2	PROCEEDINGS
3	TROUBLETINGS
4	JUDGE WOODRUFF: Please raise your right
5	hand. Do you solemnly swear or affirm that the
6	testimony you're about to give shall be the truth, the
7	whole truth and nothing but the truth?
8	MR. GOLDSTEIN: I do.
9	JUDGE WOODRUFF: Thank you very much.
10	MR. GOLDSTEIN: The purpose for these
11	evidentiary and public hearing today should be first
12	and foremost centered around AmerenUE's management of
13	their current rates and the income derived from their
14	customers in order to determine if their company has
15	been prudently managed, and is worthy of, and has a
16	need for a 17.95 percent rate increase. And an
17	increase to their return on equity from 10.76 percent
18	to what AmerenUE's expert witness Roger A. Moran
19	believes should be an ROE of 11.5 percent.
20	I initially found some of the testimony
21	from AmerenUE in their copy and paste experts to be
22	contrived and disingenuous. However, I was able to
23	glean a lot of valuable information from their
24	testimony. AmerenUE provides electrical utility
25	service to at least 508 communities within 56 counties

Page 3 and the city of St. Louis in the state of Missouri. 1 Could it be AmerenUE is spread too thin within the 2 state of Missouri. How many of these communities 3 4 provide AmerenUE with net profits. AmerenUE has maintained service and communities that have not 5 provided profits for years to AmerenUE. 6 7 Investor-owned utilities, IOUs, have known since the 8 late 19th century or early 20th century that providing electrical utilities service to rural communities was 9 10 not profitable. The only way it could be profitable 11 is if the kilowatt hour cost was extremely high to offset the low amount of electrical meters per square 12 mile. Investor-owned utilities in general, and 13 AmerenUE in particular, have extremely high 14 expenditures and must offset those high incomes and 15 they can't do that in some of the sparsely populated 16 areas where they are giving service or providing 17 18 service. AmerenUE cannot possibly be -- I said that. 19 I have absolutely no problem with AmerenUE providing service to rural areas of Missouri. 20 21 However, I have a problem if AmerenUE is mitigating their financial losses in rural areas with the high 22 23 income provided by the urban, residential, and 24 commercial customers in the St. Louis region and requesting a 17.95 percent rate increase to attempt to 25

1	Page 4 achieve their authorized return on equity. AmerenUE
2	in some rural communities is practically competing
3	directly with electrical utilities cooperatives.
4	AmerenUE is able to skim customers in certain areas
5	from co-ops, but I believe if an honest and thorough
6	audit was performed, it would show low or no income
7	from some of the communities served by AmerenUE. Union
8	Electric doing business as AmerenUE is not only an
9	investor-owned utility, it is also a holding company
10	of a Fortune 500 company. Ameren Corporation, the
11	parent company, also has Fortune 500 expenditures.
12	Where electrical utility co-ops have far less
13	expenditures than AmerenUE and are not allowed to make
14	profits and are eligible for grants and low interest
15	loans from the federal government. The St. Louis
16	region, AmerenUE customers are paying twice for
17	AmerenUE to compete against co-ops. We pay through
18	our federal taxes, which provide rural utility service
19	grants and the federal government backs low interest
20	loans to co-ops through the Department of Agriculture.
21	Then we pay a second time for AmerenUE to compete
22	against co-ops by AmerenUE mitigating their looses in
23	some rural communities with high volume income
24	provided by high customer volume in the St. Louis
25	region.

	Page 5
1	The president of AmerenUE, Warren L.
2	Baxter, seems perplexed that his company is unable to
3	achieve their authorized return on equity of 10.6
4	percent. If, in fact, a 17.95 percent rate increase
5	was granted to AmerenUE and their authorized return on
6	equity was raised to 11.5 percent. It would only
7	exacerbate the problem they are having trying to
8	achieve their authorized return on equity. If after
9	an audit there are communities that provide low or no
10	income for AmerenUE and a 17.95 percent rate increase
11	is granted, then AmerenUE will return very soon for
12	another rate increase because AmerenUE must first shed
13	unprofitable rural areas and either sell, trade,
14	lease, or relinquish control of territories that are
15	pulling down their income. Rate increases will not
16	solve AmerenUE's inability to achieve their authorized
17	return equity. And will have, instead, the opposite
18	effect. Businesses in the St. Louis region that are
19	teetering on the edge of profitability may be forced
20	to close. May be forced to close, move, or
21	consolidate operations if a 17.95 percent electrical
22	rate increase was granted to AmerenUE.
23	In the last five years in the St. Louis
24	region, there have been three automobile assembly
25	plants closed. The Ford automobile assembly plant in

	D. C
1	Page 6 Hazelwood closed in 2005. And two Chrysler automobile
2	assembly plants in Fenton closed in 2009. The closing
3	of these automobile assembly plants negatively
4	impacted AmerenUE's income significantly because the
5	new automobile assembly plants have modernized and
6	shifted costs to robotics, integrated technology. And
7	if the automobile plant also has or had sheet metal
8	fabrication, then there is an even greater dependency
9	upon on electrical energy to power the huge stamping
10	presses and the automobile industry is now using
11	electrically charged paint and coatings for exterior
12	metal automobile parts.
13	In addition to the greater dependence by
14	the automobile industry on electrical energy, the
15	grocery and retail industries have significantly
16	increased their energy usage because of greater
17	integrated technology, use for a variety of purposes
18	such as linking their data network to their cash
19	registers to provide valuable sales and inventory
20	information. And the grocery industry in particular
21	have much more pre-cut, pre-packaged meat, prepared
22	meals, deli, and dairy products, salad bars and frozen
23	foods that must be refrigerated in huge commercial
24	coolers or freezers, 24/7. And they use much more
25	energy than the grocery stores of previous eras

	Page 7
1	because many grocery stores now are open 24/7.
2	Large companies in the St. Louis region
3	like the GM automobile assembly plant in Wentzville,
4	Boeing, and GKN aircraft, Monsanto, and Mallinckrodt
5	Chemical, Hussman Refrigeration,
6	Anheuser-Busch/In-Bev, and MetroLink are also huge
7	electrical energy users who deserve a much better
8	effort by AmerenUE to contain costs. St. Louis region
9	municipal and county government are subjected to the
10	same unfair, mitigating conditions from AmerenUE that
11	large businesses in the St. Louis region are being
12	subjected to, and have the added burden of having to
13	pay for the electrical energy costs for street lights
14	and traffic signals. A few of the other large
15	electrical energy costs excuse me a few the
16	other large commercial energy users in the St. Louis
17	that could be paying more for service so that AmerenUE
18	can compete against the Missouri co-ops in rural areas
19	are churches, temples, mosques, hospitals, medical
20	centers and clinics, doctor, dental and optical
21	offices, nursing homes, veterinary offices,
22	restaurants, gas, convenience stores, public and
23	private schools, day care centers, community, trade,
24	and technical schools, automobile sales and repair,
25	newspaper publishing, radio and television media, and

Page 8 each gas, telephone, cell phone and all utility 1 2 companies. The residential AmerenUE customers in the 3 4 St. Louis region are being asked to conserve energy by 5 purchasing more energy efficient appliances, furnaces -- I'll be through when I'm through. You will get 6 7 your chance. 8 JUDGE WOODRUFF: I'm sorry. You're 9 correct. We do want to let witnesses speak their 10 piece, but, of course, we do want to try and move things along as well. It looks like you're on your 11 last page. 12 13 MR. GOLDSTEIN: Perhaps. Back to where I 14 The residential AmerenUE customers in the St. Louis region are being asked to conserve energy by 15 purchasing more energy efficient appliances, furnaces, 16 air conditioning units, water heats, light bulbs, and 17 ceiling fans. Many residential customers to AmerenUE 18 19 in the St. Louis region have installed better siding, new energy efficient windows, and home insulation or 20 21 have built energy efficient homes to conserve energy. We have spent millions of dollars to conserve energy 22 23 and reduce our carbon footprint. And now we want 24 AmerenUE to do likewise. 25 AmerenUE gives \$75 window air conditioners

4	Page 9
1	to low and moderate income customers in the St. Louis
2	region. However, AmerenUE's ulterior motive is a
3	public relation campaign to give the public the
4	impression that this company is a compassionate
5	companies that cares about the well-being of their
6	customers. If AmerenUE cared about their customers,
7	then they would be trying to make it possible for low
8	and moderate income customers in the St. Louis region
9	to be able to turn on those air conditioners and would
10	not be seeking a 17.95 percent rate increase and would
11	not be wasting funds competing against co-ops.
12	One final point is that a large number of
13	residential customers of AmerenUE in the St. Louis
14	region are unemployed, under-employed, disabled, or
15	retired and are severely, negatively impacted by
16	AmerenUE's illogical, in-efficient, imprudent,
17	irresponsible, and uneconomical way of managing their
18	company. AmerenUE is sacrificing the St. Louis region
19	while pursuing rural residential and commercial
20	customers who could be better served by co-ops. No
21	one is gaining anything from the redundant,
22	unnecessary, and expensive competition between the
23	AmerenUE and the Missouri co-ops. Rate increases are
24	not working for AmerenUE and never will as long as
25	their executives and managers continue to use the

	Page 10
1	illogical, imprudent, inefficient, irresponsible, and
2	uneconomical management decisions that were used 75
3	years ago. The time has come for AmerenUE to make
4	bold changes and release the archaic business
5	practices of the past and in favor of moving forward
6	in the future. AT & T, the baby bells, and their
7	customers had to adapt to the changes that occurred
8	when the telecommunication industry was deregulated in
9	1983.
10	Thomas Albert Edison had to accept changes
11	to the industry that he created. During the late 19th
12	century there was a debate about whether the
13	electrical transmission standard would be alternating
14	current or direct current. Mr. Edison favored DC
15	transmission but he lost the debate and had to accept
16	and adapt to changes. The electrical generating
17	transmission and distribution system is again at a
18	critical juncture in history and AmerenUE must decide
19	if they want to lead, follow, or get left behind, but
20	this vitally important industry cannot and will not
21	wait for AmerenUE and you cannot lead this industry
22	from the rear. AmerenUE in order to embrace the
23	future must first release the past. Happenstance,
24	additions, and a 17.95 percent rate increase request
25	will not benefit AmerenUE or the customers of

1	Page 11 AmerenUE. Until the wasteful habits of the past are
2	eliminated, nothing is going change. AmerenUE must
3	make intelligent decisions, plans how to reach
4	profitability, and commit to change. Thank you. Do
5	you have any questions? And I'd like to say
6	something.
7	JUDGE WOODRUFF: Please let the witness
8	speak.
9	MR. GOLDSTEIN: I didn't know I was coming
10	here to be heckled. But I had things to say and I
11	tried to summarize a lot of things about AmerenUE.
12	And I might have touched on some things that some of
13	you may want to bring out, but if I touched on it, you
14	don't have to bring it out. And thank you very much.
15	JUDGE WOODRUFF: Thank you, Mr. Goldstein.
16	As the tenor of the crowd is indicating, we do have a
17	lot of people here tonight and I would appreciate it
18	if you can limit yourself to about ten minutes when
19	you're speaking. And I'll also if you have
20	something written that you want the commission to
21	read, we can take that as an exhibit and you don't
22	have to read it into the record unless you want to.
23	So the next witness is Antonio Borjas. Please raise
24	your right hand. Do you solemnly swear or affirm that
25	the testimony you're about to give shall be the truth,

	Page 12
1	the whole truth and nothing but the truth?
2	MR. BORJAS: I do.
3	JUDGE WOODRUFF: State and spell your name
4	please.
5	MR. BORJAS: Antonio Borjas; B-o-r-j-a-s.
6	My question is to the CEO of UE was how much did he
7	get on his profit with six percent? Roughly I figured
8	a \$170 million to \$190 million. And I can tell you
9	folks I'm on a fixed income and my profit was zero.
10	So they get \$170 million to \$190 million. Mine is
11	zero. And everything else keeps going up and up and
12	up and I say no to this rate increase. Thank you.
13	JUDGE WOODRUFF: Any questions for Mr.
14	Borjas?
15	CHAIRMAN CLAYTON: Are you a St. Charles
16	resident?
17	MR. BORJAS: Yes, I am. I'm from St.
18	Charles, Missouri.
19	CHAIRMAN CLAYTON: Thank you.
20	JUDGE WOODRUFF: Do the attorneys have
21	questions for Mr. Borjas. Next is Representative Chet
22	Bokee. Please raise your right hand. Do you solemnly
23	swear or affirm the testimony you're about to give is
24	the truth, whole truth, and nothing but the truth.
25	MR. BOKEE: Absolutely. Why would I not?

	Page 13
1	JUDGE WOODRUFF: Tell us name and spell it.
2	MR. BOKEE: Chet; C-h-e-t. B-o-k-e-e.
3	Former state Missouri legislator. I never accepted
4	any money from any special interest groups. So,
5	therefore, my conscience and record is clean. I have
6	learned a little bit here tonight. We come up with a
7	17 or 17.95 percent increase. I was wonder why that
8	sounded like a nifty round number. Well, I suppose
9	through my negotiations in the past as a union man and
10	so on and so forth, if you get half that you're still
11	happy. I don't know what you're really shooting for,
12	but obviously something. I'm one of the retirees. I
13	have been on Social Security here and I agree, I did
14	not get any increase from our government because that
15	it's zero inflation index. Then I learn we got two
16	different things going. We do the work and then we
17	ask for the money guarantees later because we're in
18	hole, but yet it looks like AmerenUE is still making a
19	bit of a profit. I looked at some of their stocks
20	today and things like that. Nobody on Social Security
21	got an increase so that's not to going to help you on
22	any other increase. And it seems like everything is
23	going up, not just a little bit. I think the cable
24	company is going up 25 percent if you haven't got your
25	bill yet, you will soon see that. In fact, it will be

1	Page 14 more because Time Warner wants additional money. I'm
2	a little off subject, but for future subjects. We're
3	kind of getting jammed we the public. We all need
4	electrical. I thought it was tied to inflation, but
5	obviously it's not. It's to expenses and salaries,
6	you know, whether they be an inordinant salary,
7	hundreds of thousands of dollars for your salary. I
8	don't know. I don't have any internal information to
9	the company, so I don't know if there is waste or
10	abuse. I don't know if there's bonuses. I don't know
11	who is who and what's what. I don't know if any of
12	the commissioners up here might have some self ties,
13	you know, in with their family. And I'm not accusing
14	anyone, certainly, but I don't know who's got stock in
15	Ameren. I don't know who's been passed money as they
16	ran for office. I don't know if so this is
17	something I hope the commission also will look at a
18	little bit. If anybody's family works for Ameren, if
19	there could be stigmatation (sic) to agreeing to a
20	raise of this magnitude or something like this. In
21	case anyone hadn't heard, I'm sure they have, but
22	we're kind of in a recession, depression. Money is a
23	little bit scarce anymore. So I think, you know, one
24	of the concerns the commissioners here should have is
25	not just well, we consider it or we consider that. I

