Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

I teach biology and environmental science to high school and college students. I have found that young people overwhelmingly support renewable sources for our energy needs. It is these young people that pay the consequences of our continued dependence on fossil fuels for our energy.

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

I am part of the Rural Electric Cooperative and am pleased that they have taken the initiative to purchase energy from renewable sources. The positive affect of wind energy, for example, can be seen in the benefits received by the small towns in northwest Missouri. Witness their testimonies, and you can see how important renewable energy has become for their economy.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Mrs. Rosemarie Mier

Mar 26, 2010

Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

I'm writing to encourage you to implement Proposition C in ways that will be good for Missouri residents and for our environment. And so I'm hoping that you'll write rules that encourage, even require, utilities to put the highest priority on using whatever renewable energy is available to them whenever possible. That you'll have rules supporting energy projects of all sizes, so that solar energy is grown in a multitude of ways. That you'll promote the growth of renewable energy production inside the state of Missouri. This would provide more jobs, and could even position us as an exporter of solar energy equipment. Finally, I'm hoping that you'll include all utilities that operate within Missouri to the above rules and encouragements.

Implementing Proposition C in ways that maximize the use and production of renewable energy, specifically solar and wind, will in the long run benefit Missouri in a variety of ways. Please fashion such implementation in meaningful ways, keeping the needs of the majority of Missourians in mind as you work out the details of enforcing this Proposition.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Dr. Antonio Cutolo-Ring

Dear Missouri Public Service Commissioner,

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
 - * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
 - * encourages a good balance of small, medium, and large solar energy projects; and
 - * includes all investor-owned utilities.
- * Look at geothermal. An unending heat source of over 2000 degrees that will last an estimated 4 billion years is just below the surface of our entire State. We should be the State that no longer has to be "The Show Me State", but the one that says, "We'll Show You State" Geothermal can put us so far ahead of the rest of the country and even the world that our self sufficient energy system(s) will bring many to find out what they have to do to try to match us or copy our strenght's in power production. All this and electricity in 24 to 48 months after the first spade of dirt is turned. Consider, it is done with out a drop of carbon going into the air.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Mr. Ray Wallace

Mar 24, 2010

Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

As a lifelong Midwesterner, I'm especially concerned about the energy policies of this part of the country. I'm particularly interested in renewables after spending a few years in Germany and seeing how their environment, which isn't that much different than our own, was conducive to renewables and conservation.

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;

Mar 24, 2010

Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

Since I was one of the many volunteers who gathered signatures for Prop C, I was happy that the Missouri Clean Energy Initiative (Proposition C) passed in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on fossil fuels (coal and oil) and on nukes (the worst idea humans ever came up with).

My household is doing our part to increase our efficiency and to generate solar electricity to feed back into the grid. We did the energy audit, followed all their advice. We put in a 2 Kw PV grid tie system and installed a ground source heat pump.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy (NOT nuclear power!) over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Ms. Claire Garden

Mar 24, 2010

Missouri Public Service Commissioner

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

I retired from Kansas City Power & Light in 2005. I know they are working toward providing more clean energy. However every utility is a business and without clear rules it is hard for them to find the will to do expensive new projects, even very important ones. Clear government rules level the playing field between companies so no one is receiving an unfair business advantage.

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Subject: Support Clean Energy for Missouri

Dear Missouri Public Service Commissioner,

I was pleased to see the Missouri Clean Energy Initiative (Proposition C) pass in November 2008. This initiative will create new jobs for our state, save ratepayers money in energy bills, and reduce Missouri's dependence on imported fossil fuels such as coal.

To maximize Missouri's clean energy potential, I encourage you to pass rules that implement Prop C as the voters intended. Specifically, I ask you to be sure the renewable electricity standard (RES):

- * generates in-state development of renewable energy;
- * ensures that utilities maximize their use of renewable energy over non-renewable energy while impacting electric bills by less than 1 percent;
- * encourages a good balance of small, medium, and large solar energy projects; and
- * includes all investor-owned utilities.

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Ms. Suzy McShane

We need to do all possible to ensure CLEAN AIR for our children, as too many of them are developing asthma and related respiratory problems-as are their parents and grandparents. Clean air is life for everything on this planet!!

Please be sure to implement the RES in a way that maximizes Missouri's clean energy potential while creating local jobs and jump starting our economy.

Sincerely,
Mrs. Sandra Eppinger
