```

Page 3 PROCEEDINGS 1 2 (Starting time of the Hearing: 7:30 3 p.m.) JUDGE JORDAN: Let's go on the record. 4 5 The Missouri Public Service Commission calls the actions in files number ER-2012-0174 and ER-2012-6 7 0175. These actions are providing and appearance 8 and application for rate increases. This the local 9 public hearing in those actions. We are here to 10 record the testimony of witnesses in these actions. My name is Daniel Jordan and I'm not a 11 12 Commissioner, I'm a Regulatory Law Judge, I'm an employee of the Commission. My job's to conduct 13 14 proceedings like these. 15 To my right is Commissioner Robert 16 Kenney. Commissioner do you have remarks? 17 COMMISSIONER KENNEY: Good evening 18 everybody. Thank you for taking the time to come 19 out at seven o'clock on a Wednesday night and share 20 your thoughts with us regarding the Kansas City 21 Power & Light of the Greater Missouri Operations 22 Rate case. 23 I am Robert Kenney. I am one of the 24 four Commissioners, there are typically five of us, 25 but we're short one Commissioner, I'm one of the

		Page 4
1	four. And your testimony is very important and is	
2	a critical part of this process. It's something	
3	that we do take very seriously in the course of our	
4	deliberations.	
5	As Judge Jordan indicated, your	
6	testimony will be taken down by a court reporter	
7	and be transcribed and it will become a part of the	
8	record. And the other Commissioners who aren't	
9	here today will have the opportunity to read and	
10	review that testimony as a part of their	
11	deliberations, so please don't assume by the fact	
12	that they are not here that they are not going to	
13	take into account, take serious consideration of	
14	your remarks.	
15	So again, thank you for taking part in	
16	the process and I look forward to hearing your	
17	testimony.	
18	JUDGE JORDAN: I will now have entries of	
19	appearance from the parties. We will begin with	
20	the Applicant's Utilities.	
21	MS. GILBREATH: On the behalf of Kansas	
22	City Light & Power Company and KCP&L of Greater	
23	Missouri Operations Company, Lisa Gilbreath, SNR	
24	Denton US, LLP, 4520 Main Street, Suite 1100,	
25	Kansas City, Missouri 64111.	

		Page 5
1	JUDGE JORDAN: Thank you. And for the	
2	Staff of the Missouri Public Service Commission.	
3	MS. ALM: Tanya Alm appearing on behalf	
4	of Staff for the Missouri Public Service	
5	Commission, P.O. Box 360, Jefferson City, Missouri	
6	65102.	
7	JUDGE JORDAN: Thank you. And for the	
8	Office of the Public Counsel?	
9	MR. MILLS: Thank you, Judge. Lewis R.	
10	Mills appearing on behalf of the Office of the	
11	Public Counsel and the public. My address is P.O.	
12	Box 2230, Jefferson City, Missouri 65102.	
13	JUDGE JORDAN: Thank you. And are any of	
14	the interveners present today? I'm not seeing any	
15	intervening parties.	
16	The purpose of this proceeding is to	
17	hear testimony and it will become part of the	
18	official file. As I've mentioned the court	
19	reporter to my right, just beyond Commissioner	
20	Kenney, is recording testimony. And that will be	
21	testimony under oath, or if you prefer, I will	
22	administer an affirmation if your convictions	
23	forbid you from taking an oath.	
24	And as Commissioner Kenney mentioned	
25	there is a transcript. I'd also like to mention	

		Page 6
1	that we are recording by video also.	
2	So if you wish to testify on matters	
3	subject to these actions, then I will be calling	
4	names that are on my list in order. When I call	
5	you, please come up to the podium. I will	
6	administer an oath or affirmation and I may ask you	
7	a few questions to get you started, making sure	
8	that I've pronounced your name correctly, making	
9	sure it's spelled right and what your relationship	
10	is to the Applicant's in this case.	
11	Do speak clearly, and the commission	
12	wants to hear what's on your mind and so be	
13	complete, but in respect for the time of everyone	
14	that's been here throughout the question and answer	
15	session and are still here now, please be concise	
16	so that everybody can have their turn.	
17	And if you agree with something that's	
18	already been said, you can come up and say that,	
19	just refer to the earlier speaker and say that you	
20	feel that way, too. But do feel free to come up	
21	and say that. If something was said in the	
22	question and answer session that you would like the	
23	Commission to consider, you have to tell us that	
24	here. The rest of that was not on the record, this	
25	is on the record, so do come up and mention that.	

		Page 7
1	Your job here today in testifying is to	
2	be the witness and you're a special kind of witness	
3	because you're not really subject to the control of	
4	direct examination. Usually, a witness can't just	
5	come up and start talking. Usually they have to	
6	wait for direct examination, but you're free to say	
7	the things that are on your mind. You will be	
8	subject to cross examination, in that if you have	
9	some clarification and the parties have some	
10	questions to clarify what you said, they will be	
11	asking.	
12	Here's what I'm going to do on that	
13	since it's a little bit difficult, since it's a	
14	little bit of a challenge for our court reporter,	
15	what I'll do is, I will after you've said what you	
16	say, I'll ask Commissioner Kenney if he has any	
17	questions and then I'll just throw the floor open	
18	to Counsel for Utility, for Staff and for OPC, and	
19	if you have questions, please jump up and say so,	
20	otherwise I'll assume you're done and then I'll	
21	move on.	