Page 15 1 think if there is some increases in the future due to oil increases, I think they can probably ask for it. 2 I'm not certain of all the laws we have or all the 3 4 rules you all have, but obviously, they can ask for a 5 small increase for any monetary -- I think there is some oil involved but in nuclear there is not, in the 6 7 generation of electricity. My basic thing here is I 8 want to just say no. Not to a nine percent interest, 9 or nine percent charge, definitely not an 18 percent 10 charge. I certainly don't think that's necessary. It 11 hadn't been proven to me. You know other companies 12 are downsizing. Maybe the number of employees or number of lawyers or number of salaries, numbers they 13 14 get. I'm shocked sometimes what some people earn. I'm just an average American trying to do the best I 15 can with what I have. I'm surprised they didn't bring 16 out Karen Foss. Maybe she'll come out later. 17 Again, 18 I don't know the structure of your business. 19 I'm a businessman; very, very small businessman. if I ran my businesses the way some other business is 20 run there business with the waste and abuse, bad 21 decisions, I'd soon be out of business. But I don't 22 23 think Ameren is going to go anywhere. If I remember, 24 they bought Union Electric and I don't know much about them, but I do recall another hearing I want to 25

Page 16 American Water Company in this very same room about 1 2 nine years ago. They were asking, as I recall, a 300 percent increase. I run up here, probably broke a few 3 4 laws driving up here. I come to find out it wasn't 5 because they needed money for water or infrastructure what they had. And by the way, American Water wasn't 6 7 at that time owned by Americans. It was owned by a German company, so our money was going overseas. 8 9 want to increase some project up in St. Joe, Missouri. 10 And they were going to take -- St. Charles is 11 supposedly the richest county in the state of Missouri, I learned that, but I'm not one of them to 12 13 add to that. But in conclusion, I think you kind of know 14 where I'm coming from. I hope you all wisely, maybe 15 16 like King Solomon, would do is put yourself in some of our places. And look at what really is needed. 17 concluding may be one percent. And that's giving the 18 19 benefit of the doubt more than the government gave us 20 Social Security. One percent increase with zero 21 inflation. So I just ask you gentlemen, there is 22 three of you hear, and one up there, and the rest 23 somewhere else. I ask you to consider this wisely. 24 Now, through any other elements or means, not who you know, or what you know, or what you think, or what you 25

Page 17 might do in the future for somebody; do it on the 1 2 basis what's needed. There's been good facts. We got some intelligent people out here and some of them told 3 4 exactly like it is. I hope you all are listening. 5 Thank you, sir. JUDGE WOODRUFF: Anyone have any questions? 6 7 Next witness is Randy Pohlman. Please raise your 8 right hand. Do you solemnly swear or affirm the 9 testimony you're about to give in this matter is the 10 truth, whole truth, and nothing but the truth? 11 MR. POHLMAN: Yes, it is. 12 JUDGE WOODRUFF: Spell your last name. 13 MR. POHLMAN: P-o-h-l-m-a-n, and I live in 14 St. Louis county. 15 JUDGE WOODRUFF: Okay. What would you like to tell us? 16 MR. POHLMAN: Well, first of all, I'm 17 against it. And I'm only 51, okay, but I am on Social 18 19 Security. I had to take a medical retirement from my 20 place of employment because of hip problems. So I am 21 also on Social Security along with quite a few people 22 out here. And, yes, we did not get no raises. Okay. We don't get cost of living raises. Before you 23 24 gentlemen came in there was a lot of points made, and 25 one of them was a question on what the president

	Page 18
1	makes. Well, the company I work for back in early
2	'90s was making \$87 million a year okay. We had a
3	layoff. They laid off over 20,000 people that
4	actually made the product. If you let go of that one
5	man, would you put 2150 people back to work at cost of
6	\$40,000 a year back then. Okay. Now, this gentleman
7	don't make quite that much, but it seems like every
8	time that he wants to make a cutback, they lay off the
9	people that make the product or people that fix the
10	product and stuff like this. I never see any give
11	backs. He did say yes, they are not going to get any
12	raise. Well, yeah, the guys that are doing the fixing
13	part of it might be CBU, collective bargaining unit
14	people that are under contract. Every time a contract
15	comes up, though, they don't want to give anything.
16	They want a take because I don't see any president or
17	vice-president or anybody else giving back. That's
18	one thing that kind of irks me. Another reason why I
19	came here is here a month or so ago, my mother and
20	father-in-law are in their late '70s, a transformer,
21	the main wire above it broke, fell down on the
22	transformer, blew the transformer up. And according
23	to the lineman put 7500 volts through the house. It
24	blew light bulbs out in the house, shattered the glass
25	in the house, blew out a big screen TV that they

1	Page 19 didn't buy, that the family had bought for them. In
2	stead of watching a 17-inch we bought them a 52-inch.
3	Well, I'd like to read something here. It's 11 lines,
4	okay, not much. It's community of service. It's off
5	of theirs. We turned in the lineman told me to
6	tell them it was not act of God because it was a
7	bright, sunny day, and wasn't because of a squirrel
8	eating on lining because transformers to blow up
9	because of a squirrel, and other animals. It had
10	nothing to do with that; nice, suuny day. It was a
11	failure of their equipment. All right. "The company
12	will make all reasonable efforts to provide the
13	service requested on adequate and continuous basis.
14	We will not be liable for service interruption,
15	deficiencies, or imperfection, which result from
16	conditions which are beyond a reasonable control of
17	our company. The company cannot guarantee the service
18	as to continuity freedom from voltage and regularity
19	variation, reversal of phase erosion and single
20	phasing. The company will not be responsible or
21	liable for damages to customers' apparatus resulting
22	from the failure or improper performance of service
23	beyond reasonable control of the company. In cases
24	where the failure or imperfection of service might
25	cause damage, might damage customers' apparatus,

	Page 20
1	customers should install suitable protective
2	equipment. Well, you know what, it was on a surge
3	protector. It fried the surge protector and fried the
4	TV. We had a guy come out at \$750 just to replace
5	power unit to get the TV working. Then the gentleman
6	said if it's also the digital board, that's another
7	\$800. Well, it's a 52-inch projection big screen TV.
8	They can buy a 50-inch plasma TV for \$750. But the
9	point is with that, this company is not liable for
10	nothing. Okay. And that's what gets my goat. If
11	we're driving in our car and our steering breaks and
12	we knock down their electric pole, we're sure as heck
13	responsible for their electric pole. We're
14	responsible for what we have and what we do and what
15	we use. Why is the company like this not responsible
16	for their stuff. Plus, you know, like everybody else
17	has said, in the economy, a lot of people is not
18	getting raises. Why should they think we should be
19	able to afford a 18-percent raise. I'm against it.
20	Sorry. Thank you.
21	JUDGE WOODRUFF: Any questions.
22	CHAIRMAN CLAYTON: What's your first name?
23	MR. POHLMAN: Randy.
24	COMMISSIONER GUNN: Did your parents make a
25	claim?

1	Page 21 MR. POHLMAN: Yes, sir. I got it all right
2	here.
3	COMMISSIONER GUNN: They were denied based
4	on that language?
5	MR. POHLMAN: Yes, based on
6	COMMISSIONER GUNN: If you would do me a
7	favor and give the address of your parents' home to
8	one of our staff that was around here earlier, I would
9	appreciate it.
10	MR. POHLMAN: Okay. I don't know who they
11	might be.
12	JUDGE WOODRUFF: Mr. Ochum was the
13	gentleman.
14	COMMISSIONER GUNN: There is some people in
15	back with their hands raised. They are our staff.
16	Give the address to them. I would appreciate it.
17	Thank you.
18	JUDGE WOODRUFF: Next name is it Ron
19	Dickey. Raise your right hand. Do you swear or
20	affirm that the testimoney you're about to give is the
21	truth, the whole truth, and nothing but the truth?
22	MR. DICKEY: I do.
23	JUDGE WOODRUFF: Tell us your name and
24	spell your last name for us.
25	MR. DICKEY: My name is Ron Dickey. I

Page 22 reside at 20 Hawthorne Hill Drive in Warrenton, 1 2 Missouri in Warren County. I learned a lot here and just the conversation we had earlier, one process that 3 4 you go through for the rate increase. The one thing I 5 got out of it to put in laymen's terms, it sounds like 6 the fox is in the hen house and now we're going to 7 shut the door. That's what it sounds like to me. Ι 8 got this notice from Ameren, and it does say that 9 there will be a 18 percent increase or a basically a 10 \$14 per month charge. Okay. I feel that -- and 11 that's for an average customer. I feel I'm an average 12 customer, and I've done my calculations. The amount of my increase per month will more than double that 13 14 I know when the last time I got a 18 percent increase and that was never. And I don't know where 15 the rest of the people in this room, but that's up to 16 them to answer. Our house and senate members voted 17 18 themselves a 20-percent raise, but that discussion is 19 for a later date near election time, so don't forget it. I am retired and on Social Security, Medicare, 20 the government Rx plans, and I had to purchase a 21 secondary insurance policy to cover what Medicare 22 23 doesn't cover. Social Security says there are 50 24 million people on Social Security in the United States, the house and senate voted for no cost of 25

	Page 23
1	living raise for Social Security for the next two
2	years. The loss of the COLA will generate \$33 billion
3	for the federal government for the year 2010. The Rx
4	plan increase will generate \$5,808,000,000 for the
5	government for 2010. Medicare increase will generate
6	\$60 million. The total amount generated for 2010 will
7	be \$38,940,000,000. Total generated over two years
8	will be \$77,808,000,000. The reason for Ameren's rate
9	increase seems to be for fuel costs. I worked in
10	competitive manufacturing for 46 years both as a
11	worker and as a manager. I went through many years
12	with high fuel costs and high material costs with a
13	set budget. And when these problems arose and we went
14	over budget, I would had to lay off indirect people
15	and in some cases direct people in order to bring the
16	budget in line without increasing the cost of our
17	products. If the budget could not be brought in line
18	in these ways, we would have to borrow money, pay it
19	off through profits with interest. The only other way
20	would be to sell out or go out of business. Ameren is
21	not in competition with anyone, so why do they
22	advertise. Ameren had a rate increase of 7.8 percent
23	in March of 2009. And along with this proposed rate
24	increase of 18 percent, that is a 25.8 increase in
25	less than a year. This is even better than the house

	Page 24
1	Page 24 and senate raise of 20 percent. Does anyone here see
2	anything wrong with this picture? I would hope that
3	Ameren is being run as a business, but I do not feel
4	that it is or we would not be here looking at an
5	18-percent rate increase. After looking at Ameren's
6	past history where raises seem to always be approved
7	in one form or another, I hope that our time here is
8	not wasted.
9	Let's face it. After reviewing some past
10	history of Ameren, we are only looking at rate
11	increases in our future. Why is that when fuel and
12	other costs go up we get a rate increase and when they
13	go back down, we get no downward adjustment in our
14	bills. I do not understand this picture. Is there
15	anyone who can explain this? Why are we not looking
16	at new technology to drop our electric and gas rates
17	instead of going along with the status quo. I am sure
18	your facilities are not efficient and I know I could
19	go into any one of your facilities and point out these
20	inefficiencies. This is not to say your people are
21	not good at their jobs or they deserve the wages that
22	they are getting. The problem is getting upper
23	management to step up to the bar and make some hard
24	decision about these inefficiencies and keep the
25	business on budget. This budget needs to be look at

	Page 25
1	by management on a monthly basis and lower management
2	on daily basis in order to make adjustments in timely
3	matter. I guess you can always threaten you customers
4	to cut off their gas and electric if you do not get
5	this rate increase rather than bringing the business
6	in line with the budget. Your customers unfortunately
7	are unable to pick and choose your power company. I
8	would challenge you to improve your efficiencies and
9	bring this business back in line without this rate
10	increase. I had to make decision when fuel prices
11	were high. I had to use less fuel, make less trips,
12	use community services. You can walk, ride a bicycle
13	get rides from other people, and borrow money. These
14	things were for fuel only, but I had to make the same
15	decisions for higher prices on food, clothing, housing
16	and so forth. The only difference between Ameren and
17	myself is I could not pass my rate increases on to
18	someone else. I am on a fixed income and I am
19	constantly adjusting my budget and alternating my life
20	style. If I can do it you can do it. Thank you.
21	People on Social Security in this country by going
22	without a cost of living raise over the two-year
23	period will say the government \$77,880,000,000, what
24	have you done for your country lately. I thank you
25	for your time and patience. May God grant wisdom to

Page 26 all of you who are making these decisions. Thank you, 1 2 gentlemen. 3 JUDGE WOODRUFF: Thank you. Next name on 4 the list is Tom Schneider. Please raise your right 5 hand. Do you solemnly swear or affirm the testimony you're about to give in this matter is the truth, the 6 7 whole truth, and nothing but the truth? 8 MR. SCHNEIDER: So help me God. 9 JUDGE WOODRUFF: Tell us your name and 10 spell the last name. MR. SCHNEIDER: Tom Schneider; 11 12 S-c-h-n-e-i-d-e-r. I live at 3716 Runnymede. Thank 13 you for letting us present our views. I'm here to 14 speak against the 18 percent increase. I have been blessed in my lifetime with a steady, well paying job. 15 Thus my family could likely cope with the proposed 16 increase. But we would have to do some belt 17 18 tightening. I retired in 2001 and since then I have 19 been working with St. Vincent DePaul Conference at our local church, St. Borromeo. For those not familiar, 20 at St. Vincent DePaul, we are a Christian, Catholic 21 group which tries to provide financial and spiritual 22 23 assistance to those in need. We do this through 24 volunteering, monetary, and personal interaction with individuals in need as well as cooperating with other 25

Page 27 agencies such as St. Joseph care service, Catholic 1 2 Charities, Salvation Army, United Way, and/or conference. Over the last year and a half with the 3 4 economic downturn, the number of individuals 5 requesting assistance for utilities, food, rent, et cetera, has increased significantly. And the amount 6 7 of available resources has not been able to keep pace 8 with this need. The proposed 18 percent rate increase will have, in my opinion, a disastrous effect not only 9 10 on those who are already seeking assistance, but will 11 significantly increase the numbers seeking help. The rate increase would not only affect individuals but 12 13 also businesses, which will then need to pass on their 14 costs to their customers. I urge the commissioners to 15 seriously consider reducing the rate increase, and to 16 urge and monitor Ameren in exploring any means to reduce expenses. Rather than the substantial rate 17 increase proposed, which will have a deleterious 18 19 effect on so many citizens. Thank you. 20 JUDGE WOODRUFF: Thank you. Any questions. 21 CHAIRMAN CLAYTON: Make sure you can hear 22 I had just a couple questions. You mentioned me. 23 that the group that you are part of provides 24 assistance to those in need. Did I hear you 25 correctly?

