Case No. ER-2006-0314

AFFIDAVIT OF STEVE M. TRAXLER

STATE OF MISSOURI)	
)	SS.
COUNTY OF COLE)	

Steve M. Traxler, of lawful age, on his oath states: that he has participated in the preparation of the foregoing Surrebuttal Testimony in question and answer form, consisting of 29 pages to be presented in the above case; that the answers in the foregoing Surrebuttal Testimony were given by him; that he has knowledge of the matters set forth in such answers; and that such matters are true and correct to the best of his knowledge and belief.

Steve M. Traxler

Subscribed and sworn to before me this 544 day of October 2004.

ASHLEY M. HARRISON My Commission Expires August 31, 2010 Cole County Commission #08399978

1	SURREBUTTAL TESTIMONY
2	OF
3	STEVE M. TRAXLER
4	KANSAS CITY POWER AND LIGHT COMPANY
5	CASE NO. ER-2006-0314
6	Q. Have you pre-filed direct testimony in this proceeding?
7	A. Yes, I have.
8	Q. What is the purpose of your rebuttal testimony?
9	A. My surrebuttal testimony will address the direct testimony of Kansas City
10	Power & Light Company (KCPL) witnesses Lorie Wright on the issues of Prepaid Pension
11	Asset, Tracking FAS 87 pension cost, Exclusion of SERP from FAS 87 pension cost,
12	Robert W. Hriszko and Michael W. Cline on the issue of Regulatory Plan Amortization and
13	Chris B. Giles and Michael M. Schnitzer on the issue of Off System Sales Margin.
14	EXECUTIVE SUMMARY
15	Q. Please summarize your surrebuttal on the issue of FAS 87 pension cost, the
16	Prepaid Pension Asset and exclusion of KCPL's Supplemental Executive Retirement Plan
17	(SERP) from FAS 87 pension cost.
18	A. The Staff became aware during its audit that the amounts reflected for FAS 87
19	pension cost and Prepaid Pension Asset in the Regulatory Plan Stipulation and Agreement
20	included amounts assignable to KCPL's joint partners in the latan and LaCgyne generating
21	stations. It is the Staff's position that these amounts should be reduced approximately 6.9% to
·	

ł

i

ł

eliminate the costs which are not related to providing service to KCPL's Missouri
 jurisdictional electric ratepayers.

The Staff has excluded KCPL's SERP cost from the tracking mechanism for FAS 87 pension cost because KCPL refuses to fund the amounts collected in rates. This violates the funding requirement of the pension tracking mechanism agreed to in the Regulatory Plan Stipulation and Agreement in Case No. ER-2005-0329.

Q. Please summarize your surrebuttal testimony on the issue of Regulatory Plan
Amortization:

9 A. The Staff is recommending three changes to its filed position on the
10 Regulatory Plan Amortization.

Staff is proposing a correction to the method used to allocate Great Plains Energy
 Inc.'s (GPE) long-term debt to KCPL's Missouri electric jurisdictional electric operations.

2) Consistent with the correction to the method used to allocate GPE's debt to KCPL,
an additional net balance sheet amount has been included in the Regulatory Plan Amortization
calculation to consider investment not reflected in KCPL's rate base.

3) Staff has revised the level of additional book depreciation (amortization) required to
meet the rating agency credit metrics addressed in the Regulatory Plan Stipulation and
Agreement.

19 It is Staff's belief at this time that these changes may eliminate the issue on how the20 Regulatory Plan Amortization should be calculated.

Q. Please summarize your surrebuttal testimony on the question raised in KCPL's
rebuttal whether a higher ROE represents the lower cost option for providing the necessary

cash flow required for maintaining KCPL's investment grade credit rating rather than the
 Regulatory Plan Amortization.

3 A. KCPL witnesses. Chris B Giles and Michael W. Cline both rely on an erroneous hypothetical example to assert that a higher ROE is more beneficial to ratepayers 4 5 than the Regulatory Plan Amortization for providing the cash flow required to maintain KCPL's investment grade credit rating. Staff has generated an EMS cost of service run under 6 7 both scenarios which reflects that both scenarios produce the same revenue requirement in the 8 first year of implementation. However, in all subsequent rate cases, ratepayers will pay lower 9 rates, under the Regulatory Plan Amortization scenario as a result of the rate base offset for 10 the Regulatory Plan Amortization which is provided for in the Regulatory Plan Stipulation 11 and Agreement in Case No. EO-2005-0329.

12 Q. Please summarize your surrebuttal testimony on the off-system sales margin
13 issue.

14 Α. The Commission's July 28, 2005, Report And Order and the agreed to 15 language in KCPL's Experimental Regulatory Plan Stipulation And Agreement, Case No. 16. EO-2005-0329, Section III.B.1.i., as amended by the July 26, 2005, Signatory Parties' 17 Response To Order Directing Filing specifically precludes KCPL from proposing any 18 adjustment in a rate case to remove any portion of its off-system sales margin. KCPL is 19 proposing a \$19 million (Total Company) reduction to its 2005 off-system sales margin for 20 the purpose of sharing the "risk" of off-system sales between customers and shareholders 21 (Giles direct, page 23, lines 17-19).

The "risk sharing" mechanism being proposed by KCPL is an assignment of \$19 million of the profit from off-system sales in 2005 to shareholders. Reducing the profit

from off-system sales in this fashion violates the Stipulation And Agreement in Case No.
 EO-2005-0329. Mr. Giles' rebuttal testimony continues to support an assignment of
 \$19 million of KCPL's 2005 margin (profit) on off-system sales to shareholders as an
 additional equity return.

