the call to the toll-free number provided, and ends upon translation of an 811 call to the Customer provided toll free number.
3. The Company does not undertake to transmit messages under the terms of 811 service.
4. The Company will have no liability for any damages arising from damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission occurring in the course of furnishing 811 service.
5. The Company's failure to provide or maintain service shall be excused by government orders, civil commotions, acts of God and other circumstances beyond the Company's reasonable control.
6. The Company shall not be liable for any act or omission of any entity, and shall not be liable for any accident, injury to person or property, including death, libel, slander, infringement of intellectual property rights, nor shall the Company be responsible for any direct, indirect, incidental, special, consequential, exemplary, or punitive damages.
7. The 811 Customer shall defend the Company at the 811 Customer's expense, indemnify, and hold the Company harmless against any and all loss, claims, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted against the Company as directly or indirectly arising from the provision of 811Service.

Section 4
Original Sheet 66

GENERAL SERVICES

211 SERVICE

A. DESCRIPTION

211 Service allows the calling party to reach the 211 provider (211 Service Customer) by dialing an abbreviated telephone number, two-one-one (211).

211 Service is a routing service that determines the central office serving the calling party, converts the 211 dialed digits to a Customer-designated Routing Telephone Number (RTN) and routes the call over the telephone network to the RTN.

211 Service may only be purchased by information and referral providers authorized by the Missouri Public Service Commission in accordance with 4 CSR 240-32.200 of the Code of State Regulations.

211 Service is offered subject to the availability of facilities.

B. TERMS AND CONDITIONS

1. The 211 Service Customer must provide a copy of the order granting its authority as a Missouri Information and Referral Provider in the service area of the Company.
2. Unless otherwise authorized by the Missouri Public Service Commission, and technically feasible of implementation by the Company, there shall be no more than one 211 Service Customer for each stand-alone, host, or remote central office serving area. This assures that 211 calls from a calling party located within a 211 service area can be routed to the Information and Referral Provider certified for that service area. The Company will route calls based upon the serving central office. If a central office serves one or more remote offices or multiple states, the Company will route 211 calls based on the originating NPA-NXX. The Company will default route calls to one of the 211 Service Customer's routing Telephone Numbers if the Company is unable to route based on the serving central office or the originating NPA-NXX.
3. Only 211 calls originating within an operational 211 service area will be routed to a call center. End users dialing 211 outside operational 211 service areas will receive a recorded message that the call cannot be completed as dialed.
4. By subscribing to 211 Service under this tariff, the 211 Service Customer agrees to comply with all applicable federal and state laws and regulations.

Section 4
Original Sheet 67

211 SERVICE (Continued)

5. The 211 Service Customer may designate only one Routing Telephone Number per 211 service area, but may designate different Routing Telephone Numbers for different service areas as set forth below. The Routing Telephone Number must be a toll-free 8XX telephone number for central offices outside of the 211 call center's local service area.
 - a. if the 211 Service Customer utilizes more than one 211 Routing Telephone Number, it must designate the specific stand-alone, host, or remote central office(s) to be served by each Routing Telephone Number.
 - b. Normally only one Routing Telephone Number can serve a stand-alone, host, or remote central office serving area.
 - c. 211 calls are not permitted where local calling is restricted, e.g., prisons.
6. The Company will route 211 calls originating from calling parties on the Company's local exchange network, whether the calling party is served by the Company or by another local exchange company reselling the Company's service. 211 Service will not complete calls dialed using 0 + 211 or 1 + 211. 211 Service does not include operator-assisted calls, and will only be available to PBX, Centrex, and Key switching systems when those systems have been correctly programmed. The Company does not undertake to perform, nor shall it be responsible, for such programming.
7. The Company will make commercially reasonable efforts to route 211 calls to the appropriate calling center. The Company will not be held responsible for routing mistakes or errors. The Company's obligation under 211 Service ends upon call completion to the Routing Telephone Number(s) designated by the 211 Service Customer(s). At all times it shall be the obligation of the 211 Service Customer to test and be aware of any translation errors or other mistakes in routing 211 calls to the appropriate calling center.
8. The Company does not undertake to transmit messages under the terms of 211 service.
9. 211 Service is provided as a community service. There will be no recurring or non-recurring charges for the service.