	Page 20
1	Page 28 MR. SCHNEIDER: That's correct.
2	CHAIRMAN CLAYTON: When it comes to utility
3	service, do you all what kind of services do you
4	provide? Is it direct cash assistance? Do you help
5	with improving energy efficiency, things like that?
6	Can you give me a sense of what your group does?
7	MR. SCHNEIDER: Most of it involves
8	financial assistance or working with other agencies to
9	help people whose power is about to be shut off or has
10	been shut off, but we do have means to assist people
11	in proficiency programs, yes.
12	CHAIRMAN CLAYTON: Okay. Is there anything
13	else? Do you all interact with the utilities
14	directly?
15	MR. SCHNEIDER: Yes.
16	CHAIRMAN CLAYTON: Other than just writing
17	a check, do you work on try to access programs they
18	may have in place to help those less fortunate?
19	MR. SCHNEIDER: Yes.
20	CHAIRMAN CLAYTON: Does Ameren do you
21	have a productive relationship in that regard aside
22	from the actual rate?
23	MR. SCHNEIDER: I think they try to do what
24	they can. I mean they have energy efficiency programs
25	to help, like, weather strip homes and that sort of

	Page 29
1	thing. And I think they are pretty cooperative in
2	that, yes.
3	CHAIRMAN CLAYTON: Okay.
4	MR. SCHNEIDER: The trouble is there is so
5	many people that don't have the funds to pay their
6	utility bills. And when they get threatened with
7	shutting their power off, and during this time of the
8	year they can't do that, but come April that's when we
9	really get into problems because maybeen people
10	haven't been able to pay anything during the winter
11	time.
12	CHAIRMAN CLAYTON: The last question is
13	have you ever reached out to the Public Service
14	Commission on behalf of those organizations to have
15	you ever needed assistance from the commission staff
16	in trying work through any challenges?
17	MR. SCHNEIDER: No, I haven't done that.
18	CHAIRMAN CLAYTON: It may be helpful. If I
19	can get the staff to raise their hands again. They
20	are right back there. You may want to exchange some
21	cards. That may be helpful if you do run into
22	problems. That relationship may be helpful in the
23	future.
24	MR. SCHNEIDER: Thank you.
25	CHAIRMAN CLAYTON: I don't have any other

	Page 30
1	questions. Thank you.
2	JUDGE WOODRUFF: Any other questions?
3	Thank you, sir. Next name on the list is Elbert
4	Haennsler. Thank you very much. Please raise your
5	right hand. Do you swear or affirm that the testimony
6	that you're about to give shall be the truth, the
7	whole truth, and nothing but the truth?
8	MR. HAENNSLER: Yes, sir.
9	JUDGE WOODRUFF: Thank you. You need to
10	spell your last name.
11	MR. HAENNSLER: First name is E-l-b-e-r-t;
12	H-a-e-n-n-s-l-e-r. I reside at 1224 Allen Avenue, St.
13	Charles, Missouri. I'm not going to take a lot of
14	time because a lot of things that I had down have
15	already been gone over, but talking to you gentlemen
16	and talking to Ameren, one of the things that Ameren
17	says is that we listen. I certainly hope that all of
18	you gentlemen and all the rest of you that are on
19	these boards listen to these people that are here
20	tonight. Because the things they have to say are very
21	important in doing away with this type of tax or
22	increase that Ameren wants. Basically, if you listen
23	to these people I think that you will hear so many
24	things that we've all said that so many are on fixed
25	incomes. If you get into a situation where you have

Page 31 any stocks or dividends and things not only with 1 Ameren, but with other companies; they have gone down. 2 If you have CDs or if you have a small savings account 3 4 the interest rate has fallen. So basically, as we go 5 along with those types of things, I hope that you will listen to these people. The economy situation in not 6 7 only St. Charles, but in the United States is 8 certainly not good. And we certainly do not need 9 these types of increases at this time going along with 10 Ameren. I hope when Ameren makes certain decisions in buying some companies, and I believe, one of the 11 12 companies they recently purchased was Illinois Power. And if I'm not mistaken, that particular group had a 13 14 big debt that they had to take over. So what are we trying to do, are we trying to get this particular 15 16 increase to take part in taking over their debt that we need to take care of. It was brought up a while 17 18 If you look at television and see things -- and 19 I do have to get this in -- we see somebody like Karen Why don't we get somebody like Coach John 20 21 Walker or somebody like Suzanne Dole to do these commercials or basically save money, cut costs and do 22 away with these types of things. As far as it was 23 24 concerned and we managed the big salary, and I was very happy that the gentleman obtained that type of 25

	Page 32
1	salary, but there was nothing mentioned that if these
2	people leave Ameren, about the golden parachutes that
3	they can get, about the stock incentives that they can
4	obtain. So these gentlemen and ladies that leave
5	these companies walk off with their pockets lined. It
6	is time that we do not that we do away with this
7	type of thing, not only with the situation with
8	Ameren, but with other large businesses. And I
9	certainly hope that comes about with that particular
10	thing. As we mentioned and as I said before, things
11	about not only the people on fixed income, but think
12	about the people of the future. America is growing.
13	We're getting more and more people that are in the
14	baby boom era. Those people will also be getting on
15	to fixed incomes, so that we have that particular
16	thing coming about. It was said that Ameren made six
17	percent on their investments and that they as well as
18	other institutions are in the business of making
19	money. I certainly would like to know where I could
20	make six percent on my investments. So basically I
21	think that the audience here would feel the same way.
22	The last thing is one of the three things that Ameren
23	says is to respond. And I certainly hope that the
24	judge, commissioners, and chairman, that you respond
25	positively to the people that are here tonight and say

Page 33 no to this increase. Thank you very much. 1 2 JUDGE WOODRUFF: Any questions for Mr. Haennsler. The next name on the list is Kathleen 3 4 Kaiser. Please raise your right hand. Do you 5 solemnly swear or affirm that the testimony that you're about to give shall be the truth, the whole 6 7 truth and nothing but the truth? 8 MS. KAISER: Yes, I do. 9 JUDGE WOODRUFF: Tell us your name and 10 spell your last name. 11 MS. KAISER: Kathleen Kaiser; K-a-i-s-e-r. And I want to thank you for giving us the opportunity 12 13 to voice our opinion. And I want to say that Ameren 14 does a decent job. But I do see some things that need to be considered. If they are going to raise the 15 16 rates, they also have to consider like in St. Charles, we have to pay Missouri taxes and we also have to pay 17 St. Charles municipal taxes. So it's not going to 18 19 just be 18 percent, you have additional percentages 20 because you have additional tax to pay, so that's 21 something to consider also. And also, I would hope that they would rethink their marketing budget. When 22 I came in I picked up this very expensive brochure. 23 24 mean this thing's got to cost a lot of money. Let's rethink our marketing budget before we come to us and 25

1	$$\operatorname{Page}34$$ ask us for an increase. There is so many things you
2	could do to decrease your budget. And I would like
3	them to think about how about adding some solar
4	panels or wind at plants. Just a thought, just a lady
5	with a thought. But we are in a recession. The
6	unemployment is almost ten percent in Missouri. We've
7	added zero jobs. And I want to say coming to us at
8	this time asking for 18 percent increase, Ameren,
9	shame on you.
10	JUDGE WOODRUFF: Any questions for Ms.
11	Kaiser? Next name is Ed Semlor. Good evening, sir.
12	Please raise your right hand.
13	MR. SEMLOR: Good evening.
14	JUDGE WOODRUFF: Do you solemnly swear or
15	affirm that the testimony that you're about to give is
16	the truth, the whole truth and nothing but the truth?

- 17 MR. SEMLOR: I do.
- JUDGE WOODRUFF: Tell us your name.
- 19 MR. SEMLOR: Edwin Semlor; S-e-m-l-o-r. I
- 20 live at 1643 Chapman Court, St. Charles.
- JUDGE WOODRUFF: Thank you. What would you
- 22 like to tell us?
- MR. SEMLOR: I used to own a business. I'm
- 24 71 now. I had to go back to work because we're trying
- 25 to keep our home. And then all of a sudden we're

	Page 35
1	getting additional bills thrown at us. I'm Social
2	Security would not cover I tried to sell my home in
3	two and a half years ago. It was right when the
4	market died. Well, my house is not worth what it was,
5	and now so everything I have we've been depleting
6	our savings just to make it month to month to pay our
7	mortgage payment. Where am I going to get this
8	additional funds. Everybody is asking for more. The
9	government, everybody, and when I hear the salaries of
10	these people from that executives. I'm not saying
11	they are not worth it, but when times get tough when I
12	had my business if things got tough, I took less.
13	Because the money comes from the business. When the
14	money isn't there in the business, when the people
15	can't pay their bills, you just have no place to go.
16	So I'm begging AmerenUE to hold off and take a look at
17	their own pay and say, hey, we've got to help this
18	country right now, we got to get together and fight
19	because we can survive together, but I have a hard
20	time right now, me and my wife, but we love what we do
21	and I want to continue to be a contributor to this
22	country. And I pray that you listen. That's all I
23	ask and I'm thankful to be here.
24	JUDGE WOODRUFF: Thank you, sir. Any
25	questions? The next name on the list is Dave Walle.

	Page 36
1	Raise your right hand. Do you solemnly swear or
2	affirm that the testimony you're about to give will be
3	the truth, the whole truth, and nothing but the truth?
4	MR. WALLE: I do.
5	JUDGE WOODRUFF: Tell us your name and
6	spell your last name.
7	MR. WALLE: David W-a-l-l-e. I reside at 6
8	Atwood Drive, St. Peters, Missouri, 63376. About the
9	rate increase, as people before have said, everybody's
10	got their hand in my pocket. I don't have any more
11	pockets left. I lost my job in April. I never got a
12	18 percent pay raise the entire time I was working. I
13	was lucky to get three. Two years ago I got a letter
14	from Ameren about renewable energy. That it would
15	cost me more for renewable energy. Well, if renewable
16	energy is so great, why does it cost more. I never
17	heard anything else. I guess it didn't sell because
18	people didn't volunteer a rate increase so they are
19	asking for this more. Wind energy, no. Holland has
20	tried it. Holland is famous for windmills. Has it
21	cut any of their costs for their power plants, no.
22	Has it done anything for them, no. Just run up the
23	cost. Ameren's own web site shows wind energy as some
24	of the highest priced electricity throughout the
25	country. I would suggest Ameren look at more

Page 37 conventional ways of developing electricity which is 1 2 cheaper. Solar won't work. We're not in Florida. We're not in California. We're not in Arizona, 3 4 deserts. The other thing is not only is this 18 5 percent on us, but it's 18 percent more because our government runs on electricity, they pay -- it's on in 6 7 higher tax. The government has no money of their own. 8 It comes from us. So we're going to be paying more. 9 I close by saying I guess the 18 percent increase --10 and I suggest Ameren should look at cutting their 11 costs, more efficient operations, and stand up for the people because we might get cap and trade which will 12 13 really skyrocket our electric rates. 14 JUDGE WOODRUFF: Any questions? Thank you, The next name is the list is Owen Peters. 15 sir. 16 Please raise your right hand. Do you solemnly swear that the testimony you're about to give is the truth, 17 the whole truth and nothing but the truth? Good 18 19 evening. 20 MR. PETERS: I do. 21 JUDGE WOODRUFF: Tell us your name and 22 spell your name. 23 MR. PETERS: My name is Owen Peters and I 24 have been in St. Charles County for 43 years.

Fax: 314.644.1334

overall I think Ameren or UE previously has done a

25

	Page 38
1	good job supplying electricity at my residence. The
2	only time I had outages is when a tree fell on the
3	wires or the transformer blew up, or some other
4	reason. And so, I believe they have done a good job
5	overall. However, I agree with most of these people
6	here that at this time you couldn't pick a worse time
7	to ask for a rate increase because of the unemployment
8	and foreclosures on homes, the prices of gasoline
9	going up, and all these costs are going up. And
10	perhaps I wish you would withdraw your request for a
11	rate increase rather than just reduce it because I
12	don't know how it's going to benefit me. If you're
13	going to charge me 18 percent or even 6 percent, how
14	is it going to benefit me? I'm getting supplied
15	electricity and it's working just fine, so how is the
16	additional cost to me going to benefit residential
17	customers? Basically, that's all I have. And I think
18	and I have one question for you, gentlemen, were
19	any of your commissioners appointed by former Governor
20	Matt Blunt.
21	COMMISSIONER GUNN: I was.
22	MR. PETERS: In the Post Dispatch it said
23	that you, Kevin Gunn was favorable to utilities and
24	not so favorable to the general public. That's what
25	it said in the paper? Is that not true.

	Pose 20
1	Page 39 COMMISSIONER GUNN: I don't think.
2	MR. PETERS: You're not going to?
3	COMMISSIONER GUNN: I can't answer
4	questions.
5	CHAIRMAN CLAYTON: Mr. Peters, if I got
6	your name down correctly, a few years back there was a
7	couple storms that hit the metro area, power was
8	knocked out. Were you affected by that when the power
9	went out?
10	MR. PETERS: Yes.
11	CHAIRMAN CLAYTON: For six, eight, ten
12	days, 12 days?
13	MR. PETERS: I think the longest I was out
14	of power was probably five days.
15	CHAIRMAN CLAYTON: Did that happen more
16	than once?
17	MR. PETERS: No. I was out of power for 12
18	hours at one time and two days another time and so
19	forth, in my 43 years of being here.
20	CHAIRMAN CLAYTON: The question I'm asking
21	is there were several big outages that the company
22	faced. One was in '04, '05, two in '06, and two ice
23	storms that happened in '07. And it's been suggested
24	that investments have been made that have improved the
25	system. You started off your comments saying the

Page 40 company's done with a good job with delivering power. 1 2 Glad to hear that. They are supposed to do that. Since you've been in this area for a long period of 3 4 time, have you seen an improvement in the past two or 5 three years with power and reliability of the service 6 that you received? 7 MR. PETERS: I think so, yes. 8 CHAIRMAN CLAYTON: Have you seen more tree 9 trimming, seen more investments in your neighborhood? 10 MR. PETERS: In my neighborhood, tree trimming probably last year, I think they did. Well, 11 they cut my trees down and trimmed them. So I think 12 that improved, but there was a transformer that blew 13 14 right next door. I don't know -- what could you say that it blew. It cut off electricity for a couple 15 days until they repaired it or replaced it. My 16 question for reliability is -- how much more 17 18 reliability are you going to provide with rate 19 increase? Underground is only --JUDGE WOODRUFF: I'm sorry. We can only 20 21 have one person talking at a time. 22 CHAIRMAN CLAYTON: I understand your 23 I just wanted to hear whether you saw any 24 new activity over the last couple years in your 25 neighborhood. And I think you answered about tree

	Page 41
1	trimming and some
2	MR. PETERS: The past couple years I think
3	reliability has been very good.
4	JUDGE WOODRUFF: Thank you. Next name on
5	the list is Betty Noonan. Please raise your right
6	hand. Do you solemnly swear or affirm that the
7	testimony that you're about to give will be the truth,
8	the whole truth, and nothing but the truth?
9	MS. NOONAN: Yes, sir.
10	JUDGE WOODRUFF: Thank you very much. Tell
11	us your name and spell it for us.
12	MS. NOONAN: Okay. My name is Betty
13	Noonan; N-o-o-n-a-n. My address is 9 Francis Court,
14	St. Charles, Missouri. And St. Charles county has
15	been my community for 40 years. I'm here this
16	evening, gentlemen, to respectfully request as members
17	of the Public Service Commission, that you deny
18	AmerenUE's rate increase proposal that is currently
19	before you for both residential and commercial
20	customers. Also, to ask that you disapprove any
21	future flexibility clause that would allow them the
22	ability to bill customers for any type of value added
23	surcharges or revenue shortfall type costs. These may
24	include but not limited to increase in their fuel
25	cost, introduction of new pure power, which is new

Page 42 1 wind power, and so forth. My request is made basically because power is such a critical element for 2 basic survival to everyone in this room and everyone 3 4 in every community. It touches one's health through 5 food stores, hospitals, medical centers, one's safety and mobility on the streets with simple things as stop 6 7 and go lights; in our parks, even our ability to ride 8 to work as we need to stop and pump the gas or stop at 9 that electronic ATM, our learning institutions, or 10 charities, the functioning of even our government. Everything will be impacted by this increase. 11 12 impact is not going to trickle down. It will pour 13 down. Unlike Ameren customers, I mean unlike Ameren, 14 customers cannot petition anyone anytime for hearings, but when we do have the opportunity to attend, we like 15 to share our experiences. Yes, it would be nice for 16 consumers to be able to say, hey, Mr. Somebody, I paid 17 18 an average 20 cents a gallon more for gasoline this 19 month, so Mr. Somebody, divvy up. Or, hey, I'm going green, and I'm buying a hybrid. Guess what, you 20 21 finance me but you don't get anything in return. As a personal example, I'm going to use me. This increase 22 23 will mean I will now pay for 15 months of usage in a 24 12-month period. And an amount equal to three months of normal electrical usage. Now, do I see that as 25

	Page 43
1	such a 18 percent increase on the AmerenUE bill. No,
2	I don't. Rather, I see an absolute 25 percent
3	increase in my annual electric budget, three months is
4	a quarter, quarter is 25 percent of the year. Along
5	with increased prices on every goods and service I
6	purchase. Ladies and gentlemen, again, an increase
7	awarded AmerenUE at this time is going to have a very,
8	very dramatic impact across our community. Price
9	increases will come downward from every business,
10	every hospital, every medical care facility, all of
11	our educational institutions, community service
12	providers, and, yes, even our government centers.
13	Every one will feel it from everywhere. With the
14	employment rate in the double digits, no raises for
15	those who currently have jobs, no jobs available for
16	those that have been laid off, and the federal
17	government says there is zero inflation, our economy
18	is in need of serious repair. We urge you to deny any
19	rate increase request. This is not the time for
20	increase. Perhaps AmerenUE can find a way to tighten
21	their belt so to speak. In the area of efficiencies
22	or salaries, most of us have already done this and
23	will continue to do so. And thank you very much,
24	commissioners, for your time and for your
25	consideration. Thank you.