5 <u>PREPAID PENSION ASSET – REGULATORY PLAN STIPULATION AND</u> 6 <u>AGREEMENT</u>

Q. What is the issue between KCPL and the Staff related to the Prepaid Pension
8 Asset to be included in Rate Base?

9 The Regulatory Plan Stipulation and Agreement approved in Case No. Α. EO-2005-0329 included specific ratemaking treatment for pension cost to be used in rate 10 cases filed between 2005 and 2010, the period covered by the Regulatory Plan. The pension 11 cost agreement included rate base recognition of a Prepaid Pension Asset representing 12 negative FAS 87 pension cost flowed back to KCPL ratepayers in prior years. KCPL witness 13 Lorie Wright is supporting a position on page 5, lines 18-23, of her surrebuttal testimony that 14 15 the amount of the Prepaid Pension Asset established in the Stipulation and Agreement, \$34,694,918 Missouri Jurisdictional, included both KCPL's share of the Prepaid Pension 16 17 Asset and also the share which is allocated to KCPL's partners in the Iatan and LaCygne 18 generating stations. KCPL's partners in the latan generating station are Aquila and Empire 19 District Electric Company (Empire). KCPL's partner in the LaCygne generating station is Westar Energy. Ms. Wright's position is that since the Prepaid Pension Asset identified in the 20 21 Stipulation and Agreement in Case No. EO-2005-0329 included pension cost for both KCPL and pension cost assignable to it's utility partners in the latan and LaCygne generating 22 23 stations, the same assumption should be used for ratemaking purposes not only in this case

ç

but also in subsequent rate cases between now and 2010. It is Staff's position that if the Prepaid Pension Asset amount established in the Regulatory Plan Stipulation and Agreement included pension cost amounts which are assignable to Aquila, Empire and Westar Energy it was erroneous. KCPL's rate base in this case should only reflect a Prepaid Pension Asset balance related solely to KCPL's Missouri jurisdictional electric operations.

Q. Were you the Staff member responsible for developing the pension cost
ratemaking treatment the parties who signed the Stipulation and Agreement in KCPL's
Regulatory Plan Case No. EO-2005-0329 ultimately agreed to?

А.

Yes I was.

9

Q. Was it your understanding the Prepaid Pension Asset KCPL provided in Case
 EO-2005-0329 related solely to KCPL's Missouri jurisdictional electric operations?

A Yes it was. The Staff would not recommend rate base treatment for a Prepaid Pension Asset which includes an amount that should be allocated to KCPL's partners in the Iatan and LaCygne generating stations. KCPL's ratepayers should not be forced to pay a return on investment included in rate base which should be assigned to the ratepayers of Aquila, Empire and Western Resources.

Q. What percentage of the Prepaid Pension Asset included in the Stipulation and
Agreement in Case No. EO-2005-0329 has Staff assigned to KCPL's operating partners in the
Iatan and LaCygne generating stations in this case?

A. Staff has allocated approximately 6.9% of KCPL's pension cost to KCPL's
joint partners. This allocation percentage will be trued up in the true-up audit consistent with
KCPL's allocation of payroll costs to its joint partners.

Q. Is KCPL's position regarding rate base treatment for a Prepaid Pension Asset which includes pension cost assignable to KCPL's joint partners consistent with the intent of the Regulatory Plan Stipulation and Agreement in Case No. EO-2005-0329?

A. No. The Stipulation and Agreement in Case No. EO-2005-0329 was intended
to address KCPL's Missouri electric operations. Recognition of a Prepaid Pension Asset
which includes the share of KCPL's pension costs assignable to Aquila, Empire and Westar
Energy was clearly not intended by the Regulatory Plan Stipulation and Agreement.

8 <u>TRACKING FAS 87 PENSION COST – REGULATORY PLAN STIPULATION AND</u> 9 <u>AGREEMENT</u>

10

11

1

2

3

Q. Is there a similar issue between the Staff and KCPL regarding FAS 87 pension cost recognized for tracking purposes in the Regulatory Plan Stipulation and Agreement?

12 Yes. The method agreed to for tracking KCPL's actual FAS 87 pension cost Α. against the FAS 87 included in rates required identifying the amount of annual pension cost 13 being recovered in KCPL's existing rates. Any difference between KCPL's annual FAS 87 14 costs and the level included in existing rates is tracked, accounted for as a regulatory asset or 15 16 liability, included in rate base and amortized to cost of service over 5 years in KCPL's next 17 rate case. A \$22 million amount was included in the Stipulation and Agreement representing 18 what Staff believed to be KCPL's 2004 FAS 87 pension cost for its total company electric 19 operations. Staff is now aware that the \$22 million FAS 87 amount KCPL provided in that 20 case also included an amount assignable to its utility partners in the latan and LaCygne 21 generating stations. KCPL's witness, Ms. Wright is supporting a position on page 7, lines 22 16-21, in her rebuttal testimony that the \$22 million amount included in the Regulatory Plan

Stipulation and Agreement should not be adjusted to remove the 6.9% share assignable to
 KCPL's latan and LaCygne partners.

Q. Were you aware that the \$22 million FAS 87 pension cost, provided by KCPL in Case No. EO-2005-0329, included an amount which should be assigned to KCPL's partners in the Iatan and LaCygne generating stations?

A. No. It was Staff's understanding that the \$22 million FAS 87 pension cost
amount represented KCPL's 2004 total company pension cost prior to allocation to the
Missouri, Kansas and FERC jurisdictions. There is no logical rationale for tracking a FAS 87
pension cost which included pension cost assignable to the ratepayers of Aquila, Empire and
Western Resources – KCPL's joint utility partners. The Stipulation and Agreement in Case
No. ER-2005-0329 was intended to apply solely to KCPL's Missouri jurisdictional electric
ratepayers.

Q. What adjustment is necessary to correct the \$22 million FAS 87 cost in order
to determine the correct result under the tracking mechanism?

A. Like the Prepaid Pension Asset previously discussed, the \$22 million starting
point for the tracking mechanism must be reduced by approximately 6.9% to eliminate the
amount assignable to KCPL's joint partners, Aquila, Empire and Westar Energy.

18 <u>EXCLUSION OF SUPPLEMENTAL EXECUTIVE RETIREMENT PLAN FROM FAS</u> 19 87 PENSION COST

Q. What issue is KCPL raising regarding the cost of its Supplemental Executive
Retirement Plan (SERP)?

A. As previously stated, in order to implement the tracking mechanism for tracking KCPL's annual FAS 87 pension costs, the FAS 87 pension cost in existing rates,

must be identified as starting point. On page 7, lines 7-11, of her rebuttal testimony, Ms. Wright states that it is KCPL's belief that the \$22 million FAS 87 pension cost, representing the level being recovered in existing rates, included the cost of KCPL's SERP plan and, therefore, the FAS 87 pension cost determined in this case and subsequent cases should include the annual cost of the SERP.

