TARIFF FORMAT

- A. Sheet Numbering Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the PSCM. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:

D. Check Sheets - When a tariff filing is made with the PSCM, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on file with the PSCM.

3.3 CUSTOM FEATURES

The features in this section are made available on an individual basis or as a part of feature packages. Custom features are offered on a monthly basis where facilities or interconnection arrangements are available.

- a. Anonymous Call Rejection ACR (*77) Allows customers to automatically reject all calls that have been marked anonymous, unavailable, or private by the calling party. When ACR is active, the called party receives no alerting (ringing) for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.
- Auto Redial Repeat Dialing. (*66) This feature automatically redials the last outgoing number dialed by the Customer. Activation and deactivation of this feature is completed by the Customer. Repeat Dialing will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.

Repeat Dialing (usage sensitive) is available on a pay-per-use basis, and the functionality is the same as Repeat Dialing. Repeat Dialing (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.3 CUSTOM FEATURES (Cont'd.)

- c. Call Forwarding Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the customer's access line and the distant access line to wJ.1ich the call was transferred.
- d. Call Forwarding (Busy Line) automatically reroutes an incoming call to a customer predesignated number when the called number is busy.
- e. Call Forwarding (No Answer) automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within the number of rings programmed by the Company.
- f. Call Forwarding (Busy Line/No Answer) provides for the automatic routing of incoming calls to a preselected telephone number when the called telephone number is busy and/or does not answer within a determined number of rings. When Call Forwarding service is provisioned in a central office, the pre-selected forwarded telephone number must be within the same central office control group. No assurance can be given that transmission will be fully satisfactory during Call Forwarding service calls.
- g. Call Forwarding (Remote Access To) Remote Access to Call Forwarding provides the Customer that is a subscriber of a Call Forwarding service with the ability to activate, deactivate or change Call Forwarding designations from a remote location. This service can only be accessed from a Dual Tone Multi-Frequency (DTMF) equipped telephone which has a full set of characters including "*,, and "#". All charges incurred to access the remote number will be billed appropriately. The transmission may not meet normal standards depending upon the distance and routing necessary.

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.3 CUSTOM FEATURES (Cont'd.)

h. Call Forwarding - (Selective) - Selective Call Forwarding provides the Customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The Customer can construct or modify a telephone number screening list. Incoming calls will be screened against the Customer's list and only those telephone calls from telephone numbers on the list will be forwarded. The Selective Call Forwarding Customer is responsible for the payment of charges (i.e., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion. The Customer must also subscribe to the Call Forwarding feature.

Subscribers to Selective Call Forwarding activate the service and construct or modify the screening list by dialing *63 and following the prompts. This service may be temporarily deactivated by dialing *83.

- i. Call Return (*69) This feature allows the Customer to automatically return the most recent incoming call, even if it is not answered. If the telephone number is busy, Call Return will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. This is accomplished by the Customer activating a code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions. The operability of this call back feature is dependent upon whether the caller's originating telephone number can be recognized, or not.
- h. Call Return (usage sensitive) is available on a pay per use basis and the functionality is the same as Call Return. Call Return (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.3 CUSTOM FEATURES (Cont'd.)

j. Call Trace - (Customer Originated) - Allows a customer to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening or harassing calls. A Call Trace may be activated at any time during or immediately following the call to be traced. The incoming call detail recorded by the Company showing the results of the trace (i.e., telephone number traced) will not be released to the customer. Such call detail shall be provided only to law enforcement authorities upon request. A trace cannot be successfully completed if the incoming call originates in a telephone central office not equipped for Call Trace Service.

At its option or upon receipt of a proper request from a law enforcement agency, the Company will set up a temporary tracing arrangement using Call Tracing at no charge to the customer when in the judgment of the Company or law enforcement agency, the unwanted call(s) present a serious threat of harm or destruction of property.