1	Page 44  JUDGE WOODRUFF: Any questions? Next name
2	on the list is Tom Gillette. Raise your right hand.
3	Do you solmenly swear or affirm that the testimony
4	you're about to give shall be the truth, the whole
5	truth, and nothing but the truth?
6	MR. GILLETTE: Yes, I do.
7	JUDGE WOODRUFF: Tell us your name and
8	spell your last name.
9	MR. GILLETTE: My name is Tom Gillette;
10	G-i-l-l-e-t-t-e. I live here in St. Charles. I have
11	lived in St. Charles all my life and, yeah, the
12	service is fine. I am some of what I had to say
13	was spoken very well by Tom Schneider, the effect on
14	very poor, the people who can least afford this. I'm
15	also hear to speak about rate increases because in our
16	business, we use a lot of energy inputs and we follow
17	both electric rates and natural gas rates. The
18	challenge that I see not just with AmerenUE and
19	because AmerenUE does operate some natural gas plants,
20	but this goes on across the country, Public Service
21	Commissions are allowing utilities to build natural
22	gas fired plants. By doing this they are pushing up
23	the price of natural gas which affects all of us
24	probably as much as the rate increase does that we're
25	talking about. And I think that we really need to

Page 45 look elsewhere for other methods of generating 1 2 electricity, especially for generating that surplus electricity. Tomsauk was a brilliant piece of 3 4 generating capacity, build another one. That's all I 5 have. 6 JUDGE WOODRUFF: Thank you, sir. 7 questions? Thank you, sir. The next name on the list 8 is Troy Birdman. Is Mr. Birdman still here? 9 next name is John Behr. Please raise your right hand. 10 Do you solemnly swear or affirm that the testimony 11 you're about to give shall be the truth, the whole truth and nothing but the truth? 12 13 MR. BEHR: I do. 14 JUDGE WOODRUFF: Thank you very much. Tell 15 us your name and spell us last name for us. MR. BEHR: John Behr; B-e-h-r. I'm a 16 resident of St. Charles county, but I'd like to direct 17 my remarks tonight on behalf of the company I work 18 19 for, Schnuck markets, rather than as a personal, residential customer of Ameren. Like the others who 20 21 came before you tonight, I also would ask that you not grant Ameren their 18 percent rate increase request. 22 However, I'd like to talk more specifically about how 23 24 any such rate increase is apportioned amongst their class of service customers, if you will. There are a 25

Page 46 1 number of rate classes, as I'm sure you well know, with different electric rate structures from 2 residential to small and large general service, to 3 4 small and large primary service. And finally, the very largest, which are called large transmission 5 customers. General service customers have 6 7 consistently paid more toward the cost of service than 8 other classes. In the past, settlements like those 9 that will come out of of this rate request have 10 favored other customer classes by using across the 11 board rate increases for a major portion of the 12 revenue increase request. Ameren's own class cost of service testimony in the past shows that the general 13 14 service class is still paying more. Energy is a substantial cost for small businesses. And I think as 15 everyone would agree here tonight, small businesses 16 really drive our economy. Particularly as we try to 17 18 recovery from this deep recession. The profit margins 19 of independent retailers like Schnucks -- we're a privately held company. Our profit margins like other 20 21 companies like us are under extreme pressure from big box competitors like Wal-Mart, Target and Costco. 22 23 our company, we operate 106 grocery stores, nearly 24 half of which are served by AmerenUE. Each one of these is really a small business unto itself with its 25

Page 47 own P & L. Each of these stores serves an important 1 role in a local community as a food and drug retailer. 2 As well as an employer of about 150 or so people per 3 4 store on average. Energy is a substantial cost for 5 small businesses and especially for grocery stores. I'll echo some comments made by a gentleman earlier in 6 7 the evening. Grocery stores require a lot of electrical to keep their food refrigerated and frozen 8 9 as well as lighting and heated and air conditioning. 10 As a result because of that refrigeration component, 11 we use a lot more electricity per square foot than 12 residence, office buildings or even dry goods retailers. Refrigeration accounts for about half of 13 the total energy use in a grocery store, or can you 14 think of another way a grocery store using twice as 15 16 much energy per a comparable size stores like Lowe's or Home Depot or Kohl's that only have to provide 17 18 lighting and air conditioning. Food retailing is 19 extremely competitive. In good times grocery stores operate on a razor thin profit margin of about one or 20 21 two percent are sales. In good times we don't make 6 percent like Ameren. It's very competitive. 22 23 Likewise, as we just explained, our energy costs are 24 high, our utility costs are about one or two percent of our sales. Just like our profit margins are one or 25

									Page 48
two	percent	of	our	sales.	So	if	our	utility	rates

- 2 were raised 18 percent, our profit would fall 18
- 3 percent. And for some of our stores, this could
- 4 easily mean the difference between keeping that store
- 5 open or closing it. And the impact to that community
- 6 is that a small business could suffer or each fail in
- 7 that community. So I only ask you tonight to consider
- 8 how any such rate increase gets apportioned among the
- 9 rate -- among the classes of service. And this time,
- 10 please, general service customers should be treated
- 11 fairly at all levels. And this will serve to take
- 12 care of small businesses which are critically
- important right now in this economy and any recovery.
- 14 Thank you.
- JUDGE WOODRUFF: Any questions for Mr.
- 16 Behr.

1

- 17 CHAIRMAN CLAYTON: Mr. Behr, I do have a
- 18 question. I don't know if you're the right guy to ask
- 19 this question or not. Does Schnuck's take part in the
- 20 demand response offerings from Ameren? Do you know
- 21 what I mean.
- MR. BEHR: I do. I'm director of
- 23 facilities.
- 24 CHAIRMAN CLAYTON: I didn't know from what
- 25 arm of Schnuck's --

	Page 49
1	MR. BEHR: We do not right now because the
2	program that they offer is not particularly beneficial
3	to us in demand response. Much of our load is very
4	flat because that refrigeration is running 24/7. And
5	so it's difficult for me to shed any of my load during
6	the middle of the day when the peak demand occurs.
7	CHAIRMAN CLAYTON: I'm not familiar with
8	Schnuck's foot print where you serve customers, but do
9	you have any stores that do participate in the demand
10	response program?
11	MR. BEHR: We do have a few in northern
12	Illinois in Com Ed territory.
13	CHAIRMAN CLAYTON: What makes a demand
14	response program work for Schnuck's to participate, to
15	come down to just the dollar that is paid? Is it
16	something that has to work with your load profile?
17	MR. BEHR: It's really the dollar that's
18	paid. And frankly, where we do participate in
19	northern Illinois, it's a tiny, miniscule amount. We
20	do it because we can and seldom get called upon. And
21	all we're able to do is shut off lighting.
22	CHAIRMAN CLAYTON: I hate to invoke the
23	name of Wal-Mart who is a competitor of yours, but
24	Wal-Mart has participated. They got a national
25	program on demand response. Have you all studied what

	Page 50
1	Page 50 they do to determine whether it's works for Schnuck's?
2	MR. BEHR: I have looked at it a bit. I
3	would question whether they participate in anything
4	with AmerenUE. In other utilities, especially in the
5	northeast and west coast, et cetera, demand response
6	is much more effective and mostly because they are
7	willing to pay a lot more.
8	CHAIRMAN CLAYTON: But there are things you
9	can do that can shed that load during high peak times?
10	MR. BEHR: There are some, but I can't even
11	begin to shed 25 percent of my load, maybe five.
12	CHAIRMAN CLAYTON: Thank you.
13	JUDGE WOODRUFF: Any other questions? That
14	was the last name on the list. I'll throw out if
15	somebody wants to come up and testify, I see several
16	hands. We'll let this march and we'll try to get
17	everybody up here.
18	MR. GLENN: How are you doing? I hadn't
19	planned on speaking tonight.
20	JUDGE WOODRUFF: Do you solemnly swear or
21	affirm that the testimony you're about to give shall
22	be the truth, the whole truth, and nothing but the
23	truth?
24	MR. GLENN: Certainly.
25	JUDGE WOODRUFF: Tell us your name.

	Page 51
1	MR. GLENN: Lindeman Glenn out of
2	Florissant, Missouri. I hadn't planned to speak
3	tonight, but it's pretty interesting people got a lot
4	of good information and that. Personally I myself can
5	I understand why they want a rate increase. I can
6	understand why it's justifiable. For one thing they
7	have been pushing conserving energy, which means they
8	are selling less electricity. If all of us conserve
9	electricity, they are making less money. In addition
10	to that, the Obama administration has a little thing
11	about not liking coal. Other than my relatives' place
12	at Callaway nuclear plant, they're big producers down
13	here at Portage. It is using coal. So at what point
14	or is this part of what the Obama administration is
15	is that what they are going to do to this coal?
16	Is that part of this race that's going to bump on to
17	us as a consumer? Is this part of it? That's what I
18	would like to know because at some point that's going
19	to come down the road or is that going to be another
20	40 percent increase down the road. That's something I
21	would like to get clear. Because like I said, if
22	you're in business, you want to make money. However,
23	if you are floating around a two-digit profit margin,
24	I have a real problem with that because myself and
25	rest of these people that work, I don't think we make

Page 52 1 that kind of profit margin. Not a lot of people do. I think Bernie Madoff did in all his companies in his 2 little scams. However, if you want a legitimate 3 4 business that serves the public as a public utility, 5 and you want to make a profit in double digits, so 6 somebody better go back and take a double look at what 7 these people are making as profit. As far as people running it, some them are probably pretty intelligent. 8 9 However, on some, the last issue that they had with me not having utilities for five days at a time because 10 they didn't do their jobs, which I'm trying to figure 11 12 out who, because you got leadership and vice-president and then you got assistant, assistant, to assistant 13 14 vice-president, okay. Which one is responsible? Well, I'm not responsible. Well, somebody is darn 15 sure responsible for this matter. So, you have got 16 enough of them in there, half of them to could 17 18 probably go bye-bye because all they do is put the 19 blame on somebody else. Okay. If you want to do your job and get in there. I'll work for them for free for 20 21 a year, not a problem. I'll run it. They can all go bye-bye and I'll run it. And I quarantee I can turn 22 23 the company around. It's real easy to do because I 24 ain't interested in making a bunch of money. I'm not interested in all stocks afterwards and big profits 25

	Page 53
1	and a nice, new building they got down there, and new
2	equipment and big walkway across the street they
3	built, and everything else they invest their money in
4	and want to come back and say we need increase to pay
5	for all this. Why didn't you think about that before
6	you built it and bought it because people out here are
7	hurting. I got all kinds of relatives no jobs, laid
8	off, disabled. I got a sister that's dying now and
9	she can't even get Social Security because she quit
10	working. Even though she worked most of her life and
11	they said you don't get anything. Tough luck, bye.
12	And her husband just had cancer. Their insurance ran
13	out and they had tough luck. Bye. We can drag all
14	the refugees over here and give them everything we
15	want, but we won't take care of our own people. I
16	suggest this commission start taking care of the
17	people in Missouri and the U. S. government should be
18	doing it, but they let all our jobs go overseas. Half
19	of these kids in college and high school that spent
20	all kinds of money going to colleges get out and they
21	want to give them \$20,000. They got \$50,000 in bills
22	going to college. How are our kids and your kids
23	supposed to put up with this where you got all these
24	people making all this money and the rest of us I
25	don't even get one percent on my savings account. How

1	Page 54 are we supposed to deal with that situation? It's not
2	going to end up very pretty. And I believe it's
3	starting to go show in the polls. So, that's why I
4	didn't really want to talk, but I wanted to express a
5	little opinion.
6	JUDGE WOODRUFF: Please raise your right
7	hand. Do you solemnly swear or affirm that the
8	testimony your about to give is the turth, the whole
9	truth and nothing but the truth?
10	MS. BRANDT: Yes, sir.
11	JUDGE WOODRUFF: Tell us your name please.
12	MS. BRANDT: My name is Evelyn Brandt;
13	B-r-a-n-d-t. Before you gentlemen came to the room we
14	were asking questions or we were allowed to ask
15	question to some of the AmerenUE workers and the CEO.
16	And one of the things somebody asked was how much he
17	was making in one year. And his response was \$575,000
18	per year, which means a lot more than people that has
19	ten percent job loss right now. And we were asking
20	also to him and how much was their profit last year in
21	nine months. He said it was between \$160 million and
22	\$180 million. What I would like to know how many
23	people in that kind of profit they hired to help your
24	economy. How many people they give more jobs to for
25	\$180 million. If they took that if they don't have