**SERVICE CONNECTION CHARGES
MOVES AND CHANGES**

JAN 15 1997

General

MISSOURI
Public Service Commission

The charges specified in this section for service connection charges, moves and changes do not contemplate work being performed by the Telephone Company employees involved in a time when overtime wages apply, due to the request of the customer, nor do they contemplate work once begun being interrupted by the customer. If the customer requests that overtime labor be performed or interrupts work once begun, an additional charge, based on the additional cost involved, applies.

Definitions of Service Connection Charges:

1. Service Order Preparation: The charge applied for each customer request for work performed by the Telephone Company in connection with the receiving, recording, record alteration and processing of customer service requests. A single charge is made for all services to be completed for the same subscriber at the same premises at the same time.
2. Line Connection: The charge applied for work done in the central office and/or outside plant facility associates with providing each access line (the line from the serving central office up to and including the station protector at the customer's premises), or making changes thereto.
3. Demarcation Point: The point of connection, provided and maintained by the telephone company, at which the station wiring becomes dedicated to an individual customer's use. For an individual customer dwelling this point of connection will generally be the modular jack incorporated into the customer side of the Network Interface Device (NID). The drop wire and the network protector will continue to be provided by, and remain the property of, the telephone company. The demarcation point is usually the point at which the telephone company wiring connects with the customer's wiring.

SERVICE CONNECTION CHARGES
MOVES AND CHANGES

RECEIVED

NOV 24 1986

General

The charges specified in this section for service connection charges, moves and changes do not contemplate work performed by the Telephone Company employees involved in a time when overtime wages apply, due to the request of the customer, nor do they contemplate work once begun being interrupted by the customer. If the customer requests that overtime labor be performed or interrupts work once begun, an additional charge, based on the additional cost involved, applies.

Definitions of Service Connection Charges:

1. Service Order Preparation: The charge applied for each customer request for work performed by the Telephone Company in connection with the receiving, recording, record alteration and processing of customer service requests. A single charge is made for all services to be completed for the same subscriber at the same premises at the same time.

CANCELLED

APR 15 1997
B. H. P.S. #2
Public Service Commission
MISSOURI

2. Line Connection: The charge applied for work done at the central office and/or outside plant facility associates with providing each access line (the line from the serving central office up to and including the station protector at the customer's premises), or making changes thereto.
- +3. Demarcation Point: The point of connection, provided and maintained by the telephone utility to which the inside station wiring becomes dedicated to an individual customer's use. For an individual customer dwelling, this point of connection will generally be immediately adjacent to the protector or the customer's side of the protector. The drop and block, including the protector, will continue to be provided by and remain the property of the telephone utility.

2. Line Connection: The charge applied for work done in the central office and/or outside plant facility associated with providing each access line (the line from the serving central office up to and including the station protector at the customer's premises), or making changes thereto.
3. Premise Visit: The charges that applies for a visit to the customer's premises to perform work, other than disconnect work, requested by the customer. When more than one visit is necessary, for Telephone Company reasons, to complete the work, only one Premise Visit charge applies. Additional charges apply for repeated trips requested or necessitated by the customer.
4. Inside Wiring: The charge that applies for installing, moving or changing inside wire on the customer's premises to provide service at the location requested. The Inside Wiring charge applies for each location on the customer's premises where the customer desires inside wiring for either an item of terminal equipment to be connected or a suitable outlet to be placed as a provision for future connection of terminal equipment where suitable inside wiring is

SERVICE CONNECTION CHARGES
MOVES AND CHANGES

MOVES AND CHANGES

JAN 30 1977

- A. A move is a transfer of telephone service or equipment from one location to another on the same premises where there is no interruption of the service other than is incident to the work involved.
1. A move may be made in either of two ways, the circumstances in each case determining the procedure to be followed:
- By an actual change in location of the equipment from the old to the new location.
 - By the installation of equipment at the new location and the subsequent disconnection and removal of the equipment at the old location. In such cases where the switchboard or dial branch system is involved, the cost of the move includes the cost of installing equipment at the new location equal in capacity to that at the old location, the cost of removal of the equipment at the old location, and the cost of rearrangements or extensions of wiring.
- B. Discontinuance of telephone service and equipment at one premises and their installation at another premises is not considered as a move and is provided for subject to the regular termination charges, and service connection charges and/or any installation charges that may be applicable.
- C. Charges for moves of telephone service or equipment, except as otherwise provided in this section, apply as follows:

MOVES AND CHANGES (Continued)

C. (Continued)

1. For Company owned stations within the Exchange Area:

- a. Moves of individual and party line main stations
and toll terminals.

