I cannot even find traditional landfills in the code anywhere. I agree that we may be able to liken this to a composting facility, due to the biodegradable nature of the waste, and have a CUP hearing on this. Hopefully this is going somewhere pretty desolate. I can only imagine the opposition to this we're going to have.

Joe

Joe,

I have a quick question for you. I just got out of a meeting with Ameren and they are proposing to put in a landfill (I don't think it is the traditional landfill, it is for ash deposits from the factory) in the Agricultural Non-Urban zoning district. I know we don't have any classifications for this but I was thinking it could possibly fall under composting facility, yard waste. If you could let me know your opinion on if this is a CUP or even allowed that would be great.

Thanks,

Mrs. Scottie C. Eagan