Q. Why is Staff opposed to including the cost of the SERP for purposes of
tracking KCPL's FAS 87 pension cost in accordance with the method Staff agreed to in the
Regulatory Plan Stipulation and Agreement in Case No. EO-2005-0329?

9

10

11

A. The method developed by the Staff for tracking KCPL's FAS 87 pension cost was based upon three fundamental principals listed below. The second principle applies to the issue regarding whether the SERP should be included in KCPL's FAS 87 pension cost.

12 1) The FAS 87 pension cost collected in rates would be used first to amortize the
 existing Prepaid Pension Asset, previously discussed, representing negative pension cost
 under FAS 87 that had been flowed back to KCPL ratepayers in prior years.

2) Annual FAS 87 pension costs which exceed the statutory funding requirement
under ERISA regulations must also be funded into the pension fund. This ensures that all
pension cost collected in rates are used for funding KCPL's pension obligation after recovery
of the Prepaid Pension Asset addressed in 1) has been accomplished.

3) After the Prepaid Pension Asset has been fully amortized, the difference between
KCPL's annual FAS 87 pension cost and the annual level reflected in existing rates will be
tracked and treated as a regulatory asset or liability and included in rate base and amortized in
subsequent rate cases until fully recovered by KCPL (regulatory asset) or returned to
ratepayers (regulatory liability).

ļ

1

I

1

į

ī

l i

ł

!

ļ

ł

-

1	The only reason, the Staff is opposing including the SERP cost in KCPL's annual
2	FAS 87 cost is because they are refusing to fund the SERP cost collected in rates. Unlike
3	KCPL's normal defined benefit pension plan which has statutory funding requirements under
4	ERISA regulations, the SERP is a supplemental plan for higher paid executives which is not
5	covered by ERISA funding requirements. KCPL must agree to fund the FAS 87 costs
6	collected in rates. As soon as KCPL makes a commitment to fund the FAS 87 SERP costs,
7	as required for all other FAS 87 costs collected in rates under the method stipulated to in Case
8	No. EO-2005-0329, this issue will be resolved.
9	Q. By excluding KCPL's SERP cost from the annual level of FAS 87 pension
10	cost, is Staff precluding rate recovery of SERP cost in rates?
11	A. No. Rather than recover the cost under the accrual accounting method,
12	FAS 87, the Staff has included an average of the SERP benefit payments KCPL has actually
13	made.
14	Q. Is the treatment of the SERP cost recommended by the Staff for KCPL
15	consistent with the ratemaking treatment the Staff has used for other electric utility companies
16	in Missouri including Aquila and The Empire District Electric Company (Empire)?
17	A. Yes. The Staff has consistently opposed recognition of SERP costs in rates
18	using the FAS 87 accrual accounting method unless the utility agrees to fund the amounts
19	collected. In addition, the pension cost tracking mechanisms currently in effect for Aquila
20	and Empire exclude the FAS 87 cost for a SERP consistent with Staff's recommendation for
21	KCPL.

TRACKING MECHANISM FOR FAS 88 PENSION COSTS 1 2 Q. On page 8, lines 5-6, of her rebuttal testimony Ms Wright states the Staff has 3 made no recommendation regarding KCPL's deferred accounting treatment for pension cost 4 recognized under FAS 88. What are pension costs under FAS 88? 5 Α. FAS 88 - Employers accounting for Settlement and Curtailments of Defined 6 Benefit Pension Plans and for Termination Benefits, relates to the settlement or curtailment of 7 benefits under a defined benefit pension plan. 8 Q. What is a curtailment under FAS 88? 9 When the services of a significant number of employees are terminated earlier Α. than expected, a curtailment occurs under FAS 88. Any unrecognized prior service cost 10 11 related to the remaining expected future service lives which have been eliminated must be recognized immediately. KCPL will b required to recognize a FAS 88 pension cost in late 12 13 2006 as a result of the early retirement program currently in place. What ratemaking treatment is KCPL requesting for FAS 88 costs? 14 Q. 15 It is the Staff's understanding that KCPL witness, Terry Bassham, is A. 16 requesting deferred accounting treatment for FAS 88 costs similar to the method in place for 17 tracking of FAS 87 pension costs agreed to in the Regulatory Plan Stipulation and Agreement 18 in Case No. EO-2005-0329. He addresses his proposed treatment for FAS 88 costs on pages 19 10 and 11, of his direct testimony. 20 Q. Has KCPL requested deferred accounting treatment for FAS 88 costs in any 21 other case pending before this Commission? 22 Α. Yes KCPL's filing in docket EU-2006-0560 is a request for deferred 23 accounting treatment for FAS 88 costs.

.

,

ł

.

1

.

1	1 Q. What is the Staff's position regarding KCPL's r	equest for deferred accounting
2	2 treatment for FAS 88 pension cost?	
3	3 A. FAS 88 costs are legitimate pension costs which	h should be recovered in rates.
4	4 Staff is agreeable to deferred accounting treatment and tracking	g of FAS 88 costs between rate
5	5 cases with the following understanding:	
6	6 1) Any FAS 88 costs deferred and subject to recover	y in a future rate case should
7	7 include only the costs related to Mo. jurisdictional electric oper	ations and exclude all amounts
8	8 assignable to KCPL's joint partners;	
9	9 2) Consistent with the Stipulation and Agreement in	KCPL's Regulatory Plan Case
10	10 No. ER 2005-0329, KCPL will be required to fund all FAS	88 pension costs collected in
11	11 rates; and	
12	12 3) The difference between KCPL's annual FAS 88 co	sts and the amount included in
13	13 existing rates will be accounted for as a regulatory asset or liab	bility, included in rate base and
14	14 amortized over 5 years in KCPL's next rate case.	
15	15 Q. If the Staff and KCPL agree to the terms yo	u set in your previous answer
16	16 would the Commission need to address this issue in Case EU 2	006-0560?
17	17 A. In Staff's view it would not.	
10		
18	18 REGULATORY PLAN AMORTIZATION	
19	19 Q. What is the purpose of your surrebuttal testin	nony regarding the Regulatory
20	20 Plan Amortization?	
21	A. My surrebuttal testimony will address the	rebuttal testimony of KCPL
22	22 witnesses Robert W. Hriszko and Michael W. Cline.	