Within the same room, each station..... \$2.00
To another room on same floor of the build-
ing, each station..... 2.50
To another floor in the same building,
each station..... 3.00
To a location outside of the building,
each station..... 4.00

- b. Moves of Private Branch Exchange and
extension stations, each station..... 2.00

- c. Moves of all other equipment and wiring... Cost

- D. The charges shown above for moves of stations apply to private
branch exchange service when only the stations are moved; where
the move involves both a move of stations and other equipment,
the charge for the entire move will be the actual cost with a
minimum charge equal to the charge shown above for the number
of private branch exchange stations moved.

1. In the case of private branch exchange equipment for which
the initial contract period is three years at the same loca-
tion, the subscriber is given the choice of arranging for
the change of location on the same, or to a different pre-
mises in the same exchange area, by one of the following
methods and regardless of whether or not the initial con-
tract period has expired.

- a. By terminating the contract for service at the old
location, and signing a new application for a three
year period at the new location. In this case, the
subscriber is required to pay the sum of any termination
charges which may be applicable, plus the not-in-place
service connection charges which would apply in case of
a new installation.

Service Connections-Link Up Missouri

NOV 19 1997

A. Applicability of Link Up Missouri Service Connection Program

MO. PUBLIC SERVICE COMMISSION

1. The Link Up Missouri Service Connection Program is a Federal Lifeline assistance program applicable to eligible residential subscriber, as defined below, and designed to promote subscribership to the telephone network among low income residential households.

- a. Service Connection Charges, as set forth in this tariff¹, for initial installation of the main residential service access line, will be discounted at a rate of 50 percent, or \$30.00, whichever is less. These reduced charges shall be assessed only for a single residential telephone line per eligible household at the principle place of residence. +
- b. The customer may defer payment on up to \$200 of the above charges without interest for a period not to exceed one year. The deferred charges do not include any permissible security deposits required. Payments shall be equally paid over a twelve month period. *
- c. A qualifying low-income customer may choose with a or b, or both a and b as described above.
- d. Link Up assistance is available for a second or subsequent time only for a principal place of residence with an address different from the residence address where assistance was previously provided.
- e. The premises at which the residence service is requested must be the applicant's principal place of residence.
- f. There is only one telephone line serving the residence premises. The residence premises household (dwelling unit) shall consist of that portion of an individual house or building or one flat or apartment occupied by a single family or individuals functioning as one domestic establishment.
- g. Link Up will not be furnished on a Foreign Exchange service. *

¹ These do not include other charges that may be required at the initiation of service such as security deposit, contribution in aid of construction, customer advances, etc.

SEP 9 1988

+Service Connections-Link Up Missouri

MISSOURI
Public Service Commission

+A. Applicability of Link Up Missouri Service Connection Program

+1. The Link Up Missouri Service Connection Program is a Federal Lifeline assistance program applicable to eligible residential subscribers, as defined below, and designed to promote subscribership to the telephone network among low income residential households.

+a. Service Connection Charges, as set forth in this tariff¹, for initial installation of the main residential service access line, will be discounted at a rate of 50 percent, not to exceed \$30.00. These reduced charges shall be assessed only for a single residential telephone line per eligible household at the principle place of residence.

+2. Eligibility Requirements

The following requirements shall be used by the company to determine the eligibility of a subscriber for Link Up Missouri assistance.

- +a. Subscribers must have lived at an address where there has been no telephone service for at least three months prior to the date that assistance is requested.
- +b. Eligible subscribers must not have received this assistance within the last two years.
- +c. Subscribers must not be a dependent for federal income tax purposes, unless the subscriber is more than 60 years of age.
- +d. Subscriber is currently receiving MEDICAID/medical assistance payments from the State of Missouri, and has provided their Department of Social Services Client Number (DCN) to the Company.

+Of the eligibility requirements listed above, items a., b., and c., will be determined by the subscriber, and item d. will be State certified by the Department of Social Services.