22	In your testimony, it's a good time to	
23	bring up service issues. The Commission needs to	
24	know about service issues because of Staff does	
25	it's best to find out about these things. They	

		Page 8
1	cannot be everywhere at once, so do keep those in	
2	mind. Also keep in mind that the things you say do	
3	matter to the Commission. A couple of examples of	
4	that like that are relevant now are our rate	
5	stabilization recommendations that the Commission	
6	is considering.	
7	Those will be ideas that would make it	
8	possible for the - to have fewer of these	
9	reactions, so the Utility doesn't come back right	
10	after it's finished it's last rate action with	
11	another rate action, so we don't have to keep	
12	coming back here.	
13	Also, the Commission is considering, for	
14	example, lots of rates for the very low income	
15	persons. Things like that arise from the ideas	
16	brought forward in these local public hearings. So	
17	when you've given your testimony, wait for	
18	questions and then I'll excuse you.	
19	Any questions on our procedure so far?	
20	Not seeing any, I'll begin to call names from the	
21	list of those who have signed up to testify.	
22	The first name on that list is Billy S.	
23	Edwards. Billy S. Edwards, come forward to be	
24	sworn. And for the reporter, Billy S. Edwards is	
25	pretty much the way it sounds.	

Page 9 1 COURT REPORTER: Thank you. 2 MR. EDWARDS: Thank you for your time. 3 BILLY S. EDWARDS, being first duly sworn by Judge Jordan, testified as follows: 4 5 JUDGE JORDAN: And you are Billy S. Edwards? 6 7 MR. EDWARDS: Yes, sir. 8 JUDGE JORDAN: And what's your relationship with the Applicant for a rate 9 10 increase? MR. EDWARDS: Customer located in 11 Smithville, Missouri. 12 JUDGE JORDAN: What would you like the 13 Commission to know about this? 14 MR. EDWARDS: Well, I just - I've got a 15 16 statement here I'm going to try to go over and be 17 brief as possible. Again, my name is Bill Edwards. I live in Smithville, Missouri. In 18 19 2001, my wife and I designed and built an extremely 20 energy efficient home. The best windows extremely 21 tightly insulated as possible, even went to 22 extremes of putting in a geothermal heating and 23 cooling system. And only D florescent lights 24 throughout. In other words, the point I'm making is I have done everything I possibly can to cut 25

Page 10 costs at my end. I've seen nothing in this dog and 1 2 pony show, sorry, that I just saw, to convince me 3 that KCP&L feels our pain, has done anything to cut their costs. 4 5 I work in Tusla, Oklahoma where the electric rates down there are about 8 cents a 6 7 kilowatt. When I built this house in Smithville, 8 they were about 6 and now I'm paying 12. That's a 9 44 percent rate as told to us by their own 10 employees right here. Every year they keep coming back and want us to pay for severance costs, flood 11 12 costs. I should make it clear that I'm a union 13 14 employee. I'm not saying people do not deserve to 15 make decent wages. Their employees are extremely 16 well paid and I'm just talking about their union 17 employees, extremely well paid, excellent benefit 18 package. Their pamphlet they sent out to us in the 19 mail, one of the things that are laid out, the 20 reason they needed a rate increase was health care 21 costs. 22 We all, or most of us here all pay our 23 own health care costs. It's a serious situation. 24 I don't believe I need to be paying my health care costs and their employees' health care costs, as 25

	Page 11
1	well. Now, I'm not blaming this all on labor, I'm
2	saying the company in general could make their
3	plant more efficient. They could find other ways,
4	but labor is unfortunately, in this environment, is
5	part of the equation. And I know that you
6	gentlemen cannot tell them to address their labor
7	costs.
8	But however, if you tell them no, they
9	will be forced to look within and they will -
10	they've looked to us outside for the last four -
11	well, the 44 percent. So I believe it's time that
12	they look within, at their own costs and quit
13	coming back to this well that's about gone dry.
14	Thank you for your time.
15	JUDGE JORDAN: Just a second.
16	Commissioner Kenney, any questions?
17	COMMISSIONER KENNEY: I don't have any
18	questions for Mr. Edwards, but you've given this a
19	lot of thought and so I do appreciate you taking
20	the time to come here
21	MR. EDWARDS: Thank you.
22	COMMISSIONER KENNEY:and share with us
23	your thoughts. Thank you.
24	JUDGE JORDAN: Not seeing anything from
25	the other parties, thank you, sir. The next name

Page 12 on my list is Robert B. Bonsee. I hope I 1 2 pronounced that correctly? 3 MR. BONSEE: Yes, sir. JUDGE JORDAN: Mr. Bonsee, will you spell 4 5 your name for the court reporter? 6 MR. BONSEE: B-o-n-s-e-e. 7 JUDGE JORDAN: And that's a double e. Is 8 that correct? 9 MR. BONSEE: Yes, yes, sir, two e's. 10 JUDGE JORDAN: Very good. ROBERT B. BONSEE, being first duly sworn 11 12 by Judge Jordan, testified as follows: JUDGE JORDAN: Now, what would you like 13 14 to tell the Commission? 15 MR. BONSEE: Yes, sir. As part of my 16 comments, I want to comment on something that the 17 Kansas City P&L people made in their presentation where they said, and I believe this attorney 18 19 pointed out that as they are going to put on a very 20 elaborate case before the Public Service Commission 21 using public relations people and accountants and 22 lawyers and probably a very costly case, it is 23 their intention to make the customers pay for this 24 case. 25 The very fact that they are doing that,

	Page 13
1	to me, is indicative of their attitude and the
2	basic thinking behind this, that we are the ones
3	facing now a fifth price increase. They are coming
4	before the Commission to do it. They are going to
5	put on an expensive case and make the customers pay
6	for their own loss, which I think is indicative of
7	again, not to repeat, of a abusive attitude on
8	their part, abuse of values on their part, to do
9	that, to put that case on to hurt the customers and
10	then make the customers pay for it.