Q. On page 3, lines 3-15, Mr. Hriszko states that the purpose of his rebuttal testimony is to rebut the contention of the Staff that KCPL is not entitled to tax gross-up on an Regulatory Plan Amortization provided for in the Regulatory Plan Stipulation and Agreement for the purpose of providing sufficient cash flow for maintaining KCPL's debt at investment grade.

- Has the Staff changed its position since its direct filing regarding the calculation of the
 Regulatory Plan Amortization?
- 8 A. Yes. The Staff is recommending three changes to its filed position regarding
 9 the calculation of the Regulatory Plan Amortization:

1) The Stipulation and Agreement in Case No. EO-2005-0329 included a sample 10 calculation for the Regulatory Plan Amortization as Attachment 1 to Appendix F. This 11 12 calculation method was used by the Staff for the purpose of calculating the Regulatory Plan 13 Amortization addressed in my direct testimony. Subsequent to the filing of direct testimony, 14 Staff discovered an error in how the long term debt, included in the capital structure for Great Plains Energy (GPE), was allocated to KCPL's Missouri jurisdictional electric operations. 15 Staff is recommending a correction to the method used for allocating GPE's long term debt to 16 17 KCPL's Missouri jurisdictional electric operations.

2) Consistent with Staff's belief that the two debt coverage credit metrics, addressed in
the Regulatory Plan Stipulation and Agreement, are intended to cover all of KCPL's assets
supported by debt, Staff is recommending that an additional net investment be included in the
Regulatory Plan Amortization calculation to recognize KCPL's net investment not included in
rate base. The primary additional investment included in this calculation is KCPL's
investment in Construction Work in Progress (CWIP).

- 3) Staff has revised the level of additional Book Depreciation required to meet the
 cash flow required for the Funds From Operations (FFO) as a percent of debt credit metric.
- Q. What change is Staff recommending for allocating GPE's long term debt to
 KCPL's Missouri jurisdictional electric operations for purposes of calculating the Regulatory
 Plan Amortization?

6 Attachment 1 to Appendix F of the Regulatory Plan Stipulation and Agreement Α. 7 allocated GPE's long term debt to KCPL's Missouri jurisdictional electric operations by 8 multiplying GPE's total long term debt balance by KCPL's Missouri jurisdictional allocation 9 factor for plant in service. GPE's capital structure supports KCPL's electric operations and the operations of its non-regulated subsidiary, Strategic Energy. This method of assigning 10 11 GPE's long term debt balance to KCPL's Missouri jurisdictional electric operations resulted in a long term debt balance allocated to KCPL which related to KCPL's electric operations 12 13 and the operations of GPE's non-regulated subsidiary, Strategic Energy. To eliminate any 14 debt assignment to KCPL related to Strategic Energy, Staff is proposing to apply GPE's long 15 term debt ratio to KCPL's Mo., jurisdictional rate base plus the additional net investment on 16 KCPL's balance sheet not reflected in rate base, previously discussed.

- Q. Has Staff made a more current calculation to determine the increase in book
 depreciation required to provide KCPL the opportunity to meet the cash flow required by the
 two credit metrics addressed in the Regulatory Plan Stipulation and Agreement?
- A. Yes. Staff has recomputed the increase in book depreciation required to provide the additional cash flow required to meet the rating agency credit metrics addressed in the Regulatory Plan Stipulation and Agreement. Staff's current revenue requirement, under a traditional cost of service approach, is a revenue excess of \$34.5 million. Staff has calculated

that an increase in book depreciation equal to \$86.2 million is required to give KCPL the opportunity of meeting the cash flow requirements of the rating agency credit metrics. Consistent with any increase in book depreciation, KCPL will recognize a corresponding increase in the straight line tax depreciation deduction used in calculating deferred income tax. The net increase in book depreciation recovery will provide the opportunity for the aftertax cash flow required to meet the rating agency credit metrics.

Q. Have you prepared a calculation of Attachment 1 to Appendix F which reflects
the Staff's current recommended revenue increase for KCPL including the additional increase
in book depreciation required to meet the cash flow requirements of the rating agency credit
metrics?

- A. Yes, attached as Schedule 1 to this surrebuttal testimony, is a calculation of the cash flow requirements of the rating agency credit metrics based upon Staff's current revenue requirement excess of \$34.5 with an additional \$86.2 in book depreciation and corresponding increase in the straight line tax depreciation deduction used calculating deferred income tax. The net result is a recommended revenue requirement increase of \$52.1 million.
- 16

Q. Does Schedule 1 reflect a need for any additional amortization?

A. No. Line 31, Funds From Operations (FFO) is reflected at \$0 in the middle
column, labeled Jurisdictional Adjustments. This indicates that Staff's current revenue
requirement for KCPL, \$52.1 million, provides sufficient cash flow required by the rating
agency credit metrics calculated on Schedule 1.

Q. Will the Staff's recommended rate increase for KCPL which includes the
increase in book depreciation required for the Regulatory Plan Amortization change based
upon the results of the Staff's true-up audit?

A. Yes, it will.

2 <u>HIGHER ROE VS. REGULATORY PLAN AMORTIZATION FOR MEETING</u> 3 <u>CREDIT METRICS</u>

4

1

Q What is the purpose of this section of your surrebuttal testimony?

5 Α. KCPL witness, Michael W. Cline in his rebuttal testimony asserts that using an 6 Amortization, allowed under the Regulatory Plan Stipulation and Agreement, for providing 7 the necessary cash flow required for rating agency credit metrics, is less favorable to 8 ratepayers that providing the additional cash flow by raising the allowed return on equity 9 (ROE). He also takes exception to a statement in my direct testimony that KCPL has an 10 incentive to maximize its ROE for the purpose of avoiding a Regulatory Plan Amortization. KCPL witness Chris B. Giles also suggests that using a higher ROE is a lower cost method 11 12 than using a Regulatory Plan Amortization for the purpose of providing the required cash 13 flow to maintain KCPL's credit rating. My surrebuttal testimony will address the rebuttal testimony of Mr. Cline and Mr. Giles on these issues. 14

Q. On page 2, lines 14-15, of his rebuttal testimony, Mr. Cline expresses disagreement with a statement in your direct that "KCPL has an incentive to maximize its requested return on equity, for the purpose of avoiding an amortization, resulting from the financial benchmark ratio analysis." Is your statement still accurate?