¹ These do not include other charges that may be required at the initiation of service, such as security deposit, contribution in aid of construction, customer advances, etc.

RECEIVED

Service Connections-Link Up Missouri

NOV 19 1997

A. Applicability of Link Up Missouri Service Connection Program (Continued)

MO. PUBLIC SERVICE COMMISSION

2. Eligibility Requirements

The following requirements shall be used by the company to determine the eligibility of a subscriber for Link Up Missouri assistance. An applicant must meet the following criteria in order to qualify for Link UP.

a. The customer must participate in one of the following programs:

- 1) Medicaid
- 2) Food Stamps
- 3) Supplemental Security Income (SSI)
- 4) Federal public housing assistance
- 5) Low Income Home Energy Assistance Program

b. The customer must sign, under penalty of perjury a document certifying:

- 1) He/she is receiving benefits from one of the programs in 2.a. above.
- 2) Name of the program(s) from which they are receiving benefits.
- 3) That he/she will notify the company if he/she no longer participates in the program(s) named in a. preceding.

SERVICE CONNECTION CHARGES
MOVES AND CHANGES

CHARGES FOR MOVES AND CHANGES DO NOT APPLY TO:

- A. Moves or changes required for the proper maintenance of the equipment or service, or for changes from manual to dial stations, or from magneto to common battery manual stations, or vice-versa.
- B. Moves or changes made at the time of a change in the class or grade of service, provided such move or change is necessary because of the change in the class or grade of service
- C. Changes from one type of switchboard to another. However, changes from dial systems to any other type of system is subject to regular termination charges
- D. Changes in style or type of station equipment made at the time of a move of the station, i. e., only the charge for the move is made.

PRIVATE LINE TARIFF CONCURRENCE

RECEIVED

JUL 14 1993

Private Line Concurrence

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Private Line Service as set forth in Oregon Farmers Mutual Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for private line service of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

MO. PUBLIC SERVICE COMM.Private Line Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, in whole or in part, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

Technical Trial of Distance Learning

In addition to the Private Line Services provided under the above concurrence, the Company also provides facilities for the Technical Trial of Distance Learning described below.

DESCRIPTION OF TRIAL

The Company is conducting a technical trial of a service called Distance Learning. This service will provide video connections between classrooms in different schools thus allowing a teacher to conduct a class in multiple locations at the same time. The Company will provide facilities only within its operating area as a part of this technical trial and will interconnect its facilities with the facilities of other Local Exchange Carriers as necessary to complete the trial. The technical trial will initially be tested at no charge.

The trial is scheduled to begin in 1993.

ACCESS SERVICES TARIFF CONCURRENCE

Access Services

Access services are those services which are described in the Access Services Tariff of Oregon Farmers Mutual Telephone Company. These services are offered by the Company to intrastate interexchange customers (ICs) in accordance with the rules and regulations specified in the Access Services Tariff of Oregon Farmers Mutual Telephone Company and approved by the Missouri Public Service Commission, and in any amendments thereto and authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for access services of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort, and after provisions has been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Oregon Farmers Mutual Telephone Company's Access Services Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Oregon Farmers Mutual Telephone Company's Access Services Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company.

Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

Section 6

ACCESS SERVICES TARIFF CONCURRENCE

12. Rates and Charges (Cont'd)

12.1 Otelco Mid-Missouri LLC (Cont'd)

12.1.2 Switched Access Service (Cont'd)

Otelco Mid-Missouri LLC adopts the John Staurulakis ("JSI") F.C.C. Tariff No. 1 Interstate Access Charge Tariff, including the Company-specific rates designated therein, as found at <https://apps.fcc.gov/etfs/public/lecTariffs.action?idLec=37>, as effective with the FCC for intrastate use. This Tariff includes all the rules, regulations, rates and charges under which intrastate access services will be offered to all telecommunications providers. Exceptions to this adoption of the Tariff schedules are as follows. Unless otherwise stated, these rates, as set forth in Paragraph 1 below, apply to originating intrastate/intraLATA and intrastate/interLATA traffic only: *