11	As we talk about this utility rate
12	increase, we're talking about a very serious matter
13	that affects people in a serious way. Because of
14	the economy many people are living on the edge.
15	There are people in Kansas City that have an
16	electric bill laying on their table tonight and
17	they're not exactly sure how they're going to pay
18	it. That's what we're talking about.
19	The increase that's being proposed by
20	Kansas City Power & Light is not being proposed by
21	working people or people living on minimum wage
22	jobs. This increase is being proposed by
23	executives and it's planned and proposed by
24	executives running a large business, who are on
25	huge salaries, far out of proportion to what they

Page 14 actually do. Their electric bill to them is an 1 2 incidental expense. They probably don't even know 3 how much it is. But the people who are facing this rate 4 5 and who are going to balance the books for them, are sitting there and they're choosing many cases 6 7 the elderly, the under employed or the unemployed 8 and they're choosing between electricity, water, 9 food and medicine. Those are the people - it's affecting all of us, but it's affecting them very, 10 11 very, very seriously. 12 And as we have said, they have come to 13 us now and they have made four increases totaling, if this one passes, it will be 6-0, 60 percent in 14 15 five years. We were hit again, and again, and again, it's gone up. And we're all having to pay 16 17 for it. We absorbed the last four increases and my 18 thought is now it's their turn. 19 They say that this rate increase has to 20 come about because they have looked at their books 21 and they just can't operate without it. They say, 22 well, we're going to put this case on. We just 23 have to have the money because we can't operate 24 without it. But the customers could say the very 25 same thing. We have people sitting out there that

	Page 15
1	paid the last four increases and they're not sure
2	how they're going to pay for it. If they had the
3	money to hire the lawyers and the public relations
4	people, they could make a case for themselves that
5	they've looked at their books and they simply can't
6	operate, either.
7	So my question is, why do we always have
8	to take the hit? We took the hit the last four
9	times. We looked at our books and said, look, we
10	can't pay it, either. And we had to pay it. So
11	after we have absorbed the last four increases, now
12	it's their turn to figure out what on earth they're
13	going to do to balance their books because that's
14	what we've been doing.
15	They say we've got this airtight case.
16	We've got an airtight case. We can't pay it,
17	either. We don't know where the money is going to
18	come from, just the same case that they would make.
19	Why do we always have to give in? We have found
20	the money the last three times.
21	I want to say also, the Public Service
22	Commission cannot continue to create this
23	negotiation charade by saying, well the utility
24	company has asked for this, but we're going to give
25	you this. So we didn't give into them because we

		Page 16
1	told them no and the rate isn't going to be here,	
2	it's going to be here, when this is what they	
3	wanted to begin with. All this is hot air.	
4	They're going to get what they want and make it	
5	appear that we got a deal.	
6	They - and as said before, if the Public	
7	Service Commission sells us out on this, we don't	
8	need them. We need people who are going to stand	
9	up for us and who are, for once, going to look	
10	directly at these people and say your answer to a	
11	rate increase is no. It is an absolutely	
12	categorically no. There will be no increase. If	
13	that is not the answer, I will won't believe in the	ž
14	Public Service Commission. These folks now, after	
15	we have had four increases, if this one passes, 60	
16	percent, now they are the ones that should be told	
17	no and not us.	
18	I want to say also at this point, that	
19	Kansas City Power & Light is a monopoly. I would	
20	like to be in a business where every single person	
21	in the society had to buy what I was selling. And	
22	not only did they have to buy what I was selling,	
23	but they had to buy it from me. Now how would you	
24	like to be in a business like that? Where	
25	everybody's got to buy what you're selling and not	

	Page 17
1 only that, they've got to buy it from you.	
2 Once the Public Service Commission hand	ls
3 the stick to them, they're going to beat us with	
4 it. As anyone knows, they have a very strict way	
5 of disciplining us. When you don't pay that bill,	
6 you know what happens. You can sit there in the	
7 dark, you can sit there in the cold, you can sit	
8 there in the heat in the summer. They're free to	
9 charge what they want and because of this business	3
10 arrangement they cannot be free to just charge what	at
11 they want, because of this lock tight monopoly that	at
12 they have. All other businesses are regulated by	
13 the free market economy.	
14 Now, a man mentioned at the beginning of	of
15 the meeting, he said, well, this is not like	
16 Walmart, you know, Walmart and these other	
17 businesses, they can just raise the price and the	
18 public utility company can't do that, they have to)
19 ask permission to raise the price. But every othe	er
20 business runs into these cost problems and they ge	et
21 together with their people and say, look, we've	
22 looked at the books, it's tight, it's bad, we've	
23 got to have more revenue.	