A. Yes it is. Under the Stipulation and Agreement approved in Case No. EO
2005-0329, any Regulatory Plan Amortization included in cost of service will be used as a
reduction to rate base in any subsequent rate case. This ratemaking treatment allows
ratepayers to earn a return on the additional cash flow provided for the purpose of maintaining
KCPL's investment grade credit rating. Conversely, if a higher ROE is used to provide the

additional cash flow required to maintain KCPL's credit rating, there is no reduction to
KCPL's rate base in future cases which results in higher earnings. In summary it is a
mathematical certainty that if a higher ROE is used in this case in lieu of a Regulatory Plan
Amortization for purposes of providing the cash flow for maintaining KCPL's credit rating,
ratepayers will pay higher rates in all subsequent rates filed by KCPL.

Q. Can KCPL's recommended treatment on Off System Sales Margin be fairly
characterized as an attempt to maximize ROE in this case?

- A. Yes it can. KCPL's proposed adjustment to reduce the margin of off system
 sales by \$19 million results in a revenue requirement increase of \$9.8 million for KCPL's
 Missouri jurisdictional electric ratepayers. In response to a question in Staff Data Request
 No. 213.1 (attached as Schedule 1-3 to my rebuttal testimony) as to whether KCPL's
 proposed adjustment reducing the margin from off system sales was a substitute for
 requesting a higher ROE, KCPL witness Chris Giles answered "Yes".
- Q. On page 5, lines 1-3, of the rebuttal testimony of KCPL witness,
 Michael W. Cline he states, "Ratepayers are disadvantaged in the short-run if a high level of
 cash flow for financing is provided through Additional Amortization rather than the cash
 being sourced through traditional ratemaking." Is this an accurate statement?
- A. Certainly not. This statement suggests that ratepayers are better off in the short
 run if a higher ROE is used for providing the cash flow to maintain KCPL's credit rating
 rather than use a Regulatory Plan Amortization to generate the required cash flow. Mr. Cline
 attempts to support this erroneous conclusion using a "hypothetical "example reflected on
 Schedule MWC-3 attached to his rebuttal testimony.

Q. Does the example on Mr. Cline's Schedule MWC-3 reflect the "reality" of using a higher return on equity in lieu of an additional amortization for the purpose of meeting the cash flow required by the rating agency credit metrics addressed in the Regulatory Plan Stipulation and Agreement in Case No. ER-2005-0329?

A. Certainly not. Mr. Cline asserts, incorrectly, that using a Regulatory Plan Amortization in lieu of a higher return on equity (ROE) results in a revenue requirement which is 300% greater than the scenario based upon a higher ROE. "The revenue requirement in the second scenario is over 300% greater than that of the scenario with no Additional Amortizations." (Cline rebuttal, page 5, lines 10-12). The "reality" of implementing either scenario in this rate case is that **both** result in the **same** revenue requirement if implemented in this case, ER-2006-0314.

12

Q.

Why would both scenarios result in the same revenue requirement in this case?

13 The revenue requirement for KCPL in this case and all subsequent rate cases Α. 14 between now and 2010, the period covered by the Regulatory Plan, is driven by the cash flow 15 required to meet two credit metrics necessary for maintaining KCPL's investment grade credit 16 rating. The cash flow required to meet the two credit metrics does not change depending on 17 whether you use a higher ROE or a Regulatory Plan Amortization for purposes of addressing 18 a cash flow deficiency. Mr. Cline's hypothetical example on Schedule MWC-3 reflects the 19 erroneous result that KCPL's revenue requirement is significantly less, 300%, if a higher ROE 20 is used in lieu of an additional amortization provided by the Regulatory Plan Stipulation and 21 Agreement. As stated previously, Mr. Cline's conclusion completely ignores the "reality" of 22 implementing either method in this case for meeting the cash flow required for meeting credit 23 metrics necessary for maintaining KCPL's investment grade credit rating.

Q. What is the best way to demonstrate that KCPL's revenue requirement in this case will be the **same** whether a higher ROE or alternatively a Regulatory Plan Amortization is used for the purpose of providing sufficient cash flow to meet the rating agency credit metrics?

A. The obvious way is to calculate KCPL's revenue requirement under both
approaches and run the results through the spreadsheet used to calculate the need for any
additional amortization, Attachment 1 to Appendix F to the Regulatory Plan Stipulation and
Agreement.

Q. What increase in KCPL's existing rates is necessary for meeting the cash flow
required for meeting the rating agency credit metrics addressed in the Regulatory Plan
Stipulation and Agreement?

The Staff's current cost of service calculation, under a traditional cost of 12 Α. service approach is an excess revenue requirement, or, otherwise stated, over earnings of 13 \$34 million. When this result is run through the credit metric cash flow calculation the result 14 reflects a need for a Regulatory Plan Amortization of \$86 million to meet the cash flow 15 required by the two credit metrics. This results in a net revenue requirement increase of 16 \$52 million (\$86 million - \$34 million). I have prepared a cost of service EMS run 17 (Scenario 1) which reflects a \$52 million revenue requirement assuming an \$86 million 18 Regulatory Plan Amortization. Attached as Schedules 2 and 3 is a copy of Accounting 19 Schedule 1 - Revenue Requirement from Staff's EMS run and a copy of Staff's weighted cost 20 of capital calculation based upon a midpoint ROE of 9.37%. 21

22

23

Q. Have you also prepared an additional cost of service EMS run which produces the same \$52 million revenue requirement using a higher ROE in Staff's weighted cost of

capital (Scenario 2) in lieu of the \$86 million Regulatory Plan Amortization used in l 2 Scenario 1?

> A. Yes.