		<u>Rate</u>
(E)	<u>Originating Switched Access Rates</u> (Per MOU) *	
(a)	Carrier Common Line Non-Toll Free	0.066613
	Carrier Common Line Toll Free	0.000000
(b)	Tandem Switched Facility Non-Toll Free	0.000402
	Tandem Switched Facility Toll Free	0.000000
(c)	Tandem Switched Termination Non-Toll Free	0.002090
	Tandem Switched Termination Toll Free	0.000000
(d)	Tandem Switching Non-Toll Free	0.005272
(e)	Joint Tandem Switched Transport Toll Free***	0.001000

DIGITAL LINK SERVICES TARIFF CONCURRENCE

JUL 15 1992

Digital Link Services ConcurrenceMISSOURI
Public Service Commission

The Company concurs in the rules and regulations governing intrastate intra-LATA interexchange Digital Link Service as set forth in Oregon Farmers Mutual Telephone Company's tariff on file with and approved by the Public Service Commission of the State of Missouri, and in any amendments thereto as authorized by the Missouri Public Service Commission or applicable law. The Company does not concur in the rates for Digital Link Service of Oregon Farmers Mutual Telephone Company. Rates for these services are set out in the following pages of this concurrence.

Provision of Services

The Company, to the extent that such services are or can be made available with reasonable effort, and after provisions have been made for the Company's telephone exchange services, will provide to an intrastate IC, upon reasonable notice, services of the type offered in Oregon Farmers Mutual Telephone Company's Digital Link Tariff pursuant to the terms and conditions specified therein and at the rates specified in the following pages of this concurrence. The Company's concurrence in Oregon Farmers Mutual Telephone Company's Digital Link Tariff shall not be construed or deemed a representation that all services and service components described therein are available from the Company.

Cancellation Rights

The Company reserves the right to cancel and make void the above concurrence statement, subject to requirements as may be ordered by the Missouri Public Service Commission, at any and such time as it appears that such cancellation is in the best interest of the Company and/or its customers.

Section 7
Original Sheet 2

IMPROVED MOBILE TELEPHONE SERVICE

A. IMPROVED MOBILE TELEPHONE SERVICE

JAN 27 1977

1. Improved Mobile Telephone Service, hereafter referred to as IMTS, allows a mobile subscriber to originate and receive calls to or from other IMTS mobile stations, fixed mobile stations, or land-line telephone through the local channel, provided he is within range of the tower and base station (approximately 25 miles radius) which is located near and operates through the Pilot Grove, Missouri telephone exchange.
2. IMTS also allows a mobile subscriber to "roam" into range and receive service from a "foreign base station" which is served by another company, provided his mobile set is equipped with the proper channel equipment for compatability with the foreign base station.
3. The local channel service entitles the mobile subscriber to the same service as a land-line subscriber in the Pilot Grove, Missouri exchange.
4. The Telephone Company is not obligated to furnish IMTS service when facilities are not available

B. IMTS - COMPANY OWNED EQUIPMENT

1. Preferrably all equipment for providing IMTS is furnished and owned by the Telephone Company
2. All installation and maintenance work is performed by Telephone Company personnel or by licensed contractors qualified to perform the necessary work. When unusual maintenance work results from negligence of the subscriber, the Telephone Company will bill him actual cost of labor, materials, and miscellaneous charges necessary to restore the unit to a serviceable condition. It is the responsibility of the customer to deliver his vehicle to where the equipment is to be serviced.

3. Paging and Public Address Systems may not be connected, either directly or indirectly to exchange or toll service facilities of the Company.
4. The following conditions are applicable to Type 1 equipment only.
 - a. Equipment arranged to permit an attendant to page from a PBX switchboard through the use of the attendant's headset/handset require one (1) transmitter-transfer, and one (1) jack, per paging facility.
 - b. Connection of customer owned and maintained music services with the facilities offered herein will be made only through Company owned connecting equipment filed elsewhere in this section; however, since the facilities offered here in are not basically designed for the transmission of music, the Company cannot guarantee the quality or fidelity of the transmission.
 - c. All conduit and any special construction required for the installation of Paging and Public Address Systems may be furnished by the customer or by the Company at its costs as outlined in the General Regulations for Special Construction.

ENHANCED BUSINESS SERVICE

JUL 28 1992

+A. General

- +1. Enhanced Business Services (EBS) is a service offering enhanced features on Business One Party Touch Button Local Exchange Access Lines. The service is limited to customers with a minimum of two access lines. EBS service is provided only in the exchanges and at locations where equipment and facilities are available.