	Page 55
1	two years of any kind of profit, they just worked,
2	paid their workers. Right now is not the time to do
3	anything new. That's my belief anyway, but if they
4	did not make any profit for two years, that would make
5	\$320 million that asking for the public \$402 million.
6	So what I'd like to know, is that why now. I do
7	realize America is going green, I do realize that.
8	And you're trying to build power plants and trying to
9	do more green and all that, but is this the time when
10	people can't find jobs, everybody is helping each
11	other's families out, grandparents are taking care of
12	their grandchildren even. Is this the time? And
13	another thing is that you know, I wasn't born in this
14	country, but I'm an American citizen and I will die
15	for this country. And I believe America is the
16	greatest country in the world, but here's the thing,
17	they are asking the government is asking from us as
18	Americans to help each other out basically, help each
19	other out. What is AmerenUE doing to help Americans
20	out. And the other thing. And I'm done basically for
21	my question. And I'm against this increase, but I
22	notice that you as commission members and seem like
23	Robert Clayton is the only one asking questions may I
24	ask why Mr. Clayton
25	MR. KENNEY: I think there was a desire to

Page 56

- 1 allow the most number of people to speak and allow
- 2 everybody in the room to have an opportunity to
- 3 express their opinions rather than all of us asking
- 4 questions. I think it was really just a desire to
- 5 allow the maximum number of people that wanted to take
- 6 the time to speak to sometime.
- 7 MS. BRANDT: That did answer my question.
- 8 The judge was asking if there is any question and Mr.
- 9 Clayton was the only one asking questions. That's
- 10 what I would like to know why Mr. Clayton -- why did
- 11 he ask question.
- 12 CHAIRMAN CLAYTON: The questions I asked I
- 13 was interested in the answer that.
- 14 MS. BRANDT: To be honest, that shows me
- 15 actually that you are the only one interested in
- 16 listening to us.
- 17 COMMISSIONER GUNN: We can certainly ask
- 18 questions about reliability.
- 19 MS. BRANDT: T be honest with you, I feel
- 20 as a consumer, as an American citizen, if he is only
- 21 one listening -- supposedly if you guys are
- 22 representing us I would expect everybody to ask
- 23 questions, not just Mr. Clayton --
- 24 CHAIRMAN CLAYTON: Ms. Brandt, I appreciate
- 25 you saying that. I don't think that anyone in the

	D 57
1	Page 57 room should characterize just because I ask
2	MS. BRANDT: I wasn't categorizing. I
3	wanted to make sure everybody was listening.
4	CHAIRMAN CLAYTON: I have been accused of
5	asking too many questions and heckled by crowds for
6	asking way too many questions.
7	MS. BRANDT: I think you did well because
8	that showed your character and you care.
9	CHAIRMAN CLAYTON: I appreciate that, but I
10	don't think you should take away from everyone else.
11	MS. BRANDT: Thank you.
12	COMMISSIONER JARRETT: I just wanted to say
13	I am here in Jefferson City, and I have been here
14	since the hearing started and I am listening to ever
15	witness.
16	JUDGE WOODRUFF: Do you solemnly swear or
17	affirm that the testimony that you're about to give
18	shall be the truth, the whole truth, and nothing but
19	the truth?
20	MS. KALIPS: Yes, I do.
21	JUDGE WOODRUFF: Thank you.
22	MS. KALIPS: My name is Chris Kalips;
23	K-a-l-i-p-s. I reside at 1008 Devonshire. And I
24	hopethe people from AmerenUE is writing that address
25	down. The only reason why I'm up here is because Mr.

Page 58 1 Clayton was asking the questions. I am one of the 2 customers that the power is not on. That two years ago my electric went out for the six days. I had to 3 4 pay for hotel rooms, two iceboxes worth of food, freezer, and actually blew out one of my iceboxes. 5 6 Because of the wording in their stipulations, I didn't 7 get an icebox because it was an act of God. Two weeks 8 later, ice storm again. I was the next person was out 9 for four days; food, more hotel rooms. My power is 10 not on, in fact, two months ago it was out again, 11 bright sunny day. It's a running joke with my 12 friends. It's a running joke with my family, why. 13 All the time, all the time. My lines are buried. 14 Squirrels aren't eating it, moles maybe. It's always out. People walk a dog in my 15 know. neighborhood and it pees and my power goes out. 16 Honestly. I contacted finally a gentleman who was so 17 18 helpful at AmerenUE on 94. Do not ask me his name. got it wrote down. He walked the lines and he was 19 well aware how bad the power was back there. 20 21 what really bothers me is two blocks over there is a gentlemen who does work for AmerenUE. He is a 22 23 manager, and he is actually on a separate grid, that's

Fax: 314.644.1334

why he is always on supposably and I'm off. Fix my

grid with the 18 percent.

24

25

	Page 59
1	CHAIRMAN CLAYTON: I don't want to
2	interrupt, but I want to ask a question. In this
3	crowd I'm asking for permission.
4	MS. KALIPS: Go ahead.
5	CHAIRMAN CLAYTON: I was on the commission
б	when all the outages took place.
7	MS. KALIPS: I called the PSC, too.
8	CHAIRMAN CLAYTON: I think there was a desk
9	right out front that has a reliability sign, as I
10	recall. Did you go to that desk?
11	MS. KALIPS: Yes.
12	CHAIRMAN CLAYTON: Did you give them your
13	address?
14	MS. KALIPS: No. Because why, it's always
15	like it's all the time. It's not this year. It's
16	last year. It's been like that the five years.
17	CHAIRMAN CLAYTON: So you haven't seen any
18	improvement since '06 and '07?
19	MS. KALIPS: Yes. I can say it's better
20	than it was, but my power still goes out for what
21	reason.
22	CHAIRMAN CLAYTON: How many times a year
23	does it go out?
24	MS. KALIPS: This year I can only think of
25	maybe five.

1	Page 60 CHAIRMAN CLAYTON: Since Friday?
2	MS. KALIPS: No, not this year, last year.
3	CHAIRMAN CLAYTON: So 2009?
4	MS. KALIPS: Maybe five.
5	CHAIRMAN CLAYTON: If you go back three
6	years prior to that, how many times would you say it
7	went out? How many dogs came through the
8	neighborhood?
9	MS. KALIPS: It went out so much that I got
10	so mad and choose not to pay my electric bill. You
11	know what that got me?
12	CHAIRMAN CLAYTON: What did it get you?
13	MS. KALIPS: My power turned off and I had
14	to pay a deposit to turn it back on plus pay my bill.
15	CHAIRMAN CLAYTON: The reason I asked about
16	this desk, I would urge I hate to bother the PSC
17	staff again, but Ameren people, they can go and check
18	circuits and check on reliability statistics?
19	MS. KALIPS: That one guy on 94, you pulled
20	that down and gave me everyday. He said yeah, you're
21	one of those that's on that bad grid.
22	CHAIRMAN CLAYTON: We do have rules that
23	are in place that were not in place before. That's
24	why I'm interested. I'll tell you I have done a lot
25	of hearings on Ameren in the metro area and we were

	Page 61
1	here an entire summer on reliability issues after
2	those storms and crowds were not happy. And that's
3	why I'm interested to know have things improved?
4	MS. KALIPS: With those storms with
5	AmerenUE it's like they give you phone numbers to call
6	for help and go to facility. And after who do you
7	call for help and I went through all the numbers and
8	everything, and it got back to the help with the Red
9	Cross. Why am I taking money from somebody else who
10	doesn't have it because I'm trying to prove a point to
11	AmerenUE. It's not
12	COMMISSIONER GUNN: But your lines are
13	underground.
14	MS. KALIPS: They have been underground
15	since I moved in that house seven years ago.
16	COMMISSIONER GUNN: So it's not a tree
17	trimming issue.
18	MS. KALIPS: They have trimmed the trees.
19	My whole neighborhood is underneath the ground.
20	COMMISSIONER GUNN: But they are still
21	trimming trees?
22	MS. KALIPS: Still trimming trees. It's
23	white trucks that say JT's. Still trimming trees.
24	CHAIRMAN CLAYTON: Ms. Kalips, I would urge
25	you to meet with the staff and if there is reliability

1	Page 62
1	issue, there are things we can do to dig into it and
2	identify the problem. That's what getting all these
3	people in the room together is about. So I urge you
4	to take advantage of that?
5	MS. KALIPS: Thank you.
6	JUDGE WOODRUFF: Any other questions for
7	Ms. Kalips? Do you solemnly swear or affirm that the
8	testimony you're about to give is the truth, the whole
9	truth and nothing but the truth.
10	MR. DESE: Yes.
11	JUDGE WOODRUFF: Tell us your name.
12	MR. DESE: My name is Philip Dese; D-e-s-e.
13	JUDGE WOODRUFF: What would you like to
14	tell us?
15	MR. DESE: I just have some comments
16	because I know the inner workings of Union Electric
17	and I don't like a lot of them. I'm a certified
18	boiler inspector, and I have inspected Union Electric
19	plants; Labadie, Portage, Meramec and some of the
20	others. The quality of maintenance is not what ASME
21	wants period. You guys are in life expectancy mode
22	and have been that way since 1980. Well, you're in
23	some plants you're like 25 years past the life of the
24	boiler and still going. Now, one of these days this
25	thing is going to blow up and it's going to be "An act

1	Page 63 of God." I don't think so. I was down at Meramec
2	plants because I had to do a third party loss
3	investigation for main step-up transformer out of one
4	of your generators. And when I walked in number one
5	it was toasted. It overheated. When you overheat oil
6	in transformer you build up ammonia. And when you
7	build up ammonia and nitrogen it blows up. And when
8	it does explode, it's above the ignition temperature
9	of the oil so it burns. So we had like 14,000 gallons
10	of oil or 13, five. I don't remember which this is
11	back in like '93 or '94. And so I was asking
12	questions because I had to do loss investigation on
13	this thing. Well, it turns out that this transformer
14	was shipped in from Europe, I believe, Germany but I
15	don't remember, I did know. But it was shipped in,
16	came across the ocean into New York city and trucked
17	all the way from New York city into here. Okay. It
18	had too small of an oil cooler for our normal ambient
19	temperature and that was my recommendation is this
20	transformer should have been provided with adequate
21	oil coolers with fans. Okay. For the Missouri
22	environment. Instead, an engineer or somebody went
23	down to K-Mart or Wal-Mart and got a soaker hose, ran
24	it through the oil cooler fence and it obviously
25	didn't work. My question is just this okay because I

Page 64 asked one of your employees how in the heck can you 1 2 guys take a \$6 million loss on a transformer that takes 14 months to rebuild. Okay. And just burn it 3 4 up, blow it up, whatever you want to do with it. And 5 I was told point blank guys and these are you guys, point blank, "hey, don't worry about it. It won't 6 7 cost us a dime. We're going turn it in as an act of 8 God. 9 CHAIRMAN CLAYTON: These are Ameren folks? 10 MR. DESE: Yes. CHAIRMAN CLAYTON: We don't work for 11 12 Ameren. 13 MR. DESE: But you guys approve it. 14 CHAIRMAN CLAYTON: They are not our guys. I want to be clear on what we're talking about here. 15 You mention --16 17 MR. DESE: I'm positive it was turned in. It was turned in as an act of God. And this is about 18 19 as much an act of God as somebody walk up and put 20 three or four slugs through the case. That's number 21 one. Number two, you guys already have your 18 percent or approximately rate increase because when 22 Callaway 1 was built, the entire foundation network 23 24 for Callaway 2 was poured, in place, and is sitting there. I was out at the site and there was a 25

Page 65 bull-dozer pushing dirt over the foundation. 1 It's buried under 12 to 15 feet of dirt. Was that cost 2 passed on to us from Callaway 1 went on. I think it 3 4 Same way with the intake structure. The intake structure on the Missouri river was built for two 5 units. And as a rate payer I got to pick up the 6 7 entire cost of that instead of just half. I also got to pick up the cost of running, I think, it's 12 miles 8 9 of pipe that I can stand up in and walk through to the 10 plant. And there is a reverse line coming back out 11 the outflow pipe that's the same size. So I mean we've got huge amount of investment sitting there for 12 a plant that doesn't exist and probably never will. 13 14 The smallest contract on unit one was the pipe insulation contract. It was billed for \$400,000. 15 final price was \$1.6. That was the smallest contract 16 on the whole construction site. There was so many 17 18 massive cost overruns it was pathetic and the general 19 contractor was more than happy because his contract said he got, I think, ten percent for every dollar he 20 21 touched. So he didn't mind doing did wrong one, two, three, four times, you know, or whatever it cost. 22 23 got ten percent. And that is the end of my comments, 24 but I don't think you need a 18 percent. You have already got it in what's buried up at unit 2 and also 25

	D
1	Page 66 the increased size because even the cooling tower,
2	parabolic cooling tower was designed for the second
3	unit?
4	JUDGE WOODRUFF: Any questions.
5	CHAIRMAN CLAYTON: Yeah, I do. Mr. Dese,
6	are you a former employee or current employee of
7	Ameren.
8	MR. DESE: I was a consultant.
9	CHAIRMAN CLAYTON: To the company?
10	MR. DESE: To the company. I represent the
11	insurance company.
12	CHAIRMAN CLAYTON: And was that during the
13	entire construction period?
14	MR. DESE: No.
15	CHAIRMAN CLAYTON: '75 to '83.
16	MR. DESE: This was only like a five-year
17	period from like '78 through '84, I guess. I'm trying
18	to remember. I'm old.
19	CHAIRMAN CLAYTON: Did you ever testify
20	before the Public Service Commission during the rate
21	case involving Callaway 1 and proposed Callaway 2?
22	MR. DESE: No.
23	CHAIRMAN CLAYTON: So you never offered any
24	testimony or consulted on actual rate making before
25	the Public Service Commission?