3

4

What ROE assumption is required in Staff's cost of service EMS run to Q. generate a \$ 52 million revenue requirement for KCPL in that case? 5

An ROE assumption of 17.92% is required to generate the identical 6 Α. \$52 million revenue requirement necessary for meeting the cash flow requirements of the 7 rating agency credit metrics. Attached as Schedules 4 and 5 is a copy of Accounting 8 Schedule 1 - Revenue Requirement from the Staff's EMS run and a copy of Staff's weighted 9 cost of capital calculation using a midpoint ROE of 17.92%. All of the other accounting 10 schedules in the two EMS cost of service runs are being provided as work papers supporting 11 12 this surrebuttal testimony.

Based upon the results of the two cost of service calculations, Scenario 1 -13 Q. Regulatory Plan Amortization and Scenario 2 - ROE = 17.9%, are ratepayers better off under 14 the higher ROE scenario than the Regulatory Plan Amortization scenario in the first year that 15 16 rates established in this case are in effect?

No. Ratepayers are indifferent in year 1 as to whether a higher ROE is used in 17 Α. lieu of a Regulatory Plan Amortization for purposes of providing the necessary cash flow to 18 meet the rating agency credit metrics. This result demonstrates that Mr. Cline's first year 19 result showing a 300% savings from the higher ROE assumption is erroneous because it does 20 not reflect the reality of implementing either scenario in this rate case. 21

22 Does Mr. Cline's testimony or Schedule MWC-3 address the impact on Q. ratepayers for both scenarios beyond year 1? 23

A. No. Mr. Cline's failure to address the difference in impact on ratepayers after year 1 is more misleading than the erroneous conclusion reflected for the first year of implementing both scenarios on his Schedule MWC-3.

Q. What is the impact on KCPL's ratepayers after year 1 resulting from using the
Regulatory Plan Amortization for meeting KCPL's cash flow requirements in lieu of a higher
ROE?

Under the Regulatory Plan Stipulation and Agreement, any Regulatory Plan 7 Α. Amortization used for setting rates will be used as an offset (reduction) to KCPL's rate base 8 in subsequent rate cases. The reduction to rate base, under the Regulatory Plan Amortization 9 scenario in KCPL's next rate case will be approximately \$53 million after considering the 10 reduction in deferred taxes that results from any increase in book depreciation (regulatory 11 plan amortization). Using Staff's recommended midpoint rate of return in this case, grossed 12 up for taxes to 10.96%, ratepayers will benefit from an annual revenue requirement reduction 13 of \$5.8 million in all rate cases filed after year 1 under the Amortization Scenario 1. 14 Alternatively, under the higher ROE Scenario 2, ratepayers will pay an additional \$5.8 15 million in rates set in rate cases, filed by KCPL after year 1, if Mr. Cline's recommended use 16 of a higher ROE scenario is adopted by the Commission in this case. 17

Q. Does KCPL witness Giles also assert that a higher ROE is less costly to ratepayers than a Regulatory Plan Amortization for providing the cash flow necessary to maintain KCPL's investment grade credit rating?

A. Yes. On page 12, lines 1-4 of his rebuttal testimony, Mr. Giles makes the
following statement:

0.

As I indicated in the introduction to my rebuttal testimony, the concept of additional amortization was a means to assure the credit community that KCPL would be able to achieve sufficient cash flow to maintain its credit rating. It is not a lower cost method of financing than equity as shown in the rebuttal testimony of Mr. Michael Cline." (Emphasis added)

Mr. Giles is relying on the same erroneous analysis as Mr. Cline to support his statement.

9

1

2

3

4

5

6

7

8

Please summarize your testimony on this section of your surrebuttal testimony.

Mr. Cline and Mr. Giles are asserting that ratepayers are better off (pay lower Α. 10 rates) if a higher ROE is used to provide the cash flow required for maintaining KCPL's 11 investment grade credit rating in lieu of using a Regulatory Plan Amortization. As previously 12 discussed the Staff has generated two EMS run results which reflect implementation of 13 Scenario 1 - Regulatory Plan Amortization and Scenario 2 - Higher ROE. The results of the 14 two EMS cost of service runs indicate that the revenue requirement is identical in year 1 15 which exposes the fallacy in the conclusion reached by Mr. Cline that the higher ROE 16 scenario resulted in a 300% savings to ratepayers in year 1. The hypothetical example used 17 by Mr. Cline does not reflect a realistic implementation of the two scenarios for purposes of 18 setting rates in this case. 19

More importantly the assertions by Mr. Cline and Mr. Giles **fail to mention** the revenue requirement impact on ratepayers in all rate cases **after** year 1. As stated above, under a Regulatory Plan Amortization scenario, ratepayers will benefit from lower rates in subsequent rate cases as a result of the reduction to rate base provided under the Regulatory Plan Stipulation and Agreement.

All arguments by KCPL for adoption of the highest ROE proposed in this case on the premise that the higher ROE is "less costly" to ratepayers than a Regulatory Plan

Amortization, for purposes of providing the necessary cash flow for maintaining KCPL's
 credit rating should be rejected.

3

NON-FIRM OFF-SYSTEM SALES MARGIN

4

Q. What is the purpose of this section of your surrebuttal testimony?

A. My surrebuttal testimony in this section will address the rebuttal testimony of
KCPL witness Chris B. Giles and Michael M. Schnitzer on the issue of the level of off-system
sales margin to be included in KCPL's cost of service in this case.

- Q. How is Mr. Schnitzer's rebuttal testimony related to the disagreement between
 the Staff and KCPL regarding the appropriate level of off system sales margin to be reflected
 in KCPL's cost of service for this case?
- As explained on page 8, line 25, and continuing on page 9, through line 10, of 11 Α. my rebuttal testimony, Mr. Schnitzer was retained by KCPL for the purpose of performing a 12 risk analysis of the off-system sales market based upon projected assumptions through year 13 end 2007. The results of Mr.Schnitzer's analysis are summarized on schedules which reflect 14 the probability of occurrence for various levels of off-system sales margin. KCPL witness 15 Chris Giles sponsored direct testimony supporting KCPL's cost of service recognition of 16 ** _____** million in off-system sales margin which represented the 25th percentile in 17 Mr. Schnitzer's analysis reflected on Schedule MMS-5 of his direct testimony. 18 Mr. Schnitzer's rebuttal testimony addresses updating his analysis for changes in data as of 19 20 June 30, 2006.