24 But they say, well okay, we'll raise th	ie
25 price and the boss says no, we can't raise the	

		Page 18
1	price. Because if we raise the price, we're going	
2	to lose our customers and we're going to be out of	
3	business altogether. So raising the price is not	
4	an option for many businesses. Many businesses	
5	would like to say, just kick it, just kick them,	
6	run the price up, jack it up. And they say, we	
7	can't. If we do that, we'll be at - these people	
8	have no such fear.	
9	They know that this price increase is	
10	not going to lose them one single customer. Not	
11	one. Nobody is going to say, look folks, I've had	
12	it with you, I'm going over here. I'm going to buy	7
13	it from your competitor. There is no competitor.	
14	Well, they say, well, I'll just do without it.	
15	I'll just stop buying Wendy's hamburgers or I'll	
16	just stop buying - you can't stop buying what	
17	they're selling.	
18	I don't mean to be offensive, these	
19	people have us by the throat and they know it.	
20	They know it. Other businesses know they cannot	
21	raise prices. There is, as some man mentioned	
22	earlier, there is absolutely no real incentive for	
23	them to economize. They don't have to economize	
24	because they can always raise their price and their	-
25	customers ain't going nowhere, not one.	

		Page 19
1	When they need money, they just come to	
2	us. We are powerless against this monopoly. We	
3	don't know where the money will come from and they	
4	will not lose their customers in raising these	
5	rates.	
6	These things being the case, I'm going	
7	to ask the Public Service Commission to defend us,	
8	and if I'm harsh, please forgive me, against this	
9	vicious and insensitive monopoly. Stand up for us	
10	and look at them say, go back and you go through	
11	your books, you lay off who you need to lay off,	
12	you cut where you need to cut.	
13	Like Winston Churchill said to the	
14	British Navy in 1940, I don't care you do it, get	
15	out there and sink that boat. Okay, you get the	
16	books in line because you cannot raise rates. You	
17	have hit these people four times in a row and not	
18	it's your turn to sit down and say my goodness,	
19	what are we going to do. That's we did. We had to	
20	figure it out and now you're going to have to	
21	figure it out. Thank you very much.	
22	JUDGE JORDAN: Thank you for your	
23	testimony. Commissioner Kenney?	
24	Commissioner Kenney: Nothing. No	
25	questions. Thank you, Mr. Bonsee.	

		Page 20
1	JUDGE JORDAN: Anyone else? Thank you.	
2	The next name on my list is Michael A. Patterson.	
3	MR. PATTERSON: Yes.	
4	MICHAEL A. PATTERSON, being first duly	
5	sworn by Judge Jordan, testified as follows:	
6	JUDGE JORDAN: Go ahead.	
7	MR. PATTERSON: Okay. I'm a customer of	
8	KCP&L and I'm opposed to this rate increase for	
9	several reasons. The first being that we have had	
10	so many so close together. It's on a fixed income	
11	on disability, it's beginning to get really hard.	
12	I've cut everything I can cut to reduce my bill,	
13	short of turning off the refrigerator and the	
14	freezer and the air conditioner. So on a fixed	
15	income, this is hard.	
16	Now being as how KCP&L is a wholly owned	
17	subsidiary of Great Plains Energy, these figures	
18	will come from both Great Plains and KCP&L. We've	
19	talked about we've lost revenue, but according to	
20	the Great Plains year end statement for 2011, they	
21	show an operating increase from 2010 to 2011 of	
22	approximately an increase of 62 million dollars in	
23	operating revenue. KCP&L, in the same time from	
24	2010 to 2011, shows an increase of 41 million	
25	dollars in operating revenues.	

Page 21 Now, Great Plains total assets at year 1 2 end in 2011, from their year end statement shows an 3 increase of 300 million dollars. KCP&L's total assets at year end from their same statement, shows 4 5 an increase of 266 million dollars of assets from the previous years. 6 7 Now, the stock prices on Great Plains in 8 2010, was about \$19.63 and that's the high point of 9 the stock for that year, for what I can find. Now, 10 in 2012, the stock is up to roughly \$21.77 a share 11 as a high point for 2012. Currently, as of closing 12 bell today, the stock was at \$22.01, which means 13 we've had an asset increase in growth for the company and all the stockholders. Not only are 14 15 they getting just their dividends, they're also 16 getting some growth with this now too. 17 Now, we're stating that costs are 18 because of lower natural gas prices and they can't 19 sell as much as they'd like to and I can understand 20 that, even though with the heat the way it's been 21 this last two months, I find that hard to believe. But the thing is, we have assets and these are from 22 23 the second quarter of 2012, pulled from Great 2.4 Plains. I couldn't find KCP&L. The only place 25 I've been able to find theirs is on their year end

1 statements. 2 So basically, a total asset increase of 3 339 million dollars as of the second quarter, 2012. Now, the total liabilities for that same period is 4 5 still an increase of 53 million dollars. So 6 basically, you've got a total overall net increase 7 of 286 million dollars. 8 It's not like these companies are losing 9 money year after or year or even breaking even, 10 they're actually gaining each and every year, even with their expenses tending to go up. So like I 11 12 said, I'm kind of opposed to this. 13 The other problem I have is we've raised 14 the dividend either the last guarter of 2011 or the 15 first quarter of 2012. It was .2075, it was raised 16 a half a cent to .2125, which I agree doesn't sound 17 like much, but in the information I've been able to 18 find, 73 percent of the stock is owned by 19 institutions, not individuals, institutions and 20 mutual funds. 21 The prime example here is the top institutional holder is Vanguard Group, 22 23 Incorporated. They own 7.4 million shares. Black Rock owns 6.5 million shares. Stradins, the mutual 2.4 25 fund owns 4.5 million shares. These are just the

> MIDWEST LITIGATION SERVICES Phone: 1.800.280.3376

Fax: 314.644.1334

Page 22

	Page 23
1	top two in each of these categories. Prudential
2	owns 3 million shares. And we have a total shares
3	hold from what I could locate of 112.8 million of
4	Great Plains stock. Since you can't own KCP&L,
5	you're going to own Great Plains, so this all - the
6	dividends are all going to come out of this.