	Page 67
1	MR. DESE: No. My job was that of my
2	qualifications. I'm fire protection engineer and I'm
3	national board certified boiler inspector.
4	CHAIRMAN CLAYTON: Okay.
5	MR. DESE: I'm also electrical engineer.
6	CHAIRMAN CLAYTON: Excuse me. Okay. Do
7	you have any specific examples of current safety
8	problems associated with AmerenUE?
9	MR. DESE: I have not been working since
10	2000.
11	CHAIRMAN CLAYTON: Okay. So you don't have
12	any specific examples?
13	MR. DESE: No, I don't have current. I
14	will give you some current examples. Yeah. Okay.
15	Some current examples that I have noticed. Okay.
16	Union Electric has a load, and I mean a load because
17	they're mostly bedroom communities. They have a load
18	of mounted transformers and it's almost impossible to
19	try to service all those, but at least the big ones
20	should be serviced. And yet that was part of one of
21	their cutbacks. Okay. When they needed some money
22	they cut back on service of the major transformers,
23	the distribution transformers.
24	CHAIRMAN CLAYTON: Are you aware of the
25	infrastructure rule that the commission passed a few

	Page 68
1	years ago?
2	MR. DESE: No, sir.
3	CHAIRMAN CLAYTON: That required inspection
4	of infrastructure such as transformer lines, poles.
5	MR. DESE: Inspection doesn't do darn
6	thing. You have do do oil testing and clean the oil
7	and insulators and that stuff. If you're not going to
8	do that, okay, drive away and shoot a hole in it
9	because it's going to fail.
10	CHAIRMAN CLAYTON: So, how would a rule be
11	written that would require that just basically aside
12	from directing that an inspector goes in and checks
13	the functionality of a transformer, how would you add
14	to that.
15	MR. DESE: When you get a report that they
16	want you to pay for "an of act of God" ask for oil
17	testing records, ask for dielectric tests records.
18	There should be more than one. They are supposed to
19	do this on an ongoing basis like changing the oil in
20	your car.
21	CHAIRMAN CLAYTON: I don't have any other
22	questions. Thank you, Mr. Dese.
23	JUDGE WOODRUFF: The gentleman in the blue.
24	MR. VALENTI: Thank you.
25	JUDGE WOODRUFF: Do you solemnly swear or

1	Page 69 affirm that the testimony you're about to give shall
2	be the truth, the whole truth, and nothing but the
3	truth?
4	MR. VALENTI: I do.
5	JUDGE WOODRUFF: Tell us your name.
6	MR. VALENTI: Sam Valenti; V-a-l-e-n-t-i.
7	JUDGE WOODRUFF: What would you like to
8	tell us?
9	MR. VALENTI: First of all, I'd like to
10	thank you for coming down. I appreciate that. I am
11	probably on the far end of the spectrum of people
12	you're going to talk to because I have no confidence
13	in you. I have no confidence in the executives with
14	UE in the back of the room. Zero. They are
15	corporatists. You come from a corporate environment,
16	and you succumb to corporate arguments without
17	adequately listening to people. People have been
18	standing up here one after another tonight talking
19	about their hardship. One third of the people in the
20	state of Missouri right now are retired, unemployed,
21	underemployed, cannot afford your rates as they are.
22	So I'm going to suggest this. I'm going to suggest we
23	give them 18 percent reduction in rates. All right.
24	And if we have to settle for something like eight
25	percent reduction, well, so be it. I can live with

1	Page 70 that, you know. At least it's a reduction. Now, I
2	don't trust you to do the hard work. You're dressed
3	in suits. When I see you come in blue jeans and
4	T-shirts, then I think you will be on my level. When
5	I see you missing your teeth, then I think you will be
6	on my level. When I see you not having a car for five
7	years and walking, then you will be on my level and
8	the level of a lot of our people. Because America,
9	the people working people of America are going
10	down. This isn't a joke. This is real. It's
11	happening now. The reason it's happening is because
12	corporate people have bought off our politicians.
13	Politicians don't work for America anymore. They work
14	for corporations. We mean this as a corporatist
15	state. That's called fascism. My father fought in
16	World War II in Patton's army, won four bronze stars,
17	liberated the guys at the Battle of the Bulge that
18	ended that war. He fought long and hard. I fought
19	during the Vietnam war, okay. So I'm not going to
20	stand up here and listen to people who are corporate
21	people try to tell me what's going on, and I don't
22	know because believe me I do. And I want to point you
23	guys out in the back with UE. You stand on notice
24	that the people are not going to tolerate your
25	behavior any longer. This is not a game. This is

1	Page 71 life and this is death. And it's time you understand
2	that. So take your rate increase off the table and
3	learn to live within the budget like we live. Because
4	people are going to get rifles soon. And it's time
5	they do. So here's my proposal. The only way to get
6	UE to get out of that 20th century mind set they are
7	in is to shock them. You got to shock the electric
8	company of all crazy things, but that's what you got
9	to do. And that 18 percent rate reduction will do it.
10	It's not Pollyanna; it's not pie-in-the-sky. What
11	that will do is guarantee that there is no rate
12	increase. And we'll try to live with what's here.
13	And by doing that you will change their goofy culture
14	into a good will culture because that's where America
15	is living right now. So wake up, think that there are
16	a lot of people like me because there are. All right.
17	I'm sorry I raised my voice. I'm sorry if I offended
18	anyone, but that's how I feel and that's where I'm at.
19	Thank you.
20	JUDGE WOODRUFF: Any questions?
21	MR. CUCCIO: C-u-c-c-i-o Tony. I live at
22	209 Whitehurst Manor Court, St. Louis, Missouri.
23	JUDGE WOODRUFF: Do you solemnly swear or
24	affirm that the testimony your about to give shall be
25	the truth, the whole trth and nothing but the truth?

	Page 72
1	MR. CUCCIO: I do. I think my opinions
2	aren't falsehoods. I just have a series of questions.
3	I don't understand, and I hope we're not paying for
4	the advertising in the media that AmerenUE advances to
5	burnish its image. I mean I have one transmission
6	line into my house. I can't use Cuivre River, I wish
7	I could. The subdivision across the way from me has
8	Cuivre River, the school and church behind me have
9	Cuivre River. And when my power is off, theirs is
10	always on. And I have belonged to co-ops before, and
11	I have been very pleased with those. I hope we're
12	also not paying for message boards at the Blues, Rams
13	and Cardinal stadium and facilities. I don't see the
14	point in advertising anyway since you have a set group
15	of customers. I mean I either have to use you or I
16	have to go back to Abe Lincoln time or light a candle
17	or bring in a wood burning stove because I don't have
18	an alternative. AmerenUE power play for the Blues, I
19	don't know that I would want to be associated with
20	that. I think they scored once in the last 40 times.
21	It's pretty low wattage power play. When US Cellular
22	field was built in Chicago in 1993, Commonwealth
23	Edison gave the owners, Reinsdorf and Ionhorn free
24	electricity, free power and then asked for a huge rate
25	increase of the community. I want to make sure we're

Page 73 not giving the fat cats that run those three teams 1 2 free or reduced electricity below what we or Schnuck's, or some other commercial employers pay. 3 4 Also, I remember five or six years ago talking to 5 someone at AmerenUE told me that their bargaining employees paid nothing in the way of contribution for 6 7 their health care. I hope you're looking not only at 8 compensation, but you're looking at benefits provided 9 and making sure they have reasonable deductibles, 10 reasonable out-of-pockets, reasonable co-pays on 11 physician visits and drugs that are comparable to 12 those of other employers. And that they are not paying nominal amount as percentage of premium for 13 14 those plants. They are probably self-insured so it's cost of their claims and administrative cost. I don't 15 understand why they are selling appliances, why do 16 they sell stoves? I see advertisements for that. 17 18 are they trying to compete with Lowe's and Home Depot 19 and Best Buy. Also, I don't understand why they are for subsidizing people that put in more efficient air 20 21 conditioners, furnaces. Federal government does that. I took advantage of that when I put in a new air 22 conditioner and furnace a year or two ago, but in time 23 24 when you're asking us to pay 18 percent more it seems to me this laundry list or items like this should be 25

	Page 74
1	examined and may not, you know, amount to a whole lot,
2	but every little piece that can be taken off that
3	budget means maybe that 18 percent increase doesn't
4	have to be 18. Maybe it can be 17 and a half or
5	something less. Somebody told me when I brought up
6	the issue of advertising, that shareholders pay for
7	that and we didn't pay. I hope that's true because I
8	hate to think I was paying for what I think is
9	frivolous media advertising. That's all I have.
10	JUDGE WOODRUFF: Any questions?
11	CHAIRMAN CLAYTON: All of the issues that
12	you mention
13	MR. CUCCIO: I just brain stormed those
14	when I got out of bed this morning.
15	CHAIRMAN CLAYTON: They are all excellent
16	questions and all issues that come up in the case that
17	comes before us.
18	MR. CUCCIO: I hope they do.
19	CHAIRMAN CLAYTON: The parties, the
20	stakeholders involved in the case, there is sparring
21	back and forth and ultimately the commission has to
22	make a decision, but every issue that you mention is
23	something that generally we have to decide on, so it's
24	not automatic that something goes in an expenditure
25	goes into rates. That's not the way it works and

	Page 75
1	that's what the commission does. What I wanted to ask
2	you is you mention did you say you were at the end
3	of the line?
4	MR. CUCCIO: No, I got in late.
5	CHAIRMAN CLAYTON: Do you are you
6	adjacent to Cuivre River?
7	MR. CUCCIO: I am adjacent to a subdivision
8	that has Cuivre River and adjacent to St. Joe, and I
9	am I think the school has it. I know the church
10	has it. I haven't lost power very much, not like my
11	daughter, not like my secretary, not like another
12	woman at work who seems every time there is a little
13	issue they are throwing out food and I don't know how
14	they put up with that time and time again. I lost it
15	a couple time and I haven't gone to a hotel. We've
16	just put on additional covers and held each other
17	closer. I don't see their power off, and I belonged
18	to a cooperative when I lived in central Illinois.
19	They gave us dividends back every year. I thought it
20	was efficiency run much more so than Illinois Power
21	which was the alternative for folks around there. So
22	when I see my power off and see those lights still
23	ringing around me it leaves a bad taste in my mouth,
24	but I haven't loss power like some people.
25	CHAIRMAN CLAYTON: That's all I have.

Page 76 1 Thank you. 2 JUDGE WOODRUFF: Do you solemnly swear or affirm that the testimony you're about to give shall 3 4 be the truth, the whole truth, and nothing but the 5 truth. MS. HOFFMANN: 6 I do. 7 JUDGE WOODRUFF: Tell us your name. 8 MS. HOFFMANN: Mary Kay Hoffmann. 9 JUDGE WOODRUFF: Spell the last name. 10 MS. HOFFMANN: H-o-f-f-m-a-n-n. Well, first off, I'm fully aware of the difference between 11 co-ops and Ameren because I work for a company who 12 develops software for those co-ops. So I work -- we 13 14 develop telephone and electric software. So I'm fully aware of the advantages of a co-op. The issue I have 15 with Ameren in general is I'm one of the lovely areas 16 where our power lines are underground and my power is 17 18 out all the time and has been since 1974. This is not 19 a new issue. This is a long-standing issue. I don't 20 get any money back when my power is out. I don't get 21 to cut my bill because they can't provide me power. But yet they are looking at us to give them 18 percent 22 increase. And if it has to do with maintenance, these 23 24 long term maintenance, then this maintenance should have been going on for the last 35 years and shouldn't 25

1	Page 77 be being reimbursed now. In general, this is how I
2	look at it. If this 18 percent increase goes through
3	they are going to end up less money because they are
4	putting people out in the street or people like my
5	poor father that has to move in with me. He is 84
6	years old and works two jobs. If this 18 percent
7	increase goes in, he can't afford it. So instead of
8	making more money, they are going to make less money
9	because people are out in the streets or living with
10	family. That's the bottom line. I mean you have got
11	people out here, many people have attested they are on
12	fixed incomes and they are out working second jobs to
13	make ends meet. If you put an 18 percent increase on
14	utilities, of course, our food is going to go up as
15	well as utilities going up as well as taxes going up
16	as well as everything else going up and those people
17	are going to be out in the street or living with
18	family. So they aren't going to be making more money.
19	They are going to making less and turning around with
20	those additional increases hitting people that are
21	living trying to make ends meet. So they are making
22	their ends meet. What they need to do is cut there
23	budget we had to where I work, we work with co-ops.
24	When money was tight, we held our raises back. We
25	didn't earn vacation. We didn't earn bonuses. We

1	Page 78 tightened our belt. We put our heads to work and made
2	it work on the budget we have. And that's what they
3	need to do.
4	JUDGE WOODRUFF: Any questions.
5	CHAIRMAN CLAYTON: I just wanted to ask
6	you, you're in St. Charles?
7	MS. HOFFMANN: I'm in the city of St.
8	Charles.
9	CHAIRMAN CLAYTON: On the reliability
10	issue, you said your power always goes out since 1974?
11	MS. HOFFMANN: Yes, sir.
12	CHAIRMAN CLAYTON: So
13	MS. HOFFMANN: My boss laughs when I call
14	in and say my power is out, and he goes is that the
15	15th time this year.
16	CHAIRMAN CLAYTON: What kind of response do
17	you get from
18	MS. HOFFMANN: None.
19	CHAIRMAN CLAYTON: Do you call?
20	MS. HOFFMANN: I call every single time.
21	CHAIRMAN CLAYTON: Has anyone ever come out
22	and check the circuit. How often would you say it
23	goes out.
24	MS. HOFFMANN: How often it goes out?
25	CHAIRMAN CLAYTON: A year. I mean last

Page 79 year not this year. 1 2 MS. HOFFMANN: Up until the time they started cutting trees, I bet my power had gone out a 3 4 good six to eight times since the tree cutting. 5 Depending on how long they consider a power outage, my 6 power has probably gone out six times. 7 CHAIRMAN CLAYTON: So that's improved 8 slightly. 9 MS. HOFFMANN: Minimally. The last power 10 outage during the freeze, I almost lost animals. lost trees. And my family and I had to stay because 11 12 we couldn't rush off to hotel. Nobody wanted to take all our animals so we sat in the house at 45 degrees 13 with the fireplace trying to keep our animals and 14 family warm. As far as food, it was frozen enough 15 outside, I stuck it outside. So I didn't lose any 16 food that time, but come around the following July, I 17 18 was also in that five to six day power outage, and I 19 lost everything. Did I get any money back? Have I ever got any money back; not a single penny. So there 20 service, excuse me, is less to be desired. 21 increase is not something that our economy can take 22 23 and they need to learn to tighten their budget and 24 tighten their own belt and refuse their bonus and their raises races until they can make this company 25

	Page 80
1	work on the budget that they got.
2	COMMISSIONER GUNN: Are you seeing are
3	you seeing not only long term outages, but are you
4	seeing because you mentioned that depending what
5	they consider to be an outage. Are you seeing short
6	term power outages as well.
7	MS. HOFFMANN: I have had two this week
8	already.
9	COMMISSIONER GUNN: And how long do those
10	last; ten minutes?
11	MS. HOFFMANN: Sometimes it's 30 one time.
12	Another time it can be 15 minutes or other times it
13	can be half hour. It just depends on what caused it.
14	And it's not in my immediate neighborhood because my
15	power lines are all underground.
16	COMMISSIONER GUNN: You were counting those
17	intermittent outages. Those short term outages in six
18	to eight times in the previous year or would that
19	increase?
20	MS. HOFFMANN: That would probably increase
21	it.
22	COMMISSION GUNN: Thanks. I don't have
23	anything else.
24	JUDGE WOODRUFF: Do you solemnly swear or
25	affirm that the testimony you're about to give shall

Page 81 be the truth, the whole truth, and nothing but the 1 2 truth? MR. STEGEN: 3 I do. 4 JUDGE WOODRUFF: Tell us your name. MR. STEGEN: 5 Steve S-t-e-g-e-n. 6 JUDGE WOODRUFF: What would you like to 7 tell us? MR. STEGEN: I would like to remind all of 8 9 you of something that I read in January of last year, 10 that the Missouri Department of Social Services, here was an article in the paper said that fully 50 percent 11 -- 50 percent of the residents of this state are on 12 some kind of welfare benefit. And I just believe and 13 14 that's something you can check through the Department of Social Services, and I just believe that this is 15 this request is just completely outrageous. And I 16 listened to the man from St. Vincent DePaul. 17 18 worked for St. Vincent DePaul myself. And things are 19 in terrible condition. People are really hurting and 20 these people don't really seem to consider that at 21 all. It's just -- it's just really bad. And I hope that this is -- I don't even want to see them get 22 23 three percent. I heard somebody before thought maybe 24 they were looking for some kind of reduced amount, but with all the things I have heard tonight, I don't 25