Q. Has KCPL changed its position of selecting Mr. Schnitzer's projected level of
 off-system sales margin based upon the 25th percentile reflected on Mr. Schnitzer's updated
 analysis attached as Schedules MMS-8 and MMS-9 to his rebuttal testimony?

.

!

1	A. No. On page 5, of his rebuttal testimony, Mr. Giles identifies KCPL's updated
2	position of including **** million in off-system sales margin in cost of service for this
3	case. The ** ** million level replaces the ** ** million level recommendation in
4	Mr. Giles direct testimony.
5	Q. What is the probability of occurrence associated with the \$79 million off-
6	system sales margin selected by KCPL for its June 30 updated cost of service?
7	A. The 25 th percentile equates to a 75% probability that KCPL's actual 2007 off-
8	system sales margin will exceed the ** ** million level used for setting rates in this case
9	under KCPL's proposal.
10	Q. What is the median or 50 percentile off-system sales level in Mr. Schnitzer's
11	updated risk analysis?
12	A. The median value has remained unchanged at ** ** million in
13	Mr. Schnitzer's updated risk analysis. The median value, ** ** million has a 50%
14	probability of being higher than KCPL's actual off-system sales margin in 2007 and a 50%
15	probability of being lower than KCPL's actual off-system sales level in 2007.
16	Q. On page 3, of his rebuttal testimony, Mr. Schnitzer identifies three significant
17	changes which have occurred since his January 2006 analysis. Does Staff have concerns with
18	Mr. Schnitzer's recognition of any of these changes?
19	A. Yes. Beginning on page 3, line 22, and continuing on page 4, through line 10,
20	Mr. Schnitzer identifies a new 50 MW capacity sale contract that KCPL has negotiated.
21	Q. How does the recognition of the new 50 MW capacity sale contract impact
22	Mr. Schnitzer's projected off-system sales margin analysis?

Mr. Schnitzer identifies the impact of recognizing the reduction in available Α. 1 2 capacity on projected levels of off-system sales margin on page 4, lines 6-8, of his rebuttal 3 testimony: The effect of the MJMEUC sale is to decrease the number of MWH's 4 5 available for sale off-system, and hence to decrease the projected Off-System Contribution Margin. However, thus is *partially* offset by an 6 approximately 300,000 MWH reduction in forecast native load 7 obligations. (emphasis added) 8 9 Q. Does Staff have a concern regarding Mr. Schnitzer's recognition of the 10 reduction in available capacity as a result of the new MJMEUC capacity sale contract? Mr. Schnitzer's testimony does not identify the effective date of the 50 MW 11 A. capacity sale contract. However, Staff is fairly certain that the effective date of the contract 12 13 occurs sometime after the September 30, 2006, true-up date agreed to by the signatory Parties to the Regulatory Plan Stipulation and Agreement. Mr. Schnitzer's projected off-system sales 14 15 margins have been reduced by recognizing the 50 MW capacity sale contract even with the offsetting reduction in projected native load. This 50MW capacity sale contract causes a 16 17 material mismatch in KCPL's revenue requirement unless there is consistent cost of service 18 recognition for both 1) the reduction in **non-firm** off-system sales margin and 2) the increase 19 in the **firm** off-system margin from the new capacity sale contract with MJMEUC. How can the mismatch in KCPL's cost of service be avoided? 20 Q. The mismatch that will result if only one of the two impacts on KCPL's cost of 21 Α. 22 service is recognized can be avoided in two scenarios: 23 1) Since the 50 MW capacity sale contract occurs beyond the September 30, 2006, 24 true-up date for this case, a mismatch in KCPL's cost of service can be avoided if Mr. Schnitzer runs his analysis without recognizing the 50 MW reduction in available 25 capacity resulting from the capacity sale contract and without recognizing the offsetting 26

projected reduction in native load obligations. Under this approach, no mismatch in KCPL's
 cost of service would occur because both future impacts of the capacity sale would be
 excluded from KCPL's cost of service. The Staff considers this to be the best approach
 because it is not intended under the Regulatory Plan Stipulation and Agreement that KCPL's
 cost of service be based upon events which occur after the 9/30/2006 true-up date.

2) The mismatch in KCPL's cost of service can also be avoided by using the opposite
approach. If the reduction in non-firm off system sales margin, resulting from the reduction in
available capacity, is recognized in cost of service consistent with KCPL's rebuttal testimony,
then the projected increase in firm off-system margin resulting from the new 50MW firm
capacity contract should also be reflected in KCPL's cost of service.

Q. Have you requested KCPL to have Mr. Schnitzer update his analysis to
exclude both the reduction in capacity from the 50 MW capacity sale contract and an
offsetting reduction in forecast native load?

A. Yes. Staff may file a request for supplemental testimony depending on theresults of the updated analysis.

Q. On page 4, lines 4-5, of his rebuttal testimony, Mr. Giles makes the following
statement regarding the margin on off-system sales, "These sales benefit retail customers
because the margin from those sales is a reduction to KCPL's retail revenue requirement." Is
the benefit identified by Mr. Giles intended to be protected by the Regulatory Plan
Stipulation and Agreement in Case No. EO-2005-0329?

A. Yes. The language in section J, page 22, of the Stipulation and Agreement is
clear in its intent of protecting the benefit to ratepayers that results from using the margin on
off-system sales as reduction to KCPL's revenue requirement:

KCPL agrees that off-system energy sales and capacity sales revenues and related costs will <u>continue</u> to be treated above the line for ratemaking purposes. KCPL specifically <u>agrees not to propose any</u> <u>adjustment that would remove any portion</u> of its off-system sales from its revenue requirement determination in any rate case, and KCPL agrees that <u>it will not argue that these revenues and associated expenses</u> <u>should be excluded</u> from the ratemaking process. (Emphasis added)

8

1

2

3

4

5

6

7

9

10

Q. Is Mr. Giles recommended treatment for off-system sales margin in this case consistent with language in the Regulatory Plan Stipulation and Agreement requiring full recognition of the margin from off-system sales?