+B. Conditions

- +1. Enhanced Business Service is offered in two different versions:

- +a. MVP - offered to customers - 2 to 6 lines.
+b. IBS - offered to customers - 6 to 75 lines.

For customers with over 75 lines, IBS will be provided on an individual case bases.

- +2. Customer premise equipment must be compatible with the services and equipment provided by the Company.
+3. The minimum charge for Enhanced Business Service shall be one month.
+4. Any combination of Enhanced Business Service features can be applied to access lines with an Enhanced Business Service Group, except those features that are mutually exclusive.
+5. One directory listing will be provided without charge for each EBS Service. Each additional listing will be provided as set forth in Section 4.

+C. Description of Service Features

+1. Basic Features

- +a. Direct Inward Dialing (MVP/IBS) - Calls to individual EBS lines may be dialed directly to the line from an outside line.

PRIVATE BRANCH EXCHANGE SERVICE

DEC 15 1982

(1) A. GENERAL

1. Standard Facilities

The rates quoted herein contemplate the use of standard equipment and apply at all business and residence locations. Special equipment and arrangements are furnished where practicable at charges, based on costs, determined as outlined under miscellaneous equipment in this tariff.

MISSOURI
Public Service Commission

2. Installation

- a. In addition to the Installation Charges quoted below for the switching equipment regular Service Connection Charges apply for the installation, moves and changes of all stations, station equipment and C. O. trunks. Beyond the circuit limit of 250 feet, if not on the same premises the cost of labor and material is chargeable.
- b. A three year contract is required on all Manual Systems over 40 lines and on all Dial Switching Systems.

3. Power Equipment

- a. Power equipment, excluding standby battery supply, for equipment including talking, equipment and ringing current, is furnished without additional charge in connection with P.B.X., P.A.B.X., and Automatic Inter-communicating systems. Current necessary to operate the power equipment is provided by the customer at his expense, and must be suitable to meet operating requirements.
- b. Standby battery supply is furnished at customers request only. See rate charge under B. 4 of this section.

4. P.B.X. Systems Outside the Base Rate Area

When the private branch exchange is located outside of the base rate area, the mileage charges apply as specified under Mileage Charges in this Tariff.

- (1) Limited Availability. See Section 2, paragraph G, 1st Revised Sheet 9.

+C. Description of Service Features (Continued)

+1. Basic Features (Continued)

MISSOURI
Public Service Commission

+b. Direct Outward Dialing

+1. MVP - Calls to outside lines may be dialed using the standard calling sequence.

+2. IBS - Calls to outside lines may be dialed by dialing an access code and the standard calling sequence.

*c. Intercom Dialing (MVP) - This feature allows a MVP subscriber to call other members of the same customer group by using abbreviated dialing in lieu of the seven-digit number.

+d. Station to Station Dialing (IBS) - This feature allows an IBS subscriber to complete a call to other lines within the same IBS group by dialing the last one to four digits of the line number. The IBS customer selects the number of digits to be dialed.

+d. Touch Button Service - This feature provides multifrequency tones for customer dialing in lieu of dial pulses.

+D. Rates

+1. EBS service charges are in lieu of regular Business Access Line rates and Touch Button rates shown in Section 1 and Section 4 of this tariff, except as set forth in the following paragraph.

When used in conjunction with a key system(s), PBX(s) or any other equipment providing similar functionality, the charges set forth in the rate section will be in addition to normal access line rates as set forth in Section 1 and Section 4 of this tariff.

+2. Service Order and Line Connection charges are applicable as set forth elsewhere in this tariff.

MISSOURI
Public Service Commission

- a. P.B.X. and P.A.B.X. Stations may be located at any point on the same or other premises of a customer or on the premises of the customer's agents or representatives. Stations located on premises of the customer other than those on which the switchboard is located are offered subject to the availability of circuits and to the requirement that the customer contract for such facilities as are necessary to provide standard operation and transmission.
- b. The station rate quoted herein are for stations that are located in the same building with the switchboard and cable distributing terminal and other buildings located within two hundred fifty feet of main building housing the switchboard and cable distributing terminal, and which are all located on the same premises.
- c. Mileage charges, as specified under mileage charges in this Tariff, apply in connection with each station not located within the limits set out above.