	Page 82
1	think they deserve anything, period. 25 percent in
2	one year, that is just outrageous. And I lived in
3	Texas for a few years, the home of Enron. And I moved
4	back here and I got my first bill from AmerenUE. When
5	I left it was UE, when I came back it's AmerenUE, and
6	I about fell on the floor when I saw my first bill. I
7	couldn't believe it. And I started asking some
8	questions and I was told that at one time the PSC had
9	really great consumer advocates and Governor Blunt
10	fired him. And I don't know what we've got now, I
11	just met a gentleman over here. He seems to be a nice
12	person. I don't know who appointed him. But, I would
13	be curious to find out and compare the ten years prior
14	to Governor Blunt and the ten years after he was
15	elected to see what the cost of living and the rates
16	have given us with the two different governors in
17	power. Thank you very much.
18	JUDGE WOODRUFF: Anyone have any questions.
19	Do you solemnly swear or affirm that the testimony
20	that you're about to give shall be the truth, the
21	whole truth and nothing but the truth?
22	MS. SANDERS: I do.
23	JUDGE WOODRUFF: Tell us your name.
24	MS. SANDERS: Yvette Townsend Sanders.
25	JUDGE WOODRUFF: What would you like to

	Page 83
1	tell us?
2	MS. SANDERS: I think that when I was at
3	Jay Nixon's inauguration he said something about there
4	being very tough times. And as we know it in almost
5	every household there is somebody without a job.
6	There is we are experiencing really hard times now,
7	most in every household. Okay. I think it's
8	ludicrous for AmerenUE to ask for 18 percent increase,
9	I think it puts a very bad face on Ameren, I really
10	do. And I remember at the governor's inauguration, I
11	remember him saying Jay Nixon said we need to all
12	work together. I also think that sometimes when you
13	are I don't resent anyone making more money than
14	me, but sometimes when you're in a certain plateau,
15	you're so you don't have any knowledge of what's
16	going on. You don't even have a clue of what's going
17	on. And to ask for 18 percent increase at this time,
18	it's telling us something about AmerenUE. It's
19	telling us something. I have a home in Pike County,
20	and I had a terrible experience with AmerenUE. I had
21	huge electric bill, but no one was staying there. I
22	called. Valentine's Day three years ago I'm sitting
23	there, I had spoke with AmerenUE and they had made
24	arrangements for someone to meet me there at nine
25	o'clock in the morning, no one ever showed up. I'm on

Page 84 the phone with AmerenUE all day long. They gave me 1 2 attitude that they could care less and they didn't give a damn. It was -- it really was a rude awakening 3 4 of how things were done and I think you're telling us 5 the same thing now by asking for 18 percent increase. 6 It doesn't make any sense. That's all I have to say. 7 JUDGE WOODRUFF: Any questions? Do you 8 solemnly swear or affirm that the testimony that 9 you're about to give shall be the truth, the whole 10 truth and nothing but the truth. 11 MS. KAHN: Yes. 12 JUDGE WOODRUFF: What's your name? 13 MS. KAHN: My name is Rehana Kahn; K-a-h-n. 14 Okay. I have been living here in this country for the last 32 years and in St. Charles for the last six 15 16 years. And I have no problem with AmerenUE. They are They are decent, but it's rates -- they have 17 come out with 18 percent. That is really ridiculous. 18 19 This is not only personal. This has got some strings 20 attached to it, but we had all around it has up so 21 high because we had consumers -- we had to pay for so many things, utilities, oury everyday requirement 22 things, and this is all intermingled with that because 23 24 when energy is high, everything will go up. So it has 25 already had been said. But this is the thing which is

	Page 85
1	really concerns me. And I wentI'm on Social
2	Security and I'm a widow for the last 23 years. And I
3	have raised my kids and put them through college and
4	get them married and everything. I have done it. I
5	was looking forward for my retirement age so I could
6	sit down and satisfactorily and have my entire life in
7	a peaceful way. But I don't believe that because this
8	is time that everybody is frustrated, so we have to
9	copy with this environment with the circumstances and
10	everything, but I don't know what time they have
11	chosen for this raise, and they have on the contrary
12	they have made profit from millions of dollars. Now,
13	the people over here, they are so frustrated. They
14	are right. They are very genuine in their demands.
15	Just for a gesture, AmerenUE should spend all the
16	profit, not all, half, whatever they can. They should
17	spend for welfare of the people who are already
18	suffering and that's what I wanted to say. Thank you.
19	JUDGE WOODRUFF: Any questions. Do you
20	solemnly swear or affirm that the testimony you're
21	about to give will be the truth, the whole truth, and
22	nothing but the truth?
23	MS. BENEDICT: I do.
24	JUDGE WOODRUFF: What is your name.
25	MS. BENEDICT: Nancy Benedict. 3557

1	Page 86 Somerset Drive, St. Charles, 63303. I want to say I'm
2	against this increase. It's being requested, and it
3	hasn't been mentioned here, but anyone here in this
4	room can attest to the fact that if they get this
5	raise, it's only going to follow that every other
6	utility is going to request one. It's just too much
7	and that's all I have got to say.
8	JUDGE WOODRUFF: Questions? Do you
9	solemnly swear or affirm that the testimony you're
10	about to give shall be the truth, the whole truth and
11	nothing but the truth?
12	MR. HAYNES: I do.
13	JUDGE WOODRUFF: Tell us your name.
14	MR. HAYNES: First name Marc; M-a-r-c;
15	H-a-y-n-e-s.
16	JUDGE WOODRUFF: What do you want to say?
17	MR. HAYNES: Personally, like a lot of
18	people, I think this is kind of ridiculous that they
19	are asking for 18 percent. It says right here in
20	their little facts thing that they are planning on
21	doing reducing of expenditures and stuff like that.
22	To me, it would be more logical to basically reduce
23	that stuff first. Did they reduce executive pay? And
24	then implement some of their cost reduction before
25	hitting us up with the rate increase. You know it

	Page 87
1	just doesn't seem like most of us can afford it. I'm
2	a single father and, you know, my brother recently
3	lost his job, so he had to move in with me. And it's
4	real hard in the economy today and for them to say we
5	want to raise your rates 18 percent. I didn't get a
6	raise last year at all. That was just one of things I
7	have to accept. And I think it's something that they
8	should have to accept that they have to implement some
9	of the cost cutting procedures first before they hit
10	us up for the money. There is a guy I ride with. I
11	commute. I recycle. I got a programmable thermostat.
12	I do everything that I can to cut my cost. I really
13	do. I drive four minutes from my house to a commuter
14	bus and take MetroLink. I do everything I can and I
15	think it's in the best interest of us as citizens that
16	these people do the same thing. One of my complaints
17	about Ameren was that when we have one of the ice
18	storms a couple years ago, I was, you know I still
19	had power for like and I was looking out my back
20	window and all of a sudden I don't know if it was
21	transformer that blew, but all I remember is there was
22	cable bounces around on the ground live. I called
23	Ameren to tell them about this and the lady says it is
24	about a four-hour wait. Four-hour wait. It's a
25	safety hazard. I'm sorry. That's the way I look at

Page 88
it. There is a wire bouncing around on the ground
with sparks shooting out of it. And she basically
said we can't do anything about it. Somebody should
be there in about four hours. I got off the phone and
called the fire department. I guess they called
Ameren and they said cut it off, do whatever they have
to do. And they went out and put cones out there for
safety thing. I think that some of this stuff we're
paying for seems like it's the Tomsauk fiasco, ice
storm fiasco, stuff they should have been doing for
decades that they basically we're going to end up
paying for now. That's all I got. Thank you.
CHAIRMAN CLAYTON: When was this? Was the
line down during one of the major outages?
MR. HAYNES: Yes. It was. It was one of
the ice storms. I can't remember if it was two or
three years ago. I don't remember exactly.
CHAIRMAN CLAYTON: December of 2006?
MR. HAYNES: It was cold.
CHAIRMAN CLAYTON: Or January, 2007. There
was one after that.
MR. HAYNES: I lost power, I want to say
I can't honestly remember.
CHAIRMAN CLAYTON: It was during one of the
major outages?

	Page 89
1	MR. HAYNES: Yeah. I know the people I
2	stayed at, their actual lines were underground, and
3	they didn't lose power, but I guess because of that
4	one generator blowing or transformer whatever they are
5	called, you know, our whole subdivision did.
6	JUDGE WOODRUFF: Thank you. Do you
7	solemnly swear or affirm that the testimony you're
8	about to give shall be the trth, the whole truth and
9	nothing but the truth?
10	MR. GROSCH: I do.
11	JUDGE WOODRUFF: Tell me your name.
12	MR. GROSCH: Art G-r-o-s-c-h, 805 Concordia
13	here in St. Charles. Okay. I think some of the
14	things that's about echoed what I'm going to say also.
15	And one of the things I'm going to say first, Mr.
16	Clayton, I don't know why it's been echoed I don't
17	know why you're the only one that you answered things.
18	I'd like to hear from Mr. Kenney or Mr. Gunn. That's
19	besides the point. The point is I'm retired also.
20	And I don't I can't see where. I'm going to be
21	able to afford a 18 percent increase. And another
22	thing. First time I saw Karen Foss on one of your
23	advertisements, I thought we're going to be paying for
24	this, who knows what they are paying her. Don't laugh
25	because you know as well as I do she is getting pretty

	Page 90
1	good bucks. She is getting pretty good bucks. Why
2	does management decide to do that and turn around and
3	want us to get an 18 percent increase and another
4	thing is they are always telling us get new
5	furnace, new air conditioner, insulate, get new
6	windows, insulate the attic, get around your windows.
7	You never get ahead because as soon as you do that,
8	next month they raise the rates. So you're not really
9	gaining anything, you're gaining, but you're paying
10	more. I'm just saying it's a no-win thing. Just like
11	now, you're asking for 18 percent, I hope to God they
12	don't get that, but I'm sure the commission service is
13	going to give them something. That's just the way it
14	works and big money talks. That's another thing. On
15	the Johnsonville state park did Sasser the Tomsauk
16	reservoir, I remember them saying the public would not
17	pay a nickel for that. If everybody believes that I
18	have got a bridge I'll sell you here in the back when
19	we're done. Because I don't believe it. I really
20	don't because just what's been going on. So , I think
21	I have said enough and I'd like somebody besides Mr.
22	Clayton, if he's got any questions, if that's not
23	being too rude.
24	CHAIRMAN CLAYTON: I'll sit back, I guess.
25	MR. KENNEY: I don't have any questions,

Page 91 but thank you for participating in the process. Since
you're the second person that made mention of the fact
that I haven't asked any questions, I should say that
you should not interpret the fact that I am asking no
questions that I'm not paying attention. I am
intently listening to each person. I don't want to
just ask questions for the sake of hearing my own
voice. I appreciate the time you have taken and
everybody has taken to come and participate in the
process. You and everybody else that's testified,
your testimony is being transcribed in the transcript.
I'm not only taking notes and listening intently, now
I will go back and review your testimony as we get
closer to the case. So you are an important part of
the process and I do truly appreciate the fact that
you have come out here and taken the time to express
your view.
MR. GROSCH: I did feel like he is more
concerned than you guys, but evidently not.
CHAIRMAN CLAYTON: It seems that I like
hearing my own voice.
COMMISSION KENNEY: I did not mean to imply
that.
JUDGE WOODRUFF: Do you solemnly swear or
affirm that the testimony you're about to give shall

	T
1	Page 92 be the truth, the whole truth, and nothing but the
2	truth?
3	MS. CONNOYER: I do.
4	JUDGE WOODRUFF: Thank you. What's your
5	name?
6	MS. CONNOYER: My name is Judith Connoyer,
7	and I'm a lifelong resident of St. Charles city. I
8	live at 220 Canary Lane in the city of St. Charles,
9	63301. C-o-n-n-o-y-e-r.
10	JUDGE WODDRUFF: Thank you.
11	MS. CONNOYER: I don't have a whole lot of
12	new things to add, but I simply wanted to reiterate
13	something that Tom Schneider had mentioned when he was
14	talking about the ministry to the poor through St.
15	Vincent DePaul. I worked with that ministry at
16	College Church in St. Louis a number of years ago and
17	worked directly with people who are just really on the
18	edge of society and unable to afford their utility
19	bills and I can only I think it's fair to say that
20	as more people fall into that category there is just a
21	larger number of people that are going to need that
22	kind of help. At this point, I am retired from
23	ministry. I am since a retired minister and
24	evangelical Lutheran church in America. So also in
25	that capacity as pastor I have received calls from

	Page 93
1	people when I was inner city churches who just simply
2	were unable to meet their utility bills. And this was
3	sometime within the last five or six years. I don't
4	have that direct contact anymore, but I know what
5	that's like. And I simply need once more to make
6	people aware at the other end of the spectrum, the
7	corporate people who run this, who simply have I'm
8	quite sure to say just have no knowledge of what it
9	is to live at the edge of society and you sometimes
10	think it's people's fault, but if you actually come to
11	know some of those people, you come to know how much
12	they struggle in their daily lives just to keep
13	afloat. And it is the situations that they find
14	themselves in are not their fault. There have been
15	many times thank God I am not this person, or why,
16	because I simply don't know how I could manage. And
17	they try very, very hard. And simply cannot gain
18	ground because of circumstances. Yes. There are
19	people where it is their fault, but for many, many it
20	isn't . This 18 percent rate is unconscionable. It's
21	unconscionable not only for those people who are very
22	poor, but it is for the middle class as well, and we
23	know that middle class is spiraling down constantly.
24	How many more people are going to end up in poverty
25	because of what corporations are doing. As many

1	Page 94
1	others have said, because utilities are so vital to
2	our way of life, a raise in the utility rates are
3	going to have a ripple effect negatively throughout
4	our economy. As far as my own person situation, I am
5	not one who is going to be greatly hurt by this, of
6	course, we all have to tighten our belt and that would
7	be true of myself as well. It wouldn't affect me at
8	this point in my life as negatively and it would some
9	others. Never the less, it would be a negative effect
10	because I too am a member of the middle class. How
11	long that can go on as a retired person, how long
12	before each a person like myself would spiral down, no
13	one knows. But there is a spiraling down effect in
14	our country as large corporations squeeze us and this
15	is what I see. I see it on a national level, but I
16	see it at state level. And I'm hearing from people
17	here in this audience who are witnessing to this
18	through their very life stories about what is
19	happening. For the sake of justice, when you make
20	your decision, gentlemen, please do the right thing.
21	Thank you.
22	COMMISSIONER GUNN: When you were in the
23	ministry, were you interacting with Ameren directly on
24	any of their programs?
25	MS. CONNOYER: No. I didn't have that

Page 95 1 program. 2 COMMISSIONER GUNN: That's all I have. 3 Thank you. 4 JUDGE WOODRUFF: Do you solemnly swear or 5 affirm that the testimony you're about to give shall be the truth, the whole truth, and nothing but the 6 7 truth? 8 MR. FERKEL: I do. 9 JUDGE WOODRUFF: What's your name? 10 MR. FERKEL: Paul F-e-r-k-e-l. I didn't 11 really come here to say anything tonight, just to hear because I really don't have all the facts on any of 12 this stuff, but I did come as a homeowner in St. 13 14 Charles for the last 23 years now. And over this time period being in the labor movement, I always had that 15 American dream. I watched my dad as I grew up and 16 worked hard. We had a lot. I grew up in north 17 18 county. I moved out here in St. Charles because a lot 19 of young families were coming out here. I've been in the labor movement for 32 years now. My pension has 20 21 been frozen. My pay has been cut by 15 percent. My wife, who we chose to be a stay-at-home mother to take 22 care of our family because we figure for our kids --23 24 because we knew how we grew up. She chose that too. Now, she does work. Her pay has been cut 50 percent. 25