No it is not. Mr. Giles recommended level of ** ____ ** off-system sales 11 Α. margin required an adjustment reducing the 2005 test year level by \$19 million for the stated 12 purpose on page 7, lines 7-11, of his rebuttal testimony "to adjust the return on equity to 13 reflect this additional risk" related to the margin from off-system sales. Mr. Giles' proposal to 14 adjust the return on equity by assigning off-system sales margin to shareholders violates the 15 intent of language in the Regulatory Plan Stipulation and Agreement which specifically 16 precludes KCPL from recommending such an adjustment. If KCPL believed that assigning a 17 portion of the margin on off-system sales to shareholders was necessary in order to earn a 18 reasonable return on equity ROE for shareholders, then KCPL should not have agreed to 19 language in the Regulatory Plan Stipulation and Agreement which precludes KCPL from 20 21 doing so.

Q. Did KCPL receive something in return for its commitment not to make
adjustments to remove any portion of its off-system sales from its revenue requirement
determination in any rate case during the period covered by the Regulatory Plan?

A. It certainly did. The Amortization provided for in the Regulatory Plan
Stipulation and Agreement for KCPL and for The Empire District Electric Company (Empire)
for the purpose of providing additional cash flow required for the opportunity to maintain a

BBB credit rating is unprecedented in Missouri. Under a traditional cost of service approach,
Staff's current cost of service calculation reflects an excess revenue requirement of
approximately \$34 million. However, as a result of the Regulatory Plan Amortization, Staff is
recommending a \$52 million rate increase instead of a \$34 million rate reduction.

Q. On page 8, lines 5-7, of his rebuttal testimony Mr. Giles asserts that KCPL's proposed treatment for off-system sales margin is not a sharing mechanism: "One means to recognize this risk is to include margins at the 25 percent level of expected margins during the year that rates would be in effect as proposed by KCPL. This is not a sharing mechanism." (emphasis added) Is this statement consistent with Mr. Giles direct testimony and response to Staff discovery?

11

12

13 14

15

16

17

18

19 20

21

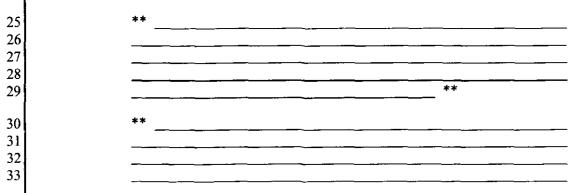

22 23

24

A. No it is not. The following statements appear in Mr. Giles direct testimony:

Because these risks are so large, the Company believes that it would not be acceptable to retail consumers to incorporate the full costs of the risks to capital within the rate of return. Therefore, KCPL has decided not to request a rate of return above 11.5%, and proposes to **share the off-system sales risk** with customers and shareholders.(emphasis added) (Giles Direct, page 23, lines 15-19)

. . . the only reasonable and responsible method to determine the appropriate amount of off-system sales margin to include in test year revenue is to project the amount of off-system sales margin expected during the first year that the increased rates would be in effect, calculate the risk of those off-system sales and **share the risk** between retail customers and the Company. (emphasis added) (Giles direct, page 25, lines 3-7)

1 2 ** 3 4 Some utilities in various venues have proposed sharing off -system 5 sales margins between customers and the company. In fact, in its most recent rate increase request, AmerenUE proposed to account for the 6 risk of off - system sales in the same manner KCPL is proposing in 7 this case. (emphasis added, Giles Rebuttal, page 7, lines 14-17) 8 9 There is no question, based upon the statements above, that KCPL's proposed treatment for off-system sales margin in this case represents a partial assignment of off-10 system sales margin to its shareholders as a substitute for requesting a higher return on equity. 11 12 This recommended treatment is a clear violation of the commitment made by KCPL in the 13 Regulatory Plan Stipulation and Agreement. 14 Does Mr. Giles' reference to AmerenUE's proposed sharing mechanism for Q. sharing off-system sales margins between customers and the AmerenUE justify KCPL's 15 16 recommended treatment for off-system sales margin in this case? Certainly not. AmerenUE is free to propose a type of sharing mechanism. It is 17 Α. 18 my understanding that AmerenUE has not agreed to language in a Stipulation and Agreement 19 which specifically precludes it from doing so as KCPL has done. Additionally, AmerenUE's ratepayers are not committed to providing millions of dollars in additional rate relief for the 20 21 purpose of maintaining Ameren's credit rating. KCPL and AmerenUE are in completely 22 different positions regarding the ratemaking treatment each can propose for off-system sales 23 margin. Does Mr. Giles rebuttal testimony indicate a clear understanding of the 24 Q. language addressing off-system sales margin in the Regulatory Plan Stipulation and 25

26 Agreement?

.

•

I.

ī

ł

i

1	A. Yes it does. On page 7, lines 18-22, of his rebuttal testimony, Mr. Giles makes								
{									
2	the following statement:								
3 4 5 6 7 8	As a number of witnesses in this case have noted, KCPL has agreed in its testimony in this case, and in the Stipulation and Agreement approved in 2005 by the Commission, that it has no inherent right to the earnings from off-system sales market as long as the costs of the assets generating those wholesale earnings are in retail prices. (emphasis added)								
9	Q. After expressing a clear understanding of KCPL's commitment in the								
10	Regulatory Plan Stipulation and Agreement, regarding the margin on off-system sales, does								
11	Mr. Giles make a request that KCPL not be required to keep that commitment?								
12	A. Yes. Mr. Giles' very next statement in the same paragraph on page 7, lines								
13	22-23, and in the next paragraph on page 8, lines 5-6 read as follows:								
14 15 16 17 18	The Commission must recognize, however, wholesale revenue and earnings have different financial characteristics than retail revenues and earnings. One means to recognize this risk is to include margins at the 25 percent level of expected margins during the year that rates would be in effect as proposed by KCPL.								
19	Mr. Giles has already admitted in response to Staff Data Request No. 213.1 that								
20	KCPL's proposed treatment for off-system sales margin represents an assignment of \$24-30								
21	million in interchange margin to shareholders as an equity return. Given Mr. Giles clear								
22	understanding of the commitment made by KCPL in the Regulatory Plan Stipulation and								
23	Agreement, referenced above, his two following statements can be characterized as a request								
24	that the Commission not hold KCPL accountable for the commitment made in the Regulatory								
25	Plan Stipulation and Agreement.								
26	Q. Does this conclude your surrebuttal testimony?								
27	A. Yes, it does.