- k. Call Waiting This feature provides a tone signal that alerts the Customer talking on the line when a second call is incoming. A maximum of two calls may be in process at one time. A Customer who subscribes to Call Waiting can also inhibit the reception of the Call Waiting tone for the duration of a single call, preventing interruption of the call by activating the code (*70) to cancel Call Waiting. This functionality is automatically included with the Call Waiting feature at no additional cost to the Customer.
- 1. Call Waiting In (With Name and Number) Call Waiting ill with Name and Number is an enhanced version of Call Waiting ill. It is designed for use by a Call Waiting subscriber. A customer who is off-hook on an existing call, is able to receive the telephone number of a new incoming call on their customer provided premise equipment attached to the Customer's subscriber line. Additionally, the name found in the Company's records, applicable to the line originating the call, including the nonpublished and non-listed service is displayed on customer- provided premise equipment. The Customer must purchase the equipment separately, and it is not available under this tariff.

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.3 CUSTOM FEATURES (Cont'd.)

- m. Speed Dialing 8 This feature allows the Customer to reach a list of frequently called numbers by dialing an abbreviated code. The Customer may call up to eight pre-selected numbers by dialing one-digit codes. Programming of these numbers is completed by the Customer.
- n. Three-Way Calling Enables a customer to add a third party on an existing call without operator assistance, thereby establishing a three-way conversation. The transmission quality may vary depending on the distance and routing necessary and may not necessarily meet normal standards.

Three-Way Calling (usage sensitive) is available on a pay per use basis and the functionality is the same as Three-Way Calling. Three-Way Calling (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

- o. Caller In (Number Only) This feature automatically displays a caller's telephone number, including non-published and non-listed service on a customer provided display unit. The customer must purchase the equipment separately, and it is not available under this tariff.
- p. Caller ID (Name and Number) Allows the Customer to identify most callers by letting him/her see the names and phone numbers on special display equipment. The customer must purchase the equipment separately, and it is not available under this tariff.
- q. Caller ID Name and Number Blocking Per Line (*67) Any Company calling party may prevent the delivery of Calling Party Number and Calling Party Name to the called party by dialing an access code (*67 on their touch-tone pad or 1367 from a rotary telephone) immediately prior to placing a call. The access code will activate blocking on a per call basis.

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

3.3 CUSTOM FEATURES (Cont'd.)

- r. Priority Call Service (*61) This feature permits the Customer to preselect telephone numbers that can be given a distinctive alerting signal or ring. The Customer can create or change a list of telephone numbers by dialing an activation code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.
- s. Distinctive Ring Distinctive Ring allows a Customer to establish up to two telephone numbers on the same access line and to distinguish calls to each number by distinctive ringing patterns. The standard ringing pattern applies to the billing telephone number, while the dependent telephone number receives a distinctive ringing pattern for incoming calls. Distinctive Ring is available to single line residential customers where facilities are available.

When a Distinctive Ring Customer also subscribes to Call Waiting, incoming calls to the billing telephone number will activate the standard Call Waiting tone. Calls to dependent telephone number will activate a distinctive Call Waiting tone. When a Distinctive Ring Customer subscribes to any Call Forwarding service, the dependent telephone number may be forwarded to the same number as the billing telephone number or receive no forwarding treatment.

SECTION 3 - DESCRIPTION OF SERVICE (CONT'D.)

Customers may prevent the display of the calling number and name by activating Caller ill blocking.
- 3.4.5 Non-Listed Directory Listings Non-listed numbers are not listed in the Company's directories but are included in directory assistance records available to the general public.
- 3.4.6 Regulations Incoming calls will be completed by the Company only when the calling party places the call by dialing the telephone number. The Company will adhere to this practice notwithstanding any claim of emergency the calling party may present. The acceptance by the Company of the Customer's request to refrain from publishing his/her telephone number in the directory does not create any relationship or obligation, direct or indirect, to any other person than the Customer.

The Company's liability, if any, for its gross negligence or willful misconduct or the right of the Customer to seek any legal remedy available for the same is not limited by this tariff. In the absence of gross negligence or willful misconduct with respect to any claim or suit brought by, or other legal remedies available to, the Customer for damages associated with publishing the telephone number of non published service in the directory or disclosing said number to any person, the Company's liability, if any, shall not exceed the monthly charges which the Customer may have made for such unpublished service for the period during which the service was affected.
