Aquila (ticker: ILA, exchange: New York Stock Exchange) News Release - March 9, 2000

UtiliCorp Invests In Missouri Telecom Provider; Expansion Planned In Energy Service Area

KANSAS CITY, MO, March 9, 2000 - UtiliCorp Communications Services today announced it is partner with ExOp of Missouri, Inc. to bring digital-quality voice, data and Internet services to rural communities in the Kansas City area with planned expansion into other parts of UtiliCorp United's energy service territory.

UtiliCorp Communications Services, a non-regulated affiliate of UtiliCorp United, is joining the launch a state-of-the-art telecommunications expansion in western Missouri with a \$7.5 million investment in ExOp, a facilities-based local exchange carrier in Kearney, Mo.

"Currently, our rural energy service territories are significantly under served by their current telecommunications and cable providers," said Jeff Ingram, vice president, UtiliCorp Communications Services. "We're excited about joining this partnership and bringing the best communications available into our service area."

ExOp, founded in 1996, is in the process of expanding its fiber transmission and distribution lines in the Kearney area, and plans to begin extending its fiber lines into adjacent communities. The company currently provides service to 1,400 voice and data access lines in Kearney. The \$7.5 million investment by UtiliCorp will allow ExOp to speed the expansion of its communications services in Kearney and into surrounding communities, Ingram stated.

Among services ExOp offers is local telephone service with features such as caller ID, call forwarding and voice mail; long distance services, and high-speed Internet access. Within the next few months, ExOp plans to begin providing digital cable television service. UtiliCorp's investment represents a 35 percent ownership in ExOp. An additional 36 percent interest is held by St. Joseph Light & Power. UtiliCorp and St. Joseph currently have a merger agreement pending before the Missouri Public Service Commission. Upon approval of the merger, the combined company would hold a 71 percent interest in ExOp.

UtiliCorp Communications Services recently began construction of a community-wide fiber optic project in Pueblo, Colo. UtiliCorp United, through its United Energy subsidiary, is currently building a 500-mile fiber-optic network in Australia.

Through its Missouri Public Service division, UtiliCorp United, (NYSE: UCU) based in Kansas City, provides electric service to about 205,000 electric and 47,000 natural gas customers in the state.

UtiliCorp is a multinational energy company with about 4 million customers. It operates in the U.S., Canada, the United Kingdom, Spain, Germany, Norway, New Zealand and Australia.

PRESS RELEASES

Fidelity Communications Company

Fidelity Moves Into Country Club Area in Rolla

Fidelity Communications is making progress on extending lines into the Oak Meadow Country Club with service available sometime this fall. Its hybrid fiber coax lines carry telephone, cable TV and speed Internet service.

The project extends from the city limits out Highway BB to the golf course. It will make service to the Pines, Forest Lakes and other subdivisions in the area, totaling almost 500 homes.

"The same services we're offering in Rolla will be available out there," said Tim Riggs, Outside PI Supervisor. "It's the same technology we're using in the city limits of Rolla."

Two nodes are being added, the first serving 298 homes and the second serving 185. Fidelity is now installing underground and aerial fiber optic and coax cables in some of the subdivisions.

"Our marketing department has been conducting surveys and gathering information from potential customers in these areas," Riggs said. "We need to let people know they'll have the same service available to them in a few months."

In addition to interactive digital cable TV and high-speed cable Internet modems, Fidelity offers local and long distance service, including four different long distance plans. About 85 percent of its residential customers use Fidelity as their long-distance carrier.

Fidelity offers the latest in telephone technology and features, including Caller ID with Nationwide call forwarding, voicemail, call waiting, distinctive rings for different callers and rejection of unwanted calls.

For more information, contact the business office at 426-5000.

Local Telephone Service

Fidelity Communications Services I

Fidelity Communications has been providing local telephone service in Missouri for over 60 years. Two years ago, Fidelity brought that expertise and commitment to excellence to Rolla. With the Lucent Technologies 5ESS switching equipment located in our local Rolla business office and our fully staffed service department, Fidelity offers a superior solution for your local telephone service. State-of-the-art technology plus a full range of tools, called SmartFeatures, lets you make your phone work for you.

SmartFeatures, such as Nation Wide Caller ID with Name, Call Forwarding, Call Waiting, Voice Mail and Speed Dial, make calling your friends across town or around the world easy. For example, see the name and number of who is calling you before you pick up the phone. No more unwanted telemarketing calls.

Never miss that important call you're waiting for when you need to leave your home or office. Use one of the several Call Forwarding features Fidelity offers to forward the call to your cellular phone or to another phone number. Or use the convenience of our new, more user friendly Voice Mail system and give everyone who calls you the opportunity to leave a message.

Telephone service the way you want it!!! Let Fidelity Communications of Rolla provide all your communications and information needs.

- **Save Money**
- **Convenience of one bill for all services**
- **Local business office**
- **Employees that care about your needs**

Fidelity Communications – Growing with Rolla