7	The annual dividend now is 85 cents a
8	year, paid to 112.8 million people. That comes out
9	to roughly 95 million, 880 thousand dollars per
10	year. With the dividend increase, the difference
11	between what it was in 2011 and what it is now, is
12	still 564 thousand dollars, annually.
13	At some point, businesses in the private
14	sector, in order to grow would not spend their
15	dividends to their customers, they would say, okay,
16	we want to grow, we want to build new equipment,
17	repair equipment, upgrade equipment; therefore, our
18	stock will become more valuable as we get newer
19	equipment, better capabilities. They would suspend
20	dividends because dividends are after everything
21	else is paid. This is money left over at the end
22	of the year to give to your investors.
23	But most investors understand that when
24	you're retooling a business, adding equipment,
25	adding plants to upgrade you, that sometimes the

	Page 24
1	dividends have to stop or be reduced because part
2	of that money has to be used in order to do those
3	things. You can't expect your customers to pick up
4	the total cost for your upgrades and everything
5	else. That's usually spread out over a period of
6	time and prices over that period of time. And as I
7	said, we've had way too many rate increases for a
8	very large percentage, too close together.
9	I mean, at some point, I'd hate to find
10	myself to where I can't pay my light bill because
11	it's exceeded what I have money left over to do
12	with. And on a fixed income the money doesn't go
13	up that often or that much.
14	So, I mean, I would prefer that if we
15	absolutely have to give a rate increase, instead of
16	a percentage increase, why don't we make it like a
17	supplemental rate increase. KCP&L figured that if
18	they got their 15 percent, it would raise the
19	normal bill \$15 a month, I believe is what was
20	stated. Okay, so if we get a lower percentage,
21	they should still be able to figure out what the
22	monthly increase should be for the average
23	customer.
24	So why don't we, at this point because
25	of so many percentage rate increases, if we just

	Page 25
1	absolutely have to do this no matter what, then why
2	don't we just go and put in like a supplemental
3	rate increase and make it a set dollar figure. I
4	can deal with a set dollar figure, per month, much
5	easier in my budget than trying to figure out a
6	percentage increase and how I'm going to pay for
7	it. So if we're going to have - this should be an
8	average cost, then just take that average cost and
9	say okay, here's what you get for a rate increase.
10	Because, like I said, the percentages add up.
11	Right now, we're say roughly 30 percent,
12	I believe without this 15 percent they want. Well,
13	when you add that 15 percent, that's on all the
14	other percent rate increases, too. It's not just
15	this time from what it was five years ago or six
16	years ago. That percentage isn't based on a price
17	from five or six years ago. And it multiplies
18	rather quickly. And basically, that's all I got -
19	have.
20	JUDGE JORDAN: Thank you. Commissioner
21	Kenney?
22	COMMISSIONER KENNEY: Mr. Patterson,
23	thank you for your taking the time out here. Your
24	comments seem very well researched and well thought
25	out. Where did do your research?

	Page 26
1	MR. PATTERSON: Okay, basically, I pulled
2	up the internet and pulled up Great Plains Energy
3	end of year statement, and also went to CMBC.com,
4	pulled up the stock quote for Great Plains Energy,
5	which is the 2012 quarterly amounts.
6	COMMISSIONER KENNEY: Obviously, it's
7	clear that you have done your homework and thank
8	you for taking the time out.
9	MR. PATTERSON: Okay.
10	JUDGE JORDAN: Questions from the other
11	parties? Not seeing any, I'll don't have anything
12	for you. Thank you.
13	MR. PATTERSON: Thank you.
14	JUDGE JORDAN: The next name on our list
15	is Marcia Ball.
16	MARCIA BALL, being first duly sworn by
17	Judge Jordan, testified as follows:
18	MS. BALL: I'm against this proposed
19	electric rate increase that KCP&L would like to
20	impose, for various reasons. Electricity, people
21	don't realize, runs everything, so it affects all
22	aspects of our lives, more than people really
23	realize. For one thing, gas pumps, they use
24	electricity to pump the gas through the gas pumps
25	to the car, so you're gas is going to go up,

		Page 27
1	because then, you know, the gas station has to pay	
2	more. Your groceries are going to go up because	
3	the lights, refrigeration, etcetera, so your food	
4	goes up.	