6. Operating

All operating at the customer's premises is performed at the expense of the customer and must conform with the regulations which the Telephone Company establishes as necessary in order to maintain a proper standard of service.

7. Operator Sets and Position Dials

Ordinarily one operator's telephone set (or handset) and if required, one position dial is supplied without charge for each switchboard position. If the customer desires operator sets in addition to those ordinarily furnished, they will be supplied at the regular monthly rate.

KEY TELEPHONE SYSTEMS

DEC 15 1982

(1) 1. General

MISSOURI

A. Key telephone systems are arrangements of equipment consisting of one or more telephones equipped with keys ~~in the base or with~~ separately mounted keys, to provide one or more of the following service features in connection with central office lines:

1. Pickup - An arrangement whereby a telephone may be connected to one or more lines by key operation at that telephone.
2. Holding - An arrangement in which, by key operation, a call may be held on one line while a call is made or answering on another line.
3. Intercommunication - An arrangement in which, by key operation, two or more telephones may communicate with each other over an intercommunicating line without the use of intermediate switching equipment.
4. Exclusion - An arrangement where, by key operation, a station may obtain the private use of a line for the period of a conversation and thereby control the use of the line by other interconnected stations.
5. Signaling - The signaling is provided in connection with the above features by means of rotary dial or touch button signaling equipment. Touch button service is an extra-cost feature, see Section 1.

B. Except as specifically provided, all telephones connected to a key telephone system will ordinarily be located on the same premises or in the same building. Telephones not on the same premises nor in the same building will be furnished subject to the condition that, if additional equipment and facilities are required for satisfactory operation, the subscriber will be required to pay additional charges for such additional equipment and facilities based upon the costs incurred.

Original Sheet 2

BURIED FACILITIES FOR SUBDIVISIONS

1.1 INSTALLATION OF TELEPHONE LINES WITHIN SUBDIVISION (1) TELEPHONE
LINES CONSTRUCTED, INSTALLED AND OWNED BY UTILITIES IN SUBDIVISIONS
SHALL BE INSTALLED UNDERGROUND.

1.1.1 The following definitions are used in this section of the tariff:

APPLICANT: The developer, builder, or other person, partnership,
association, firm, private or public corporation, trust, estate,
political subdivision, governmental agency, or other legal entity
recognized by law, applying for the construction of a telephone
distribution system in a subdivision.

BUILDING: A single structure roofed and enclosed within exterior
walls, built for permanent use, erected, framed of component
structural parts and unified in its entirety both physically and
in operation for single-family residential occupancy in a sub-
division (Definition excludes mobile homes).

SUBDIVISION: A lot, tract, or parcel of land divided into two or
more lots, plots, sites or other divisions for use for new resi-
dential buildings or the land on which is constructed new multiple-
occupancy buildings per a recorded plot thereof if such recordation
is required by law.

1.1.2 The Telephone Company upon receipt of the applicant's proper
application will install an underground telephone system with
suitable materials to assure that the applicant will receive
reasonably safe and adequate telephone service. The provision
of the underground telephone system will be provided at no charge
except where a charge is permitted under Paragraphs 1.1.4 and
1.1.6 of this section of the Tariff. Temporary service is
provided under Paragraph 1.1.5 of this section of the Tariff.

(1) This section is filed pursuant to and as required by the Commission
General Order No. 55, ordered in Case 17519, effective January 23, 1973.

Section 11
Original Sheet 3

BURIED FACILITIES FOR SUBDIVISIONS

1.1.3 RIGHTS-OF-WAY AND EASEMENTS

- JAN 25 1977
- A. Within the applicant's subdivision, the Telephone Company will construct, own, operate, and maintain underground telephone lines only along public streets, roads, and highways which the Telephone Company has the legal right to occupy, and on public lands and private property across which rights-of-way and easements satisfactory to the Telephone Company may be obtained without cost or need for condemnation by the Telephone Company.
- B. Rights-of-way and easements, within the subdivision, satisfactory to the Telephone Company, must be furnished by the applicant in reasonable time to meet construction and service requirements before the Telephone Company shall be required to commence its installation. Such rights-of-way and easements must be cleared of trees, tree stumps, and other obstructions and graded to within six inches of final grade, by applicant, at no charge to the Telephone Company. Such clearance and grading must be maintained by the applicant during construction by the Telephone Company.