	Page 96
1	So we now are experiencing no longer the American
2	dream. We're experiencing what the rest of these
3	people are all talking about. And we're struggling
4	each and every day to keep ourselves above water. I
5	work all kinds of side jobs. I work my job and
6	another job with my brother who is in lawn care. I
7	don't know what's happening to the American dream and
8	I don't have all the answers for AmerenUE, but I do
9	know this, 18 percent is way more than an average
10	family can afford. Nine percent is way more than an
11	average family can afford. I have over the last 15
12	years of employment received less than a three percent
13	increase in wages each year. There is no way I could
14	walk into my employer who is ready to go bankrupt
15	possibly this year, and say, you know what, times are
16	bad right now, I got a lot of expenses out. I need 18
17	percent, I need nine percent. Instead I have given
18	them 15 percent to retain my job. All I ask of
19	anybody in this country whether it be big business or
20	all of us, we need to come together and start helping
21	each other and this country. I don't know what always
22	going on, but what's going on isn't good. And I don't
23	know what the answers are. I don't sit at the table.
24	I don't get to sit on the boards of UE or whatever,
25	but the average family living in America is losing

Page 97 their dreams and no one seems to be doing anything 1 2 about it. Thank you. 3 JUDGE WOODRUFF: Ouestions? Do you 4 solemnly swear or affirm that the testimony you're 5 about to give shall be the truth, the whole truth, and nothing but the truth? 6 7 MS. GREIWE: Yes, I do. 8 JUDGE WOODRUFF: What's your name? 9 MS. GREIWE: Sandra G-r-e-i-w-e. 10 JUDGE WOODRUFF: What would you like to tell us? 11 12 MS. GREIWE: I'm 67 years old and proud of I'm not enjoying getting older. My husband 13 it. 14 developed -- he was a Schnuck's meat cutter, and he developed a debilitating disease that finally took his 15 life. I watched him die over a period of five years. 16 He's been gone for almost eight. I work part time. 17 18 have worked part time, two jobs. I am a registered 19 nurse. In 1989, I founded a not-for-profit organization because I was under the impression as I 20 21 grew up that America was great because of the three-footed stool of government, business, and not 22 23 for profit. I chose to be a part-time stay-at-home 24 mom with my kids. My husband worked full-time as a meat cutter. When he died, then I went on and got his 25

	D 00
1	Page 98 widow's benefit. He didn't get all of his Social
2	Security because he died at the age of 63 and half. I
3	get half of what he was allotted for his retirement
4	from meat cutting. Is it enough to cover expenses?
5	Well, it would have been had we not have somebody that
6	feels that they need 18 percent more of my electric
7	bill. I'm on a fixed income. I pay \$75 a month for
8	my electric. Since 1964, when we got married I kept
9	track of our electric usage. At one point, about 12
10	years into it we got electric bill that says you are
11	responsible for the cost of your electricity. Well,
12	that made me call UE, and I said who wrote that and
13	what does that mean. You decided the rate. I can
14	only either turn lights off or turn them on, and I
15	have an electric stove that has one burner that I use
16	and I eat raw as much as I can, which is healthier. I
17	would like to see a show of hands of those that are
18	left here who agree with me that 18 percent is not
19	acceptable. Not everyone here tonight is going to be
20	able to stand up here and say anything. And I'm
21	shaking inside because I love America and I have given
22	my life instead of going out and earning a big salary,
23	I gave it in volunteer service to America. I don't
24	regret that, only that I can't help you guys with your
25	18 percent. So I would like to see you all to freeze

-	Page 99
1	your salaries like mine was, and will be for two years
2	like a lot of people in here, who will not be getting
3	that cost of living raise. And they were so excited a
4	couple years ago when they give us four percent, never
5	have we ever done that, and I guess that was in
6	preparation for not giving us anything for two more
7	years. For that I will end my comments. I will say
8	when I was born 67 years old, someone gave me a button
9	recently that says "born free now expensive". And I
10	do wear that from time to time. That's it.
11	JUDGE WOODRUFF: Questions? Do you
12	solemnly swear or affirm that the testimony you're
13	about to give shall be the truth, the whole truth, and
14	nothing but the truth?
15	MR. OCHSNER: Yes.
16	JUDGE WOODRUFF: What is your name?
17	MR. OSCHSNER: Tom Oschsner;
18	O-s-c-h-s-n-e-r. And I'm a resident of St. Peters in
19	St. Charles county.
20	JUDGE WOODRUFF: What would you like to
21	tell us?
22	MR. OSCHSNER: I'm in the energy auditing
23	business and so it's my livelihood to study energy
24	usage for people and for a lot of people that are at
25	middle income to upper income. The utility costs for

Page 100 1 the household is about four percent of their annual And they can absorb an 18 percent increase. 2 income. It will take them to about five or six percent of 3 4 their annual income. And for them they will be able 5 to absorb that and afford that. Unfortunately, there are a lot of people that are at that middle to lower 6 7 income level and a lot of families have now moved from the middle to lower income level. And the utilities 8 9 spending for these families is between 18 and 20 10 percent of their annual income. So, for 18 percent increase for these families, it is going to have a 11 12 drastic effect on their budgets. For people that can afford it, not a problem, but for these people it 13 14 really is going to put a lot of hardship on them, they have to make tough choices about deciding on medicine 15 for their family versus paying utilities and keeping 16 heat on and keeping air conditioning going. And it's 17 18 going to be tough times. It's going to be very 19 difficult decisions for people and I just ask that you keep these people in mind when you consider these rate 20 21 increases and grant something that is fair and equitable to everyone, the rich and poor. And really 22 23 give a little more weight, give a little more credence 24 to the people on the lower end of the scale. They need your help right now. They really do, and this is 25

1	Page 101 what you guys are here for. So they are reaching out
2	to you, please reach out to them and show them that
3	you are there for them, and help them by really
4	minimizing the rate increase at this time.
5	JUDGE WOODRUFF: Thank you. Any questions?
6	Do you solemnly swear or affirm that the testimony
7	you're about to give shall be the truth, the whole
8	truth, and nothing but the truth?
9	MS. HERTWIG: So help me God.
10	JUDGE WOODRUFF: Thank you. Tell us your
11	name.
12	MS. HERTWIG: Rebecca Hertwig;
13	H-e-r-t-w-i-g. And I live in Hazelwood.
14	JUDGE WOODRUFF: Thank you.
15	MS. HERTWIG: I don't have a lot of say. I
16	just would ask that you would deny the rate increase
17	that there would be none. And just like we all have
18	to live within our means and income that come in, and
19	not spend more than we make, I believe a company
20	should do the same. That's all.
21	JUDGE WOODRUFF: Questions? Thank you,
22	ma'am.
23	MR. PARKER: Jason Parker, St. Charles
24	county.
25	JUDGE WOODRUFF: Do you solemnly swear or

1	Page 102 affirm that the testimoney you're about to give shall
2	be the trth, the whole truth, and nothing but the
3	truth?
4	MR. PARKER: Okay. I really don't I'm
5	not here to testify or make a statement so much as to
6	just see what if it's possible to speak to you
7	
	gentlemen after the hearing tonight. I didn't want to
8	come up afterwards and find the answer is no and find
9	that I should have taken advantage of the open mike
10	night that we have going here. Is it possible to
11	all I'm asking for is information. I don't really
12	have a statement to make and I don't want to take up
13	anyone's time.
14	CHAIRMAN CLAYTON: In terms of information
15	you need to direct that to our staff which is here.
16	If I can get the staff to raise your hands. We are
17	allowed to take testimony here tonight, but we can't
18	take questions or answer questions. We're not
19	permitted to do that.
20	MR. PARKER: I suspected so. Okay.
21	CHAIRMAN CLAYTON: You can make a comment.
22	You can chime in on any issue, but we can't answer
23	questions because ultimately we will be the ones to
24	decide the case. We have our staff here and Ameren
25	and counsel. We should have recognized Mr. Mills

Page 103 several times. He is the consumer advocate that can 1 2 also answer questions, but we cannot. MR. PARKER: Okay. The only thing that I 3 4 would like to do is confirm something that was in the Post Dispatch. Would Mr. Mills be the person to do 5 6 that. 7 CHAIRMAN CLAYTON: He could or our staff. MR. PARKER: I hate to be vague, but I'm 8 9 trying not to take up time with extraneous things. 10 CHAIRMAN CLAYTON: I would ask the staff or Mr. Mills. 11 12 MR. PARKER: Okay. Thank you for coming. 13 JUDGE WOODRUFF: Anyone else wish to speak 14 tonight. I don't see anyone else. Go ahead. Do you solemnly swear or affirm that the testimony you're 15 about to give shall be the truth, the whole truth, and 16 nothing but the truth? 17 18 MS. STONE: Yes. 19 JUDGE WOODRUFF: Tell us your name. 20 MS. STONE: Paula Stone. 21 JUDGE WOODRUFF: What would you like to tell us? 22 MS. STONE: First of all, thank you for 23 24 having this open forum and open mike. It's an example to me of our democracy of freedom in action. My 25

Page 104 comments is more reflective in nature. And it goes 1 back to the founding of our country. And the founding 2 of our country was by -- for those of us who know our 3 4 history -- were those who were very well-educated and 5 extremely affluent and in positions of power and authority. And they left that and it, at very great 6 risk to themselves, personally came together to form 7 8 this country as an experience in a new type of 9 government with personal freedoms and liberty. 10 with part of that comes the task which I believe we should continue to focus on, comes a social 11 12 responsibility by those in leadership to have a sense of responsibility to the public and those that they 13 14 serve. And this is true nature of leadership, and it is true of a corporation, all your people back there. 15 And I have worked in corporate myself for many 16 decades, and I understand all the components there. 17 18 But there is also those in government positions as 19 well as private citizens because we each have our own responsibility. And so it is just a gentle reminder 20 21 of the higher good that we will serve for the welfare of all of us because of that inner connectedness and 22 23 choices that we make in our work, and in our home and 24 in our heart, does affect each and every one of us throughout. And there is a cause and effect 25

	D 105
1	Page 105 relationship. And the responsibility that goes with
2	those freedoms. And thank you for the ability to
3	speak.
4	JUDGE WOODRUFF: Thank you. Questions? Is
5	there anybody else that would like to speak? Do you
6	solemnly swear or affirm that the testimony that
7	you're about to give shall be the truth, the whole
8	truth and nothing but the truth?
9	MR. NORDEMANN: Yes, I do.
10	JUDGE WOODRUFF: What's your name?
11	MR. NORDEMANN: Olav; N-o-r-d-e-m-a-n-n. I
12	live at 12 Woods Hill Drive in St. Charles. My
13	question is regarding scope of the authority that your
14	group here has. There has been a problem in the
15	civilized world of being able to give good energy to
16	people and for 40 years environmental movement has
17	shut down nuclear power in the United States. We're
18	now seeing in France for example, France is
19	investing anybody know the number but they are
20	building multiple power plants because they're finding
21	out that's the cheapest way to be able to produce
22	electricity for their people. We're seeing through
23	the environmental movement and through powers that
24	have some into the environmental movement that there
25	are going to be major restrictions, carbon tax is one

Page 106 thing that comes to mine. AmerenUE is stuck working 1 with coal. And if they are looking into the future 2 and seeing that the government is going to go hit them 3 4 for major tax for the amount of carbon footprint that 5 they are going to put down. As a country, we have a major problem because there is safe way to make 6 7 nuclear energy work, but we have to agree on the disposal of the stuff that's the by-product of nuclear 8 9 situation. So I'm wondering if it's in your scope to 10 recommend -- I hate to say it this way -- of the 11 shutting down of the environmental movement to stop 12 our ability to go forward as a people. What's happening is the people that really do not have the 13 14 means are being punished for the fact that they want to be able to turn their lights on. So the poor 15 people are not getting a benefit from cheaper kind of 16 power, and I think there is a solution, but I don't 17 18 know that there is a political little more than there 19 is a will anywhere for anybody to take on the environmental movement with regards to would you give 20 us a break here so we can have better power. 21 know, we can talk about clean coal and all these other 22 23 ways, and getting big scrubbers, and different ways 24 for making proper electricity in this country, but one way in which to do that is that, but I am pretty much 25

Page 107 assured from the different conversations that I have 1 had that there is just no interest in anything. 2 AmerenUE would waste a lot of time trying to make that 3 4 way work, but for the country, that might be a 5 solution. So I'm wondering if you guys could recommend and put it in kind of wording you want. 6 7 It's a very contentious issue, but put it in some kind 8 of wording that if AmerenUE maybe had that second 9 nuclear power plant, we wouldn't be here today because 10 they would be able to give us cheap electricity. That 11 just may be the case. So, why, as a country, are we 12 not talking about it. We're all reacting to this 13 government that's about to put a big hammer on 14 everybody's head. It's going to cause -- because of social changes that we're supposedly supposed to make. 15 I think there are solutions here and I don't agree 16 with 18 percent. I could probably afford it, but I 17 18 still don't like the idea. I think there are ways for 19 companies like Ameren to give us cheaper electricity, and I think there should be some kind of government 20 21 help with regards to that. That's my comments. 22 JUDGE WOODRUFF: Any questions? Anyone 23 else wish to testify? Do you solemnly swear or affirm 24 that the testimony you're about to give shall be the truth, the whole truth, and nothing but the truth? 25

	Page 108
1	MS. NUNN: I do.
2	JUDGE WOODRUFF: What's your name?
3	MS. NUNN: Carol N-u-n-n. I live at 3213
4	Fox Hill Road in St. Charles. We have a house trailer
5	down at Lake of the Ozarks, and we rent the property
6	it's on. It's in the state park and we've last year
7	kept the heat on at 48 so that things wouldn't freeze.
8	My bill averages about \$80 something a month. And
9	this gentleman said he is from Jeff City. As he is
10	driving home when you get off at 70 at 54, look at
11	that trailer park. Those trailers are all about the
12	same age. Ours is 1973. And I think of those people
13	heating those trailers all the time, and what 18
14	percent would do to them because obviously they are
15	very poor people. And you're in Jeff City, you
16	obviously should be familiar with Eldon. Those people
17	in that town have also all their employment, all
18	business, all manufacturing companies have closed.
19	And if you go on the computer on real estate, google
20	even in your own zip code, but mainly maybe St.
21	Charles, Wright City, Eldon, and look at foreclosures
22	because it always lists house whether it's foreclosed
23	or if it's for sale by owner. And when you see that,
24	it's staggering to see how many people are losing
25	their homes especially in the Eldon area. You're from

	Page 109
1	down there. You should know what all the people in
2	Camdenton, Eldon, all these areas are really hurting.
3	And it's just going to be devastating to people in
4	those small towns because they have no employment.
5	They have nowhere to go. Even the big boat dealers
6	down there are closing. That's all I have to say. I
7	hope you think about really important people. Thank
8	you.
9	JUDGE WOODRUFF: Questions? Thank you,
10	ma'am. Anyone else wish to testify? I don't see any
11	hands going up. So thank you very much for coming
12	tonight, and with that we are adjourned.