5	They mentioned earlier that milk costs	
6	like 3.79 to 3.80 dollars, 3.83 a gallon. It's	
7	going to go up even higher, so the rest of your	
8	food's going to go up higher. Pharmacies are going	ſ
9	to have to pay more, so your medicine's going to go)
10	up. And so it goes on and on for every business	
11	uses electricity, so they will have to charge more,	
12	in effect, so they will be able to operate. And so)
13	we, in effect, will have to pay more. So it won't	
14	just affect our home bills, but it will affect	
15	everything because - everything we buy basically	
16	from a company, they use electricity. Money only	
17	goes so far.	
18	Everything already is going up, but for	
19	us as individuals as everybody has already	
20	mentioned, our wages aren't going up while	
21	everything else is, resulting in people having to	
22	make a choice in their lives between having	
23	electricity to live, while only gaining other	
24	things such as food, medical care, medicine and	
25	clothing. This especially is true for individuals	

		Page 28
1	that are on a fixed income, such as myself, who	
2	can't get raises and senior citizens who are on	
3	like Social Security, and who have to - who could	
4	lose their homes as a result due to making a	
5	choice. And they may have no heat, trying to	
6	conserve, when they need to pay the electricity.	
7	So, just let the companies who are	
8	saying they have issues that they have to address	
9	that they're wanting an increase, we have issues	
10	too. And they want us to help them take care of	
11	those issues. Well, who's going to help me or all	
12	the other people. We have the same issues of	
13	things going on. Nobody helps me. I can't go to	
14	my neighbor or these other people here and ask them	n
15	to help pay my bills. It doesn't work that way.	
16	We have to tighten our belts, so I	
17	believe they should also, like other companies such	1
18	as the hospital I work for, should have to tighten	
19	their belts. They send me home without pay when	
20	our census is low, so that they can conserve money	
21	to prevent having to increase their costs to	
22	patients more and more.	
23	And just like they said, they have a	
24	diversified work force. They have people at	
25	different levels getting paid, so do we. We have	

		Page 29
1	doctors, we have nurses, we have CNA's, we have x-	
2	ray technologists, and so on, and they're all paid	
3	differently. So did they, but you know, it's	
4	across the board for all of us. We all had to take	
5	cuts there.	
6	I have other problems too with what's	
7	going on. Yes, they said that their - with their	
8	people that they have dangerous jobs, okay. I had	
9	an uncle that was a lineman. He worked in Texas.	
10	He got electrocuted doing that, but he knew when he	
11	took that job what his problems were going to be,	
12	what the consequences were. That's part of having	
13	a job.	
14	I also have problems where I work, or	
15	consequences. I work with radiation and the	
16	machines are very, very heavy. If some of the	
17	counterweights get out of whack and they're not in	
18	there securely, the machines can come down and	
19	crush and kill you. It's happened to people	
20	already in the city, years ago, so that can happen.	
21	So my job is dangerous, too.	
22	They also have other things like, I know	
23	for fact that they are allowed to get unlimited	
24	overtime. And I don't think that's fair. You	
25	know, that's - and they said well, they've cut some	

	Page 30
1	of their employees. Okay, well if that's the case,
2	maybe they need to bring some employees back to cut
3	down the overtime, something they need to do to
4	help in this case, I don't know what it could be.
5	But they also send or allow their
6	employees to go down, and this is very helpful, to
7	situations to areas that need help, like Katrina or
8	places that have lost power due to ice storms,
9	etcetera, so on. But along the way, their people
10	get to have - buy other things that have other
11	purposes for going along that I don't get. They
12	can stop, and I've heard them say this, from their
13	employees, they can buy cigarettes, they can buy
14	alcohol, they can buy this and that and it's paid
15	for on the company dime. And that's just not fair.
16	You know, so and I know that they're
17	going to say, well, people that are on a fixed
18	income, you know, like senior citizens who make the
19	choice and won't lose their electricity, yeah, I
20	think there's a law in Missouri, that if you're on
21	a - and I could be wrong, and if I am correct me -
22	that if you can't pay your electric bill or heat
23	bill, for cooling or heating, you're not going to
24	be allowed to turn it off because if they don't
25	want them to die or whatever, but somehow they

		Page 31
1	still have to end up paying a bill, so there may	
2	never get it, you know, situations leveled out.	
3	And that's kind of basically what I have to say,	
4	and so, that's all I really have.	
5	JUDGE JORDAN: Thank you for testifying.	
6	Commissioner Kenney?	
7	COMMISSIONER KENNEY: No questions, thank	2
8	you very much.	
9	JUDGE JORDAN: Any others? Thank you.	
10	The next name on my list it looks like it's Susan	
11	Leeds. Is that correct? I got that right? I'm	
12	not getting any response from that. It looks like	
13	L, double e-d-s, to me. Okay, we'll pass that one	
14	and go to the next one which is Russell	
15	Wojtkiewicz. What did you say?	
16	MR. WOJTKIEWICZ: You got it, sounded	
17	pretty close.	
18	JUDGE JORDAN: I would say Wojtkiewicz.	
19	MR. WOJTKIEWICZ: Yeah, Wojtkiewicz, uh-	
20	huh.	
21	JUDGE JORDAN: Please spell that for our	
22	court reporter.	
23	MR. WOJTKIEWICZ: W-o-j-t-k-i-e-w-i-c-z.	
24	JUDGE JORDAN: Thank you.	
25	RUSSELL WOJTKIEWICZ, being first duly	

		Page 32
1	sworn by Judge Jordan, testified as follows:	
2	MR. WOJTKIEWICZ: Thank you for holding	
3	this hearing this time instead of noon, at six p.m.	