1.1.4 ADVANCE PAYMENTS

- A. Where, due to the manner in which a subdivision is developed, the Telephone Company is required to construct an underground telephone distribution system through a section or sections of the subdivision where service will not be connected for at least two years, then the Telephone Company may require an advance payment equal to the estimated cost of construction from the applicant before construction is commenced, if in the judgment of the Telephone Company an advance is required under the above described conditions, the Telephone Company has the right to refuse installation of the underground system until the required advance is paid to the Telephone Company.

Section 11
Original Sheet 4

BURIED FACILITIES FOR SUBDIVISIONS

1.1.4 ADVANCE PAYMENTS (Continued)

- 1671 25 1077
- B. If an advance is required under these rules, then the advance, without interest, shall be returned to the applicant on a pro-rata basis as the permanent service connection is made to each building or multiple-occupancy building.
- C. Any portion of an advance remaining unrefunded ten years from the date the Telephone Company is first ready to render service with the extension will be retained by the Telephone Company and credited to the appropriate construction account.

1.1.5 TEMPORARY FACILITIES

- A. Temporary facilities may be installed to provide service when necessary, for a maximum period of one year.
- B. Where it is necessary to place temporary facilities in advance of the permanent underground telephone system in order to provide telephone service, the Telephone Company may require the applicant to pay the estimated non-recoverable costs of the temporary facilities. If the required costs under the above described conditions apply, the Telephone Company has the right to refuse installation of the temporary facilities until the required costs are paid to the Telephone Company.

1.1.6 SPECIAL CONDITIONS

- A. In circumstances, where the application of these rules appears impracticable or unjust to applicant or the Telephone Company, or discriminatory to other customers, e.g., difficult rock conditions, the Telephone Company or applicant shall refer the matter to the Missouri Public Service Commission for special ruling or for the approval of special conditions which may be mutually agreed upon prior to commencing construction.

TELEPHONE INSTRUMENTS

DEC 15 1982

(1) A. General

1. A telephone instrument consists of a transmitter, Missouri, network and associated apparatus which is directly wired or connected to station outlet by means of a cord terminating in a plug or standard plug.
2. The Company will offer what is commonly known as the "500" Type telephone instrument and the dial-in-handset type of telephone instrument, both in desk and wall models and in a number of standard colors. Type may be changed by the Company at its option.

B. Standard Telephones

	Monthly Rate
Telephone instruments, wall or desk, used as main stations or extentions, rotary dial	\$ 1.00
Touchbutton dial.....	\$ 1.40

C. Compact Telephones

These are telephone instruments of distinctive design, and are much smaller than the conventional sets. They have special features.

1. Compact telephone instrument with dial in handset (e.g., Trendline, Trimline, Slenderet, Styline, and such other manufacturer's trade names as may be available. Should a manufacturer discontinue, then the Company is not obligated to furnish such compact instruments.)
 - a. Regular move and change charges apply to the class and grade of service furnished; the installation is in addition to the normal service connection charges.

(1) Limited Availability. See Section 2, paragraph G, 1st Revised Sheet 9.

MISSOURI

DECORATOR TELEPHONES

Public Service Commission

A. General Regulations

1. Decorator Telephone Service provides distinctively styled telephone sets for one party residence, business and PBX customers.
2. The decorative enclosures supplied by the Telephone Company purchased by the customer are combined with Telephone Company-owned standard operating components assembled to function as a regular telephone set.
3. Under this offering, a customer purchases enclosures from the Telephone Company. The enclosures are available in a variety of design, colors and materials.
4. The Telephone Company retains ownership of the working components and is responsible for its maintenance. A customer may not sell, install, remove, or permit others except Telephone Company employees to install or remove components from enclosures.
5. The Telephone Company provides a LIMITED WARRANTY for the Decorator Telephone enclosure. The Telephone Company warrants the Decorator enclosure to be free from defects in design, material and workmanship for a period of three months from the date of delivery. The Telephone Company will repair or replace defective enclosures reported to the Telephone Company during that period at no charge.

CANCELLED