4	Even though the hour is getting on, it is more	
5	helpful for those of us, as myself, are self-	
6	employed try to handle the clients through the day	
7	or those of us that work and try to pay our utility	
8	bills.	
9	You're heard many passioned statements	
10	to make mine a little more concise, I'm going to	
11	say I agree and ditto with Mr. Bonsee and each of	
12	the other testifiers also made some very good	
13	points of that I thought the gentleman, and I	
14	missed his name, a stark, stark, revelation and I	
15	am investor. I do own stocks and stuff like and 96	
16	million dollars in dividends. That's an incredible	
17	amount. That sounds like more than what they are	
18	asking for or close to, if I read the little	
19	pamphlet here right, 106 million dollar in a raise.	
20	You know, we are a monopolized utility.	
21	It's not as though they have to compete for our	
22	business and really tackle it. That seems like	
23	that's a little bit - that's out of whack for that.	
24	To give a point to the - they are trying to base	
25	the rates that they need to get a return on equity,	

		Page 33
1	largest company in the world, bounces back between	
2	the largest company in the world, Apple, doesn't	
3	even pay a dividend. And people just flock to	
4	their stock. They flock so much it's worth \$600	
5	and when I had it three years ago, I was tickled to	I
6	death to sell it at \$175.	
7	The recovering from the flood. It was	
8	mentioned that for the fires and the accidents that	
9	happen, and industrial accidents that are prone to	
10	happen, KCP&L carries insurance. Why do they not,	
11	if they know that Iatan is at the same level as	
12	Bean Lake, has been there for years, has flood	
13	insurance, why not flood insurance. I mean, that	
14	needs to be covered not by us rate taxpayers but by	
15	them. The can switch the grid around when they	
16	need to shut that plant down.	
17	It just, from what I've heard on the	
18	testimony from what I've heard from each of the,	
19	both Missouri Public Service Commission and KCP&L	
20	since I've been attending these rate hearings each	
21	year, it seems as though they've all kind of gotten	L
22	- it's all kind of an incestuous little circle of	
23	folks trying to do business and it completely left	
24	out any free market or any what the market does.	
25	Now, it's a monopoly and only one utility can	

		Page 34
1	provide each customer with a utility, but we're in	
2	a day and age now where that may be - ought to be	
3	looked at to be changed. We're got the technology.	
4	And back in 2007 or 08, when they were	
5	building Iatan, it was known to most of us that	
6	they had a five year come back for rate increase	
7	plan. They were going to come back for a rate	
8	increase, no matter if they got one or did not get	
9	one, we were going to pay for that. It seems like	
10	they just – it's not costing them anything to build	
11	it. They didn't take a ROI risk or anything on	
12	this, on building these plants.	
13	I understand about the federally	
14	mandated, unfunded regulatory. To that I would say	
15	that that needs to stop, that's a governmental	
16	situation that our elected representatives need to	
17	say, unless you're going to fund it, you can't	
18	mandate it, even to a private business that's a	
19	monopoly. It's really not fair to KCP&L, but	
20	that's about where it ends.	
21	I have - the last I happen to paying	
22	bills today, so I have this month's electric bill,	
23	which you guys aren't billing but I apologize, it's	
24	going to be a day late or so, so I have to pay the	
25	extra two dollars. It sat on my desk too long.	

		Page 35
1	But we - they said it's about normal usage. I'm	
2	for this month, I'm 300 kilowatt hours more than I	
3	did last year; last month I'm 400 kilowatt hours	
4	than I did last year. Usage is up, that's a	
5	dramatic increase. That ought to pay for the	
6	plant, just in usage.	
7	And I would urge that the Commission to	
8	inject a little free market as much as they	
9	possibly can, a little free market incentives that	
10	they need to look at that, if they're going to - if	-
11	they're needing for the capacity, then they need to)
12	pay for it out of the sales of that extra capacity,	
13	whether it be wholesale sales or retail sales for	
14	that extra capacity. So I am officially against	
15	any more raises. It's too expensive.	
16	As the person that spoke just before me,	
17	so eloquently said, this rate increase as it's done	ž
18	every year, it will raise everything as a base line	ž
19	we've got. And that has to weigh heavily on the	
20	Commission's decisions, because it will just affect	
21	everything that we do.	
22	Also, I realize we get a lot of rebates.	
23	There's programs to put in alternative energy. It	
24	needs to be even easier. We need to be able to	
25	take off of the grid if DNR will let us be off the	

	Page 36
1	grid. If Missouri Public Service Commission, we
2	can just say, hey, we want to take the meter away
3	and I can run a generator from time to time.
4	That's where DNR comes in, maybe I can't run a
5	generator as often enough in my backyard to
6	supplement my electricity, I don't know. But that
7	would be competition that how much gas does it cost
8	me per kilowatt of I run versus paying them, paying
9	KCP&L.
10	And that's really the only concept I've
11	got other than just say I'm against, with most of
12	the rest of the folks, that we're against the rate
13	increase.
14	JUDGE JORDAN: Thank you, Mr.
15	Wojtkiewicz. Commissioner Kenney?
16	COMMISSIONER KENNEY: Just one question,
17	Mr. Wojtkiewicz.
18	MR. WOJTKIEWICZ: Sure.
19	COMMISSIONER KENNEY: Thanks for coming
20	down tonight. You mentioned it should be easier to
21	- for getting us all on alternative energy of some
22	sort of - ot to take advantage of rebates. Have
23	you taken advantage of any of the rebates that
24	KCP&L
25	MR. WOJTKIEWICZ: I haven't. There's

			Page 37
	1	enough initial outlay on that that I have not yet.	
	2	Probably it won't do anything for the value of this	
	3	current house. If I build and if I get to build a	
	4	basically small cottage that, I'm sorry, live out	
	5	the rest of my days in, probably would start off in	
	6	that, put solar, maybe some sort of small wind to	
	7	it and back up generation and see if I couldn't	
	8	just operate without even being hooked up to power	
	9	on that.	
	10	That brings up the other point of KCP&L	
	11	frankly kind of whining about the rebates, that was	
	12	sort of, I'm sure, a give and take, that, well, if	
	13	you're going to have these rates, you need to - you	
	14	need to also pay for the rebates. The less we use,	
	15	the more we're having to pay for, the higher rates	
	16	we're having to pay for it.	
	17	So conservation isn't working here and	
	18	it's really kind of a misnomer. We're being asked	
	19	as a - as Mr. Edwards first said, he built a very -	
	20	as energy efficient as he could. His rates have	
	21	constantly gone up. We're not in any incentive -	
	22	you know, we're losing incentives like, well, if we	
	23	didn't do this and we had a lot of electricity,	
	24	then would we get a scale of economies and we get a	
	25	lower volume, would - could we do it like Walmart?	
1

MIDWEST LITIGATION SERVICES Phone: 1.800.280.3376

		Page 38
1	The more we sell, the cheaper the product is.	
2	You know, maybe not, but you know,	
3	asking us to use less, many of us use less. I have	
4	my problems, window 10 X 10, putting in a brand new	
5	high efficiency windows to help in this current	
6	house, getting ready to put a new roof on and we'll	
7	double insulate the ceiling at that point. But, I	
8	expect the rates to keep going up because I'll use	
9	less electricity.	
10	And my bill will not - I mean, I won't	
11	impact my bill any because it will go up. You can	
12	try to define all the fuel charges and surcharges	
13	and keep the kilowatt hour rates down, the bottom	
14	line is that the last figure that I have to write a	
15	check for doesn't go down on this.	
16	JUDGE JORDAN: Thank you, sir. Questions	
17	from the other parties? Not seeing any, thank you,	
18	Mr. Wojtkiewicz.	
19	MR. WOJTKIEWICZ: Thank you.	
20	JUDGE JORDAN: The last name I have on my	
21	list is David Wiese. I hope I pronounced that	
22	correctly.	
23	MR. WIESE: It's Wiese.	
24	JUDGE JORDAN: Wiese. Please spell your	
25	name for the reporter?	

Page 39 1 MR. WIESE: W-i-e-s-e. First name, David. 2 3 DAVID WIESE, being first duly sworn by Judge Jordan, testified as follows: 4 5 JUDGE JORDAN: What would you like the Commission to know? 6 7 MR. WIESE: Well, I see everyone else was prepared with something to say or had done their 8 9 research. I did a little bit before I came to this 10 public hearing, this is actually my first one. But 11 I will say, I'm going to speak from the heart just 12 a little bit instead of having facts on my side. 13 To me it just seems like short sided 14 that a company that's in business for 120 years 15 can't predict five years out or ten years out. You 16 know that they have a plan, you know that they're 17 sitting having meetings to decide what plant is 18 going to retire, what time, when or how are we 19 going to replace it. 20 In my own home, if I have an air 21 conditioner or a refrigerator or a car that I know 22 will have a lifetime of three or four years, I 23 budget that amount to buy my next car. I feel like what we are doing here is we're having to fund 24 their lack of vision and I really feel like that's important to remember because I have to look ahead 25 and say, how long am I going to have my

TRANSCRIPT OF PROCEEDINGS 9/12/2012

	Page 40
1	refrigerator? Is it a fifteen year refrigerator,
2	and if I have eight years on it, that gives me a
3	ballpark of I have seven years to budget for that.
4	I don't think it's fair that we have to
5	continually come up with money for this, so I do
6	oppose the rate hike and I agree with a lot of what
7	was said. That's really all I have to say.
8	JUDGE JORDAN: Thank you for coming and
9	saying that. Commissioner Kenney?
10	COMMISSIONER KENNEY: I don't have any
11	questions, but you did just as well as if you had
12	done the research and facts and figures, so thank
13	you very much.
14	JUDGE JORDAN: Questions from the other
15	parties? Not seeing any, thank you.
16	That is the last name on my list. Is
17	there anyone else here who would like to testify?
18	I do not see any.
19	So please remember that if anything else
20	occurs to you or to your neighbors, you can come
21	and chat with the Commission Staff or the Office of
22	the Public Counsel which represents the public in
23	these actions.
24	On behalf of the Missouri Public Service
25	Commission, thank you all for attending and for

TRANSCRIPT OF PROCEEDINGS 9/12/2012

1	giving your input, putting in so much thought and	
2	time and effort into this as you obviously have.	
3	With that we will adjourn and we will go off the	
4	record.	
5	(WHEREIN, the Hearing is concluded at	
6	8:25 p.m.)
